

IV 1026

Fahys Permanent Filled Case.

Fahys Permanent Gold Filled Cases are the most thoroughly and carefully made cases to be found on the market.

In beauty of Pattern,
In tastefulness of Engraving,
In handsomeness of finish,
They are unsurpassed.

JOSEPH FAHYS & CO.

We Knock Off the Middleman's Profit on Diamonds.

Fact I.—We cut our own diamonds in our own factory.

Fact II.—We employ no salesmen.

Fact III.—We sell direct to the retail dealer.

Either, then, we make a 3-fold profit or we sell for lower prices. An easy way to prove whether the former or latter is true, is to send to us for a selection package and compare our prices with others' the next time you want any diamonds.

Buy direct from the cutter and you'll never fizzle on a sale.

J. R. WOOD & SONS,

DIAMOND CUTTERS,

No. 2 Maiden Lane,

New York.

They will come to you for their wedding ring.
Sell them the best wedding ring in the market.
A ring you can unconditionally guarantee to be
exactly what it is represented to be.

A ring of our manufacture. With all its excel-
lence it costs no more than inferior ones.

J. R. WOOD & SONS,

RING MAKERS,

2 Maiden Lane,

New York.

We Have Doubled our Line for the Fall Trade

in Vest Chains, Guard Chains, Fobs, Locketts, Grand Paris, etc., coupled with a large number of new ideas which we will not dwell upon at this time. When you see our line you will wonder at our new creations, and it will bother you to know how we can give you so much for the money.

Don't mention it to anyone.

Design, Workmanship, Quality and Durability

are the four factors
which have made the

BIGNEY CHAINS

the most popular in the
market to-day. They
are handled and worn
by more people than
any other make.

Can You Answer This One ?

Why is the WADSWORTH (25 year) PILOT the best “quarter-of-a-century” Watch Case on the market ?

THE REASON IS
that, built on honor and
sold on merit, the

PILOT

represents a maximum of
beauty, wear and value.

There's always a reason. There's no element of chance—no lottery—when you buy a WADSWORTH. The reason is in the goods.

CUT GLASS

AND STERLING SILVER

WE do not claim that our **American Rich Cut Glass** is the handsomest.

That's for the dealer to determine. What we **do** claim is that it's the best that we can produce with skill and honest workmanship.

With our cut glass, as with our **Plated Ware** and **Sterling Silver**, we have a reputation to live up to.

Make your headquarters with us when in New York.

AMONG the various historical styles of decoration suitable for silverware, none has attained a more lasting popularity than that associated with the name of Louis XIV of France, le Grand Monarque. ¶ It is for this reason that the Whiting Company have decided to introduce a novel and original treatment of this favorite form of French Renaissance applied to a very complete line of Hollow Ware, characteristic examples of which will be here shown from time to time.

The Best American Watch.
Sold on its reputation and merit.

The W. J. JOHNSTON COMPANY,

Wholesale Agents of the Leading American Watch Companies,

Fifth Avenue and Market Street, Pittsburgh, Pa.

The Greatest Recommendation

ever given to

Illinois Watches and Hamilton Watches

was, by their greatest rival in the Watch Business, in these few words, **"They have robbed us of our Railroad Watch Business."**

The conclusion is clear, but the statement is ambiguous.

The Railroad Watches most in demand are the Watches that are the best for the purpose, and it is an indisputable fact that the

**Most Reliable Railroad Watches in the World
are the Illinois and Hamilton Watches.**

GREAT MANY of the leading jewelers of America are pushing the sale of *ILLINOIS WATCHES* because of their superior quality.

If you are not entirely satisfied with the line of watches you have been selling, we would be glad to have you try a few of our manufacture.

We are sure you will find them satisfactory in every way and of greater value than comparative grades of other makes.

If your jobber does not carry them, write us for price list and discounts.

NEW YORK

Notice of Removal

IN consequence of much needed room for our factory, we have removed our offices to rooms 121 and 122 on the 12th floor of our building. Our former office on the 11th floor has been added to the factory, giving us 1,800 square feet for manufacturing purposes, covering the entire 11th floor, and allowing us greatly increased facilities. This will enable us to maintain our reputation for promptness in filling orders, which has always been our chief aim.

Our designer, Mr. John P. Schmidt, sailed for Europe, on the steamer "Kaiser Wilhelm der Grosse," on April 17th, to visit the leading jewelry centers of Europe for the latest novelties in fine Diamond Work, and on his return early in June, we will be prepared to show some of the newest and most artistic effects in all kinds of Diamond Mountings, for the Fall trade.

"We never follow the Fashion, the Fashions Follow Us."

MAURICE L. POWERS.

JOSH W. MAYER.

TIARAS.

THIS ornament has been the most neglected of any in the past few years. There is a growing demand for this head-dress, and having had many calls of late, it has encouraged us to show an extravagant line of this queenly ornament. It will be the reigning fad for the coming season, and we are now prepared to say that we will show a varied line of these at our coming exhibition to be held in our offices between August 13th and 18th, inclusive.

Many reasons have combined to bring about the pre-eminence of Powers & Mayer products. Many years of aggressive and intelligent effort have been given and they have been years of splendid accomplishment, both in securing earliest representations of foreign styles and developing the best that is in America. Year after year we have introduced to the Jewelers of this country, the new models, also informing them of public demands and giving them the aid of the advice and experience of our experts. This not only gives to us their first and best efforts, but to our stock a breath of originality that does not exist elsewhere.

POWERS and MAYER,

Makers of Diamond Mounted Jewels THAT SELL.

258-260 Fifth Avenue,

NEW YORK.

We are always pleased to ship goods on memorandum when satisfactory references are given.

Favor Trade School

Attleboro Jewelry Manufacturers Discuss Suggestion of Industrial Commission That State Found School for Jewelry Working.

ATTLEBORO, Mass., May 2.—The idea of a jewelry trade school for Attleboro has been enthusiastically welcomed by the manufacturers. This proposition is an outgrowth of the suggestion made last year by Gov. William L. Douglas, of Massachusetts, that the State assist each city and large town to open, in addition to its regular public schools, a training school where boys and girls may learn the industry prevailing in the community. Gov. Douglas's idea was to throw open to the young people the industries at their very doors, by giving to the boys and girls the theoretical instruction and practical drill needed to become skilled workers. The governor deplored the effect, while confessing the necessity, of specializing the work in the factories of every industry, holding that before the young worker adopts a specialty he should first learn the industry as a whole, so that later in his specialized work he may show greater intelligence, and so he may be better fit for promotion as occasion arises.

The report of the commission appointed by him to devise a practical system for the whole State found manufacturers and employers all dissatisfied with the boys and girls who come to them from the public schools and eager for young workers with more "industrial intelligence."

THE CIRCULAR-WEEKLY correspondent has interviewed all the leading manufacturers in Attleboro on the subject of the commission's report. He finds every one sympathetic toward the idea of a jewelry trade school in Attleboro. Only one manufacturer took the ground that in his particular line of business he could get along with unskilled help in large numbers. He thought his goods were of so cheap a grade that graduates of a technical school would be no help to him, for the greater part of the work. Even he, however, favored the trade school idea as a whole, and like the rest, thought manufacturers and workers would be benefited, the character of the work would be improved, and no one would suffer in any degree from the change.

At the office of C. H. Eden & Co. the correspondent found Charles H. Eden enthusiastic. "It would be a fine idea," he declared. "I don't see how it could do anything but good." When asked if he was dissatisfied with the help that comes from the public schools, Mr. Eden preferred to let his foreman answer for him. The foreman maintained that he got better work from the boys and girls who left school at the lowest legal age than from those who went through the high school.

This was exactly in line with the finding made by the Governor's Commission, who reported that the business men one and all complained the young workers who received the almost wholly literary education of a public school lacked the intelligence to see beyond the task set before them, back to its origin and ahead toward the finished product, and were therefore unable to harmonize their work to the system, and that the schools had failed to de-

velop, as shop work would have done, that conscience which recognizes the obligation to do as good work as possible for "the house."

At this point Orlando W. Hawkins, of O. W. Hawkins & Co., dropped in on business. Learning the topic under discussion, he exclaimed: "That trade-school idea is O. K." Then he dissented from the views of Mr. Eden's foreman on the subject of the boy and girl with the high-school education. "I would rather have a high-school boy, or one with any good education, every time. The better education, the quicker I want them."

"Have you in your factory now any high school or college boys?" was asked.

"No," he answered. "I can't get any. They want more money than they're worth to start. They aren't willing to begin at the bottom. They want to start right in where their fathers left off."

Louis J. Lamb, of C. H. Allen & Co., while unwilling to discuss the matter in detail until he knew the whole plan, expressed himself vigorously in favor of the general idea. Mr. Lamb, Mr. Eden, and several others interviewed referred to the fine industrial schools of Germany as a good pattern.

William A. Cook, of Fontneau & Cook, said: "Trade schools are a help in any kind of business."

Manager Thompson, at the factory of the Chas. M. Robbins Co., said: "What we need is intelligent help, and it's hard to get them. A trade school would be very beneficial." He held that under present conditions the graduates of the public schools with liberal education make desirable recruits for the office, clerical and selling departments of the jewelry business. He also thought that in many routine departments of factory work there would always be a demand for unskilled help.

James E. Blake, of the James E. Blake Co., silverware makers, declared that trade schools are highly desirable. His words are of special interest because of the fact that when the commission was making its inquiries it found the silversmiths in the whole State were among the most eager for the schools. They claim one and all that there is need of a new generation of workers, trained both in taste and execution, and that the grade of work needs to be elevated.

Mr. Blake pointed out that the graduates of the public schools to-day, so far as the jewelry and silver industries are concerned, are holding subordinate positions, while the boys who have practically learned the trade in the shops are to-day the owners, managers and aggressive leaders. Mr. Blake also paid a high tribute to the work accomplished by the "School of Jewelry Designing" maintained by the Young Men's Christian Association.

Edward A. Sweeney, of the W. H. Wilmarth Co., said that in his particular line the trade school would be of little help, but for the jewelry industry as a whole he heartily favored it. He said that he wanted in his shop boys from 14 to 16, ambitious to learn the practical operations of a factory, rather than public school graduates. His remarks are significant. The commission found the employers all over the State unanimous in the idea that the time when

boys and girls ought to be laying the foundation of their business training is the precious period between 14 and 16.

J. Lyman Sweet, of the R. F. Simmons Co., said that if the jewelry trade school could have the right man at the head it would be a big help to the business. He referred to the improvement in the jewelry work of this district brought about by the graduates trained in the Rhode Island School of Design. He thought if the school could follow such practical lines as that it would be all right. Mr. Sweet said he preferred to hire in workers who had received at least a high-school education. His view on this subject would naturally differ from that of some other employers, because of the high grade of work his factory produces.

Clelland J. McCatchey, of the Horton, Angell Co., was confident it would be a good thing to have the young workers know something of the practical operations before entering the factory.

Charles H. Tappan, of the D. F. Briggs Co., declared emphatically: "It seems to me it would be a fine idea." He joined with the others interviewed in saying that for his own shop he preferred to hire boys who had not received a high-school or college fitting.

Edgar A. Remington, of Carter, Quarnstrom & Remington, said: "A trade school would be a grand, good thing." He also said that his firm preferred to have its young workers have a high-school education if possible.

Superintendent Amos Blackinton, at the Bates & Bacon factory, would not commit himself on the trade school proposition until he knew the way it was to be run. Like the others, however, he said that high-school and college education on the literary lines they are run to-day were no help to the ambitious jeweler. He said a boy with natural ability would do better to start with practical experience in a factory.

Hon. Sidney O. Bigney, of S. O. Bigney & Co., said: "On the whole it would be a good thing." He wanted to know, however, if the product of the pupils would go into the market in competition with the manufacturers before expressing himself finally. This point is not covered in the bill now pending in the legislature to establish the schools. The State, however, is committed to a certain policy. Massachusetts is already running large industrial schools to teach the textile business in all its forms. The product of the pupils is not allowed to compete with that of the manufacturers whose taxes help support the institution. Mr. Bigney said that there were no positions in his factory for which a young man needed more than a high-school education, as the public schools are maintained to-day.

THE CIRCULAR-WEEKLY's correspondent visited the State's trade school at Fall River to see something of the practical work of such an institution. There are in the schools scores of young men and boys of just the right age to learn rapidly, and no one seeing them could ever forget the keen, earnest, interested, ambitious look on every face. Boys who would have found the literary studies of the high-school utterly dull and an endless bore work like Trojans to master the intricacies of dyeing,

ACTIVITY

The Keynote of Our Progress

A series of pictures showing various forms of active life.

JUST OVER

By constant training and endeavor, the pole vaulter—inch by inch—increases the height of his jump. By constantly adding new ideas and patterns to our various lines of rings, we want to merit an increase in our business.

If you will let our salesmen show you our stock of rings—for man, woman and child—you will find many new and attractive patterns in the line. This means we would like more business. May we do it with you?

weaving, designing and the selections of materials for textile goods. In this trade school the young men from the mills can attend out of working hours to fit themselves for promotion, as well as the boys just starting life.

The correspondent also talked with Judge Warren A. Reed, one of the Governor's Commission. "The whole educational system of Massachusetts must be revamped. It is out of date," he asserted. Judge Reed then launched into enthusiastic praise of the work achieved by the Wilmerding and other trade schools of California, where boys enter at 12 and graduate at 16 to 18 with the basis of a technical training that makes them welcome in any trade; not skilled enough to be master workmen, but far better than the raw apprentice; while at the same time they have received all the best features of a high-school literary education.

In the past few years the Attleboro superintendents of schools have repeatedly tried, with some minor success, to introduce courses which would help prepare boys and girls for good places in the jewelry business. The town is in just the right frame of mind to welcome the proposed jewelry trade school.

A Unique and Magnificent Diamond Collar.

IRRESPECTIVE of its intrinsic value, which is considerable, a diamond collar made recently in Philadelphia, is generally regarded in the trade of that city as a notable piece of jewelry work. It has been fashioned in a most skillful manner for a prominent society woman and the uniqueness of its design, as well as the perfection of its construction, has attracted general attention. The design was suggested to the Philadelphia jewelers by a diamond collar which was presented to the bride of the Crown Prince of Germany at the time of their nuptials, about a year ago.

The scheme is especially well carried out so as to make it a lacework design, light in weight, but strong and durable. The cobwebby effect is offset and adroitly shown by contrast with a ribbonlike piece in front.

Exactly 1,600 diamonds are set in the collar, which is entirely handmade of platinum and iridium and without any gold fortification whatever. On this account alone the piece would be exceptional.

So far as the makers, Coombes & Van Roden, are informed, there has been no such piece ever before made in this country. So delicately have the jewelers fashioned the collar that, although hard as steel, it is remarkably light. It is the originality of design and the extreme refinement of construction which has made the collar one of the most admired pieces worn in Philadelphia.

The eclipse in front supports and holds a forget-me-not design. Especial attention has been paid to the designing of the clasp, so that pressure on the cross top of the bow knot releases the snap and permits the collar to disconnect at the bottom as well.

On the whole, it is admitted by those in the trade here who have examined the piece that it is an improvement on the design which was suggested by the magnificent diamond collar made a wedding gift to the Crown Princess of Germany.

Silversmiths' Stock Increased.

Gorham Mfg. Co. Votes in Favor of the New Plan for the Operation of the Several Allied Concerns.

Reference was made in last week's issue to a special meeting of the stockholders called by the Gorham Mfg. Co., to be held at the office of the company May 1, the purpose being explained in the call as follows:

"To make such changes in the charter and by-laws, or either of the Silversmiths' Co., a New York corporation, as they may see fit, including any increase in the authorized capital stock thereof; to cause the capital stock of the said Silversmiths' Co., including its increase or any part thereof, to be issued, sold, exchanged or otherwise disposed of, for a value not less than par.

"Also to sell, exchange or otherwise dispose of all or any part of the capital stock and assets, or either, of any corporation or corporations owned or controlled by the Gorham Mfg. Co. at a price not less than the cost thereof to date of sale, upon such terms and conditions as they may see fit.

"To do all things necessary or proper to effect the foregoing purposes."

The meeting was held in accordance with the call, and a resolution providing for an increase in capital stock of the Silversmiths' Co. was adopted by the following vote: Ayes, 32,265; nays, 3,251; not voting, 271.

President Edward Holbrook gave the following statement to THE CIRCULAR—WEEKLY:

"The Silversmiths' Co., a corporation organized under the laws of the State of New York, is now wholly owned by the Gorham Mfg. Co. and conducts a manufacturing business in New York City.

"It is proposed to enlarge the capital stock of this company, issuing at the present time \$7,000,000, of which \$1,750,000 will be offered for subscription at par to the present stockholders of the Gorham Mfg. Co., preferred and common. The proceeds of the sale of this stock will provide a sufficient cash capital to enable the Silversmiths' Co. to purchase the stocks of the Whiting Mfg. Co. and the stocks of the William B. Durgin Co., now held by the Gorham Mfg. Co.

"The remainder of the said issue will be offered in exchange for the common stock of the Gorham Mfg. Co., the holders of such common stock having the option of making the exchange. It is expected that a large number of them will avail themselves of the opportunity to exchange their stock under this option.

"The financial feature is, however, only a part of the plan which is further intended to offer a better method for the operation of the various companies by forming a separate organization for supervising the various plants and the commercial departments of the allied companies.

"This plan leaves the organization of the Gorham Mfg. Co. free to devote all of its energies to the business of that company, providing, however, for a central control that will be exercised over the entire business.

"It is believed that such authority will be effective in preserving harmonious work-

ing relations, securing to each company, so far as possible, all the advantages in management that may be possessed by any one of the companies.

"This plan was submitted to the stockholders for their consideration, that they might take such action as to them seemed desirable, and inasmuch as they voted to adopt the necessary resolutions and to make this plan effective, every stockholder has the right to exercise or not the privilege and subscribe to the shares of the Silversmiths' Co. stock that are to be sold for cash, which they are entitled to as stockholders of the Gorham Mfg. Co.

"The holders of the common stock of the Gorham Mfg. Co. have the further option of making an exchange and should they decide not to make exchange of their Gorham Mfg. Co. common stock for the Silversmiths' Co. stock on the terms of the exchange, their interest will remain in the Gorham Mfg. Co. exactly as before."

Jewelry, Clocks, Watches, Silverware and Kindred Lines Exported from New York.

WASHINGTON, D. C., May 2.—The following were the exports of jewelry, silverware and optical goods, clocks, watches and kindred lines from the Port of New York, for the week just ended:

Algoa Bay: 72 packages clocks, \$1,353.
Amapala: 3 packages plated ware, \$275; 4 packages cutlery, \$103.

Antwerp: 1 package optical goods, \$260.
Auckland: 6 packages cutlery, \$158; 3 packages plated ware, \$249; 60 packages clocks, \$979.

Bombay: 18 packages clocks, \$320; 6 packages plated ware, \$679; 22 packages clocks, \$197.

Bremen: 2 packages plated ware, \$200.

Calcutta: 36 packages clocks, \$1,668; 26 packages plated ware, \$3,020; 2 packages jewelry, \$1,818.

Colon: 5 packages watches, \$107.

Durban: 1 package watches, \$500.

Glasgow: 18 packages clocks, \$157.

Guayaquil: 6 packages watchmaking machinery, \$1,105.

Hamburg: 1 package watches, \$1,408; 4 packages optical goods, \$110.

Havana: 7 packages plated ware, \$683; 3 packages thermometers, \$272; 4 packages jewelry, \$211; 5 packages cutlery, \$310.

Havre: 9 packages jewelry, \$440; 2,406 pieces nickel, \$43,500.

Liverpool: 1 package plated ware, \$208; 71 packages clocks, \$763; 6 packages stereoscopes, \$175; 3 packages stereoscopes, \$375; 1 package jewelry, \$1,000; 6 packages cutlery, \$351.

London: 93 packages clocks, \$2,034; 1 package optical goods, \$250; 2 packages plated ware, \$135; 1 package clocks, \$130; 4 packages scopes and views, \$906; 22 packages optical goods, \$3,522; 6 packages clocks, \$450; 21 packages cutlery, \$336.

Lishon: 43 packages clocks, \$471.

Matanzas: 12 packages clocks, \$110.

Melbourne: 29 packages clocks, \$478; 14 packages plated ware, \$2,155.

Naples: 1 package jewelry, \$500.

Para: 45 packages clocks, \$682; 10 packages cutlery, \$648; 2 packages jewelry, \$216.

Panama: 3 packages plated ware, \$111; 1 package thermometers, \$350; 7 packages clocks, \$139; 3 packages watches, \$200.

Progresso: 9 packages clocks, \$140.

Rio de Janeiro: 7 packages cutlery, \$357; 2 packages plated ware, \$433; 1 package jewelry, \$719.

Savanilla: 1 package cutlery, \$152; 3 packages stereoscopes, \$141.

Shanghai: 141 packages clocks, \$2,946.

Singapore: 9 packages plated ware, \$976.

Southampton: 1 package jewelers' findings, \$132; 1 package watches, \$420; 1 package cutlery, \$550.

St. John: 3 packages watches, \$299; 43 packages clocks, \$490.

Sydney: 23 packages clocks, \$450; 14 packages plated ware, \$3,202; 4 packages cutlery, \$181.

Vera Cruz: 8 packages plated ware, \$487; 1 package silverware, \$275; 3 packages cutlery, \$113; 27 packages clocks, \$546.

Wellington: 17 packages clocks, \$158.

General Appraisers Render Decision as to Duty on Steel Watch Chains.

In a decision announced last week by the Board of United States General Appraisers, New York, a ruling was made in relation to the duty on watch chains made of steel. The case came in the form of a protest by A. Strauss & Co. against the assessment of duty by the Collector at New York. The Board divided the articles into two classes and sustained the protest in part. Under the decision, when the chains are of the usual lengths and fashioned for utility, they are dutiable as manufactures of metal. On the other hand, chains that are shorter than the usual length and suitable for any other use than the amusement of children are held to be dutiable as toys.

The opinion, written by General Appraiser Fischer, says:

The merchandise consists of steel watch chains, upon which duty was assessed at the rate of 45 per cent. ad valorem under the provisions of Par. 193 of the Tariff Act of 1897. A large number of claims appear in the protests, but the only one pressed is that the goods are dutiable properly at 35 per cent. under Par. 418 of said act as toys.

At the several hearings on these protests, much testimony and some representative samples of the goods were admitted. The testimony offered to show that the chains are commercially recognized as toys was contradicted by a member of a domestic firm dealing in domestic goods of this character, as well as by a catalogue which showed that the chains are used by adults, as watch chains ordinarily are, in the carrying of cheap watches, and it falls short of substantiating the claim of the importers.

From an examination of the samples we find that items 4355 on protests 167809, 175486 and 176038 are chains provided with a bar and snap, but much shorter than the usual chain, so flimsy in character that the sample broke under a moderate pull, and obviously unfit for use except as playthings; that items 4836, protest 167809, and 5143, protests 171091 and 175486, are vest chains of the usual size, with a bar, snap and charm, and, though of cheap construction, are undoubted articles of utility and not mere playthings; that item 1, protest 170176, is a fully finished fob chain, to which the same observations apply, and that item 19, protests 178932-3, is a gilded chain exactly like that which was held in Abstract 7866 (T. D. 26682) to be dutiable as manufactures of metal.

In accordance with these findings, we sustain the claim under Par. 418 in protests 167809, 175486 and 176038, as to item 4355, and we modify the decisions of the Collector to that extent. The remaining items represent chains that are articles of utility and not toys, and as to them and to all other items not herein specifically allowed, the protests are overruled and the decisions of the Collector thereon affirmed.

There is judicial authority for this ruling in the case of *Veil v. United States* (128 Fed. Rep., 471; T. D. 25007), wherein watch guards made of leather mounted with cheap iron bits, spring loops and stirrups in imitation of harness, bridle and saddlery materials, were held to be dutiable as manufactures of leather. Those articles and the goods now before us are of the same character, use and general make-up.

F. S. Taylor & Co., Leavenworth, Wash., have sold out to J. W. Elliot & Co.

The Geo. W. Meyer Jewelry Co., Chattanooga, Tenn., has been appointed official timekeeper of the Nashville, Chattanooga & St. Louis Railroad. The concern has been timekeeper for all the other railroads entering Chattanooga for some time past.

A warrant was issued recently for the arrest of William Oldknow, of Atlanta, Ga., by A. L. Delkin, a former jeweler of that place, who accused Oldknow of assault and battery. Delkin and Oldknow became involved in a row which resulted in a free-handed fight. Both participants were badly bruised.

Death of Albert Wiggers.

The New York jewelry trade lost one of its oldest jewelry box and case makers last week, when Albert Wiggers, for many years head of the old firm of Wiggers & Froelick, passed away at the Flower Hospital, Manhattan, after an operation. Mr. Wiggers, though ill for some time past, was not considered seriously sick until his trouble took an acute turn while he was on a trip to Barbadoes, last February. He grew worse and three weeks ago took to his bed and specialists were consulted. On the advice of the doctors an operation was performed at the Flower Hospital, but his heart being weak, Mr. Wiggers was unable to withstand

THE LATE ALBERT WIGGERS.

the effects and passed away Monday, April 30.

Mr. Wiggers was a native of North Germany, and was 69 years old April 15 last. He came to this country when 14 years old and first learned the piano trade and later entered the jewelry case manufacturing business, starting in 1863 as a partner of a Mr. Hess, at 60 Nassau St., at which location the business has remained continuously to the present time. After being associated with Mr. Hess for two years he bought out the latter's interest, continuing alone until in 1869 he formed a partnership with Mr. Froelick, who had been his friend from boyhood, and the two remained together in business until 1895, at which time Mr. Froelick retired. The deceased and his son, Albert Wiggers, Jr., then continued under the old partnership name and two years ago the business was incorporated, although retaining the old firm style, Albert Wiggers, Jr., becoming president and treasurer; the deceased, vice-president, and John Gamundt, the secretary of the concern.

For the past 37 years Mr. Wiggers had been a resident of West Hoboken, N. J., and had been prominently identified with the work of building up that town. Not only was he among its most public spirited citizens, but he also took an active part in politics, and held many offices, among others those of Town Councilman, Police Commissioner and Mayor. He was one of the organizers of a "committee of 100" for the improvement of West Hoboken, and to his

energy and ability was due much that this committee accomplished. Outside the jewelry trade he was connected indirectly with other industries; he was a director and organizer of the Highland Trust Co., a stockholder of the Maiden Lane Safe Deposit Co. and of the Astoria Realty Co., and a charter member of the New York Turnverein. In the jewelry trade, although actively connected with none of the associations, he was well known as one of its pioneer case makers, and it was in his firm that many of the present manufacturers of jewelry cases and boxes served their apprenticeship.

Mr. Wiggers was married Nov. 10, 1866, to Eleanor Merle, and she survives him, as well as one son, Albert Wiggers, Jr., three daughters, Mrs. W. Reid, Mrs. Charles Cellard and Mrs. Charles W. Edwards, and three grandchildren. The funeral services, which took place at his residence, 192 Palisade Ave., West Hoboken, were largely attended. The remains were interred temporarily at Fair View Cemetery.

Death of David B. Lincoln.

AURORA, Ill., May 2.—The funeral of David B. Lincoln, for many years superintendent of the Aurora Silver Plate Co., was held Monday in the First Presbyterian Church, the services being in charge of Post No. 20, G. A. R., of which the deceased was a past commander. Mr. Lincoln died at his home, 114 N. View St., early Saturday morning, of heart failure. He had been ill since last November.

The deceased was born in Taunton, Mass., Jan. 26, 1844, and spent his boyhood at the farm of his father. At the breaking out of the Civil War he enlisted in the 33d Massachusetts Volunteer Regiment, serving until the close of the hostilities. He then entered the silver plate business in his native town and continued in that line until his death. At one time he was foreman of a Taunton concern, and after four years there went to New York, starting in business for himself in that city, where he remained a number of years. In 1886 he came to Aurora and accepted the superintendency of the Aurora Silver Plate Co., a position which he held continuously until last Fall.

Mr. Lincoln was a prominent citizen of Aurora, was widely known and respected, and his death is mourned by a large circle of friends and acquaintances. He was especially prominent in G. A. R. circles and in a number of fraternities and societies. Among other positions he held were those of past chancellor of Charlemagne Lodge No. 245, Knights of Pythias, and lieutenant-colonel of the fifth regiment of the same lodge. He is survived by a widow and three children—a son, Percy G. Lincoln, and two daughters, Mrs. A. H. McLaughlin and Mrs. M. D. Jones.

Statistics of the Silver and Brass Industries of Connecticut.

An output of millions of dollars worth of goods each year is shown by a report given to the public by the Connecticut State Bureau of Labor Statistics, William H. Scoville, commissioner. Two of the sections of the report treat of the silver and plated ware industry and brass industry. The re-

port explains that none of its figures are as large as might be, because of the failure of a few concerns to send their data. These interesting statistics appear:

	Brass goods.	Silver goods.
Establishments	94	32
Average persons employed	27,329	5,394
Average days in operation	297.9	295.3
Average annual earnings per employee.....	\$515.64	\$533.37
Amount paid in wages..	14,171,411	2,815,805
Gross value of product..	63,395,973	10,151,750

General Appraisers Render New Decisions as to Real and Imitation Pearls.

In a decision by T. S. Sharretts the Board of United States General Appraisers sustained last week a protest filed by J. M. Colton, of New York, regarding the customs classification of a valuable string of pearls assessed by Collector Stranahan as "jewelry" at the rate of 60 per cent. ad valorem.

The Board classified the imports as pearls in their natural condition, dutiable at 10 per cent. General Appraiser Sharretts in his opinion said:

"The merchandise under protest consists of a string of pearls graduated and matched as to size, shape and luster, but without metal attachments. These pearls were assembled with reference to color, size and quality and the assortment and selection are similar to the collection found in the articles of jewelry known as necklaces or strung pearls, and return was made at 60 per cent. under Par. 434, Act of 1897.

"The pearls in dispute were exhibited to the Board at the hearing in the case at Philadelphia, based upon which we find they were temporarily strung on cotton cords for preservation only, and not strung as jewelry. See G. A. 5892 (T. D. 25996).

"Reference is made by the appraiser to *Tiffany v. United States* (103 Fed. Rep., 609), but that decision was reversed in principle by the Circuit Court of Appeals, Second Circuit (112 Fed. Rep., 672), which reversed the Circuit Court for the Southern District of New York (105 Fed. Rep., 766). The goods now before us fall directly within the ruling of the Circuit Court of Appeals, Second Circuit, in the case of *Neresheimer v. United States* (T. D. 25676), based upon which decision and the others cited we sustain the claim in the protest that said goods are dutiable either directly or by similitude at 10 per cent. ad valorem under Par. 436 of the Tariff Act of 1897, the Collector's decision being reversed."

In another decision by Mr. Sharretts the Board sustained in part a protest filed by Benedict & Warner, New York, regarding the rate of duty applicable to imitation pearls. The decision follows: "We find the merchandise to be imitation pearls assessed with duty at 45 per cent. ad valorem under Par. 112, and claimed to be dutiable at 20 per cent. ad valorem under Par. 435 of the present Tariff Act. On the authority of G. A. 6088 (T. D. 26554) we sustain the protest so far as it relates to said merchandise which is marked (B.W.) on the invoice for identification, to which extent the Collector's decision is reversed."

Narval Babb, Stratford, Ont., is about to move his stock into larger and newly furnished quarters.

AMETHYST

In Siberian, Brazilian and D'Auvergne qualities, in all shapes and sizes. Golden and Madeira topaz. Half, round and bouton pearls. Reconstructed rubies, opals, garnets, and doublets in the fancy colors and fancy shapes—uniform grades, especially selected for the American Market.

Rhode Island's Great Industry.

Interesting Census Report on the Jewelry and Silver Trade of Providence.

WASHINGTON, D. C., May 1. The jewelry trade is fourth of the large industries of Rhode Island and the capital has been increased from \$8,787,502 to \$11,199,233 in 1905, while the number of establishments have been reduced from 210 to 197 in the same period of time. The average number of wage-earners has been reduced from 7,102 to 6,175, while their wages have been increased from \$3,145,557 to \$3,365,274; the cost of materials used has increased from \$6,176,854 to \$6,657,581, and the value of the output from \$13,229,313 to \$14,131,756. In addition to this there are also in the State 10 establishments for the refining of gold and silver.

In 1900 there were in the State four silversmithing establishments and eight silverware plants; this number has been reduced to 10; the capital stock, however, has been increased from \$5,199,284 to \$8,582,489; the number of employees has been increased from 1,815, earning \$1,099,612, to 1,919, earning \$1,439,688; the value of the output has been increased from \$4,249,190 to \$5,323,261.

In value of products for the manufacture of jewelry Rhode Island led all other States and territories in the United States in 1905. Gold and silver, reducing and refining, not from the ore, and silversmithing and silverware are two important industries that are closely allied to the manufacture of jewelry.

As compared with the totals for the State, the three industries, jewelry, gold and silver reducing and refining, and silversmithing and silverware combined, gave employment to 8,471 persons in 1905, or 8.7 per cent. of the total number of wage-earners in the State; their wages amounted to \$4,859,771 or 11.3 per cent. of the total wages paid, and the output at \$24,015,718 was 11.9 per cent. of the State's total.

Of the jewelry firms 76, or 38.6 per cent. are under individual ownership, with capital amounting to \$1,725,244; 1,526 wage-earners are paid \$696,269, the cost of materials used, \$1,207,103, 18.1 per cent. of the total, and the output, \$2,759,694, or 19.1 per cent.

Sixty-nine firms control capital amounting to \$2,979,601, employ 2,163 persons, who earn \$1,161,490, and have an output amounting to \$4,268,163, or 29.6 per cent.

Fifty-two incorporated companies are 26.4 per cent. of the total establishments, they have invested \$6,494,388, or 58 per cent.; give employment to 2,786 persons, or 43 per cent. of the total number, to whom is paid \$1,507,515, or 44.8 per cent.; the cost of materials is \$3,641,108, or 54.7 per cent., and the value of the products, \$7,403,899, or 51.3 per cent.

Of the silversmithing and silverware establishments four are firms and six are incorporated companies; for the former the invested capital is placed at \$72,678, and for the latter \$8,509,811, or 99.2 per cent. of the total; the number of employees are 68 and 1,851 respectively, and the wages \$1,409,04 and \$30,644; the cost of the material used by the four firms is \$48,428, or

two per cent., and for the corporations \$2,371,933. The value of the products turned out by the four firms is \$120,381, or 2.3 per cent., and for the companies \$5,202,883.

Of the jewelry firms, 16 have an output valued at less than \$5,000, their total output being \$618,930; 18 have outputs between \$5,000 and \$20,000, the aggregate being \$516,172; 86 are between \$20,000 and \$100,000, total, \$3,846,761, and 17 between \$100,000 and \$1,000,000, of which one firm is capitalized at an excess of a million, the total output being \$10,919,890.

Of the silversmithing and silverware establishments, five have outputs ranging between \$20,000 and \$100,000, the total being \$171,877, with a like number between \$100,000 and \$1,000,000, with one of the five having an output of more than \$1,000,000, the total being \$5,118,387.

Taking the specified industries of the State we find nine electroplating establishments with a capital amounting to \$21,888, under the control of 10 persons, having on the payrolls five salaried employees who receive \$3,930, and in addition 18 employees who receive \$20,943; of that number 10 are men who receive \$18,847; four women receive \$1,377, and four children under 16 years of age, \$719; the miscellaneous expense is \$1,235, and the cost of materials \$16,692, with an annual output of \$67,480.

Twenty-four establishments are engaged in the manufacture of enameling and the manufacture of enameled goods, with a total capital of \$192,635, under the management of 17 persons, having on their payrolls 18 salaried employees who receive \$16,008; and in addition 385 wage-earners who receive \$157,581; of that number 234 are men who receive \$115,260; 132 women receive \$38,479, and 19 children, \$3,842. The miscellaneous expense is \$45,437, cost of materials used, \$62,495, and the total output, \$338,392.

The 10 gold and silver reduction and refining plants have a total capital of \$598,739, of which \$36,820 is in lands, \$37,560 in buildings, \$48,097 in machinery and tools, and the balance in cash and sundries. The total number of firm members is 16, and in addition to this there are on the pay rolls 27 salaried employees who receive \$29,288, and 77 wage-earners who receive \$54,809. Of that number all are men. The total amount expended under the heading of miscellaneous is \$66,941, and the cost of materials used to \$3,987,262, and the total output is reported at \$4,260,698.

Of the total \$11,199,233 invested in the 197 jewelry establishments, \$98,600 is in land, \$327,925 in buildings, \$1,988,254 in machinery and tools, and the balance, \$8,785,054 in cash and sundries. Two hundred and thirty-three persons are interested in the management of these firms, and on the pay-rolls are carried 799 salaried employees who receive \$918,569 annually; in addition to these employment is furnished to 6,475 persons at a total wage of \$3,365,274; of that number and amount 4,140 are men to whom is paid \$2,616,580; 2,251 women receive \$732,891, and 84 children receive \$15,803. The item of miscellaneous expense amounts to \$1,142,636, and of that amount \$166,145 is for rent of works, \$16,392 for taxes, \$872,920 for rent of works, interest, etc., and the remainder, \$87,179

for contract work. The total cost of materials used is \$6,657,581, and of that amount \$78,422 is for fuel and rent of power and heat. The total value of the output is \$11,131,756.

Turning our attention to the 10 silversmithing and silverplating establishments, with their total capital of \$8,582,489, we find that \$182,519 is invested in land, \$1,549,222 represents the value of the buildings, \$1,292,004 is in machinery and tools, and the balance in cash and sundries. Interested in the management of these establishments are nine persons, and on the payrolls are 139 salaried employees who receive \$171,368; in addition to this employment is furnished to 1,919 employees, who receive \$1,139,688, and of that number 1,707 are men and receive \$1,357,357; 196 women are paid \$79,844, and 16 children, \$2,487. The total miscellaneous expense is placed at \$379,822, of which \$8,634 is for rent of works, \$11,967 for taxes, \$358,781 for rent of offices, interest, etc., and \$440 for contract work; the total cost of materials used is \$2,423,361, of which \$34,907 is for rent of fuel, etc. The total value of the output is \$5,323,264.

In addition to the industries named there are also in the State one clock factory, one for manufacturing cutlery, one for the manufacture of jewelry cases, two lapidary works, two for optical goods, one for gold pens, one for plated ware.

Pawtucket has four of the jewelry establishments, Providence contains eight of the electroplating works, all of the establishments for enameling, all of the gold and silver refining and reduction works, 193 of the jewelry establishments, and all the silversmithing and silverplating works, the establishments for the manufacturing of jewelry cases, and two lapidary works, also the gold pen, and the plating establishment.

Proceedings Against McKay Co. Washington, D. C., Settled and Receiver Discharged.

WASHINGTON, D. C., May 3.—In the case of Louis Costaggini against John F. McKay and the McKay Co., jewelers, the Equity Court has dissolved the temporary injunction issued April 20, and has discharged and vacated the rule to show cause. This action was taken by the court upon the representations of counsel for the parties involved that the question at issue should be disposed of out of court, so as to save the business of the McKay Co. from destruction. It seems that a friendly adjustment has been perfected among the parties to the suit, and this being the case the court has ordered James S. Easby-Smith, the receiver appointed by the court, to return to the defendants all the books, papers and assets which were taken into his possession as receiver.

The McKay Co. has given a deed of trust chattel to William M. Offley and Robert P. Shealey to secure Meyer B. Newman in the sum of \$950. The chattels are located in the McKay jewelry store at 1115 F St., N. W.

The Watson Drug Co. has succeeded to the business of Leon V. Officer, Atoka, Ind. Ter.

San Francisco Jewelers Resuming Business.

Temporary Quarters Opened at Oakland and in the Stricken City—Details as to Present Conditions Told in Interviews and Letters.

SAN FRANCISCO, Cal., May 2.—The jewelry business in Oakland and this city is rapidly getting into definite shape, and a number of the more prominent firms have already resumed to a greater or less extent. Several of the leading retailers are arranging to open temporary stores in the new retail district of San Francisco, which extends along Fillmore St. and Van Ness Ave. The uncertainty as to just what part of the reconstructed city will be the best retail locality has so far prevented any permanent arrangements by the retailers. The wholesalers have, generally speaking, arranged for suitable warerooms and offices in Oakland, and will continue to conduct their business from that city until suitable quar-

ters can be secured in San Francisco. A number of the stores are counting on remaining in Oakland for from four to 12 months.

A. I. Hall & Son, who have temporary offices at 113 Broadway, Oakland, and at 2443 Vallejo St., this city, started one man on the road, last week, with a full line of samples. Some stock has already been received, and more is on the road. L. A. Smith, representing the same house, will cover some of the principal points in his territory, and other travelers will be put out within the next 30 days, who will book orders from the catalogue for delivery from the factory, though it is hoped that delivery can be made from stock very soon.

Shreve & Co. opened a temporary office and salesroom at 2429 Jackson St., here, May 1, and are already doing business in a small way. The new Shreve building, at the corner of Grant Ave. and Post St., the framework, walls and floors of which are

in good shape, will be reconstructed at once.

Manager Melrose, of the W. K. Vanderslice Co., states that no definite arrangements for a location have yet been made, although the company will most certainly re-enter the retail trade at an early date.

The various Chinese jewelers, formerly located along Kearny and adjacent streets, have been busy this week securing permits and searching in the ruins of their stores for any property which may have survived.

Hammersmith & Field, formerly in business on Kearny St., are still conducting business at their temporary office in Oakland and have not yet decided on a location for their new store in San Francisco.

HOW THE SHREVE BUILDING NOW LOOKS, WITH ITS WALLS AND FLOORS STILL IN GOOD STATE OF PRESERVATION.

ters can be secured in San Francisco. A number of the stores are counting on remaining in Oakland for from four to 12 months.

A. I. Hall & Son, who have temporary offices at 113 Broadway, Oakland, and at 2443 Vallejo St., this city, started one man on the road, last week, with a full line of samples. Some stock has already been received, and more is on the road. L. A. Smith, representing the same house, will cover some of the principal points in his territory, and other travelers will be put out within the next 30 days, who will book orders from the catalogue for delivery from the factory, though it is hoped that delivery can be made from stock very soon.

Shreve & Co. opened a temporary office and salesroom at 2429 Jackson St., here, May 1, and are already doing business in a small way. The new Shreve building, at the corner of Grant Ave. and Post St., the framework, walls and floors of which are

In addition to the firms which secured temporary offices last week the following have now arranged for temporary offices: California Jewelry Co., corner of 14th St. and Broadway, Oakland; W. K. Vanderslice Co., 1551 Devisadero St., San Francisco; Phelps & Adams, 1103½ Broadway, Oakland; the Bohm-Bristol Co., 2506 Fruitvale Ave., Fruitvale; Gorham Mfg. Co., 1103½ Broadway, Oakland; Baldwin Jewelry Co., 1521 Sutter St., San Francisco; Radke & Co., 1198 McAllister St., San Francisco; Diamond Parlor Jewelry Co., 1461 Steiner St., San Francisco.

The military authorities here report that the safe of a jeweler named Less, formerly in business on Kearny St., has been broken and that the military under Col. Maus had rescued the contents from the looters. Thieves have been busy in the former retail jewelry district ever since the ruins cooled, and a number have been caught red-handed. The authorities have not decided to drive

off all relic seekers and sightseers from this section.

2778 PINE ST.,

SAN FRANCISCO, Cal., May 2, 1906.

Editor THE JEWELERS' CIRCULAR—WEEKLY:

During and after the days following the fire, it was given out by local papers that all letters would be forwarded without stamps, owing to lack of same here. Many letters in answer to inquiries from New York and eastern jewelry firms were, therefore, forwarded without stamps and, after being retained by the postal authorities here, were returned to writers after five or seven days. This will explain to a great many houses the seeming neglect on the part of their San Francisco houses to answer letters promptly.

Our entire business center and, without exception, the whole jewelry district, both wholesale and retail, is completely destroyed by fire. Many were fortunate enough to rescue all or part of their stock. The feeling is that for the balance of the year there will be no business. But we are optimistic in being sure that 1907 will bring a very great boom in our line and that the setback will be for a short time only.

Excuse writing, as typewriter and all other tools were destroyed in the great fire. Kindly publish all or any part of this and oblige many old subscribers, and especially

Yours sincerely,

MAX ABRAHAMSON.

Formerly 126 Kearny St.

J. C. Blythe, the San Francisco representative of Joseph Fahys & Co., arrived in New York in the early part of last week and remained two or three days, during which time he gave to the members of the company a vivid account of the calamity. On the morning of the earthquake he hurried to the office at 126 Kearny St. When the fire threatened the building he decided to remove the books and insurance policies. Because of the disturbed condition of the city, the disposition of the stock of gold and filled cases, valued at \$20,000, presented to him a difficult problem for solution. He realized that if he attempted to carry the cases away, with what assistance he could get, there was danger of the stock being separated from him. It then seemed possible that lawless elements might take advantage of the circumstances to rob. Citizens were already being impressed for work in fighting the flames. He concluded to leave the cases in the safes.

The insurance policies he kept in his pockets and the books he placed in his house. Later the soldiers blew up his home, so that the books were destroyed.

He spent two days and two nights sleeping out, not trying to get to Oakland at first, because he knew if he went there he could not get back. Having ascertained that the building in which the office was located had been destroyed by the fire and that nothing could be done for the present in reaching the safes, he came on to New York, so as to notify the company of all that had happened. When he left San Francisco the military had not yet permitted any examination of the ruins of the Kearney St. buildings. After such an examination is permitted it may take some time to dig out the safes. To what extent, if any, the

GENERAL SELLING AGENTS

JOHN W. SHERWOOD

FRANK E. HARMER

stock has been injured nobody is prepared to say until the doors of the safes are opened. Some people believe that the watch cases will be practically protected from the heat. Mr. Blythe started back for San Francisco about the middle of the week to resume charge of the business.

Ira Goddard, secretary of the Jewelers' Safety Fund, New York, said yesterday that not a single claim against the company has as yet been filed as a result of the disaster. It happened that comparatively few salesmen were in San Francisco at the time of the earthquake. A little earlier in the season there were many more there, and later there would have been a larger number. The losses of stock in the offices of resident agents is not covered by the company's policies, which are designed to protect stock while in transit. If a salesman, having a policy, lost his stock by fire in his hotel the policy would, of course, cover such a loss, but as far as has been reported those whose samples were burned in this manner were not insured in the union.

In relation to the probable damage to jewelry stock in fires, Mr. Goddard said that he recalled an instance, several years ago, when a stock of diamonds, valued at \$10,000, had passed through an intense fire in an express car. The diamonds were in a safe. The only damage to the stones was that they had temporarily lost their brilliancy. This necessitated repolishing, with a slight loss in weight as a consequence. The Safety Fund, which had insured the diamonds, was called upon to pay only a few hundred dollars, the cost of labor in polishing and the value of the slight losses in weight. The lightest kind of heat, Mr. Goddard said, would be fatal to pearls. As to jewelry, it might be melted in safes. The metal would then be of value, but the loss would be considerable because of the value of the workmanship.

The Solidarity Watch Case Co., New York, subscribed \$100 for the sufferers through Burr W. Freer, at San Francisco. The employees of the company in New York and Brooklyn sent a generous contribution through their local organization.

W. A. Salmon, who travels with the extensive lines of clocks of Harris & Harrington, 12 Barclay St., and goods of the Riviere Brass & Bronze Works, of 330 Seventh Ave., New York, had a close escape in San Francisco, where he had only just located for a business visit at the Palace Hotel. Mr. Salmon lost his entire lines of samples, and saved only the clothing he had the opportunity to take hurriedly with him. He begs to say to his friends in the trade that in two weeks he will be on the road again, with full lines of samples and photographs.

The A. Wittnauer Co., 9 Maiden Lane, received word last Friday from F. H. Wilkinson, who was traveling for the house and was in San Francisco at the time of the earthquake, that the stock was safe. Mr. Wilkinson was stopping at the Palace Hotel at the time, and at once removed the stock to a safe deposit vault.

The subscriptions to the Jewelers' Board of Trade fund for the relief of the San Francisco victims, heretofore acknowledged, amount to \$32,209. To this was added, May 3, \$460.53, making a total of \$32,669.53. The

additional subscriptions were as follows:

Kastenhuber & Lehrfeld	\$100.00
Powers & Mayer	100.00
Hartwig, Emma B.	50.53
Stern, L. & Co.	50.00
Redlich, Alex.	50.00
Barrows, Ira	50.00
Safford, D. L.	25.00
Lapham, Edwin B.	25.00
Lauterbach, Aaron	10.00

Emma B. Hartwig gave the receipts of her restaurant at 83 John St., Thursday, May 3, amounting to \$59.53.

Several representatives of Shreve & Co., San Francisco, have been in New York in the last week and their many friends have extended to them earnest congratulations on their personal safety. They have passed most of their time in the Maiden Lane district and members of the trade who have met the western men have been much interested in getting information as to conditions in the stricken city.

George Lewis, the secretary of the company, kindly gave to a reporter of THE CIRCULAR-WEEKLY some information as to the happenings on the day of the earthquake. He was lying at the Pacific Union Hotel and, getting out safely, was the first man to reach the store in the new building recently erected for the firm. By 8 o'clock he had about 100 men of the force in the building. Orders were given that nobody should be allowed to enter except those connected with the business and the employees, and none who entered were allowed to go out until all left, when the fire was approaching.

Mr. Lewis made up his mind in the morning that the city would be destroyed, and, accordingly, all the men at hand were put at work storing jewelry and silverware in the vaults. They had from eight in the morning until midnight to do this, and at the latter hour the flames were so close that all were obliged to leave. By that time all the stock except the bric-à-brac, cut glass and china was in the vaults. Mr. Lewis and Bruce Bonney, the vice-president, remained in the neighborhood and saw the fire reach the building and destroy the interior. The building is of sky-scraper proportions, the company occupying the basement, first floor, mezzanine and the second floor, while the offices above were rented.

Mr. Lewis said it was apparent that nothing inside the building, exposed to the flames, could survive. He remained in the city for more than a week. After the fire had swept his building and the ruins had cooled a little, he made his way inside. Everything of glass, he said, was melted and looked like ice. Cut glass and china, bric-à-brac lay in unrecognizable masses. Chandeliers were strung like icicles. Nothing of wood remained. The vaults were cool 10 hours after the fire. They were not opened, however, up to the time Mr. Lewis left San Francisco, as the firm desired to take no chances. In a number of cases, when the vaults had been opened, flames had broken out afresh and the military authorities were therefore slow in giving permission to open vaults.

Mr. Lewis said that he is as confident as he can be of anything without actually seeing it, that the merchandise in the vaults is safe. There are two of these vaults, one in the basement and one on the ground

floor. They are each 12 feet long, six feet wide and eight feet high, built of brick and steel by the De Bault Safe Co., and were pronounced on their completion to be as perfect protection as could be obtained.

The company had the assistance of soldiers, Mr. Lewis said, who protected the building's contents from the start, so that there has been no danger of any looting. Reports of people breaking into the store and stealing were therefore baseless.

The company's factory was also destroyed by the fire, the machinery being a total loss.

Mr. Lewis was not prepared to say what was the total loss on the factory or on the fittings and merchandise known to have been destroyed in the store. Whatever the loss is, he said, it is fully covered by insurance, so that the company is amply protected. The company leased, soon after the fire, new quarters at Jackson and Filmore Sts. Here it has a large building that had been used for a residence. This will be stocked at once and the business will be conducted here until the interior of the burned building has been refitted. It is likely that for a time both buildings will be used. The company has also opened an office at Post St. and Grant Ave.

While he remained in the city Mr. Lewis said that he had to take his chances with everybody else in getting food, rich and poor alike being glad to go in the bread line. After all arrangements had been made for resuming business, Mr. Lewis had no difficulty in getting a train east, and he arrived in New York last week. It is his intention to sail in a few days for Europe.

Godfrey Eacret, the company's buyer, who returned last week from Europe, met Mr. Lewis in this city. H. Houston, who is with the company, came on from San Francisco, and will remain in New York for a short time.

J. C. Aikin, of Aikin, Lambert & Co., returned to New York last week and received the congratulations of many friends on the fact that, although he was in San Francisco at the time of the earthquake, he was not harmed. Mr. Aikin occupied room 13 in the Palace Hotel.

To a CIRCULAR-WEEKLY reporter he said that he was awakened by falling plaster, and when the bed and furniture were thrown to one side of the room he realized that there was an earthquake. Going into the courtyard of the hotel, he found the guests seeking places of safety. The plate glass windows had been broken to pieces and the glass was scattered on the floors. He warned several ladies of the danger, as they were walking toward the glass in their bare feet. As he had no baggage except a light steamer trunk, he found a man who was willing to carry it over to the St. Francis Hotel.

Mr. Aikin spent all of Wednesday, the day of the earthquake, watching the fire. He noticed that before the fire reached the business district that Shreve & Co.'s store was apparently not damaged. Mr. Aikin said that people generally were not greatly alarmed. There was plenty of time to get away from the fire.

He remained out Wednesday night watch-

ing its progress, and Thursday morning he made his way to the home of a relative, C. S. Aikin, who lives about three miles out, opposite the Presidio. One side of the house had fallen, but the family were making themselves as comfortable as possible, and Mr. Aikin was glad to accept their hospitality until Saturday, when he took the first coast train that left for Los Angeles. He planned that it would be more comfortable to take a train from Los Angeles east than to get a through train in the crowds leaving San Francisco, and this plan enabled him to visit an aunt at Los Angeles. The train was delayed, however at San José, where he spent Sunday, and did not reach Los Angeles until Monday.

ATTLEBORO, Mass., May 5.—Communications continue to come to the Attleboro manufacturing jewelers, adding details to the loss sustained by the industry through the San Francisco earthquake. The W. H. Saart Co., which for many days heard nothing from its representative in that locality, has a letter saying the office was burned, but the greater part of the samples and other things of value were in a large safe, and escaped with little or no damage. Oscar S. Levy has notified J. M. Fisher & Co. that his line of samples appears to be lost, the office having been burned out. He adds that his own home was badly shaken up, but he and his family suffered no injury.

Numerous Attleboro jewelers are in receipt of copies of the letter sent east by Kahn Bros. notifying the trade that the customers in Oakland are as solvent as ever, that there is no occasion for any lapse in confidence toward them, and that all the losses in that community fall on real estate owners, not on merchants. The letter proclaims the fact that the firm is not acting selfishly in the matter, but sends the letter in the interests of the whole place.

The manufacturing jewelers in Attleboro continue to add their donations to the relief fund. They have been liberal givers to the Attleboro town fund, which last week reached the neighborhood of \$5,000, and they have given through the jewelers' fund raised in Providence. Among donations not acknowledged in the two previous issues are: Employes of the D. F. Briggs Co., \$43.80; Sykes & Strandberg and employes, \$38.50; P. J. Cummings & Co., \$40; Frontneau & Cook Co., \$18.

Reed & Barton, Taunton, have a vivid letter from their San Francisco representative, E. H. Adams. He was thrown out of bed by the principal shock, and as he struck the floor the wall of the dwelling fell off into the street. He threw on some clothing, and then, hearing of the quick spread of the flames, proceeded as fast as possible on foot a distance of five miles to the company's office on Kearny St. He saved from the place the most valuable of the contents, being particularly fortunate in getting out a group of samples that would have required much time to replace. He had no sooner found a safe place for them than the advancing flames drove him still further back, a second moving being necessary. Until he takes inventory of the saved goods the amount of loss will not be known. All his personal property was burned, leaving himself and wife practically penniless.

Imports of Watches, Clocks, Jewelry and Gems into Canada.

TORONTO, Can., May 5.—The monthly report of the Department of Trade and commerce of Canada gives the value of imports for home consumption for the month of January in the jewelry and kindred trades as follows:

Date of Meeting to Form National Association of Retail Jewelers Changed to Aug. 3 and 4 at Rochester, N. Y.

DETROIT, Mich., May 2.—The meeting which the American Retail Jewelers' Association had called to take place at Rochester, N. Y., for the formation of a representative national association of retail jewelers by delegates from the various State organizations of the country has been changed as to date. As it was intended that the meeting should take place in conjunction with the annual meeting of the American Association of Opticians, and as that meeting has been changed from Aug. 10 and 11 to Aug. 3 and 4, the time of the jewelers' convention has been changed to the latter dates.

It is expected that this meeting will be attended by delegates from not only all the organizations at present affiliated with the American Retail Jewelers' Association, but also the other retail jewelers' associations now in existence and the new ones which, it is expected, will be formed in various sections of the country between this date and August. Every effort will be made to have the national organization then formed thoroughly representative of the jewelry trade throughout the entire country and a large attendance is expected.

Particulars as to the meeting and election of delegates may be had from the secretary of the American Retail Jewelers' Association, Edward R. Roehm, of this city.

Death of William Oscar Cornell.

PROVIDENCE, R. I., May 2.—William Oscar Cornell, head of the refining concerns of Cornell & Andrews, this city; Cornell & Andrews Co., Meriden, Conn., and Cornell-Andrews Smelting Co., Attleboro, died yesterday morning at his residence in Whalen Ave., at the age of 70 years.

The deceased, who had been long and favorably known in the jewelry trade, was born Feb. 8, 1836, and originally went into the grocery business. He started in the refining business about 1890, with Frederick W. Andrews, who had long experience in this line, and the latter's son, Frank H. Andrews, was ultimately admitted. R. J. Rice became a partner in the Cornell & Andrews Co., and has charge of the branch in Meriden, Conn. The Cornell-Andrews Smelting Co., at Attleboro, was incorporated under the laws of Rhode Island, some time ago, with a capital stock of \$25,000, and was controlled by the deceased and his partner. The plant in this city was at 25 Mathewson St.

Mr. Cornell was also the president of the Providence Dyeing, Bleaching & Calendering Co., and was secretary of the American Seamless Wire Co. He was a trustee of Tufts College and a member of the Society for the Prevention of Cruelty to Animals and was also prominent in the work of the First Universalist Church. He is survived by a widow.

Death of Kuno F. Keller.

APPLETON, Wis., May 2.—Kuno F. Keller, a pioneer jeweler of Appleton, and one of the best-known men of the trade in this section, passed away at his home, 37 Sherman Pl., early last evening. Mr. Keller's death, which was sudden, was due to heart failure, and came as a shock to all his friends and family. He left his store feeling slightly unwell, and after returning to his home felt worse and lay down on a couch. A short time afterward Mrs. Keller called to him, and, receiving no reply, went to the couch and found him lying lifeless. The physicians who were summoned said that he had died before their arrival.

Kuno Ferdinand Keller was born in Pfulendorf, Baden, Germany, Nov. 20, 1837, and started in the jewelry trade in his native city. After receiving his education he was apprenticed to a watchmaker, and remained in that line until he came to this country in 1860. He first located in New York, where he practiced his trade and in which city he married Miss Theresia Mattes. He moved to Appleton in 1873 and purchased the jewelry store that had been conducted by Bernard Warkatler, next to the First National Bank, and this business he continued, moving to several locations, until he was finally settled in his present location, 814 College Ave. In 1891 he took into partnership his elder son, Gustav Keller, and later admitted three other sons. For a while he had a branch in Milwaukee, but this was closed a few years ago. The deceased was the fourth oldest jeweler in this State; he was a man of untiring energy and industry, and was highly thought of in the business community here.

The funeral services will be held Friday morning from St. Joseph's Church, under the auspices of the St. Joseph Society and Branch No. 6 of the Catholic Knights of Wisconsin, of which the deceased had long been prominent.

Death of Frank Harmon.

The many friends of Frank W. Harmon will learn with sincere regret of his death, which occurred at his home, 415 Central St., Springfield, Mass., last Monday. Mr. Harmon's death was not unexpected, as he had been confined to his house since Christmas with Bright's disease.

For 20 years Mr. Harmon has represented M. B. Bryant & Co., New York, in the east and parts of New York and Pennsylvania. The members of the company speak of him as a man of absolute fidelity to every trust and say that they feel his death as a great loss, in a business way, while their sense of bereavement is second only to that of his widow and daughter, who survive.

Death of M. Lippert.

CHICAGO, May 5.—M. Lippert, doing a jobbing jewelry business as M. Lippert & Co., in the Columbus Memorial building, was buried here last Tuesday at Waldheim Cemetery. Mr. Lippert died in Sioux City, Ia., while stopping at the house of B. Reingold, a retail jeweler of that town.

Deceased was well known in the local trade, having been in the jewelry business here about 18 years.

H. H. Humber, Leduc, Alberta, Can., moved recently to Red Deer, same province.

**Jewelers Having Tortoise
Shell Goods**

that have become dull or broken, can have them repaired, repolished and made as bright as new, at a small expense, by sending them to the manufacturer.

POTTER SHELL WORKS, Providence, R. I.

Receiver Appointed for I. G. Dillon & Son Co., Wheeling, W. Va.— Creditors Meet at New York.

The appointment last week of a receiver for the I. G. Dillon & Son Co., the prominent retail jewelry house of Wheeling, W. Va., surprised creditors, who, at the request of the president of the company, met in the rooms of the Jewelers Board of Trade, New York, on the same day that the application for a receiver was made at Wheeling. The company carried a stock roughly valued at \$150,000. The liabilities are said by Mr. Dillon to be about \$130,000, and he says that the assets are worth far more than that amount.

The creditors, after discussion of the situation, appointed a committee to investigate conditions and to take what action is necessary. Oliver G. Fessenden, of Hayden W. Wheeler & Co., is chairman of the committee.

No representative of the company was present at the meeting, and the creditors did not learn until later of the legal proceedings at Wheeling. Secretary D. L. Safford, of the Jewelers Board of Trade, as a member of the investigating committee, went to Wheeling on Friday to make inquiries.

WHEELING, W. Va., May 2.—I. G. Dillon, the president of the I. G. Dillon & Son Co., yesterday filed an application in the Circuit Court asking for the appointment of a receiver to take charge of the business and settle the present obligations.

In the bill asking for the appointment of the receiver, Mr. Dillon says that the obligations of the firm are about \$130,000, but that the assets will far exceed that sum. The company has an authorized capital of \$100,000, and it is said that under the proper management of the court all claims can be met in full and a balance will be left.

The cause assigned for this application was that too much credit had been extended by the firm to its customers and that it was in need of ready money. Some of the creditors are said to be clamoring for their money and in order to protect the business the court was asked to place the business in charge of some competent person.

Of the indebtedness of the firm about \$70,000 is due to foreign firms or corporations, while the balance, amounting to about \$61,000, is due to local creditors, most of it being due to banks. In regard to the sums due banks, the bill states that all the notes are amply secured and that there will be no loss to any one.

I. G. Dillon, the president, owns 996 of the 1,000 shares of stock.

Judge Harvey on the day of the application appointed W. S. Hicks receiver. He was away from the city, and on his return refused to act. The court then appointed as joint receivers, J. A. Mills, formerly cashier of a local bank, and Frank C. Cox, an attorney. They gave bonds in \$100,000, and took possession. An inventory of the assets is now being made.

The local creditors of the firm are as follows: Bank of the Ohio Valley, \$27,337; Dollar Savings & Trust Co., \$3,500; City Bank of Wheeling, \$7,800; People's Bank, \$4,300; Wetzel County Bank, \$3,100; First

National Bank of Mingo, \$1,500; First National Bank of Woodfield, \$500; National Bank of West Virginia, \$1,500; National Exchange Bank, \$2,500; Friend Cox, \$1,000; W. A. Ward, \$7,848; German Savings Bank, \$700.

Foreman of Tiffany & Co., New York, Arrested on Charge of Padding Firm's Pay Rolls.

John B. Brosseau, for many years foreman of Tiffany & Co.'s workshop, Fifth Ave. and 37th St., New York, was arrested last Wednesday on the charge of larceny, committed by padding the pay rolls. Subsequently he confessed. According to the statements that have been made, about \$5,000 was stolen each of the last two years. How much farther back the thefts have extended will not be known until an examination of his accounts is complete.

Brosseau, who is 59 years old, had been with the company 35 years, working his way up during that time to a position of peculiar responsibility. His examination was postponed in the Tombs Police Court until to-day.

Since the arrest the police have not hesitated to express their suspicion that he stole the three pear-shaped diamonds valued at \$35,000, which mysteriously disappeared from the workshop about a year ago. It is now revealed that the police at the time of the robbery had a suspicion of Brosseau, but the members of the company were so firm in their confidence of his honesty that no espionage was placed on him, and his name was held from publicity.

Brosseau denies that he took the pear-shaped diamonds, or that he stole in any other way except by padding the pay rolls. His counsel, A. B. Cunningham, last week, was quoted in the daily papers as saying that in case Brosseau was allowed to make restitution and go free, he would expose other leakages in the jewelry establishment. The members of the company say that such a proposition will not be entertained, and that there have been no robberies except those that have been published.

The method by which Brosseau robbed the company was simple and was possible only because entire confidence was placed in him. He sent his requisitions to the cashier for the money with which to pay the money to the men. The amounts in his payroll were larger than what the men actually received. His books have not been examined for a number of years, and there was no comparison during this time of the amount turned over to him for salaries and wages and what he actually paid.

For some time the officers of the company have been aware that they have been losing money, and detectives were employed to trace leakages. After some investigation the circumstances pointed to Brosseau, but even then the officers of the company were loath to think that their trusted employe was dishonest.

The complaint in the case accuses the prisoner of the specific theft of \$50 in raising the pay account of Jacques Brizel, a repairer. The police say that he in the same manner increased the pay of 60 or 70 other employes, and that his revenue from this source was from \$60 to \$75 a week, and sometimes more.

When the case against Brosseau seemed

complete the facts were made known to Ralph M. Hyde, the superintendent, and Col. H. H. Treadwell, a director. This was a couple of weeks before the arrest. Brosseau said that he was willing to turn over his equity in his home at 413 Lenox Ave. in order to make restitution. Charles I. Cook, the president of the company, who had been ill, learned about this time of what had happened, and he directed that the law should have its course.

In his confession Brosseau says that he did not gamble and had no vices, but spent his money on his family. Persons who are somewhat familiar with his circumstances say that he lived far beyond his income, his salary being \$3,500 a year. It is also said that sickness and other troubles in his family caused unusual expenses in recent years. His son, Gerald, had a position as salesman for Tiffany & Co., beginning about two years ago, and resigned a month ago.

Death of the Rev. Henry Dutcher.

POLT JERVIS, N. Y., May 2.—The Rev. Henry Dutcher, who died at his home in Warwick, N. Y., Saturday last at the advanced age of 85 years, was at one time well known in the jewelry trade, having been in business in this city.

The deceased, who is the father of Dwight Dutcher, of Warwick, was born Feb. 21, 1821, at Coventry, N. Y., and being a member of a large family received but little education. However, with the grit and energy for which he was later noted, he studied himself, and finally took up theology, and was admitted to Elders' Orders in the Methodist Episcopal Church. While never in charge of a church he preached in many pulpits and at the same time he worked at a trade, first a cabinet-maker and later in the jewelry line. He was in the jewelry trade in this city for some time, and 12 years ago moved with his family to Warwick, in which town the business is still continued by his son.

The funeral was held at Warwick yesterday afternoon.

Death of A. P. Boynton.

CHICAGO, May 2.—The death of A. P. Boynton, a well-known jeweler of this city, was a great shock to his many friends throughout the jewelry trade. The deceased, who was 82 years old, had been in the business for over half a century; in fact, since Chicago was a small and unimportant town. He made a specialty of old clocks, but of recent years did not attempt to develop his business to any extent.

Mr. Boynton's brother, J. E. Boynton, of St. Louis, came to this city to look after the remains.

Extensive improvements have been completed in the store of William Keck, Ashland, O.

Burglars who entered the postoffice at Kingman, Ind., early Tuesday morning of last week, blew open the safe and escaped with a large amount of jewelry and watches which were carried by the postmaster, C. F. Smith. The amount of the loss is placed at approximately \$700. The building, a one-story structure of brick, was badly damaged by the explosion. No trace of the thieves has yet been found.

The PASSMORE GEM CO., 373 WASHINGTON ST., BOSTON, MASS.

Trans-Atlantic Voyagers.

TO EUROPE.

H. W. Allen and wife, Chicago, will sail next Monday.

R. A. Breidenbach, New York, sailed last Saturday on the *Patricia*.

Charles N. Hancher, Wheeling W. Va., will sail to-day on the *Baltic*.

B. Didisheim, of Hipp. Didisheim & Bro., New York, sailed recently on *La Savoie*.

George Lewis, secretary of Shreve & Co., San Francisco, Cal., will sail in a few days.

M. A. de Vries, with Eduard van Dam, New York, sailed, last week, on the *Finland*. Frederick Goldsmith, of Ingomar Goldsmith & Co., sailed on the same boat.

Loring Andrews, of the Loring Andrews Co., Cincinnati, O., will sail to-morrow on the *Amerika*.

Julius Mamluck, of Julius Mamluck & Co., New York, sailed, recently, on the *Kaiser Wilhelm II*.

Henry Bodenheimer, of Bodenheimer & Jaskow, New York, sailed, last week on the *Grosser Kurfurst*.

William Ali. Beckingham, manager of the silverware department of Pitkin & Brooks, Chicago, and his bride, sailed, last Wednesday on the *Teutonic*.

Goodman King, of the Mermod, Jaccard & King Jewelry Co., St. Louis, Mo., sailed yesterday on the *Kronprinz Wilhelm*. L. Laubheim, of Laubheim Bros., New York, and Mrs. Laubheim sailed on the same boat.

FROM EUROPE.

M. Moussaieff and S. Kutner, both of Paris, France, arrived last week.

Godfrey Eacret, with Shreve & Co., San Francisco, Cal., returned last week.

Maurice L. Powers, of Powers & Mayer, New York, returned last-week on the *Carmania*.

J. W. Mayer, of Powers & Mayer, New York, returned last week on the *Kronprinz Wilhelm*.

R. Harris, of R. Harris & Co., Washington, D. C., and family is returning on the *Zeeland*, due in New York next Wednesday.

Eduard van Dam, New York, returned Sunday on the *Amerika*. On the same boat was L. Friedlander, of R. L. & M. Friedlander, New York.

Jacob Bloom, Kansas City, Mo., offers his creditors 35 cents on the dollar. Mr. Bloom was first located in Denver, Colo., where he conducted business under the name of E. Bloom. He resumed control in 1894 and did a prosperous business. He discontinued business early in 1905 and traveled for several months, after which he re-engaged in business in this city in November, 1905.

The factory of Miller, Fuller & Whiting, Broad St., North Attleboro, Mass., was broken into either Saturday or Sunday evening, and jewelry valued at \$300 taken. An entrance was gained through a skylight window, which was reached by outside stairs. Once inside the shop the burglars hastened to the packing room, where they stripped the pattern boards and helped themselves to finished brooches and pins. Several thousand dollars worth of unfinished stock was within reach of the burglars, but was apparently untouched.

Connecticut.

The Wm. L. Gilbert Clock Co., Winsted, contributed \$350 to the relief fund for the San Francisco sufferers.

Albert G. Lewis, with Manning, Bowman & Co., Meriden, and Miss Daisy L. Morgan, will shortly be united in marriage.

Augustus R. Marshall, for many years a well-known watchmaker in Stratford, died May 1, at his home at that place, aged 76 years.

Wm. Kenneth Sessions, son of Wm. C. Sessions, returned, last week, from a trip to Florida, where he went for the benefit of his health.

The wife of N. Burton Rogers celebrated her birthday anniversary, last week, by a reception. The hostess was the recipient of many beautiful gifts.

Mrs. Elmira B. Lewis, widow of the late Benjamin Lewis, an inventor of a calendar clock, was found dead in bed at her home on Maple St., Bristol, Friday morning.

Chas. Goff, a former employe of the Wilcox Silver Plate Co., Meriden, died suddenly, May 3, in New Britain. The deceased was a member of the O. U. A. M.

Samuel Stohr, designer at factory "E," International Silver Co., Meriden, is arranging to make a trip to Europe this Summer. His itinerary will embrace visits to the principal art centers abroad.

Edward M. Phelps was arrested, May 4, in Hartford, on a charge of forgery. Among those upon whom he is alleged to have passed worthless checks is Daniel H. Blinn, 50 Asylum St. The amount of the check given to the jeweler was only \$7.

Henry Haaf, master mechanic with the Seth Thomas Clock Co., Thomaston, collided with a wagon while on the way from Bristol to the concern's offices, in his automobile one day last week, and completely demolished the vehicle. The auto was unharmed.

Notices have been posted in the various departments of the Seth Thomas Clock Co.'s factory, notifying the employes that until further notice the plant will be run only half a day on Saturdays, thus making 55 hours constitute a week's work.

Landers, Frary & Clark, New Britain, are planning to hold a big opening of their new foundry building in Elm St., which is nearing completion. It is one of the largest foundry plants in the State. The employes of the concern will give an entertainment and dance.

President Chas. F. Smith, of Landers, Frary & Clark, New Britain, arrived home, Sunday evening, of last week, after a European trip. Mr. Smith was accompanied by his wife and the latter's sister. The party was met by the Mayor of New Britain in New York and accompanied home by him.

A member of the firm of G. W. Fairchild & Sons, Bridgeport, while hastening for a train recently, dropped a valuable pearl and diamond necklace from his pocket. The necklace was found shortly afterwards by Richard F. Phelan, who returned it to the owners. The finder was liberally rewarded.

The body of Allen S. Butler, a fireman in the employ of the Bradley & Hubbard Mfg. Co.'s factory, Meriden, was found

Friday morning in the ruins of the factory, recently destroyed by fire. The deceased had been engaged in fighting the flames when he met his death. A widow and several children survive him.

Employes of factory "E," International Silver Co., Meriden, have been notified that the Summer shut-down for repairs and inventory, instead of taking place this year on July 4, will be during the Centennial and the week following. The factory will be closed June 9, and will open again June 25. It will be closed July 1 only for the holiday.

Gen. George H. Ford, New Haven, was a delegate to the National Congress, Sons of the American Revolution, just held in Boston, from David Humphrey's Branch of the Connecticut Society, Sons of the American Revolution, of New Haven. He made an address, May 3, to the latter organization in New Haven concerning the convention.

A fire which broke out May 3 in the stock room of the big Bradley & Hubbard Mfg. Co.'s plant, Meriden, threatened the entire factory at one time, but the firemen finally got it under control. There is an immense amount of damage done by smoke and water to the chandelier department. The fire was first discovered breaking through the windows of the stock room, which is on the top floor of the chandelier factory, and in a few minutes the whole top seemed to be ablaze. Two alarms called all the department apparatus and several streams were soon playing on the building. Capt. Donovan, of Hose No. 2, was overcome by the smoke and rescued with difficulty. All the fixtures and stock of chandeliers and lighting appliances were stored on the top floor. This floor and its contents were entirely destroyed. The lacquer department directly underneath was also ruined, mostly by smoke and water. The chandelier manufacturing department, which occupied the next two floors, was washed out, with considerable loss. The loss is fully covered by insurance.

North Attleboro.

Artnr Chace, Wednesday, left on a western trip for F. S. Gilbert.

James P. Black returned Saturday from a trip through New England.

Roswell Blackinton, Friday, returned from a trip to North Carolina, which he took for the benefit of his health.

James M. Clark 2d, has been granted a patent on a bracelet hinge. He has assigned it to the Daggett & Clap Co., of Attleboro.

The factories of F. L. Shepardson & Co., Casper, Mandalian Co., J. J. Sommer & Co. and the W. G. Clark Co. were closed last week pending repairs to engine and building.

That the San Francisco trade is not entirely gone for this Spring was shown last week when the W. & S. Blackinton & Co. received an order from a San Francisco house.

Ross Whitmarsh left last week to assume charge of the New York office of the George L. Paine Co., pending the recovery of George Angell, who was injured several weeks ago in an elevator accident in a Brooklyn department store.

The Bugbee & Niles Co. last week filed

its annual financial statement as follows: Machinery, \$12,857; cash and debts receivable, \$54,775; manufactures and merchandise, \$16,927; capital stock, \$50,000; profit and loss, \$34,559. The officers of the corporation are: Daniel Chisholm, president; Charles Rhodes, vice-president, and Alpin Chisholm, treasurer.

John P. Stanley, whom the older members of the trade will remember as the New York representative of the Stephen Richards Co., has written a letter to Samuel E. Fisher from Oakland, stating that although he escaped from the earthquake without injuries, that he lost all his possessions. His principal loss is a collection of curios and pictures, which, it is said, was the finest in that part of California.

Buffalo, N. Y.

C. F. Chouffet, 379 Main St., for several years a resident of Bidwell Parkway, has moved to 527 Auburn Ave.

Present & Co.'s store, 444 Main St., is being thoroughly remodeled and overhauled. The salesroom is being extended in the rear some 40 or 50 feet.

Philip Fischer, bankrupt jeweler, formerly at 548 Main St., has been employed as head salesman in the jewelry department of the Wm. Hengerer Co.'s store.

E. V. Syrcer, optician in the Best & Co. jewelry store, 11 E. Genesee St., was last week elected secretary of the Bible Class of '06 of the Lafayette Presbyterian Church.

All of the stock of the Freeman Jewelry Co. not sold at auction in the Niagara Falls branch store, was, last week, brought to the Buffalo store, 84 Seneca St., which is this week being enlarged and overhauled. The improvements will be extensive.

A. E. Sipe, in the Mooney building, Saturday night caused the arrest of Fred Storms, aged 16, by Detectives Holmes and Flynn, on a charge of petit larceny. The young man, who had been in the employ of Mr. Sipe, is accused of collecting \$10 and failing to turn it into the office.

The Niagara Ring Mfg. Co., Eagle and Washington Sts., is much pleased with the success of its innovation in furnishing an automobile in which to show customers and visitors the sights of Buffalo. The concern has noticed a substantial increase in patrons as well as calls from friends.

M. L. Levine, 163 Genesee St., has received a letter from his brother, Harry Levine, who states that the house in which he was living in San Francisco at the time of the earthquake, collapsed, and that he escaped in his night clothes, and is now living in Oakland. All his property was destroyed.

In a few weeks the town clock system of Buffalo will be materially changed. T. & E. Dickinson & Co. will remove their old stand clock from its tower in lower Main St. and erect it on a handsome post in front of their new place, 472-74 Main St. Charles F. Damm is negotiating for the placing of a chronometer at the edge of the sidewalk in front of his Main St. establishment. The chronometer will show its face beneath a heavy plate glass.

Jacob M. Kolb, Elizabeth, Ill., has been succeeded by Ira E. Shaw.

CHOPARD FRÈRES

MAKERS OF ART JEWELRY NOVELTIES.

FACTORY: 35 Rue Des Trois Bornes,
PARIS, FRANCE.

49 Maiden Lane - - NEW YORK

Philadelphia.

P. P. Swan has left the Philadelphia College of Horology to accept a position in Atlanta, Ga.

Fred Goldman held the formal opening of his new retail store at 1125 Columbia Ave., last week.

Abe Sickles, of M. Sickles & Sons, is expected back from a trip to Europe in about six weeks.

William Todd, watchmaker, resigned last week his position with George Child, 9th and Chestnut Sts.

William P. Kammerer, with J. Warner Hutchins, has completely recovered from a week's attack of the grippe.

Alterations and extensions were completed last week to the polishing and shipping department of M. Sickles & Sons.

F. B. Wallen, 105 Broadway, Camden, N. J., made a trip to Bridgeton last week to attend the birthday festivities of his mother at the old homestead.

Harry P. Lanz resigned, last week, his position with Ferdinand Levy & Co., 929 Chestnut St., to go with a chain manufacturer of North Attleboro, Mass.

Wright, Tyndale & Van Roden, dealers in ceramics and objects of art, secured judgment last week in the local courts against Joseph V. Campbell for \$448.07.

J. E. Caldwell & Co. offer a liberal reward for the return of a gold bead necklace lost by one of their patrons after attending a society function at the Academy of Music.

Jacob Muhr was, last week, elected a life member of the Hebrew Educational Society at its annual meeting. Morris Pfäelzer, a retired jobber and retail jeweler, was made a director.

Gillender & Sons, manufacturers of cut and other glass ware, donated, last week, \$500 to the San Francisco relief funds. The National Optical Co. gave \$50 and the employees of C. F. Rump & Sons chipped in liberally.

Valuable pieces of diamond jewelry from the estate of the late Rufus E. Shapley were disposed of at auction last week by M. Thomas & Sons, and brought prices entirely satisfactory to the Sansom St. dealers who attended.

Horace Sheppard, a son of Joseph M. Sheppard, 520 N. 10th St., who has been engaged in other business for some time past, purposes to return to watchmaking and start in business as a repairer for the trade in the wholesale district.

Out-of-town retailers in this city during the past week included: E. J. Allen, Seaford, Del.; Mr. Harper, of Harper & Taylor, Souderton, Pa.; B. F. Kessler, Mt. Carmel, Pa.; M. K. Laudenslager, Souderton, and Gustave Lanz, Norristown.

J. B. Bechtel, of J. B. Bechtel & Co., is touring the Lehigh Valley for orders which are now to be expected since the coal strike talk is over. Andrew Little, of the same firm, departs this week on a trip through the eastern shore of Maryland.

James G. Maree, formerly one of the best known jewelers in this city, long located in Manayunk, but now retired and living in Germantown at 424 W. Cheltenham Ave., was overjoyed last week to receive word from Thomas O'Neill, a boyhood chum, now residing at Riverside, Cal. O'Neill

is a minstrel and Mr. Maree was himself once a minstrel but he abandoned the theatrical profession for the jewelry business, while O'Neill rounded out his career as a minstrel. Mr. Maree hopes soon to have a reunion party.

The Bailey, Banks & Biddle Co., of this city, has been notified that it has been awarded by Governor Swanson, of Virginia, the contract for a \$5,000 silver service for the battleship *Virginia*. The service is to be presented to the warship by the State of Virginia. The date for the presentation of the service has not yet been fixed. The last award made to Philadelphia jewelers for battleship services was that made to J. E. Caldwell & Co., for the *Pennsylvania*, which cost \$25,000. The *Virginia's* service is to consist of about 50 pieces. The Bailey, Banks & Biddle Co. will make an elaborate punch bowl, tray cups and ladles, coffee and tea services and trays, dessert service and a dinner set, which will include vegetable dishes, a sauce boat and meat platter. The centerpiece and candelabra was made previously for the Colonial Dames of America in Virginia and will form part of the service of the new battleship, although not included in the contract award made by the Virginia State authorities.

A. G. Lee, vice-president of the Jewelers' Club of Philadelphia and one of its charter members, was guest of honor at an exclusive little dinner last night at Boothby's, this city, given to mark his retirement from the trade. Mr. Lee has been manager of the watch department of Wanamaker's store, which position he has resigned to enter into the manufacturing textile business. He has made a contract with the Maynard Co., and will act as general sales agent, with offices in New York City. He will make his home in Ridgewood, N. J. Mr. Lee has been actively engaged in the trade in this city for many years. He started out as a watchmaker, finishing his trade with the Keystone Watch Case Co. Afterward he went with the Bailey, Banks & Biddle Co., where he remained until John Wanamaker determined to open a retail jewelry store in connection with his big department store. Mr. Lee was persuaded to go with him. Since the organization of the Jewelers' Club Mr. Lee has been one of its most active members. He has made himself popular by the manner in which he has sought to enliven the various dinners and entertainments given by the club.

Attleboro.

Ben and Milton Sandfelder, western salesmen for McRae & Keeler, paid a visit to the home office last week.

Emory J. Sullivan, ex-Consul to Turkey, who visited in the Attleboros, last week, gave out a press interview, in which he declared the manufacturing jewelers are ignoring golden opportunities in the part of Europe where he formerly resided.

J. F. Dean, traveling salesman for Reed & Barton, Taunton, has returned from a successful tour of Pennsylvania. John Nichols, holding a responsible post, has resigned to enter the employ of a large concern in Oneida, N. Y. Walter Hayes, a skilled worker, has resigned to go to England, where he will work at silversmithing.

Stock taking at this factory has led to suspension of work for a few days in some of the rooms the past week.

James E. Blake, of the James E. Blake Co., has personally paid out a considerable amount to benefit the appearance of the center of the town. The change in the grade of the railroad right through the business center, which has advanced so far that trains began to run on the elevated structure, Sunday, has made Railroad Ave. and Mill St. among the most important thoroughfares. Mr. Blake has risen to the occasion by improving at considerable expense the sidewalks and the looks of his factory property on the two streets.

Boston.

John E. Canning has given a chattel mortgage for \$1,250.

C. W. Hurl, optician, 120 Tremont St., has sold his business to W. D. Hunt.

H. N. Lockwood, watch and jewelry dealer, has moved from 9 Bromfield St. to 61 Bromfield St.

George H. Gutteridge, Maynard, Mass.; John Webb, of Alden Webb & Son, Beverly, Mass., and E. C. Chagnon, Woonsocket, R. I., were in Boston during the week.

C. J. F. Sherman & Son, who have been in the jewelry business at 220 Hanover St., for 50 years, have sold out to James E. Scanlon, who has been employed by them for 15 years. The Shermans will retire from business.

Among the recent contributions to the San Francisco relief fund were the following: Employees of the American Waltham Watch Co., Waltham, Mass., \$2,006.23, and American Waltham Watch Co. (as from Waltham), \$1,000.

Lawrence Percival and bride have gone abroad for their wedding trip. Mr. Percival's father, D. C. Percival, received a cablegram from them May 5, saying they will visit Paris and London and will remain in Europe some three weeks.

Owing to the San Francisco disaster the Order of the Mystic Shrine decided to hold its annual pilgrimage at Chicago, instead of in Los Angeles, Cal. James S. Blake, of Kettell & Blake, will go as a delegate to the meeting, which will be held June 12.

The certificate of incorporation of the Waltham Watch Co., the new concern which will take over the American Waltham Watch Co., as reported in THE JEWELERS' CIRCULAR—WEEKLY last week, was filed last week at the State House, and it gives the following schedule of assets to offset the \$11,000,000 stock to be issued: Real estate in Waltham, \$950,000; machinery, \$2,200,000; merchandisc, \$3,300,000; accounts receivable, less bills payable, \$50,000; patents, trademarks and good will, \$4,500,000; total, \$11,000,000. The subscriptions for the capital stock to be issued are as follows, in preferred and common stock, respectively: Ezra C. Fitch, \$1,334,000 and \$2,334,000; Francis R. Appleton, \$1,333,000 and \$2,333,000; Royal Robbins, \$1,333,000 and \$2,333,000; total, \$4,000,000 and \$7,000,000. Ezra C. Fitch will be the president of the company, Royal Robbins the treasurer, and P. W. Carter, clerk.

AN AUTOMOBILE FREE

Old Reliable W. & S. B. ★

1866 — 1906

Forty years ago W. & S. Blackinton made the first gold filled, hard soldered, fancy link vest chains. By way of celebrating our

FORTIETH BIRTHDAY

we beg to announce a plan of direct interest to the entire jewelry trade.

In January, 1907, we will give to the retail jeweler who uses the greatest number of Blackinton chains between May 1, 1906, and January 1, 1907, an Automobile Touring Car of standard grade and 1907 model.

To the retail jeweler who uses the second greatest number we will give an Automobile Runabout of standard grade and 1907 model.

To the retail jeweler who ranks third in this contest we will give a Motorcycle of standard grade and 1907 model.

The Retail jeweler who ranks fourth in this competition will receive an American Watch Lathe of latest design.

All other retail jewelers who use Blackinton chains will share in the following provisions:

Between May 1, 1906 and January 1, 1907, every Blackinton Old Reliable W. & S. B. ★ 1-10 or Globe Filled $\frac{1}{8}$ vest or Dickens chain will bear an aluminum tag, illustrated herewith. These tags have a definite value and should be preserved.

The sales of Old Reliable W. & S. B. ★ 1-10 chains are enormous and we wish to draw particular attention to our Globe Filled $\frac{1}{8}$ chains, in view of the constantly increasing demand for the highest grades of gold filled chains.

Upon receipt of forty tags from any retail jeweler, we will send free of charge one of our Globe one-eighth gold filled vest chains. For seventy-five tags we will send two Globe chains and for one hundred tags we will give three Globe chains. Retailers should preserve the tags as fast as goods are placed in stock and should decline to receive from jobbers chains that do not bear the coupon tag.

We offer a choice of twelve patterns of Globe one-eighth gold filled chains in selecting premiums, and illustrations will be mailed free on request. Globe one-eighth gold filled chains are guaranteed to assay one-eighth, are gold soldered and are warranted to give satisfaction for twenty years. Old Reliable W. & S. B. ★ 1-10 chains are gold soldered, and are the perfection of design, finish and durability. All Blackinton chains are made by the Wearbest process which hardens the gold and greatly increases the wearing qualities. This process is owned by us and no other chains are made in this manner.

Retailers who find difficulty in obtaining Blackinton chains may, upon written request, receive a list of jobbers handling the goods in their territory, or a selection package will be sent through any jobber whom the retailer may designate. For further particulars, address the manufacturers and watch this space.

W. & S. BLACKINTON CO., North Attleboro, Mass.

Pittsburg.

Mr. and Mrs. D. L. Cleeland, Butler, Pa., were in Pittsburg last week.

Henry A. Barrett, of the George B. Barrett Co., is contemplating making a European trip in the hope of benefiting his health.

W. W. Wattles last week disposed of a piece of property, 55 by 121 feet, in Lang Ave., 21st Ward, for which he received \$12,500.

The John M. Roberts & Son Co. last week subscribed \$100 to the local California Relief Fund, which now amounts to over \$300,000, most of which has been forwarded to San Francisco.

The Pittsburg Association of Credit Men held its annual dinner at the Union Club last Wednesday night. The association intends to watch closely all proceedings brought under the bankruptcy act.

It is reported on very good authority that a Cincinnati firm contemplates opening a jewelry store in lower Fifth Ave. in the vicinity of the stores of E. P. Roberts & Sons and the Hardy & Hayes Co.

The annexation of Allegheny to Pittsburg now appears to be practically assured. The court has ordered an election on the question of consolidation June 12, which will be by joint vote of the two cities. If annexation takes place, Pittsburg will have a population of 600,000.

The jewelers in Allegheny who kept accounts at the defunct Enterprise National Bank are breathing easier since it is reported that the sale of the Santa Fe Central Railroad of New Mexico, a large creditor of the bank, may realize a handsome sum. This road was built by the Pennsylvania Development Co., which is the real debtor to the bank.

Joseph G. Wasson, manager of the jewelry department of Joseph Horne & Co., has been made chairman of the investigating Committee of Pittsburg Councils, appointed to inquire into charges made against certain Councilmen and other officials, suspected of accepting money and aiding in the vice traffic. Mr. Wasson leaves shortly for Europe to purchase goods for his firm.

Among the out-of-town merchants who visited Pittsburg last week were the following: Philip Ruprecht, Sharpsburg; S. B. Munhall, Freeport; A. A. Fortney, Morgantown; John M. Kennedy, Waynesburg; F. M. Langnecker, New Brighton; Abe Teplitz, McKeesport; George McGill, Mason-town; Frank F. Robinson, Vandergrift; D. L. Cleeland, Butler; J. S. Murphy, Greensburg; C. H. Bauer, Blairsville; Robert W. Brady, Washington; D. A. Murray, Canal Dover; J. J. Schmidt, Turtle Creek; J. Linnenbrink, Rochester.

As soon as the requisition papers can be obtained, Steven Baccario will be brought to Pittsburg from Atlantic City, so the police say, on a charge of N. Gallinger, 1200 Penn Ave., of getting \$2,000 worth of diamonds and several watches on the pretense that he had customers for them. Baccario was arrested Wednesday at the seashore on a telegram sent by Detective Crooks, of this city, charging with larceny by bailee. Baccario had been employed in a downtown club for 15 years and lived in Center St., Wilkinsburg. For years he had been trading with Gallinger. He is said to have given Gal-

linger some money in part payment for the jewelry, and said that he would turn over the balance in a few days, but had not been seen since. He disappeared some time ago, and Gallinger reported his loss to the detectives, who traced him to Atlantic City. Steps are now being made to secure requisition papers.

Lancaster, Pa.

Archie Musser has gone to Waltham, Mass., to take a position.

Frank G. Huber, of the H. S. Meiskey Co., is home from his trip.

M. Rosenstein and wife are home from a trip to Little Rock, Ark.

F. A. Peters, of the H. S. Meiskey Co., has been visiting New York on business.

A. B. Smith, head salesman for Augustus Rhoads, served as a jurymen, last week, in the common pleas court.

Percy W. Appel, of W. W. Appel, participated in the minstrel show given last week by the students of Franklin and Marshall College at Fulton Opera House.

E. R. Kant, C. E. Foose and W. N. Shute, representatives of the Non-Retailing Co., who were here for the past week helping take account of stock, have gone out on the road again.

M. Friedman, of M. Friedman & Co., New York, visited Lancaster last Saturday, accompanied by his bride of a few days. He received hearty congratulations from numerous friends here.

S. Kurtz Zook, who recently removed his optical department to an upper story, has sent his repair department up to keep it company, in order to gain room for his jewelry stock on the lower floor.

Among the out-of-town jewelers who visited Lancaster last week were: Mr. Helm, of F. W. Helm & Co., New Providence, Pa.; C. E. Hinkle, Ephrata; W. J. Frazer, Lincoln; Frank Kessler, Mt. Carmel, Pa., accompanied by Albert Richards; Leonard B. Martin, Cincinnati.

G. E. Fleisher, head watchmaker for Ezra F. Bowman's Sons, is on the sick list. Harry Carson, Bellevue, O., is taking a course in watchmaking at the Ezra F. Bowman Technical School, and J. Tschantre, who took a course in engraving at the school, has returned to Cambridge, Ind.

At the celebration Sunday of the 50th anniversary of the Junior Missionary Society of Trinity Lutheran Church, a beautiful gold plate, mounted on mahogany and exquisitely engraved, all the work of Ezra F. Bowman's Sons, was presented to Rev. Dr. C. F. Krotel, now of New York, who organized the society while he was pastor of Trinity Church.

New Orleans, La.

Louis Kaufman, a jeweler, who lives at 2304 Magazine St., learned last week that his daughter, Mrs. Loth, her husband and child were uninjured by the fire and earthquake in San Francisco, though in the city at the time.

The Royal Loan & Jewelry Co., Ltd., of this city, has obtained a charter as a corporation, with a capital stock of \$15,000. The officers are: Peres M. Stein, president; Albert Hurwitz, secretary and treasurer, and also the first board of directors.

Baltimore.

The will of Carl August Steman, probated recently in the Orphans' Court, leaves all his estate to his widow, Marie Steman, and names her executrix without bond. Mr. Steman died March 10.

Some vandal has been passing along the retail district disfiguring large plate glass windows by scratching them. Fourteen merchants have reported the fact in the last few days to the detective department.

Joseph Castelberg, president of the Castelberg National Jewelry Co., is having planned, in conjunction with Martin E. Greenhouse, Philadelphia, Pa., a modern building on the large lot on Baltimore St., which they recently purchased. The plans are not entirely completed as yet.

Edward L. Parker was sentenced to one year in jail, April 26, by Judge Morris, in the United States District Court, on the charge of using the mails for fraudulent purposes. It was stated at that time that Parker was arrested in New York in November and that he was also wanted in Philadelphia for defrauding a jewelry firm there of \$2,270 worth of goods.

George F. Buchholz, president of the Higbie-Barbour Mfg. Co., who announced, a little over a month ago, that the company would remove to Baltimore and erect an up to date silverware plant here, received bids from contractors for the new plant, last week. The bids were all rejected and Mr. Buchholz announced that the structure would be built under his own supervision. The building, as stated in THE CIRCULAR-WEEKLY, will be located on the Franklin Road, and will be three stories high and 50 feet by 150 feet. The work will be followed after plans prepared by Architect Henry J. Tinley.

Detroit.

Adolph Bunge, 260 Gratiot Ave., will shortly move to 593 Mt. Elliott Ave.

W. A. Sturgeon, of W. A. Sturgeon & Co., has returned from a trip to New York.

Frank Mathauer, with Mathauer & Koesler, has returned from a trip to the trade in the State.

Le Heup & Thomas, 80 Michigan Ave., have acquired the lease of the store occupied by Bing Bros., 82 Michigan Ave., and will enlarge their jewelry business.

The new firm of J. Friedberg & Son, 210 Woodward Ave., successors to George Schaffner, held its formal opening last week. Morris Friedberg, junior member of the firm, was with Mr. Schaffner for six years.

Thus far no clue has been obtained to the thieves who stole several hundred dollars' worth of jewelry, watches and old gold from the store of E. D. Trebilcock, of this city. A liberal reward has been offered for the apprehension of the thieves.

About 20 jobbers and manufacturers met at the Hotel Normandie, Friday night, to discuss the advisability of forming an organization among the local trade for the purpose of booming Detroit in the middle states as a jewelry jobbing center. The members of the trade in Detroit believe valuable results would come from such a movement. Another meeting will be held May 19.

GORHAM SILVER

GORHAM SPOONS AND FORKS.

¶ So long as May and June continue to be the most popular of "wedding months," so long will the Jeweler at this season of the year be called upon to meet insistent demands for suitable wedding gifts.

¶ None is more generally sought after than the set of Spoons and Forks destined to take its place among the most cherished of family heirlooms.

¶ No wider range of selection can be found than that offered by the various patterns of Gorham Silver Spoons, Forks and Serving Pieces. These are made in more than a score of distinctive designs varying from the least ostentatious to the most elaborately decorative, and put up in convenient chests holding complete sets, from the smallest combination to those containing every essential in flat silverware.

Large Gem Importations During April.

WITHOUT a break the im-
 portations of precious
 stones continue to
 surpass all previous figures, the records of
 the jewelry examiner at New York, Gen.
 Geo. W. Mindel, showing that the value of
 the precious stones and pearls which came
 into this port last month were \$1,185,000
 above the record breaking total of April,
 1905; this is not only the largest amount ever
 recorded for April, but is one of the larg-
 est amounts ever recorded for a single
 month. Of the total, \$3,614,932, the value
 of the cut stones and pearls reached the
 enormous sum of \$2,682,707, which was over
 \$1,170,000 more than the value of these
 importations a year ago, while the value of
 the uncut precious stones, principally dia-
 monds, amounted to \$932,224, the largest
 amount ever brought in during any April
 on record. It would be safe to say that the
 figures of last month established a standard
 that will be hard to pass in the future, no
 matter how good the business in the pre-
 cious stone trade may be.

The following table affords a comparison
 of the values of the importations of precious
 stones at the Port of New York during
 April in the past 10 years:

April.	Cut.	Uncut.	Total.
1906.....	\$2,682,707.56	\$932,224.53	\$3,614,932.09
1905.....	1,511,945.78	917,392.41	2,429,338.19
1904.....	808,423.34	651,052.66	1,459,476.00
1903.....	1,449,853.76	508,364.55	1,958,218.31
1902.....	1,118,866.82	422,481.79	1,541,348.61
1901.....	1,579,491.72	718,545.13	2,298,036.85
1900.....	298,021.87	53,632.57	351,654.44
1899.....	533,210.65	472,903.16	1,006,113.81
1898.....	339,172.04	109,265.79	448,437.83
1897.....	21,639.72	31,671.58	53,311.30

Proposed Jewelry Trade-School for Attleboro.

THAT the manu-
 facturing jewel-
 ers of Attleboro ap-
 prove of the report of
 the special commission appointed by for-
 mer Gov. Douglas to study the subject of
 boys and girls employed in the State's in-
 dustries, in so far as it recommends a trade
 school at Attleboro to teach jewelry-making,
 is evident from the interviews with the lead-
 ing manufacturing jewelers of that section,
 published in another column of this issue;
 they also seem to acquiesce in the findings
 of the commission that a great majority of
 the graduates of the high schools are lack-
 ing in that "industrial intelligence" which
 would be manifest in a child who had been
 brought up with a technical education and
 had been taught to develop his eye and
 hand as well as his mind. The commission
 which was headed by the Hon. Carroll D.
 Wright, as told in THE CIRCULAR-WEEKLY,
 April 18, had a special committee study the
 conditions in Attleboro, which committee
 embraced Judge Warren A. Reed, Secretary
 George H. Martin of the State Board of
 Education and Mrs. Mary Morton Kehew.
 The expert who conducted most of the ac-
 tive work of the investigation was Dr.
 Susan M. Kingsbury.

It is evident that, before giving their
 final approval to all the suggestions of the
 committee in regard to a trade school in At-
 tleboro, to be established by the State, many
 of the manufacturers are anxious to obtain
 more information as to exactly how such a
 school will be conducted, what the course
 of education will be and how the product

of such a school will be marketed (whether
 in competition with the manufacturers or
 otherwise); but in the absence of these de-
 tails it is evident that the manufacturers
 approve the general plan, and if properly
 carried out will no doubt give the State
 authorities their hearty co-operation.

The need of better trained operatives to
 maintain the standard of work or to ad-
 vance the quality of the product, particu-
 larly in the silverware line, has long been
 felt, and it is to be hoped that some action
 will be taken by the authorities of the Bay
 State Commonwealth toward putting the
 suggestion of its commission into practice,
 at an early date, that our Eastern manu-
 facturers may have the benefit of properly
 trained young operatives, such as the Ger-
 man manufacturer enjoys to a great extent
 to-day.

Jewelry Failures STATISTICS relating to com- During April. mercial insolvencies during the month of

April just passed show that the number of
 failures continues to decrease, as compared
 with the same months of 1905, there being
 793 failures last month, as against 833 in the
 corresponding period of a year ago; the li-
 abilities remained about the same, slightly
 over \$8,000,000 in each case. Of the total
 failures last month, 187 were in manufac-
 turing lines, with liabilities of \$2,100,000;
 575 were in trading lines, with liabilities of
 \$3,200,000, and 31 failures were among
 brokers and transporters, etc., with liabili-
 ties of \$2,700,000. On the whole, the total
 liabilities during the month of April were
 smaller than during any month since Octo-
 ber last.

As far as the figures of the jewelry trade
 are concerned, the showing for the month
 is exceptionally good. There have been but
 11 failures, with liabilities of \$64,025, an
 average of \$5,820, as against 13 failures in
 April, 1905, with liabilities of \$88,194. How
 these figures compare with those of April
 in former years is shown by the table giv-
 ing failures by branches of business, com-
 piled for *Dun's Review*, which records 20
 failures in April, 1904, with liabilities of
 \$62,989; 14 failures in 1903, with liabilities
 of \$61,839, and 12 failures in 1902, with li-
 abilities of \$107,711.

Death of Hezekiah C. Bridgham.

MYSTIC, Conn., May 2.—With the death,
 April 30, of Hezekiah C. Bridgham, Mystic
 lost one of its oldest residents and a well-
 known watchmaker.

Mr. Bridgham, who was 94 years of age,
 was a native of Middletown. When 14
 years old he was apprenticed to Cheney
 Bros., of East Berlin, for the purpose of
 learning the watchmaker's trade. In 1840
 he opened a store in Norwich, removing in
 1852 to New London, where he remained
 three years, after which he came to Mystic.
 The deceased was actively engaged in busi-
 ness until two years ago.

Mr. Bridgham's genial nature and happy
 disposition made a host of friends for him.
 He is survived by three daughters, one son
 and several grand and great grandchildren.

Interment was in Yantic Cemetery, Nor-
 wich.

MOUNT SOME OF YOUR STOCK IN ARCH CROWNS

They will sell more readily because they appear larger and brighter. This is caused by the open "Arch" construction, which admits more light under the stone.

The new Completed Bearing Arch Crown Mounting affords perfect security and protection to the stone. It is made of rolled and toughened stock, and the perfect bearing and tip insure reliable stone setting.

Thomas C. Kunkel moved recently from Weeping Water, Nebr., to Venango, Nebr.
Milton, Gardner & Son, Clayville, Pa., have dissolved, Elgy Gardner continuing the business.

New York Notes.

Judgment for \$120 was filed last week in favor of the Keller Jewelry Mfg. Co. and against Max Paul.

Judgment against the Gattle Jewelry Co. for \$159 was filed last week in favor of Frank P. Hoffman.

N. Schwartz moved last week from 1413 Third Ave. to 1422 Third Ave., where he had leased larger quarters.

I. I. Foster, of Milton L. Ernst, 12 Dutch St., left last week on his western trip, carrying his new line of samples.

Dr. Julius Moskovitz recently took charge of the optical department of the Knickerbocker Jewelry Co., 479 Fulton St., Brooklyn.

J. Freudenheim & Son have moved from the fifth floor to room 408 on the fourth floor of the Jewelers' building, 9 Maiden Lane.

L. Laubheim, of Laubheim Bros., 65 Nassau St., accompanied by his wife, left Saturday for the European diamond markets on the *Kronprinz Wilhelm*.

M. Moussaief and S. Kutner, both of Paris, France, arrived in New York last week and went on to visit the pearl fisheries of the Wabash.

Frederick Goldsmith, of Ingomar Goldsmith & Co., 182 Broadway, sailed April 28 on the *Finland*, and will pass about four months in Europe, most of the time in the diamond markets.

Some of the coins collected by the late Gen. L. P. Di Cesnola, for many years director of the Metropolitan Museum of Art, will be sold May 14 at the office of Lyman H. Low, 14 E. 23d St.

Among the exhibitors at the International Exposition, which opened May 1, in Tourcoing, France, is the Art Metal Goods Mfg. Co., which shows electric lamps in gold, silver and vert antique.

F. L. Peixotto will move this week from 10 Cortlandt St. to 182 William St. Mr. Peixotto several months ago bought out Joseph Friedman, who in turn was the successor of the Corbin Co.

Under a writ of certiorari the duty on metal beads is to be reviewed. The lower courts held that the duty should be 45 per cent. ad valorem as unenumerated articles and not 35 per cent. as beads.

Maurice L. Powers, of Powers & Mayer, 258 Fifth Ave., and Mrs. Powers returned from Europe last week on the *Carmania*. J. W. Mayer, of the same firm, also returned last week on the *Kronprinz Wilhelm*.

Klipper Bros. said yesterday that they will not appeal from the verdict of the jury against them in the suit which they brought against Ira B. Wiley, a jeweler of Springfield, O. The litigation, now ended, was in relation to the sale of a watch valued at \$175.

Charged with stealing six diamond rings valued at \$530, which were entrusted to him on memorandum, Jacob Barnett, 229 W. 15th St., was last week held in the Essex Market Court for the Grand Jury. The complainant was Harry Fagan, diamond dealer at 8 Delancey St. Barnett was released on \$1,000 bail.

Chas. Keller & Co., 73 Nassau St., have recently established a special department devoted to their foreign trade. Jose M.

Ibarra, 33 Lamparilla St., Havana, is taking charge of the Cuban business; Joan J. Julia has been appointed South American representative, and offices will be opened in Buenos Ayres, Argentine.

Loring Andrews, of the Loring Andrews Co., Cincinnati, O., arrived in New York this week and registered at the St. Regis. He will sail to-morrow for Europe on the *Amerika*.

Friends of Julius Mamluck, of Julius Mamluck & Co., 68 Nassau St., received word last week that he and the members of his family who were in the train wreck between Cherbourg and Paris, France, escaped without injuries. Mr. and Mrs. Mamluck went across on the *Kaiser Wilhelm II.*, leaving New York, April 24.

A paper at Nyack, N. Y., reports the arrest of a traveling jeweler, who came from New York, on the charge of larceny, by transferring to a creditor a watch entrusted to him for repairs. A strange story is added, to the effect that the jeweler, after he arrived in Nyack, paid \$2 for a wife, buying her from the proprietor of a small eating house.

The sale of the sketches and completed works of Paul Nœquet, the Belgian sculptor, who lost his life after a balloon ascension several weeks ago, was conducted last week by a number of his friends in the American Art Galleries, 6 E. 23d St., for the benefit of his mother and sister. Some of the statuettes have been cast in bronze by the Gorham Mfg. Co.

Plans were filed last week by Simon Frankel, of Joseph Frankel's Sons Co., 68 Nassau St., for his new building to be constructed at the southwest corner of Fifth Ave. and 47th St., at an estimated cost of \$200,000. The drawings call for an 11-story building. Maynicke & Franke are the architects. The store in this building has already been leased by Howard & Co., now at 254 Fifth Ave.

John Henry Buck, the well-known expert on old silver, who was for many years head of the ecclesiastical department of the Gorham Mfg. Co., and who is author of several works on old plate, and also of the series of articles on "Old Silversmiths of America," published in THE JEWELERS' CIRCULAR—WEEKLY, was recently appointed curator of metal work in the Metropolitan Museum of Art. Announcement of his selection for this responsible position is made in the current issue of the *Bulletin* of the museum. The publication also contains much interesting information in relation to recent accessions of works of art at the institution.

Creditors of A. J. Rand, Holyoke, Mass., representing a majority of the accounts, met last Tuesday in the rooms of the Jewelers Board of Trade, New York, in accordance with a request received from him. He made a statement indicating that his liabilities were \$22,600, and he estimated his assets at \$17,686. This includes a valuation of \$16,145 on stock and fixtures, of which \$3,000 was for fixtures. Part of the stock, he said, was quite old. The accounts receivable amount to \$1,400, and the cash on hand was \$101. After a discussion the creditors decided to accept 25 per cent. in full settlement. Mr. Rand agreed to execute a deed of his assets for the benefit of creditors to a trustee to be selected by the Jewelers Board of Trade. This trustee will conduct

an auction, and out of the proceeds will make the payments on the 25 per cent. basis. The surplus will go back to Mr. Rand.

The case of Simon Goldsmith against the Solidarity Watch Case Co., which was dismissed by Justice Greenbaum of the Supreme Court, as briefly noted a week ago, was an action to recover \$2,500 for alleged breach of a contract for the employment of the defendant on a commission basis. The contract of employment was made Feb. 15, 1903, and the business relations of the plaintiff and the defendant ended Jan. 27, 1904. The plaintiff claimed that he had carried out his part of the contract and had been dismissed without proper cause. The defendant company denied this and charged that he had violated the contract in various ways, such as working for other manufacturers, not turning in collections promptly, obtaining improper percentages, selling to private persons and borrowing money from customers. H. L. Herzog, as attorney for the defendants, made the motion for the dismissal of the case, which was granted by the court. C. H. Machin represented the plaintiff.

Ludwig Nissen, of Ludwig Nissen & Co., 182 Broadway, during the past week has been the recipient of many congratulations from friends in the trade on the 25th anniversary of his entering the jewelry business. On May 1, 1881, he started as a partner of Fred. Schilling under the name of Schilling & Nissen, with a little office on the top floor of 51 Nassau St. Mr. Nissen's career has often been the occasion of articles in the public press, the writers citing him as an encouraging example of the self-made man. To a CIRCULAR—WEEKLY reporter he said yesterday, with a smile, that while not eager for this publicity he cannot object if his experience will in any way be used for the encouragement of young men. When he started in the firm mentioned, he frankly says, he had no previous experience in the jewelry trade, and could scarcely tell gold from brass. More than that, he knew nobody in the trade from whom to buy or to whom to sell. His partner was a repairer. "The first thing I did," said Mr. Nissen, "was to sweep out the office, because I could not stand such a dirty place. The second thing was to make an inventory of the business, which showed that we had \$3,000 less than nothing; that is, we owed that much more than our assets." Mr. Nissen went on the street after orders, and sometimes in the earlier years, after getting an order, had to borrow from the man giving it sufficient money with which to buy the gold. As he went about dealers offered him diamonds and other gems on credit, and he decided that if they could trust him he could afford to be trusted. Schilling & Nissen after two and one-half years changed to Ludwig Nissen & Co., the name which has continued since. Mr. Schilling remained in the firm five years. In 1885 the firm moved to 18 John St. When Mr. Schilling retired, A. C. Chase became a partner. This association continued for five years. After Mr. Chase retired Mr. Nissen admitted to the firm three men who had been in the employ of the firm for many years—Emil Knopf, John W. Ruefer and F. L.

New York Notes.

(Continued from page 59.)

Wood. They have continued with him since. Two years ago the firm moved to its present quarters.

E. M. Weinberg & Co. moved last week from 276 New Jersey R. R. Ave., Newark, N. J., to 134 Mott St., New York.

Reuben Cohen, Chicago representative of the Acme Leather Goods Co., is spending a few days at the New York office, 562 Broadway.

Louis Friedlander, of R. L. & M. Friedlander, 30 Maiden Lane, returned Sunday on the *Amerika*. Mr. Friedlander procured some desirable diamonds while abroad.

R. Harris, of Harris & Co., Washington, D. C., who has been in Europe, with his family, for his health since last October, is now on his way home, much improved, and will arrive on the *Zeland*, of the Red Star Line, which is due in this city Monday next.

Henry Steelplug, who was engaged in the diamond setting business in San Francisco, Cal., at the time of the earthquake, escaped injury and, with his wife, arrived last week in New York. He has rented an office in the S. F. Myers building, 47 Maiden Lane.

George W. Heath & Co. have moved their fountain pen and jewelry factory from 27 Thames St. to 380 Canal St., corner of West Broadway, where additional room and more facilities have been obtained in order to keep up with the growing demand of the business.

Members of the New Yorker Watchmakers' Society will have their annual May walk next Sunday. They will go by trolley lines to Englewood and thence by train to Demarest, N. J., where their headquarters will be at the Midway Hotel, conducted by an old watchmaker and member of the society, Julius Friederich.

Charles N. Hancher, Wheeling, W. Va., has been in New York this week, and will sail to-day on the *Baltic* for Europe on his annual buying trip. He will pass several months visiting Amsterdam and Antwerp for the purchase of diamonds, and will spend some time in Paris, Berlin, Munich, Venice and Frankfurt-on-the-Main in search of art novelties.

Jewelers Gold Bars Withdrawn and Exchanged at New York.

Week Ended May 5, 1906.

The U. S. Assay Office reports:
Gold bars exchanged for gold coin....\$443,083.65
Gold bars paid depositors..... 81,897.18

Total	\$524,980.83
Of this the gold bars exchanged for gold coin are reported as follows:	
April 30.....	\$92,210.45
May 1.....	52,143.49
" 2.....	107,916.07
" 3.....	61,921.94
" 4.....	86,898.76
" 5.....	41,992.94
Total	\$443,083.65

Samuel Stone, Carbondale, Pa., and Miss Julia Mendelsohn were recently united in marriage in Wilkes Barre. After the ceremony the couple set out for New York on their wedding trip.

The Diamond Markets.

ANTWERP, April 26.—During the past two weeks there was a slight improvement in business, owing probably to the presence of a large number of foreign buyers, among whom were: Messrs. Presburg, M. Slahotsky, Goldschmidt, Eknayan, Hirschelsohn, Lazaroff, Vuillet, Roulina, Wims, Goldenberg, Slyper, Smale, B. Rapoport, N. Grunzweich, Vet, M. De Vries, Weissberg, Arons, Kricks, all of Paris; Messrs. Herzog, Herzfelder, Ben Rees, Jacob Strauss, New York; Mr. Sickles, Philadelphia; Mr. Fox, Cincinnati; Mr. Samek, Vienna; Messrs. Nava, Bellusky, Milan; Mr. Nelken, Madrid; Mr. Y. E. Slyper, London; Mr. Pollak, Moscow.

The demand for very small, white brilliants and roses of two to four grains still continues, but the sale of small, three-faces, as well as six-faces and brown roses, has fallen off. Large brown roses are being asked for, but not offered. On account of the large demand for rough goods and the scarcity of the same it is expected that there will be another advance.

On the occasion of the World's Fair of Liege in 1905, two well-known diamond merchants were made knights of the Leopold's Order, A. Adler and Mr. Michaux. Mr. Adler has been seriously ill, but is now better.

Work has been begun on the five buildings at Rue Leys for Louis Coeternans, diamond merchant. In one of these buildings will be the statue of Lodewyk van Berken, the inventor of the diamond polishing.

AMSTERDAM, April 25.—Business is still quiet, for though there is no small demand for goods, the desired articles are not obtainable. Very small roses and brilliants find a ready market. Large stones are not so much in demand.

The association of the employers and the diamond cutters made a contract, fixing the salaries for a year from June 1, 1905, to June, 1906, but the committee of the "bond" have been obliged to cancel this agreement, as the members demanded higher salaries than those fixed by the agreement.

Providence.

The factory of the Ostby & Barton Co. was closed last week for the annual inspection of boilers and necessary repairs.

It is probable that by the first of next month the new factory of the George W. Parks Co., on Aborn St., will be ready to begin manufacturing.

After a four weeks' trip to Germany and France, William Shackleford, well known in local jewelry circles, is back with a number of suggestions in the stone line.

Harry Fulford, of Fulford & Hobart, has been elected Grand Representative to the Sovereign Grand Lodge, I. O. O. F., from Rhode Island, the honor being conferred upon him at the annual gathering of the State order last week.

The amount of the local jewelers' relief fund for the San Francisco sufferers had reached, Monday, the total of \$3,150.25, a handsome showing by the employers and employees, who have contributed so liberally to aid their brethren in the stricken city.

The Narragansett Hotel presented an ani-

mated scene last week, the early buyers having arrived to get a line on novelties and jewelry. Among those registered were H. Estlinhausen, St. Louis; Albert Kunstader, Chicago; William Lehman, Baltimore; L. Block, Milwaukee; Herman Pichel, New York; L. Hahn, Cincinnati; George Crompton, St. Louis; Walter Mayer, Cincinnati; D. Bemis, Toronto; James Eastwood, New Glasgow, N. S.; J. L. DeGrazier, Dallas, Tex.; M. Hurvitz, Rochester, N. Y.

Third Annual Convention of the New Jersey State Optical Society.

NEWARK, N. J., May 8.—With President F. H. Hewlett in the chair, the third annual meeting of the New Jersey State Optical Society was called to order at 4 o'clock yesterday at 19 W. Park St., this city.

Following the routine business nominations for officers were called for, and the election resulted as follows:

President, L. B. Hilborn; vice-president, Robt. G. Smith; secretary, Jos. J. Hartman; treasurer, Louis A. Rochat.

Executive Committee: J. E. Jacckle (chairman), C. J. Brotherly, F. H. Hewlett, Robt. G. Smith and J. S. Wheeler.

Applications for membership were received from Messrs. De Grote and Croft; the by-laws were suspended and they were duly elected members. A communication, signed Dr. F. J. Monohan, created spirited action. The writer desired membership in the society, stating that though he called himself "Doctor," he was not a physician, but wanted his certificate engrossed "Dr.," as there was no law prohibiting the use of that title by any one. The society, with one voice, disapproved of such action, and voted that Mr. Monohan's money be returned to him and his application refused.

Instead of holding one business and three social meetings each year, the society will hereafter hold four quarterly business meetings. A hearty vote of thanks was tendered the retiring officers, following which President-elect Hilborn made a speech that showed in every sense his fitness for the office and the strict manner in which the society's business will be carried on during the coming year. Following the business session, Prof. R. M. Lockwood lectured upon "Practical Points on Fogging," and Alfred Wenzel upon "Eye Nerve Strain," both of which were highly instructive and interesting.

Having freely partaken of the intellectual feast, the members, in a body, adjourned to the banquet hall to satisfy their more material needs. President Hilborn introduced P. A. Dilworth, of New York, who, after some graceful remarks, asked to be permitted to talk "shop." He then urged that all optometrists charge a fee for examination. This was met with strenuous opposition by the New Jersey members. An impromptu debate was arranged, and Messrs. Dilworth and Ryer took the positive, while Messrs. Hilborn and Lening took the negative side. Later all members were asked to join in the discussion, which was done with a friendliness rarely surpassed. The discussions were warm, as the subject is of vital importance to all, yet it was carried on in an open-spirited manner, and all feel that a great step forward has been taken toward settling this trying question.

Ball's Official Standard R.R. Watches

WHAT WOULD YOU GIVE FOR A LIFELONG CUSTOMER?

Try this plan.

Sell your next watch customer a "Ball."

Its reliable performance will convince him you are a dealer to be depended on—he'll keep coming back for other things.

The watch will win you his business and friendship for always.

Write for booklet, and watch this space.

We want to add a lot of new friends to the Ball family of railroad watch dealers.

No. 14.

Chicago Notes.

Geo. J. Gubbins has returned from a western trip.

Sig. Stern, of Stern Bros. & Co., paid a visit to Chicago last week.

M. I. Loeb, of the Dueber-Hampden companies, was in this city last week.

Tom Boylan, with Manning, Bowman & Co., is here from the Pacific coast.

A. Max Holtzheimer has established himself in room 502, Heyworth building.

The name of the Photo Jewelry Mfg. Co. has been changed to the Cruver Mfg. Co.

A new retail jewelry store has been opened on Monroe St., just west of State St.

Edward Alberti, retail jeweler at 900 Milwaukee Ave., will sail for Europe in June.

The Schafer Jewelry Co. has removed from 124 Washington St. to 134 Madison St.

W. A. Fay, with the John T. Mauran Mfg. Co., has returned from a western trip.

E. S. & W. S. Fowler, opticians, have removed from 96 State St. to 143 Wabash Ave.

H. E. Cobb, with the Daggett & Clap Co., returned last week from a visit to the factory.

F. H. Challen, of the Ohio Cut Glass Co., has removed from room 208 to room 201, 35 Randolph St.

Robert L. Clark, with the Towle Mfg. Co., returned last week from San Francisco with his wife and baby.

Dan Axman received the congratulations of his friends, last week, when he became the father of a fine boy.

Henry E. Cohen has secured the gold mounting line of a New York firm, which he will represent in Chicago.

M. L. Levy & Co., San Francisco, have notified the trade here that they have opened offices at 461 13th St., Oakland, Cal.

A telegram to Jack Stanley from J. E. Birmingham, of Shreve & Co., San Francisco, says that "all the boys are well."

G. A. Le Roy, of the Western Clock Mfg. Co., La Salle, Ill., paid a visit to the Chicago office of the company last week.

R. W. Cohen is on a visit to the factory of the Acme Leather Goods Co., New York, which concern he represents in Chicago.

Benj. Allen, accompanied by Mrs. Allen, returned last week from a two months' sojourn at Atlantic City and Lakewood, N. J.

C. E. Child, with the C. M. Robbins Co., left, last week, for the east, to visit his parents, who are reported to be dangerously ill.

E. A. Moore, representing Albro & Kettesy and Sikes & Strandberg, has taken an office on the 10th floor of the Silversmiths building.

Larry Edwards, with the Chas. E. Hancock Co., and Jim Edwards, with the B. S. Freeman Co., left Saturday on a trip through the middle west.

Harry E. Farquharson, representing E. A. Potter & Co. and E. D. Gilmore & Co., has removed from room 603 to room 716, Columbus Memorial building.

O. F. Samuelson, Pacific coast salesman for the Towle Mfg. Co., arrived here last week. Mr. Samuelson did not lose his samples, as reported last week.

F. R. Sheridan, with Arnold & Steere, left for the Pacific Coast, Saturday. Mr. Sheridan will return with his wife and family, who have been spending the Winter as Los Angeles, Cal.

Richard Vaeth, Tacoma, Wash., passed through here last week, on his way home. Mr. Vaeth was accompanied by his daughter, who had been attending a college in Massachusetts.

D. B. Ward, formerly with the Woodstock-Hoefer Watch and Jewelry Co., Kansas City, Mo., was here last week buying stock. Mr. Ward has entered the jobbing field in Kansas City.

Harry Jehlenger, formerly jewelry buyer for The Emporium, San Francisco, which was totally destroyed, arrived here last week, with his wife and family. Mr. Jehlenger will settle here.

H. P. Cutter, formerly with Regnell, Bigney & Co., is now living on his fruit farm at Lake Cora, Mich. Mr. Cutter is vice-president of the Independent Fruit Growers' Association of that town.

Herbert W. Allen, of Herbert W. Allen & Co., diamond merchants in the Columbus Memorial building, will sail for Europe the latter part of June on a visit to the diamond markets. Mr. Allen will accompany him.

Aug. Maschmeyer, well known in the silverware and cutlery trade, was here last week. Mr. Maschmeyer has opened a jobbing, silverware, cutlery and cut glass busi-

ness in St. Louis, at 6th and Olive Sts., under the name of the Maschmeyer-Richards Silver Co.

The Bauer Jewelry Co. has been incorporated in Elgin, Ill., with a capital of \$8,000. The incorporators are: William D. Ackermann, Oliver Rystrom and Paul Zumkeller. This is an old established business under a new name. Mr. Bauer, the founder, died two years ago.

J. J. Altpeter, an old time jeweler and politician, died of heart failure last Sunday and was buried Saturday. Mr. Altpeter formerly had a jewelry store at 801 S. Halsted St. In 1878 Mr. Altpeter was elected Alderman in the 19th Ward and served two terms. In 1889 he was made sanitary trustee and served six years.

Charles Conner, alleged to be the man who smashed the window of the Bauman Jewelry Co., last November, was arrested here last week. Joe Bauman identified him as the man who smashed the window and stole a diamond heart valued at \$5,000 and a diamond lorgnette chain valued at \$3,000. The heart was subsequently found and returned to the Bauman Jewelry Co.

Sol Caro, formerly a salesman for Madison & Steele, who was arrested on a charge of embezzlement and robbery by the latter concern, was discharged last week and declared not guilty by a jury in Judge Honore's court. No evidence was heard, the question being whether or not the crime had been committed in the State of Illinois. Judge Honore decided he had no jurisdiction and the jury was instructed to return a verdict of not guilty.

F. M. Drummond, credit man for the Towle Mfg. Co., was held up and robbed, last Wednesday, at 11.30 p. m., in front of his residence, 443 Dearborn Ave., by three young bandits. With one revolver held at his stomach and another at his head, Mr. Drummond was separated from \$58 in cash, a gold watch and chain valued at \$70 and a pearl scarf pin. The police have arrested a man named Riordan, who is suspected of being one of the robbers.

Mr. and Mrs. James Galloway Hallas have announced the marriage of their daughter, Charlotte Louiz, to William Alf Beckingham. The wedding took place April 28, at Grand Rapids, Mich. Mr. Beckingham is buyer and manager of the silverware

To the Jobbing Trade.

for the coming season.

department of Pitkin & Brooks, State and Lake Sts. The bride and groom are on a wedding tour and sailed from New York, Wednesday, on the *Teutonic*. They will visit London, Paris, Southampton, Birmingham, Edinburgh, Glasgow and Liverpool, returning in September, via Montreal, Toronto and Buffalo to Chicago.

Disturbances in the money market and the illness of Julius Kahn were given before Judge Bethea last week as the reasons for the delay in the rehabilitation of the Cash Buyers' Union, last week. E. C. Day, the receiver, reported that he had not received a sufficiently large bid for the assets and said that the proposed \$500,000 syndicate had also made no bid. The case was continued. This week Postoffice Inspectors Ketcham and Kimball will present evidence to District Attorney Morrison for his final decision as to whether an officer of the company should be prosecuted for using the mails to defraud.

Minneapolis and St. Paul.

The New Store, a department store, Minneapolis, is selling out its jewelry department.

Samuel Ruben has left Rentz Bros., Minneapolis, to engage in business for himself at White Bear Lake, Minn.

Pinck Bros., formerly in the manufacturing jewelry business in the Bank of Minneapolis building, Minneapolis, have retired.

George H. Rentz, of Rentz Bros., Minneapolis, mourns the death of a valuable dog, a Boston terrier. The canine was valued at \$500.

A brief description of the early business career of G. B. Eustis, of Eustis Bros., Minneapolis, accompanied by a photograph of Mr. Eustis, appeared in the *Minneapolis News*, May 1.

The White House Department Store will open in St. Paul, at 7th and Cedar Sts., about Aug. 10. Sternberg & Gottschall are the proprietors, and have temporary offices with their wholesale house, at 4th and Wacanta Sts.

Axel Mohn, who was with John Bodfors, Minneapolis, as watchmaker, but left several months ago, to go to San Francisco, was in the ill-fated city during the earthquake and fire. He has since made his way back to Minneapolis, and has resumed his position with Mr. Bodfors.

Oscar Blackburn, for the past eight months instructor in watchmaking at the Minneapolis School of Watchmaking and Engraving, Minneapolis, has returned to his old position as watchmaker and engraver with Weld & Sons, 524 Nicollet Ave., that city, and is no longer connected with the school in any way.

The offer of S. W. Thompson and other stockholders of the Anchor Silver Plate Co. for a release of the city's interest in the site of the company's plant, St. Paul, was laid over two weeks by the Aldermanic Committee on Streets, recently. The stockholders have offered the city \$4,200 for the city's interest in four lots or \$2,500 for the city's interest in two lots. The stockholders have offered to sell their interest to the city for \$5,000, and the matter was deferred until after Dr. Ohage's return from Europe.

St. Louis

E. L. Bersche, Columbia, Ill., was among the visiting jewelers here last week.

E. A. Reed, of Reed & Barton, was one of the visitors to the local trade last week.

W. R. Haselwood, Bardwell, Ky., was one of the buyers in the local market last week.

Mrs. Ida Spieldoch, formerly with Weiss & Fassett, is now with the E. Maritz Jewelry Mfg. Co.

The members of the Mermod, Jaccard & King Co-operative Association held a meeting Tuesday evening.

James J. Burke, president of the Brooks Jewelry & Optical Co., has purchased a new home in Tower Grove Park.

The Mermod, Jaccard & King Jewelry Co. has been conducting an auction all week with much success. Art goods are being disposed of.

Three watches of the value of \$35 were stolen from the window of Paul Ducommun, 2731 Chouteau Ave., early Monday morning of last week.

George Hess, of the Hess & Culbertson Jewelry Co., has been riding horseback a great deal lately for the benefit of his health, which is greatly improved. Mr. Hess is a familiar sight in the parks on a prancing steed.

Alvin L. Bauman, president of the L. Bauman Jewelry Co., departed Saturday for an extended trip to Europe. Mr. Bauman will sail from New York on May 17 on the American-Hamburg boat *Blücher*. He will go direct to Paris.

The Mermod, Jaccard & King Jewelry Co. furnished nine silver cups competed for in the Marathon race run Sunday under the auspices of the Missouri Athletic Club for the benefit of the San Francisco sufferers. The cups ranged in price from \$250 down.

Joseph Linz, of Joseph Linz & Bros., Dallas, Tex., was here last week, accompanied by Edgar Pike, manager of the diamond department, and Arthur Linz, manager of the mail order department of the same firm. Mr. Linz reports that Texas is in a flourishing condition.

The Scruggs, Vandevoort & Barney Dry Goods Co., and the Simmons Co., two department stores, have consolidated, and will occupy the first eight floors of the Century Annex and a large part of the Century building, which together cover the entire block bounded by 9th, 10th, Olive and Locust Sts. The capitalization was at \$5,250,000. The annex is yet to be built. According to W. J. Holbrook, of the Holbrook-Blackwelder Real Estate & Trust Co., which conducted the negotiations connected with the merger, a well known St. Louis jewelry house has made a proposition to the syndicate to secure the five-story building at 11th and Olive Sts. Mr. Holbrook declined to give the name of the concern.

The Association of Jewelry Jobbers of Missouri is the name given to the organization of the jobbers, mention of which has already been made in THE CIRCULAR-WEEKLY. A meeting of the association was held last Thursday, when the constitution and by-laws submitted by the committee, of which M. Eisenstadt, of the Eisenstadt Mfg. Co.; A. L. Bauman, of the L. Bauman Jewelry Co.; and I. N. Hahn, of the S. A. Rider Jewelry Co., are members, were

adopted. The organization will be incorporated and a movement will be made to encourage organizations of jobbers in other cities to become members, making the association national in its scope. In the absence of the temporary chairman, Ed. Massa, of the Bauman-Massa Jewelry Co., Frederick W. Hoyt, of F. W. Hoyt & Co., presided at the meeting.

Kansas City.

The C. B. Norton Jewelry Co. has increased its capital stock to \$150,000.

H. B. Lindsey has sold his retail jewelry business at 201 E. 12th St. to Abe Blicden.

The Kansas City Polytechnic Institute has just put in new machinery for manufacturing jewelry.

H. F. Rover has taken a position in the accounting department of the Woodstock-Hoefer Watch & Jewelry Co.

Charles Moll, who has been in the employ of F. Winkler, has resigned and returned to his home in Gardner, Kans.

Sam Bloom, traveler for the Meyer Jewelry Co., was in this city, last week, having been called in to help entertain the visiting jewelers.

C. B. Norton, of the C. B. Norton Jewelry Co., is making arrangements to leave with the Commercial Club next week, on its trade extension trip through Kansas and Colorado.

The Green Jewelry Co. supplied the medals to the Central High School, which were given as prizes in contests for the best original essays, etc.

Harry Winkler, who has been with Otto Burklund, Osawatomie, Kans., has come back to this city, and will take the place in his father's store formerly held by Charles Moll, who resigned.

Mr. Scott, of Scott & Scott, Junction City, Kans., recently met with an accident, which brought him back to a hospital here again to take further treatment. He is reported to be getting along well.

It is believed that at the next meeting of the City Council C. L. Merry, president of the Merry Optical Co., will be elected a member of the upper house, to fill the vacancy made by the election of one member to the presidency of that body.

A judgment for \$1,170 was, last week, entered against J. R. Mercer, in favor of a real estate firm, which was suing for a commission on the five years' lease recently closed by Mr. Mercer with the United Cigar Stores Co. for the corner of 11th and Main Sts. There was a dispute as to whether Mr. Mercer owed this commission.

The following out of town jewelers called on the jobbers during the past week: A. J. Kibler, Wellsville, Kans.; B. G. Gustafson, Lawrence, Kans.; E. A. Church, Claremore, Ind. T.; Geo. H. Church, Oak Grove, Mo.; C. B. Libby, Weir, Kans.; A. J. Levin, St. Joseph, Mo.; J. A. Schmidt, Leavenworth, Kans.; Otto Burklund, Osawatomie, Kans.; N. M. Porter, Longton, Kans.

The following new pupils were enrolled by the Southwestern Optical College during the past week: R. F. Mann, Wagoner, Ind. T.; E. E. Parnell, Kansas City, Mo.; Albert E. Howell, Excelsior Springs, Mo.; S. T. Reese, M. D., Kansas City, Mo.; C. H. Meyerhoff, Brookfield, Mo.; E. G. Mason, M.D., Cawker City, Kans.; S. M.

Bishop, Springfield, Mo.; J. F. Nasep, Alva, Okla.

Sam W. Ewan, one of the most valued employes of the C. B. Norton Jewelry Co., who numbered his friends by the score in this city, and who left here March 4 to go to New Mexico for his health, died in that territory, May 3, of tuberculosis. Mr. Ewan was 29 years of age, and leaves a widow. He was a Scottish Rite Mason, and the Masons had charge of his funeral, which was held in this city, Sunday. His loss will be keenly felt by many devoted friends, and greatest of all by his employers.

Omaha.

Chas. Mankey, Manning, Ia., has taken a position with L. Robinson, Glenwood, Ia.

P. E. Flodman, of P. E. Flodman & Co., has returned from an extended trip in Alabama.

Chas. Moorehouse, vice-president of the Kennedy Optical Co., was a visitor in this city last week.

C. L. Shook, of the Shook Mfg. Co., left last week for a two months' trip through the west and northwest.

Sol Bergman, of the Sol. Bergman Jewelry Co., is making a business trip through the western part of the State.

E. A. Dayton, of E. A. Dayton & Co., Chicago, but formerly of this city, was a visitor here for a few days recently.

E. E. Muffitt, vice-president of the H. J. Penfold Co., attended a meeting of a medical association held at Lincoln last week.

Chas. Jordan, formerly with the H. J. Penfold Co., visited friends in this city last week prior to leaving for Cincinnati, where he will take charge of his father's business.

Herman Lefferts, formerly of Council Bluffs, Ia., who has spent the past two years in California, is expected to return shortly, when he will re-engage in business in Council Bluffs.

Mrs. Underwood, Murray, Nebr.; C. H. Curley, Belden; J. A. Reuling, Wynmore; Henry Zellers, of Zellers & Kusel, Hooper; Peter Wiese, Deshler, were in this city buying stock last week.

Chas. W. Fleming, Lincoln, Nebr., visited this city, recently, upon the receipt of information that the stock, valued at \$1,000, which was stolen a short time ago from his store had been located in a pawnshop in this city.

J. L. Fitch was recently taken into custody in Beland, Wis., after having been sought for several weeks on a charge of obtaining a gold watch from the store of F. C. Cook, Janesville, Wis., under false pretenses. The timepiece, which was valued at \$30, was recovered.

At the Montreal Board of Trade, recently, the citizens' gift was presented to ex-Mayor Hormidas Laporte, in recognition of his valuable services as alderman and mayor. The gift took the form of a handsome cabinet of solid silver, comprising a complete tea service with tray, and a full service of solid silver knives, forks, spoons and serving pieces. The service was made by Henry Birks & Sons, Montreal.

LINDNER & CO.,
CINCINNATI, O.

San Francisco.

News was received here recently of the death of J. D. White, Santa Cruz.

L. Plamondon has severed his connection with the California Jewelry Co. and taken a position with Henry M. Abrams.

Mat Moskowitz, watchmaker for the trade here, has changed his name, and will hereafter be content to be called Mr. Mosk.

When the safe of C. Grundel, formerly on Kearny St., was opened, recently, it was found that the coin there had melted and run together, imbedding about 20 diamonds in the mass. The stones appear to be in good condition.

The following opticians, formerly in business in San Francisco, have reopened in that city with more or less complete stocks: Berteling Optical Co., 2505 Clay St.; Henry Kahn & Co., at the Emporium's temporary quarters, Post St. and Van Ness Ave.; Hirsch & Kaiser, 1725 Fillmore St.; Crawford Optical Co., 2076 O'Farrell St.

A. Eisenberg, of A. Eisenberg & Co., has recovered, through the police, \$12,000 worth of diamonds, which have been missing since the day of the great earthquake and fire. The gems consisted of diamond rings and a large diamond star. The diamonds were rescued from the jewelry store on Kearny St. and taken to S. Clayburg, a broker, for safe keeping. Clayburg claimed that the gems had been stolen from him, but when the detectives told him they had proof that he still had them in his possession, he allowed the detectives to open a trunk that was at his home and the diamonds were found stored there. A. Eisenberg refused to prosecute the offender and the jewelry was restored.

The stock in the store of Daniel H. Strock, Hot Springs, Ark., was damaged by a fire which broke out recently in the Sumpter-Little building at that place.

Pacific Coast Notes.

Geo. W. Hickox, Albuquerque, N. Mex., visited Santa Fe, N. Mex., on a business trip, recently.

S. Spitz, Santa Fe, N. Mex., has been attending the Spring reunion of the Denver bodies of the A. and A. S. R. of Free Masonry.

John von Breton, Los Angeles, Cal., has decided to close out his stock of jewelry in order to devote his time to the optical business.

H. Britzius and F. Pequegnat, Riverside, Cal., have moved their jewelry stock from the Reynolds block to 850 Main St., next to the Rouse stores.

Mr. Wilson, Los Angeles, Cal., will soon open a store at Ocean Park, Cal., in the building formerly occupied by E. D. Grandmason, who has moved to 153 Pier Ave.

Chas. Kelley, who has conducted a jewelry and watch repairing store at Lebanon, Ore., has sold out and moved to Myrtle Creek, where he may open a store in the near future.

The store of C. P. Houston, Junction City, Ore., was entered recently by thieves, and jewelry valued at about \$200 was taken. Later Mr. Houston received through the mail a letter containing drawings of skulls and bones and a number of fine shavings.

J. H. Sohn, who has been head watchmaker and optician for E. D. Grandmason, Ocean Park, Cal., is about to open a jewelry and optical establishment on Pier Ave., at that place.

The marriage is reported of C. W. Costello, Pleasanton, Kans., to Miss Minnie Peterson.

Thieves smashed the large window in the store of Adolph Mandel, McKeesport, Pa., about a week ago and escaped with a small amount of miscellaneous stock.

CINCINNATI, OHIO.

Cincinnati.

Hugo Lindenberg, of Lindenberg & Fox, has returned from a business tour of the south.

M. J. Greenwald, 33 Arcade, is about to open his new branch jewelry store in the Arcade.

Arno Dorst, of the Dorst Co., is at his office again, having recovered from a severe attack of fever.

Walter Meyer, of Wallenstein, Meyer & Co., has gone east for 10 days in the interests of the firm.

Lindner & Co. furnished the new machinery which was recently installed at the plant of Herman Pronnitz.

A few nights ago thieves entered the jewelry store of Seiter Bros., 13th and Vine Sts., and stole a lot of jewelry.

Michaelson Bros. have opened up a manufacturing jewelry business on the third floor of the Excelsior building, Race St.

The health of Henry A. Dodt, 26 Emery Arcade, has improved so much that he expects to visit his office during the present week.

J. M. Shields, formerly a material clerk for Thoma Bros., has accepted a position with the W. P. Hitchcock Co., Syracuse, N. Y.

Gebhardt Bros., on account of their increasing business, are enlarging their factory and adding to the machinery and working force.

Loring Andrews, of the Loring Andrews Co., left May 5 for New York, from which city he will sail to-morrow on the *Amerika* for Europe.

James Haslam, representing the John Holland Gold Pen Co., has received word of the safety of his brother, who was thought to be a victim of the San Francisco earthquake.

Joseph Noterman & Co., during the past week, have had their quarters in the hands of painters and frescoers, whose work, when completed, will make these offices among the finest in town.

Sig. Strauss, of Lindenberg, Strauss & Co., has returned from a trip to New York and Atlantic City. C. J. F. Bene, formerly of Bene, Lindenberg & Co., is home from a recent visit to his southern plantation.

Gus Hengehold, watchmaker for Henry Korf, 625 Main St., had a narrow escape, a few days ago, when a ball bat came crashing through a window near which he was working. No damage was done, except to the glass.

During a wind storm which swept over Cincinnati, a few nights ago, the big plate glass corner window in George W. Newstedt's store was shattered and the stock on display was slightly disarranged. None of the stock was broken or stolen.

His many friends in the jewelry trade heard with regret of the recent death of Charles Oppenheimer, a retired merchant and father of Isadore Oppenheimer, of Hahn & Oppenheimer. The deceased was one of Cincinnati's best known and most respected merchants. He died last week at his residence, 546 Hale Ave., Avondale, at the age of 78 years.

The suit brought against B. Greenwald, 514 Race St., and Detective Crim by John Sternberger, an eastern traveling man, was

last week dismissed in the United States Court in this city. Sternberger alleged that the above parties were trying to ruin his business reputation. About a year ago he was arrested by Crim on a charge of purchasing goods from Greenwald's store on memorandum and not paying for them. After the arrest the money due was paid and Sternberger was released; he then brought suit.

Out of town dealers who bought stock here during the past week included: A. Wahlrab, Dayton, O.; Henry Ostendorf, Vincennes, Ind.; A. M. Stamm, Williamsburg, O.; L. C. Eveslage, Ripley, O.; J. G. Davis, Bellefontaine, O.; E. G. Correll, Somerset, Ky.; John P. Hess, Fond du Lac, Wis.; Charles Creighton, Morrow, O.; J. G. Irwin, Harriman, Tenn.; W. C. Carroll, Lebanon, Ky.; O. E. McWaters, Somerset, Ky.; J. T. Schaub, Hope, Ind.; Fred J. Heintz, Lexington, Ky.; Edward Israel, Harrison, O.; Nicholas Sanning, Walton, Ky.; E. Shelman, Irvington, Ky.

Denver

Meyer Hellerstein has moved to 824 15th St.

J. C. Bloom & Co. are decorating and making extensive alterations in their store.

William Pearson, Louisville, Colo., was visiting the local wholesale dealers last week.

Charles Pierson, Orleans, Nebr., made a flying trip to Denver and Boulder on business last week.

Mr. Murchison, Cheyenne, Wyo., was a recent visitor to the city, combining business and pleasure.

A. M. Jacoby, of Edward Lehman Jewelry Co., has returned from a pleasure trip to California and Arizona.

J. C. Wakefield, Durango, Colo., was a recent visitor in Denver, on his way to California, where he intends to start in business.

H. B. Kortz has purchased the stock of S. Nelson, 929 15th St., and will move from his present location, 917 15th St., to Mr. Nelson's store.

R. C. Hawkins, of the Edward Lehman Jewelry Co., has returned from a business trip to Washington, Montana, Idaho, Wyoming and other parts of the northwest.

Walter Farrell, formerly of J. C. Anderson & Co., Telluride, Colo., was in Denver last week buying from wholesalers for the business he is about to open in Montrose, Colo.

C. N. Welch, of W. W. Hamilton & Co., is on a business trip through Colorado and New Mexico, and S. L. Benty, of the same firm, is at present traveling through the northwest.

A. F. Lowenthal, 37 Maiden Lane, New York, was a recent visitor in Denver, on his way home from the Pacific coast. Directly on reaching New York Mr. Lowenthal will sail for Europe.

O. T. Craig, of Bentley & Craig, Boulder, Colo., was here for a few days last week. He is on his way to the Pacific coast and the northwest for an extended business and pleasure trip.

A large rock was thrown through the window of the Solomon Jewelry Co.'s store early one morning last week, by a mis-

creant, who then quickly rode away on a bicycle. No reason for the act has been discovered.

Henry Jacobson, of Jacobson Bros., has arrived in this city from Los Angeles, Cal. By a fortunate circumstance Mr. Jacobson visited Los Angeles before going to San Francisco and thus escaped the earthquake and the fire.

William Fleischman, of J. C. Bloom & Co., is on a business trip through Kansas. S. H. Sheffel, of the same firm, is traveling in Utah and Wyoming, and S. L. Harrod, another representative, has left for a trip through Illinois and Iowa.

Lyman Bros., 632 16th St., have secured a store in the new Symes building, now being constructed at 16th and Champa Sts., and will move into it July 1. This is the same location occupied by this firm before fire forced its removal to the present store.

Umberto Francesconi was recently added to the engraving department of Joseph I. Schwartz. Mr. Francesconi was formerly a well known grand opera singer, but through bad health lost his voice and was forced to turn temporarily to engraving as a profession.

News has been received by local wholesalers that the firm of Morris & Honeyman, Florence, Colo., has been dissolved owing to the death of Mr. Honeyman. The business has been reorganized and will continue under the name of M. L. Morris & Co. J. W. Wilson will continue as manager.

This city has become a mecca for jewelers who suffered in the San Francisco disaster and who are either on their way east or are trying to obtain positions with firms here. Among those who have called on local jewelers are A. M. Samuels, who will locate here, and H. Merritt Woodbrice, formerly with Shreve & Co., who is on his way to New York. An engraver named Johnson said he lost all his tools and machinery in the fire and was going to his old home in the east in a penniless condition.

Henry Bohm, of the Bohm, Allen Jewelry Co., has left here for San Francisco, to ascertain what losses were sustained by the store in which he was interested there with Harlan P. Bristol, formerly of this city, under the name of the Bohm, Bristol Co. The firm was located at 104-110 Geary St., right in the heart of the district first destroyed by the holocaust. The store was entirely gutted and the only property thought to be saved is a safe containing diamonds and other jewels of great value. Mr. Bohm estimates his loss at \$100,000, only \$30,000 of which will be recovered by insurance. Mr. Bristol escaped unharmed and is now with his family at Fruitvale, Cal. Samuel W. Bowman, Arthur S. Canningham and Andrew Brandt, the salesmen, all former Denver men, are also reported safe. The business was started in the ill-fated city only two years ago, and whether or not it will be resumed depends upon the losses and the business outlook of the city when rebuilt.

Carl Pressentine, Madison, Wis., has sold out and retired.

Albert Thorson, Langdon, N. Dak., has gone to Thief River Falls, Minn., to take charge of the M. E. Wold jewelry store.

NEW YORK CITY

THIS IS HOW IT HAPPENED.

Some few years ago we determined that first of all we were going to make the best Cuckoo Clocks that brains and skilled craftsmanship could put together; then we were going to sell them for as little as we could.

The expected happened. Quality won out as it always does. We have a country-wide reputation for making the best Cuckoo Clocks that have ever been produced, and with that reputation has come the largest Cuckoo Clock business in the world.

Better write for our new Catalogue.

Indianapolis.

The family of A. W. Gray, of Gray, Gribben & Gray, has gone to Kansas, where they will spend a month.

No clew has thus far been obtained by the detectives who are working on the Fletcher M. Noe burglary case. About \$400 worth of merchandise was stolen.

C. C. Hyde, formerly at New Castle, was in this city, last week, on his way to Lancaster, O., where he has taken a position as watchmaker and engraver with Charles P. Binger.

David S. Gribben, of Gray, Gribben & Gray, sailed, yesterday, from New York for Naples. He was accompanied by his wife, daughter and son, and will be gone four months.

Federal officers of this city were called to Decatur, Ind., last week, in connection with the arrest of William Goodman, said to be a jeweler, who is wanted in Bradford, O., for violation of the postal laws and for burglary.

Among the patents recently asked for is one on a needle attachment to the graphophone by Harry W. Hicks, a jeweler at Alexandria, Ind., and a buyer here. The new needle attachment will render constant changing of the needle unnecessary.

Nearly all the jewelry confiscated from the I. Groh's Jewelry Co. by Charles H. Grommiger, who committed suicide when the detectives went to arrest him, has been recovered. A large amount of the stock was found in trunks in the young man's rooms. Some more was found in pawnshops.

After successfully defending the English Hotel trophy cup for many weeks, Horace A. Comstock was forced, last week, to surrender it to Jos. Michaelis. Near the close of the match, the springs in Comstock's gun broke, and he had to finish with a borrowed gun. As his own gun was made for a left-handed shooter, Comstock was greatly handicapped by the accident.

Among the out of town jewelers who visited the local jobbers and manufacturers last week were: George L. Spahr, Lebanon; Charles H. Ham, of Blake & Ham Jewelry Store, Frankfort; J. A. Meissen, Cicero; J. A. Pickett, New Castle; Bernhart Maier, Edinburg; A. F. Fox, Plainfield; Louis F. Ott, Veedersburg; William Beatty, West Lebanon; Joseph Booth, of Booth & Son, Tipton; B. F. Turner, of B. F. Turner & Son, Arcadia; Carl Burnhill, Summitville; H. F. Bennett, Lapel, and F. Pennington, Knightstown.

Cleveland.

James Iredale is in bankruptcy and his liabilities are said to be about \$5,000.

Chas. Zink, an employe of the Webb C. Ball Co., died last week. The deceased was born in Akron, O., and for a while was employed by the George K. Foltz Co., Akron, until he accepted a position with the Ball concern, two years ago. He is survived by a widow and a child, two years old.

The validity of the "suspicious person" ordinance has been attacked in a habeas corpus proceeding begun last week by Henry Rothbart, a jeweler, who was recently sentenced to the workhouse and to pay a fine of \$50 as a "suspicious person," no

other charge being made against him. In the proceeding for his release the attorneys claim that the ordinance which permits punishment on such a charge is unconstitutional and has been abused in this case. Rothbart was arrested Nov. 10 last, on the ground that "he could not give an account of himself."

Canada Notes.

TRADE CONDITIONS.

The retail trade is quiet, as is usual at this season. The watch business is dull with little prospect of improvement. The only explanation is that the market is overstocked and dealers carrying enough to supply all ordinary requirements for some time to come. The demand of the retail trade for jewelry is better than usual, especially in plated goods. Local manufacturers are extending their plants and making great efforts to capture the home market, especially in plated jewelry of the American type. Many of them have equipped their factories on the American plan and are likely to meet with a large measure of success in the lines of chains, lockets, cuff links and articles of that description. As they are satisfied with smaller profits than the American houses there seems no reason why, with a favorable tariff, they should not overcome the obstacle of a comparatively limited market, entailing a smaller output. The clock trade continues unsatisfactory, owing to the keenness of competition. Prospects in the silverware line are good and table ware in active demand, in view of the approaching wedding season. Collections are slow and renewals frequent. The rush of immigration westward encourages anticipations of good trade in that quarter, later in the season.

J. A. Grant, Pilot Mound, Ont., has been sold out.

J. W. Gibson, Kingston, Ont., is closing up his business.

Lorne Bricker, Preston, Ont., has assigned to H. C. Edgar.

P. B. Crews, Kingston, Ont., has closed under chattel mortgage.

E. A. Hall, formerly of San Francisco, is opening a store at Frank, Alberta.

Dr. A. E. H. Grupe has gone on a trip to the northwest for J. J. Zock & Co., Toronto, Ont.

Walter E. Kelly, Goderich, Ont., has given a renewal chattel mortgage for \$1,557 to C. L. Welsh.

Wm. Bramley and wife have returned from an extended tour to South America and the West Indies.

W. K. George, president of the Standard Silver Co., was recently elected a director of the Sterling Bank of Canada, Toronto, Ont.

J. H. Jackson, 14 Adelaide St. W., Toronto, Ont., with his brothers, W. J. Jackson and H. A. Jackson, have formed the firm of Jackson Bros., and the new concern has bought out the old business of E. Raymer, Edmonton, Alberta, which they will continue, going into the manufacturing business as well as carrying on a retail business. H. A. Jackson is at present in charge of the Alberta store.

Out-of-town jewelers who called on the Toronto, Ont., trade last week, included: L. A. Jeanneret, Elmira, Ont.; Geo. Hynds, Acton, Ont., and T. A. Grothe, Montreal.

August Bonchard was recently sentenced by Judge Desmoyres in Montreal to two years' imprisonment in the penitentiary for stealing \$175 worth of jewelry and cash from the store of Alfred Mallette, 331 E. St. Catherine St., that city.

Robert Helmer, Olivia, Minn., has been granted a patent on a mechanical toy.

New Stores and Enterprises.

W. Farrell will soon open a store in Montrose, Colo.

J. H. Sohn is a new jeweler on Pier Ave., Ocean Park, Cal.

De Soto H. Grant has opened a store in Las Vegas, N. Mex.

Samuel Ruben is about to engage in business in White Bear Lake, Minn.

S. Aislander has begun business in the Havey building, Benwood, W. Va.

Gordon Hanson, Howard, S. Dak., will shortly begin business in Oldham, S. Dak.

Harry R. Barney recently opened optical parlors at 251 W. Market St., East Liverpool, O.

Burt Bradley, formerly with A. M. Ward, Abilene, Kans., has started in business in Mattoon, Ill.

Samuel Higgins, watchmaker, has opened a retail jewelry store at the corner of Ridge Ave. and Diamond St., Philadelphia, Pa.

Hurwitz Bros. & Bloom is the name of a new wholesale house which, last week, opened offices in the new Central building, Rochester, N. Y.

E. L. Griffen, optician, formerly with the L. Manasse Co., Chicago, has started in business on his own account in rooms 602, Columbus Memorial building, in the same city.

The Kortum Mfg. Co. has filed incorporation papers and engaged in business in Attica, N. Y., with a capital stock of \$5,000. The concern will manufacture platers' supplies, etc.

The Reeves Jewelry Material Co. was recently incorporated in St. Louis, Mo., with a capital stock of \$20,000, 70 per cent. of which is paid in. The incorporators are: R. F. Reeves, Joseph Gutfreund and Mary Reeves.

John Wagner, for years optician in the Progressive Co. store in Main St., Buffalo, N. Y., has opened handsome optical rooms at 91 E. Genesee St., that city. The lighting effect in the front windows is most attractive.

The San Diego Onyx Co. has been incorporated to handle onyx from the Santa Catarina quarries in lower California. Among those interested are: Col. Fred Jewell, L. J. Wilde, Chas. Collier, E. A. Hornbeck, E. B. Stuart, E. M. Barber, John F. Schwartz and W. L. Tibbals.

Christian Bauer, watchmaker, lately with Queen & Co., opticians, Philadelphia, Pa., has opened a store of his own at 11 S. 9th St., that city. He intends to conduct a jewelry repairing and watchmaking department as well as an optical department, and has accordingly equipped his establishment.

Market Price of Silver Bars.

The following are the quotations of silver bars in London and New York, as reported by Zimmermann & Forshay:

	New York.	London.
May 1.....	\$.66	30 9-16d.
" 2.....	.66	30 9-16d.
" 3.....	.66½	30 11-16d.
" 4.....	.66¼	30 5-8d.
" 5.....	.66¾	30 13-16d.
" 7.....	.66¾	30 11-16d.

August Youngerman, 305 W. 2d St., Davenport, Ia., has sold out to Lembrecht & Co. The new firm, composed of Theo. Lembrecht and Frank C. Kroeger, will continue the business at the old stand.

Our Traveling Representatives

Among the traveling representatives calling on the Toronto, Ont., trade, last week, were: W. Wilson, R. Hoehn & Co., and a representative of Wagner & Girshley, London, Eng.

C. E. Payne, of L. Gutmann & Sons, Cincinnati, O., has left on his regular trip through Ohio and Indiana. Steve Lensher, of the same house, has made a trip through the northwest.

The following salesmen were in Boston, Mass., the past week: L. C. Martin, Martin, Copeland & Co.; John W. Reddall; Harry Lissauer, Jacobson Bros.; Charles F. Sweasy, Champenois & Co.; E. R. Crippen, Philadelphia Watch Case Co.; Mr. Hickey, Henry Zimmern & Co.; Robert E. Kehl, F. H. Noble & Co.

Among the traveling representatives who called on the trade in Denver, Colo., recently, were: R. E. Williams, St. Louis Silver Co.; Arthur E. Hall, International Silver Co.; W. S. Willis, Gorham Mfg. Co.; Steve Howard, Wilcox & Wagner and Watson & Newell Co.; T. W. Agnew, New Haven Clock Co.

Traveling representatives who visited Buffalo, N. Y., last week, included: J. A. Granbery, J. A. & S. W. Granbery; Mr. Guggenheim, Ingomar Goldsmith & Co.; P. H. Phelps, Enos Richardson & Co.; Geo. T. Howard, Towle Mfg. Co.; Maurice Kohn, Silbermann, Kohn & Wallenstein; Mr. Linton, E. H. H. Smith Silver Co.; A. N. Dorechester, Chapin & Hollister Co.; Albert Holzinger.

Lancaster, Pa., was visited, recently, by the following traveling representatives: Horace M. Tuttle; Thomas C. Parker, Pittston Cut Glass Co.; William H. Weferling, Riker Bros.; Charles A. Crist, L. E. Waterman Co.; S. A. Lynch, William B. Kerr & Co.; Morris Lewkowitz, D. Ullman & Co.; F. A. Brennan, L. Witsenhausen; Jacob C. Luken, L. H. Keller & Co.; A. J. Winter, Alvin Mfg. Co.; W. L. Blackinton, Kinney Co.; M. Friedman, Jr., Friedman & Co.

Among the traveling representatives who, recently, visited the trade in Detroit, Mich., were: Wallace E. Welch, Hoyt, Obrig & Geiger Co.; Samuel L. Griffin, C. F. Rump & Sons; S. J. Hunter, Wm. I. Rosenfeld; J. T. Griffith, Jr., Carter, Howe & Co.; G. W. Payson, Seth Thomas Clock Co.; Albert Ginzberg, Eliassof Bros. & Co.; Mr. Hickok, Gorham Mfg. Co.; Frank F. Young, Hartford Sterling Co.; A. M. Stern, Goodfriend Bros.; J. G. Hutchinson, Smith & Crosby; Mr. Lucas, A. H. Bliss & Co.; Mr. Maintien, Maintien Bros. & Elliot.

Among the traveling representatives who visited the trade in St. Louis, Mo., last week, were the following: W. C. Barry, Larter & Sons; Edward O. Krauss, Western Watch Case Mfg. Co.; Edgar Huhn, Potter & Buffinton Co.; W. H. Gregory, Strobell & Crane; Richard Merker, Bates Bros. Co.; Henry H. Jacobson, Jacobson Bros.; J. H. Thompson, J. B. Bowden & Co.; A. E. Metteran, Shafer & Douglas; L. H. Smith, Bippart, Griscorn & Osborn; F. R. Horton, Carter, Howe & Co.; Henry H. Miller, Hutchinson & Huestis; L. Strauss, C. P. Goldsmith & Bro.; S. E. Bolles, William Scheer; G. A. Jewett, Hamilton & Hamilton, Jr.; J. M. Morrow, American Watch Case Co.; Jul. F. Schuman, Jr., William Kinscherf Co.; Mr. Wilkins, Ostby & Barton Co.; W. A. Moore, F. W. Gesswein Co.; M. W. Potter, J. M. Fisher & Co.; Mr. Joseph, M. B. & H. H. Joseph.

Traveling representatives who visited Omaha, Nebr., during the past week, included: Norman L. Strauss, Jacob Strauss & Sons; H. A. Roff, Brainard & Wilson Co.; Leonard J. Fox, Gustave Fox Co.; W. H. Gregory, Strobell & Crane; H. B. Greene, R. J. Roberts; Joseph Hurd, W. H. Grindley & Co. and Donlon & Co.; Julius S. Mayer, Manser Mfg. Co.; T. B. Ross, John Russell Cutlery Co.; Walter S. Noon, Cory Bros. Co.; Charles Boss, American Cuckoo Clock Co.; E. B. Frank, Pairpoint Corporation; Robert S. G. Edwards, Whitting Mfg. Co.; H. C. Rowbotham, Schrader-Wittstein Co.; John Thornton, Hayden

W. Wheeler & Co.; Charles Stiner, L. Adler & Son; E. Lechler; L. M. Frank, Buffalo Jewelry Case Co.; Harry Oliver, Tarrant & Gismond; Ralph Siegrist, Albert L. Haman; G. L. Titus, International Silver Co.; Julius Laubheim, Eisler & Laubheim.

The following traveling representatives called on the jewelry trade in Kansas City, Mo., last week: T. B. Ross, John Russell Cutlery Co.; Harry S. Aicher, Alvin Mfg. Co.; H. H. Joseph, M. B. & H. H. Joseph; H. E. Cobb, Daggett & Clap Co.; Harry E. Farquharson, E. D. Gilmore & Co.; H. C. Rowbotham, Schrader-Wittstein Co.; J. S. Mayer, Mauser Mfg. Co.; Mark Franklin, Bradley Ring Co.; Henry Bloch, L. D. Bloch & Co.; W. A. Moore, F. W. Gesswein Co.; Harry E. Barkman, Jones & Woodland Co.; E. A. Reed, Reed & Barton; Geo. L. Brenning, Dennison Mfg. Co.; Henry H. Jacobson, Jacobson Bros.; W. H. Cushman, Woodman-Cook Co.; George L. Paine, George L. Paine Co.; W. R. Cobb, W. R. Cobb & Co.; Mr. Jackson, Goodell-Pratt Co.; Geo. Weidig, Jos. Fahys & Co.; Mr. Fay, J. T. Mauran Mfg. Co.; Mr. Wilkins, Ostby & Barton Co.; J. G. Hutchinson, Smith & Crosby; Harry S. Aicher, Alvin Mfg. Co.; Walter S. Noon, Cory Bros. Co.

Traveling representatives who called on the Cincinnati, O., trade, during the past week, included: Max Jacoby, Manchester Mfg. Co.; N. Shiman, Shiman Bros. & Co.; W. B. Peck, Waite, Thresher Co.; Frank Collom, Sulzburger Bros.; Fred Kennon, John T. Mauran Mfg. Co.; Fred Carpenter, W. & S. Blackinton Co.; Frank Bloomer, E. I. Franklin & Co.; T. Sherman, S. K. Merrell & Co.; W. Marble, Marble & Co.; John Ruggles, W. H. Bell & Co.; E. A. Kohn, Eastman, Park Co.; W. Sharkey, Ziruth-Kaiser Co.; Charles L. Drown, Ostby & Barton Co.; Mortimer C. Adler, Charles Adler's Sons; W. C. Barry, Larter & Sons; T. S. Sturgis, Perley Bros.; Walter S. Noon, Cory Bros. Co.; Lucien Rockwell, Poole Silver Co.; Harry E. Barkman, Jones & Woodland Co.; C. A. Hulstrom, Wilcox & Evertsen; M. Newhouse, Schultz, Leiss & Co.; Mr. Sideman, Redlich & Co.; W. H. Gregon, Strobell & Crane; Alberto S. J. Schweizer, Ansonia Clock Co.; D. A. Davidson, Wallach & Davidson; G. E. Tinker, William B. Durgin Co.; W. Bernheim, Woodside Sterling Co.; J. F. Ripley, Standard Button Co.; Mr. Huhn, Potter & Buffinton Co.; Maxy L. Potter, J. M. Fisher & Co.; Adolph Weiss, Heinrich, Herman & Weiss; T. G. Frothingham, T. G. Frothingham & Co.; H. A. Scofield, Scofield, Melcher & Scofield; George E. White, White & Rounsville; J. T. Griffith, Jr., Carter, Howe & Co.; W. H. Osborne, R. Wallace & Sons Mfg. Co.

The following traveling representatives called on the trade at Pittsburg, Pa., last week: Louis Hurwitz, Bates Bros. Co.; A. J. Sherrard, Enos Richardson & Co.; Jesse Carpenter, Horton, Angell Co.; R. C. Read, H. F. Barrows Co.; E. R. Bennett, Waite, Mathewson & Co.; H. B. Kennion, Parks Bros. & Rogers; M. E. Van Bergh, Van Bergh Silver Plate Co.; Geo. Southwick, Payton & Kelley Co.; V. L. Burgess, Krenmentz & Co.; O. G. Fehon, J. M. Fisher & Co.; N. Shiman, Shiman Bros. & Co.; Charles S. Peckham, J. H. Peckham & Co.; Alberto Schweizer, Ansonia Clock Co.; C. S. Untermeyer, Chas. Keller & Co.; G. F. Brinck, Crescent Watch Case Co.; W. H. Osborne, R. Wallace & Sons Mfg. Co.; George H. Remington, Maintien Bros. & Elliot; H. F. Tourtellot, Waite, Thresher Co.; Edgar Huhn, Potter & Buffinton Co.; Mr. Heyman, Stern Bros. & Co.; H. N. Van Bergen, Snow & Westcott; Mr. Finberg, Finberg Mfg. Co.; Frank W. Bloomer, E. I. Franklin & Co.; D. A. Davidson, Wallach & Davidson; S. C. Corbin, Waterbury Clock Co.; Mr. Rogers, C. H. Cooke Co.; W. T. Sherman, S. K. Merrill & Co.; Fred Casper, Manser Mfg. Co.; C. M. Newcourt, Maple City Glass Co.; A. Kaufman, Ingomar Goldsmith & Co.; J. T. Griffith, Jr., Carter, Howe & Co.; H. H. Meyer, Wm. B. Kerr & Co.; H. B. Carmichael, Bride & Tinkler; J. A. Granbery, J. A. & S. W. Granbery; Charles Perret, Jules Racine & Co.; J. Ira Lester, Milton L. Ernst; J. J. Schwartz, L. Barnett & Co.

Grosse & Kappeler, Dayton, O., are holding an auction sale.

The A. J. Douglas Optical Co., Seattle, Wash., has been succeeded by the Boyer Optical Co.

Thomas Brennan, formerly with the Cross Optical & Jewelry Co., Chester, Pa., has resigned his position and opened optical parlors at 329 Ulrich St., in the same place.

LETTERS TO THE EDITOR.

Proposed Association for North Carolina.

GREENSBORO, N. C., April 4, 1906.

Editor THE JEWELERS' CIRCULAR—WEEKLY:

It has been the hope of the writer that some one would come to the front to organize a jewelers' retail association in this State, as such an organization is sadly needed. As no one, however, has appeared upon the scene, the writer has concluded to try to bring about a meeting of all the jewelers in this State. I send you a printed interview I had with the local daily paper, the *Industrial News*, which explains itself.

Now Greensboro, being a central point in this State, having the finest hotel facilities, A. P. Stiely, of High Point, has concluded to call a meeting here to convene July 3, and would like to hear from all jewelers in this State who expect to be present.

The object of this association would be about the same as that of the National Retail Jewelers' Association, with which it is my idea to affiliate. The grocers, hardware men and other merchants have such associations and a great deal of good has been derived from them. Why do we retail jewelers not combine? Is there something in our business that makes us jealous of each other? Why can't we club together, like other merchants, and work together for the good and welfare of our profession, thus making it easier to combat the abuses that have crept into our business and helping to overcome obstacles that grow larger as time rolls on. There is no reason why we stand aloof from each other and I sincerely trust we can have in the State one of the strongest associations in the Union. The writer had several letters from jewelers who have expressed their willingness and financial aid to make this a success.

R. C. BERNAU.

Among the finest jewelry offices recently established are those into which Chas. Keller & Co. and the Keller & Untermeyer Mfg. Co. have moved in the Cockcroft building, 73 Nassau St., New York. The entire seventh floor is occupied, and this gives an open stretch, with light coming from all sides. The partitions constructed provide private offices and a salesroom, rare chiefly of ground glass, which does not shut out the light. Another advantage of having the entire story is that you step from the elevator directly into the quarters of the two concerns. The handsome appearance of the woodwork in antique oak finish at once attracts the attention of the visitor. The floors of the building are of stone and in these offices tiles have been laid in a way to give a pleasing effect. In the front are quarters provided for the Keller & Untermeyer Mfg. Co., and the remainder of the space, about 90 per cent., is devoted to the business of Chas. Keller & Co., the total number of square feet on the floor being 3,500. The jewelry safes are arranged in a row, in front of which are tables convenient for purposes of selection and assorting of stock. Railings set apart a convenient enclosure for the order department. There is also a roomy and admirably equipped workshop. The private offices in the front are large and tastefully fitted. This is also true of the salesroom.

News Gleanings.

I. Aronson, Portland, Ore., is conducting an auction sale of his stock.

Kessler Bros. & Co., Wellston, O.; have been succeeded by Patridge & Co.

Walter W. Ratcliff, Albert City, Ia., has been succeeded by W. B. Gillham.

J. B. Odom, Clifton, Tex., has admitted a partner, and the firm style is now Odom & Whalton.

Peter F. Geghtol will continue the business formerly conducted by Beghtol Bros., Bennett, Nebr.

Mr. Carlyon, Wrangel, Alaska, was a heavy loser in the fire which destroyed that town, recently.

The Peever-Gorham Mfg. Co., Sisseton, S. Dak., has been succeeded by the Peever-Mercantile Co.

John O. Young, Lacombe, Alberta, Can., has disposed of his business at that place to W. D. Gooderich.

Chas. E. Keever, Fountain City, Ind., is making extensive improvements in the interior of his store.

L. A. Hall has moved his watch repairing establishment from N. 3d St. to S. Front St., Marquette, Mich.

W. Reine, Belgrade, Minn., announces a closing-out sale, due to ill-health, which compels him to retire.

W. H. Appel, Allentown, Pa., has sold his country residence at Park Side, Rittersville, to James Neiss.

The firm of A. W. Biber & Co., Spartanburg, S. C., has dissolved, and the business will be carried on by A. W. Biber.

Henry F. Peters, Moline, Ill., and Miss Irene Sage were united in marriage, May 1, at the home of the bride, in Belvidere.

W. R. Smith, Mount Pleasant, Pa., has moved his store from the Rumbaugh block to a more convenient location in the same town.

Peter Scholl has commenced business in the Diamond Drill building, Crystal Falls, Mich. Mr. Scholl was formerly in business in Chicago.

G. F. Hunt's store, Waverly, Ia., was recently robbed of \$400 worth of watches, rings and other jewelry. There is no clue to the thieves.

The telephone system adopted in Yorkton, Man., was conceived and rendered practicable by Thomas Paul, a retail jeweler of that place.

A bold robbery was committed in Findlay, O., Thursday, when thieves broke into the store of F. E. Brand and escaped with \$600 worth of miscellaneous jewelry.

Isidor Glou, Plymouth, Pa., has secured a patent on a new form of gas jet which will prevent the gas from escaping should the flame be accidentally extinguished.

The interior of the store of H. J. Webb & Co., Springfield, Mass., has been entirely remodeled. New Show cases of mahogany and plate glass have been installed.

Violet Hunt, of Prague, Okla., has the distinction of being the only woman jeweler in that territory. Miss Hunt has the reputation of being a skilled watch and jewelry repairer.

Charles Brehm, giving his residence as Akron, O., was arrested about a week ago, in Youngstown, O., as a suspicious character. When taken into custody Brehm had

in his possession a large amount of bogus jewelry.

John Riley, Jr., Exira, Ia., has gone to Winnebago, Minn., where he has bought a jewelry and optical business. He recently graduated from a school of engraving and optics.

John W. Church, trustee in bankruptcy for William D. Oertel, Syracuse, N. Y., has sold the stock of Peter Nichols for \$128. The stock was appraised at \$755. Referee Stone has confirmed the sale.

The final dividend of 3 1/100 per cent. has been declared to the creditors of E. J. Boyce, Braintree, Mass., who went into bankruptcy, some time ago. This amount is payable at once by the trustee in bankruptcy.

The store of Brittain Bros., Lindale, Ga., was entered by burglars, a short time ago, and jewelry valued at \$100 was stolen. A small part of the loot that had been dropped by the thieves in their flight was subsequently recovered.

T. A. Roberts, Chattanooga, Tenn., has moved from 725 Market St. to 103 E. 8th St. Mr. Tegan, formerly optician for the Geo. W. Meyer Jewelry Co., will have charge of Mr. Roberts' optical department in the new quarters.

F. E. Van Patton, Water and Chester Sts., Meadville, Pa., has gone into business with his brother, Herbert Van Patton, at 281 Chestnut St., in the same town. The new firm will carry a full line of watches, clocks and silverware.

The Mefford Optical and Jewelry Co. is the firm style of a business recently started in Ainsworth, Nebr., by I. W. Mefford. The name of the latter was erroneously published in a previous issue of THE JEWELERS' CIRCULAR-WEEKLY as J. W. Nefford.

The trustee of B. E. Arons, Pittsburg, Pa., has filed his final account, but the balance on hand is not sufficient to pay the preferred claims and the cost of the bankruptcy proceedings. There is practically nothing left for the general creditors.

A. W. Flye, Gloucester, Mass., is confined to his home, suffering from a painful injury, sustained a short time ago, when he broke his right leg. The jeweler had been working on a motor boat when a rope broke and allowed a heavy block to fall upon him.

Miss Elva Robertson, daughter of A. F. Robertson, St. Cloud, Minn., recently attempted suicide by cutting her throat and left wrist with a razor. Overwork is believed to have brought on nervous trouble, which unbalanced her mind. Her recovery is doubtful.

It was erroneously reported a short time ago that Cole & McElwain, Atlantic, Ia., had sold out to H. M. Sells. The concern has not sold out, but has changed its firm style to Crowley E. Cole & Co. The business will be continued as heretofore at the old location.

Wayne Cannaday, son of Charles E. Cannaday, a retail jeweler of Schoharie, N. Y., was arraigned in that village, about a week ago, on a charge of murder. He pleaded not guilty. It was alleged that the defendant, during a quarrel, a short time ago, shot and killed Mrs. J. Manchester.

The bankrupt stock of York & Goodnough, Watertown, N. Y., was sold Wednesday afternoon and was bid in by W. H.

Goodnough, father of the junior end of the firm. The price paid was \$1,275. The business will again be conducted at the old location, in charge of R. M. Goodnough.

The diamond mining industry in British Guiana is reported inactive by Consul McMackin, of Georgetown. There were produced in the calendar year 1905, 86,096 stones, weighing 5,315 carats, whereas, in 1904, the number of carats produced was 11,045. Recently a New York syndicate has sent out a working expedition, and the output will be shipped to New York.

Noticed among the sojourners at French Lack Springs, Ind., are the following members of the trade: C. D. Peacock and wife, Chicago; George H. Newstadt, Cincinnati; Fred J. Foster, of Unger Bros., and his mother, Mrs. E. Foster, of Newark, N. J.; S. D. McPhearson, C. Ray Randall & Co., North Attleboro, Mass.; C. H. Davison, Coddling & Heilborn Co., North Attleboro, Mass.

Mrs. Christina Schraner was before Magistrate Finger in Davenport, Ia., last week, charged with attempting to steal a gold pin from the store of the M. E. Nabstedt & Sons Co., at that place. The woman came into the store and asked to look at some pins. When the latter were shown to her she did not seem satisfied. The clerk then turned away to get some others and when she did so Mrs. Schraner crumpled one of the cards with a pin on it in her hand. The little tag hung out between her fingers, however, and the clerk demanded the pin. The woman handed it over and then left the store. The police were notified and the accused was arrested. After the Magistrate had heard the evidence he fined the woman \$100 and costs, which she immediately paid. She was ordered to leave the city. Mrs. Schraner had been arrested before on the charge of shoplifting, Dec. 17, 1904, and had been fined \$100 by Justice Hall and ordered to leave town. She returned a short while ago.

Newark.

Additional contributions to the funds for the relief of San Francisco have been acknowledged as follows: L. Lelong & Bro., \$100.

The William B. Kerr Co., 144 Orange St., silversmiths, has been incorporated, the authorized capital being \$100,000, with \$1,000 paid in.

Kautzmann & Sussfeld have moved from 477 Washington St. to 116 Arlington St., where they will have double the floor space of the old quarters.

Michol Ianceli, an Italian jewelry peddler, last week caused the arrest at Boston of his brother-in-law, Ernesto Criscoulo, on a charge of larceny. The complainant said that his stock of jewelry was taken one night from his home by Criscoulo, who had been living at the house. When the police arrested the man the missing property was found, it is said.

The Huteson Optical Co., Omaha, Nebr., has issued a beautifully illustrated catalogue of 128 pages, illustrated throughout with delicate half-tone cuts and filled with new ideas for the optician. It will be sent, free of charge, express prepaid, to any one in the trade.

Popular Talks on Law.

(Copyrighted, 1906, by WILLIAM C. SPRAGUE.)

CONTRACTS.

(Continued from issue of April 11.)

No. 2.—THE CONSIDERATION TO SUPPORT A CONTRACT.

The rule that every promise must have a consideration to support it in order to be good in law; in other words, that every contract must have two sides; and the further rule that the consideration, or that which is agreed to be given for the promise, must not be something which the promisor is already bound in law to give, has frequent application in cases of settlements of existing debts. A owes me, we will say, \$500, and the debt is overdue. I say to him, "Pay me \$450 now and I will release you from the remainder of the debt." He pays me \$450, relying on my promise. Am I bound in law to release him from the remainder of the debt? No, because the consideration for my promise to release him was his paying me \$450, something which he was already bound in law to do. If, however, he had agreed to do something more than he was already bound to do, as, for instance, to pay \$450 at some place other than that provided in the original contract, or to pay me \$450 and do some specified service, then that which was agreed to be done over and above the mere payment of the \$450 would be considered in the law a sufficient consideration to support the agreement to release the debtor from the remainder of the debt.

It is held, however, that if a man owes me \$100 overdue, and I agree to accept something other than money, as, say, a horse in full payment, I cannot thereafter claim that the horse was not worth \$100, and that therefore the debtor still owes me the difference between the value of the horse and the \$100 on the ground of no consideration. If one pays something other than money, whatever its value, in full satisfaction of his debt, and the creditor accepts it, the debt is discharged as completely as if it had been fully paid in money.

Then, too, if the debt is not yet due, the creditor's agreement to accept a part of it at once in full discharge of the whole debt is good, as in that case the consideration is payment before the debt is due, and that is a new consideration—something the debtor was not bound to do.

Where the debt is uncertain in amount, or is in dispute, it is held that a promise to give a release on the payment of a certain amount of money is good, even although it may be afterward found that the real amount due was more.

If a creditor receives in full payment from his debtor some obligation due the debtor from a third person, the debt is discharged, even although the transferred debt is smaller than the one for which it is given in payment.

If a person to whom a debt is due agrees to accept a negotiable promissory note for a less amount than the debt and gives a discharge, he is bound to do so, the theory being that the advantage the creditor gets from the note, it being negotiable, is sufficient consideration.

It was held that a promise of extra pay

to sailors in consideration of their agreeing to finish a voyage for which they had signed articles was without consideration. So was a promise to pay a witness for attendance at court more than the fees prescribed by law. So was a promise to reward an officer for arresting a criminal whom the duties of his office required him to arrest.

The whole question as to whether or not a promise to pay less than the whole debt will discharge the debt on the payment of the lesser amount depends entirely upon whether or not what is agreed to be done by the debtor is something which in law he is already bound to do. If there is anything to be given or to be done by him other than he is bound by law already to do, there is sufficient consideration for the promise to release, and the promisor will be bound.

A promise made to one in consideration of his forbearing to sue is made on valid consideration. A promise made to one in consideration of his forbearing to collect a debt or to enforce payment is made on good consideration, provided the forbearance be for a definite or reasonable time. A forbearance not to prosecute a demand which is found not to exist in law or in fact is no consideration.

If a creditor agrees to give up part of his debt in consideration of the debtor's giving him new or additional security, his promise will have a good consideration and be valid.

Then, too, in order for the consideration to be legal, it must not be something in the past. Thus, if one does work for me gratuitously and I afterward voluntarily promise to pay him for it, I am not bound in law to keep the promise, the consideration having been something in the past. So if I have bought a horse and not at the time required a warranty, and I afterward go to the person from whom I bought it and ask for a warranty, a warranty then given, unless something is paid or promised to be paid on it, is not valid in the law.

If I promise to repay to strangers what they may pay out in the future in taking care of my sick son who is of full age, the promise is supported by a valid consideration, and is legally binding. If, however, strangers take care of my sick son, who is of full age, and I afterward promise to reimburse them, my promise is without consideration, as it is based upon past acts. I may be morally bound to do so; but I am not legally so bound.

It has been held that where the act is done at the request of another person under such circumstances that the law will imply a promise to pay what the service is worth, a subsequent promise to pay will be binding, the theory being that the parties have reduced to a certainty what they have purposely left undetermined.

As an exception to the rule that promises cannot be based on a consideration that is past we name promises to pay debts barred by the statute of limitations or by discharge in bankruptcy. Courts so holding have declared that the moral obligation to pay a debt barred by statute or by discharge in bankruptcy is sufficient to uphold the promise.

Another rule is that the consideration must be something possible. A promise to

do something that cannot in the nature of things be done is not a valid consideration to support a contract. Not only a thing which is physically impossible, but also a thing which is legally impossible cannot be made a consideration. A mere stockholder in a corporation cannot execute a legal deed for the corporation. A promise by a stockholder to do so would not be a legal consideration for a contract.

The question arises as to whether the fact that one is morally obliged to do a thing will make his promise to do it valid as a consideration for a contract. We have seen that where one is legally bound to do a thing his promise to do it will not make a legal consideration. The rule is that a moral obligation will not uphold a promise.

There is one other point we should consider before passing from the subject of consideration. Sometimes a consideration is said to fail. If I promise to pay a man \$100 in consideration of his agreeing to sell me his chestnut colt, the consideration supporting my promise to pay is his promise to convey the title to the animal to me. If before he does so the horse dies, there is a total failure of consideration. There is absolutely no way possible by which he may fulfil his agreement.

Where a patent right was a consideration of a contract, and it was found that the patent right was void, the consideration was said to have failed. The mere fact that a patent right that constituted the consideration of a contract could not be applied to any useful purpose and was of no value did not constitute a failure of consideration.

A promise to pay money for notes which afterward are found to be forged is another instance of a promise given for a consideration that has failed. There is such a thing, too, as a partial failure of consideration, in which case the party injured may recover for so much as has failed.

Before passing from the question of consideration, let us emphasize the fact that a court will never examine into the mere adequacy of price or consideration, that is, it will not consider whether the price or consideration was large or valuable enough. Courts do not attempt to make contracts for people. They will not answer the question as to whether one person received enough for what he gave, or whether one promise was worth the other. The only time when the question of adequacy can come up is when fraud is charged and the gross inadequacy of the consideration is brought in as evidence of the fraud. Mere inadequacy of consideration, however, is not enough to warrant a court in setting aside a contract.

(To be continued.)

Charles S. German, Varna, Ill., recently sold out to Charles Berggren, the local postmaster. Mr. German has moved to Henry, in the same State.

A plot to blow up the Von Hof Hotel, in Mansfield, O., was recently discovered by L. A. Ott, a jeweler. Mr. Ott lighted a match and a flame of gas shot up from a radiator to the ceiling. An investigation showed that some one had, with a rubber tube, filled every radiator with gas.

Optical Notes and Briefs.

The J. J. Boyd Optical Co., York, Pa., has applied for a charter of incorporation.

Dr. A. W. McAllister, Jefferson City, Mo., has been appointed consulting oculist for the State Penitentiary.

G. H. Goodwin, Tracy, Minn., has located in Marshall, Minn., where he has opened an optical establishment.

The jewelry store of B. D. Olmstead, Udall, Kans., has been destroyed by fire, along with other business houses.

The North American College of Optics, of Highfield, Md., was incorporated, May 1, in Hagerstown, Md., by W. M. and Frank Happel, G. W. Kettoman, A. A. Fox and J. Warren Kettoman.

Bert Bradley, who has been with A. M. Ward, Abilene, Kans., has been married and is now locating in the jewelry business for himself in Mattoon, Ill.

The Maine Optical Co., Augusta, Me., has bought the business of C. H. Russell, of that city, and moved into the store occu-

pied by him. The Maine Co. will occupy three floors of the building, with sales-room on the ground floor and factory on the second floor.

The New England Optical Co., 232 Merrimac St., Lowell, Mass., has sold its optical business to John A. McAvoy.

E. C. Roberts, Red Wing, Minn.; A. C. Wilson, Minneapolis, and M. M. Morrison, Osage, Ia., recently met in Rochester, Minn., with Prof. J. W. Grainger, of that city, to consider a plan of work and a course of study for the new college of optometry soon to be opened by the College of Optometry of the State of Minnesota.

Edward E. Arlington, chairman of the legislative committee of the New York State Optical Society, and Mrs. Mary D. Farrington were married Tuesday evening, May 2, at the home of Rev. Dr. S. Banks Nelson. Mr. and Mrs. Arrington left on an evening train for Montreal and Northern Canada.

The Indiana Optical Society held its Spring meeting at the New Denison Hotel, Indianapolis, Ind., Thursday and Friday of last week. There were only a few members in attendance. Discussion for the most part was centered on legislation that will be urged at the next meeting of the Indiana General Assembly. The society will probably ask the Legislature to pass a bill creating a board to examine and give certificates to eye specialists who wish to practice in the State.

The Bangor Jewelry & Optical Co., which has been incorporated under the laws of Maine, with A. P. Trask as treasurer, bought the stock and fixtures of J. R. Mosher, who failed not long ago. Mr. Trask had held the stock under a mortgage. The concern is doing business at 71 Main St., Bangor, Me., with R. H. Williston in charge of the optical department and F. E. Mincher and G. E. Chase, formerly with W. C. Bryant, in charge of the jewelry department.

G. H. Sherman has gone out of the jewelry business in Paola, Kans.

W. H. Yates has purchased the jewelry store of M. E. Cook, in Novinger, Mo.

Ed Black, a jeweler of Phoenix, B. C., has moved into new and better quarters.

(IN WHICH IS CONTAINED A LIST OF THE LATEST PATENTS GRANTED BY THE UNITED STATES AND GREAT BRITAIN, THE UNITED STATES PATENTS THAT HAVE EXPIRED AND THE REGISTERED TRADE-MARKS.)

UNITED STATES PATENTS.

ISSUE OF MAY 1, 1906.

819,121. HOLDING AND GRIPPING PLIERS.

JOHN CARTER, Malden, Mass., assignor to the Globe Optical Co., Boston, Mass. Filed Jan. 18, 1906. Serial No. 296,597.

Holding and gripping pliers for opticians' use comprising a pair of co-operating longitudinally-slotted jaws; the outer upper face of one of said

jaws being formed directly in rear of its nose end with a depression to permit the free movement of the frame under operation and the inner face of the other of said jaws being formed with a transverse groove adapted to receive the curved lens-holding part of a strap.

819,272. STEREOSCOPE. CHARLES FRAZER, Bennington, Vt. Filed Dec. 20, 1905. Serial No. 292,577.

In a stereoscope, in combination, the box or eye-guard *a*; the bar or frame *c* extending from said box or eye-guard; a slide mounted on said bar and provided with means for holding the photograph or view; a handle rotatively supported by said bar or frame; the bar *f* secured to the under side of

the slide and extending across the under side of the frame *c*; a pivot-pin extending downward from said bar *f*; the bar *n* rigidly connected at one end with the handle; the bar *r* pivotally connected at one end with the forward end of the bar *n* and provided near its outer end with the notch or screw *s*; the latch *t* pivotally connected at one end with the bar *r* and provided near its outer end with the notch or recess *v*; and means for swinging said latch from its connected end whereby its notch may be moved into engagement with said pivot-pin.

819,294. FOUNTAIN-PEN. HENRY B. LEVY, New York. Filed Aug. 22, 1905. Serial No. 275,216.

A fountain-pen comprising a barrel, a piston therein, and a pen-covering cap, said cap having

an elongated neck adapted for insertion into the barrel and to be detachably connected with the piston to act as a piston-rod therefor.

819,444. HAIR-STRAIGHTENER. SIMON E. MONROE, Boston, Mass., assignor, by direct and mesne assignments, of one-third to Benjamin F. Jackson, Boston, Mass., and one-third to James H. McDonough, Chelsea, Mass. Filed Sept. 21, 1903. Serial No. 173,963.

A hair-straightener comprising a body portion

having a metallic back piece provided with a chamber, rigid metallic teeth carried by said body portion, those teeth which are beneath the chamber

being hollow and communicating with the chamber, and bristles also secured to the body portion and interspersed between the teeth.

819,568. WATCH. ROBERT MANTHEY, Bridgeport, Conn. Filed Oct. 26, 1903. Serial No. 178,482.

In a watch free from center wheel and center wheel pinion, the combination with a main-wheel arbor rotating from left to right, and a minute

wheel in frictional engagement therewith, said minute-wheel having its axis in alignment with the axis of the main-wheel arbor, of a cannon-pinion, a pinion intermediate the cannon-pinion and the minute-wheel, and a dial-wheel, dial-pinion and hour-wheel.

819,574. TICKET-CASE. NEWTON W. MOORE, Windber, Pa. Filed Oct. 26, 1905. Serial No. 284,574.

A ticket-holder consisting of a casing of rectangular form, a cover hinged at one edge to one of the longer sides of the casing and adapted to

overlap the opposite edge and a portion of the back of the casing and to be secured to said back, a frame mounted in said casing, a roller journaled in said frame, and adapted to receive a roll of tickets, and a block arranged within the casing, said casing having an opening at one end for the passage of the tickets from the roll, and said lid or casing having a cut-away portion to permit the tickets to be gripped.

819,590. COLLAR AND CUFF BUTTON. CHARLES S. PEDERSON, Alstad, Wis. Filed April 11, 1905. Serial No. 255,041.

A collar-button comprising two members, each provided with a peripheral flange adapted to en-

gage with each other and form a cylindrical head, a stem projecting from one of the members and having a laterally-projecting arm at its free end, and a sleeve projecting from the other member and formed with a housing to receive the stem, said stem being rotatably mounted in the sleeve, and means for locking the members, said means being housed and concealed by the members.

819,603. MATCH-BOX. JAMES W. SAUNDERS, Reynolds, Ill. Filed Dec. 4, 1905. Serial No. 290,233.

A match-box comprising a hollow body portion

having an open end, a removable closure for the open end, said closure having an opening therein

at its lower portion, a slide movable into and out of position to close the opening, means for holding the slide yieldably in operative position, a pin carried by the slide for movement of the latter against the action of the spring, a longitudinally-extending gutter disposed within the body portion in position to discharge matches therefrom through the opening of the closure, upwardly-divergent wings carried by the gutter and resting against the sides of the body portion, and a vertical plate secured within the body portion and lying with its lower portion between and in spaced relation to the wings.

819,680. EASEL. JOHN WEBER, Newark, N. J. Filed Dec. 13, 1905. Serial No. 291,647.

In an easel of the class described, a card or plate, in combination with a brace attached at one end to the card or plate and having its other end

adapted to swing to and from the plate and provided with a transverse slot of substantially the same width lengthwise of the brace as the thickness of the leg, and a leg attached to one end of the plate and having its other end passed through said slot to establish a sliding interlocking connection with the brace.

DESIGNS.

37,971. WATCH CASE. JOHN BAIN, Pittsburg, Pa. Filed Feb. 26, 1906. Serial No. 303,126.

Term of patent 7 years.

37,972. CLOCK-FRAME. STANLEY M. LAWSON, Cincinnati, O. Filed March 12, 1906. Serial

No. 305,725. Term of patent 3½ years.

37,978. FOUNTAIN-PEN HOLDER. FRANK A. WEEKS, Plainfield, N. J. Filed March 10,

1906. Serial No. 305,414. Term of patent 7 years.

37,973. CLOCK-FRAME. STANLEY M. LAWSON,

Cincinnati, O. Filed March 16, 1906. Serial

No. 306,470. Term of patent $3\frac{1}{2}$ years.

37,974. CLOCK-FRAME. STANLEY M. LAWSON, Cincinnati, O. Filed March 19, 1906. Serial

No. 306,936. Term of patent $3\frac{1}{2}$ years.

37,975. CLOCK-FRAME. STANLEY M. LAWSON, Cincinnati, O. Filed March 22, 1906. Serial

No. 307,549. Term of patent $3\frac{1}{4}$ years.

UNITED STATES TRADE-MARKS.

[The following trade-marks have been adjudged entitled to registration under the Act of Feb. 20, 1905, and are published by the Patent Office in compliance with Sec. 6, of said act, which provides: "Any person who believes he would be damaged by the registration of a mark may oppose the same by filing notice of opposition, stating the grounds therefor, in the Patent Office, within 30 days after the publication of the mark sought to be registered, which said notice of opposition shall be verified by the person filing the same before one of the officers mentioned in Sec. 2, of this act. If no notice of opposition is filed within said time the Commissioner shall issue a certificate of registration therefor, as hereinafter provided for."]

PUBLISHED MAY 1, 1906

SER. No. 2,634. SALVE FOR THE TREATMENT OF SORE EYES. THE E. E. SUTHERLAND MEDICINE CO., PADUCAH, KY. Filed April 21, 1905.

EAGLE EYE

The arbitrary words "EAGLE EYE."

SER. No. 5,356. HAND-MIRRORS, MANICURE SETS, TOILET AND TOOTH BRUSHES, TOILET-TRAYS AND BOXES OF ENAMELED WARE. J. C. DOWD & CO., NEW YORK. Filed May 12, 1905.

Ebonoid

The word "EBONOID."

SER. No. 11,542. METAL-POLISH. PHILIP H. SOLOMON, St. Louis, Mo. Filed Aug. 11, 1905.

The words "HELIOS THE CLEANER OF METALS" displayed on a background representing clouds and auroral radiations.

The word "COMMERCIAL."

SER. No. 14,695. ELECTRO-PLATED HOLLOW WARE, ELECTRO-PLATED OR SILVER-PLATED TABLE WARE, AND ELECTRO-PLATED OR SILVER-PLATED FLAT WARE. GORHAM MFG. CO., PROVIDENCE, R. I. Filed Nov. 15, 1905. Used 10 years.

GORHAM

The word "GORHAM."

SER. No. 16,263. WATCHES, WATCH-MOVEMENTS, WATCH CASES AND WATCH PARTS. WILLIAM F. DOLL, New York. Filed Jan. 17, 1906. Used 10 years.

DOLL

The word "DOLL."

SER. No. 17,302. ORNAMENTAL WATCH AND NECK CHAINS. ANNIE M. HALE and EDWIN E. HALE, North Attleboro, Mass., executors of estate of Oscar M. Draper, deceased. Filed Feb. 23, 1906. Used 10 years.

NONPAREIL

The word "NONPAREIL."

TRADE-MARKS REGISTERED MAY 1, 1906.

51,993. FOUNTAIN-PENS. L. E. WATERMAN CO., NEW YORK.

The arbitrarily-associated representation of a globe, a fountain-pen extending across the same, and a line extending from the pen-point and surrounding the globe.

Filed May 5, 1905. Serial No. 4,348. Published March 6, 1906.

52,174. WATCH CASES AND WATCH

MOVEMENTS. HAYDEN W. WHEELER & CO., NEW YORK.

The character "W," with the letters "H" and "W" within the loops thereof.

Filed April 20, 1905. Serial No. 2,378. Published March 6, 1906.

52,192. COMBS. DR. HEINRICH TRAUN & SOHNE, HAMBURG, GERMANY.

The representation of a man sawing a log of wood with a comb. Filed July 21, 1905. Serial No. 10,678. Published March, 1906.

UNITED STATES PATENTS THAT HAVE EXPIRED.

[Reported especially for THE JEWELERS' CIRCULAR-WEEKLY by R. W. Bishop, Patent Attorney, Washington, D. C.]

Issued April 30, 1889.

402,135. ENGRAVING AND CHASING MACHINE. W. W. BRADLEY, Newport, Ky., assignor to J. C. Dueber, same place.

402,171. CUTTING-OFF MACHINE FOR JEWELERS' STOCK. F. L. LEWIS, Providence, R. I.

402,176. CUFF-HOLDER. C. O. McCASLAND, Denver, Colo.

402,314. ART OF ENGRAVING. W. S. EATON, Sag Harbor, N. Y., assignor to Fahys Watch Case Co., same place.

402,316. ENGRAVING MACHINE. C. H. FIELD, Providence, R. I.

402,320. METHOD OF SECURING BLADES TO METAL HANDLES. HORACE GLINES and W. W. HOLMES, Bridgeport, Conn.

402,309. ELECTRICAL CLOCK. A. M. J. and V. J. A. M. JANSEN, San Willibrord, Curacao.

402,343. REPEATING WATCH. CHARLES MORLET, Hoboken, N. J., assignor of one-half to Prosper Nordman, New York.

402,359. TIME-REGISTER. H. W. SMITH, St. Louis, assignor of one-half to H. C. Baker, Kansas City, Mo.

402,380. WATCH-ENGRAVING MACHINE. AMI ZUAHLEN, Philadelphia, Pa.

402,417. FOUNTAIN-PEN. S. D. DIAS, New York.

402,466. CANDELABRUM. THOMAS MCGOVERN, New York.

402,473. WATCH-PENDANT. PAUL PERRET, Chaux-de-fonds, Switzerland.

402,486. UMBRELLA. SIMON SCHWARTZ, Joplin, Mo.

Designs issued April 26, 1892, for 14 years.

21,497. PAPER-WEIGHT. WILLIAM LANYON, JR., PITTSBURG, KANS., assignor of one-half to N. V. Lanyon, same place.

21,500. BOTTLE. J. P. CHERRY, Nashville, Tenn.

21,509. BOTTLE. MAX OBERFELDER, Chicago. Designs issued May 2, 1899, for 7 years.

30,643. MEDAL. H. K. SOLBERG, Clarkfield, Minn.

30,647. FINGER-RING. C. H. PFEL, Chicago.

30,648. LADLE. W. A. JAMESON, Niagara Falls, N. Y.

30,649. SPOON. W. A. JAMESON, Niagara Falls, N. Y.

30,653. FLOWER-HOLDER. CORA N. LITTLE-PALE, El Paso, Tex.

30,655. ERASER-HOLDER. L. W. FABER, New York.

30,665. LAMP. L. C. TIFFANY, New York., assignor to Tiffany Glass and Decorating Co., same place.

30,705. PIN-CUSHION. CORRY JONES, New York.

Burglars who recently broke into the store of C. W. Fleming, Lincoln, Nebr., escaped with watches, diamonds and miscellaneous jewelry valued in all at about \$1,000. The way in which the thieves gained entrance was unique. A skylight over the storeroom in the rear of the store was shattered, a rope was attached to an iron projection, and the intruders slid down. They then raised a window opening into the store proper, by means of a lever, and went direct to the front show window, which was filled with stock.

BRITISH PATENTS.

(ABRIDGMENTS OF SPECIFICATIONS, 1904, FROM *The Illustrated Official Journal*.)

ISSUE OF APRIL 19, 1906.

28,423. SIGHT-TESTING APPARATUS, MICROCOPES. S. CZAPSKI, Jena, Saxe-Weimar, Germany. Dec. 27.

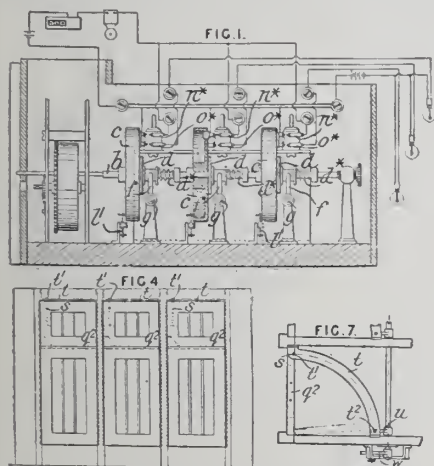

Relates to an instrument for making observations and measurements in connection with the eyes of a patient while they are accommodated for distant vision. The tubes b^1 , b^2 are held parallel by the end-pieces d^1 , g , the former being shaped to fit the bridge of the nose, and the latter having a shade

for the operator's face. A lens a^2 is fixed in each tube in such a manner that a mark f^1 and one of the patient's eyes occur approximately at the principal foci, and hence the marks f^1 , f^2 are seen as at a distance. The operator will similarly observe the patient's eyes, and, in order that the two may not be seen superposed, a prism i is inserted at the end of the tube. In a modification, a shutter k^2 , Fig. 3, with a finger-stud l^2 is provided, so that each eye may be examined separately, and a scale p^2 , o^2 , shown enlarged in Fig. 5, is arranged to measure the interocular distance, the lower part o^2 , a^2 giving the distance between the lenses for long-distance spectacles, and the upper p^1 , p^2 , graduated to a larger scale, giving the distance for reading spectacles.

28,460. TIME-CHECKING APPARATUS FOR WORKMEN. C. GEDDES, Water St., Liverpool. Dec. 27.

To register and signal the occasions on which workmen and employees spend excess time in latrines, a time-alarm apparatus is set in motion by the removal therefrom of the latrine key, and the door and lock of the latrine are so arranged that the key cannot be removed unless the door is closed.

Each key is hung from an arm on its spindle g , Fig. 1, and the fork f being thereby urged to the right keeps the spring a^* compressed. Upon removal of the key, the spring presses the friction clutch d to the left and locks the weighted drum c to a spindle b which is constantly driven by clockwork. Metal plates carried by the drum make contact, after a certain angular movement, between spring plates n^* in a bell and counter circuit, and also between similar plates o^* in a circuit containing a lamp in the latrine, which is thereby lit up and warns the occupant. When the key is replaced, the drum is freed and is returned to its normal position by the counterweight, a pivoted stop l and a pin arresting the motion. The latrine has lower doors without locks upon

which small upper doors q^2 , Fig. 4, overlap, so that in the only possible position for removal of the key, when the bolt s takes into the hole t^1 , both the upper and the lower doors are shut and locked. To prevent locking in any other position and consequent return of the key to stop the time-alarm apparatus, the bolt is kept from rising in any position of the door save the closed one by a quadrantal guard t shown in plan in Fig. 7. Normally, the maximum opening of the door is determined by a stop u . When, however, it is desired to use the latrines apart from the time-signal, this stop may be displaced by the external handle ac and the upper door may then be locked open and the key removed by allowing the bolt to rise into the second hole t^2 . To prevent use of a latrine twice in a given time by the same employee, a metal check identified by his number may be put through a slit into a locked box when he returns the key.

28,533. STYLOGRAPHIC PENS. B. W. WARWICK, London, N. Dec. 28.

The writing-needle of a stylographic pen is set at an angle to the length of the pen so as to be perpendicular to the writing-surface when in use. The needle F , Fig. 2, is carried by a screw or plug G in a crosshead E , Fig. 3, set at an angle of about 40 degrees to the axis of the pen. The needle may be coiled to form a spring as shown in Figs. 2 and

4, or attached to a tympanum T , Fig. 7, or to a spring-controlled oscillating hock P , Fig. 6, held by a slot and pin Q in the plug N . To adjust the angle of the crosshead E , it may have a tongue M so as to be clamped in a recess in the end of the pen by a screw L , a duct J supplying the ink. To prevent unequal wear of the writing-point, the plug E , Fig. 9, may be carried in the ring K formed on the end of the pen and having a supply groove to feed the duct J . The head E is sprung into the ring during manufacture. In another form, the end section E , Fig. 10, of the pen, and the needle F are both curved to bring the writing-point to the desired position.

28,565. WATCHES. A. BAUME (trading as Baume & Co.), Holborn Circus, London. Dec. 28. Drawings to specification.

Stop-Mechanism, Dials, Hands.—For purposes such as yacht racing, in which it is necessary to know the amount of time left before a signal will be given, two dials are provided at the back and front of a watch respectively, and hands on the same shaft sweep round these dials. If the numbering is the same on both dials, the hands turn in opposite directions relatively to the dials and one will give the time that has elapsed and the other the time that is to elapse. The hands are set to zero in the usual way, and the watch may have one of its dials to register time as in an ordinary watch.

28,739. HOOK FASTENINGS. P. L. WEEGER, Buffalo, N. Y., U. S. Dec. 29.

Relates to a fastening applicable to belts, garters, necklaces, neckties, etc. The fastener consists of two parts 1, 2 made of spring steel. The member

1 is a continuous ring formed with a straight bar 9 for attaching to the article to be fastened, and an inwardly-projecting spear head 5. The other member 2 is formed with two parallel legs 11, 12 terminating in hooks 3, 4, adapted to form a spring connection with the spear head 5 as shown. The parts are disconnected by turning the member 1 at right-angles to the other member.

28,751. EYE-PROTECTORS AND GOGGLES. E. MIROVITCH, Paris. Dec. 29. (Date applied for under Patents Act, A.D. 1901, March 24.)

Pince-nez protectors or goggles are constructed

so that the eye-chambers are ventilated, and so as to be readily folded into a small space. The glasses a are set in bands A , fitted on eye cups B , which have soft india-rubber heads b and flexible ventilating tubes c , c^1 with flared outer ends. Each pair of ventilating-tubes may be enclosed in a casing of flexible material. The nose-bridge D is

secured to the eye cups by ball-and-socket joints d , and its central part consists of a spring-pressed slide clamped in adjusted position by a screw or other stop. Each eye cup carries two loops e , e^1 , connected by cords to an elastic band which is passed round the head to keep the goggles in position. Each band A may be secured in its eye cup by a pin f and a spring f^1 carrying a projecting pin and a disengaging push-piece.

28,823. LENSES. M. BENTZON and A. H. EMERSON, both in London. Dec. 29. Patent not yet due for sealing.

Relates to solid bifocal lenses, particularly for spectacles and eyeglasses, and to apparatus for making them from single pieces of glass, etc. The lenses may be constructed in such a way, as shown in Fig. 2, that there is no ridge or step between

the parts of different curvature. Fig. 1 shows a lens with such a ridge. The two curvatures may be formed at one operation by a machine carrying two or more tools as shown in Fig. 8, or glass on which one of the curvatures has already been produced may be operated on by a machine carrying a single tool as shown in Fig. 3. Two single-tool machines may be used together. The glass-carriers are supported on a table slide 2, while the tool-carrying spindle 4 is rotatable in bearings on a carrier head 5 adjustably clamped

to an arm 6 pivoted to a lever 7 which carries a block 7 adjusted by a screw 8 and a spring 23, to enable the position and inclination of the tool spindle to be adjusted. The pressure of the tool on the work is adjusted by weights 6 on the arm 6. A support 8 is provided for the arm 6 when turned back. The tool 9 is shown attached to the spindle 4 by a ball 11 engaging a spring 14, and a tongue 12 engaging slots in the tool and in a collar 13. The tools may rotate in the reverse direction to or in the same direction as the lens-holder, or the lens-holder may be stationary and the tools made to revolve as well as rotate. Approximately the desired curvature is produced by steel, etc., rough-grinding tools, after which

smooth-grinding tools of softer metal, such as brass, and then polishing-tools are used. The polishing-tools may be covered with felt which has been boiled in pitch. To enable the curvature produced to be independent of the curve of the grinding-surface of the tool, tools with hollowed or recessed undersides are used, so that their grinding-surface is greatest at the parts which tend to grind away quickest. The curvature produced depends on the relative surface velocities of the lenses and tools, and the relation between the two is adjusted according to the curvature required. When two lenses are operated on together, as shown in Fig. 3, their adjacent edges may be cut

flat to bring them close together, and filling-pieces may be placed in the gaps between them, to form a complete circle of glass. Fig. 8 shows two tools arranged to produce the two curvatures simultaneously on a piece of glass which may afterwards be cut up and treated as desired. The tools have square holes engaged by square parts 42 on tool-spindles 25, 33 supported as shown and rotated and revolved at the desired speeds by pulleys 31, 32, 37, etc., through the gearing shown. The supporting-arms 26, 35 can be replaced by longer or shorter ones according to the size of the piece of glass operated on and the relative areas of the two curved surfaces. A single tool is used on the inner surface, while two or more tools may be used simultaneously on the outer surface. Two or more glass-holders 17 arranged at an angle to one another as shown in Figs. 3 and 13 may be secured to a block 16 with inclined seats by screws 19 as shown, and the block may be secured to the chuck 3* by bolts, the head of which engage undercut curved slots 21, Fig. 14, in the block. Fig. 15 shows a modification in which the blocks 17 are formed with curved faces and are secured to a curved holder. Wedges or washers may be used to tilt the lens-holder when desired. In solid bifocal lenses with a ridge between the two surfaces, the ridge is obscured or left unpolished to prevent reflection, and its sharp edge is chamfered to prevent injury when coming in contact with a hard surface. The polishing of the ridge may be prevented by a strip of copper or the like.

28,842. CLOCKS. T. WEISSER, Allemaque, Heidelberg, Germany. Dec. 30.

Cuckoo Mechanism.—Relates to the production of cuckoo, quail, or trumpet calls by a hand-operated device independent of the clockwork. A chain *c* is attached to the arm *i* fixed to the

bellows *b*, which are connected by an arm *p* and pin *q* to the bellows *b*¹. The bellows are thus operated one after the other to give the usual call. The bellows are also worked by the pin-wheel *h* of the striking-mechanism through the tappet *g*, arbor *f*, arm *e*, and connecting-rod *d*. On the chain

being pulled by hand, the tappet *g* rises from the pin-wheel *h* and does not interfere with the striking-mechanism.

28,849. WORKMEN'S TIME RECORDERS. W. M. LLEWELLIN, Bristol. Dec. 30.

In apparatus more particularly of the type described in Specification No. 20,432, A.D. 1902, a workman's signature or identifying-mark upon a time-sheet is automatically stamped with the time. The sheet is fixed to a clock-driven drum *C*, Fig. 1, which draws it from a spring-controlled spool *A*, and it is signed through the aperture *L*. The

drum and a minute type-wheel are geared to move together, and by the employment of suitable inking apparatus the proper minute will be printed in the margin of each line. Carried round by this wheel is an hour-type-wheel *F* provided with a star-wheel for a spring detent upon the larger wheel, and also engaging a fixed transfer pawl *II*, the arrangement thus printing the hour at every change. In Fig. 4, the type wheels *R*, *S* are shown mounted slightly above the record drum, which is written upon through a slot *T* and then lifted by a lever and yoke to imprint the time, a spring-pawl and ratchet-wheel feeding on the drum between each movement. Preferably, each workman makes two or more consecutive entries; a third wheel may also be added for the date.

28,850. WORKMEN'S, ETC., TIME-RECORDERS. W. M. LLEWELLIN, Bristol. Dec. 30.

Various improvements in workmen's and other time-recorders are described. In order to obtain a sharp imprint on the diagram in the index-lever type of recorder, the lever *A*, Fig. 1, has hinged to it a casing *E* carrying a spring-controlled plunger *D*¹. On depression of the lever into the number plate, the ring *D* causes a resistance to the movement until the plunger *D*¹ lifts, the stroke being then completed sharply. In the card and platen

type of machine, the platen may be hinged and lifted to the type-wheels, on striking which electric contact is made and a bell rung, or the platen may be operated as shown in Fig. 5. Card-holders *P*¹, *P*² are attached to an endless band over wheels *P*⁴, *P*⁵. The latter is driven by gearing from a wheel *S* which drives a pinion *R*, a projection *R*¹ on which lifts the platen *Q* to the type-wheels *P*. At one portion of the wheel *S*, a number of teeth are cut away so that the card is stationary as it is lifted to the type-wheels. The card-guide, operated by clockwork, for spacing the record on the card for successive days, has a double step *u*¹ so that a line shall not be missed for a Sunday or other regular holiday. In the form shown in Fig. 9, the workman first sets the three levers *f*-4 to his number, and then gives a handle attached to the shaft *e*-1 one revolution. The platen *d* is moved by the cam *g*, and a projection *hl* seizes the lowest card in the magazine *h* and carries it forward under the type-wheels *b*, to which it is lifted by the eccentric *e*. Means for controlling the feed of the inking ribbon for such machines are such that, when one spool becomes full, the direction of winding changes. In the form shown in Fig. 13, the spools *1*, *1*¹ are driven by bevel

gearing through clutches *n*, *n*¹. Near the end of the ribbon is fixed a clip *r*, which comes up against a guide *r*-2 and depresses the end *s* of a tube pivoted at *t* and carrying a ball *s*-1. The ball then rolls down, and on coming into contact with the end of the tube puts the clutch out of gear. Another feed-motion, in which the ribbon, when the spool is full, presses on the roller and puts the clutch out of gear, is also described. Similar levers to that shown at *f*-4, Fig. 9, may be applied to the machines described in Specifications Nos. 2627 and 20,432, A.D. 1902, and No. 1448, A.D. 1904.

29,006. FACE GAUGES. J. H. HALES, Newport News, Virginia, U. S. Dec. 30.

An optician's frame gauge for ascertaining the measurements for spectacle frames is shown in Fig. 1. The measuring-square 6 and the sliding measure 4 are shown in Figs. 4 and 5; when not in use, they are stowed between the front and back

of the gauge, the square 6 along the top, and the measure 4 in the end compartment 10. The rounded head 7 of the square 6 is marked angularly to give when in use the angle of tilt of the lens with reference to the line of the nose. The recess 8 is such as to accommodate the highest bridge. The sliding measure 4 is adapted to slide at right-angles to the body of the gauge. The various scales are in inches or in millimeters, and the body of the gauge may be covered with information, advertisements, etc. The gauge is preferably made of celluloid.

THE HOROLOGICAL REVIEW.

How Father Knickerbocker Marks *the* Hours

Prominent Clocks That Give the Time to New Yorkers in Manhattan, Brooklyn and the Bronx.

(Continued from issue of May 2.)

THE SHOPPING DISTRICT.

TAKE Herald Square as the next starting point. That liveliest section of our bustling city, owing to its swarm of feminine visitants by day, passes under the respectable title of the "shopping district,"

but includes those quarters where the great glare of the "white lights" casts its nightly effulgence, and the policeman's task gained the proverbial claim for luscious remuneration (of the side issue source) that earned the sobriquet of "Tenderloin." Well representative of all the much variegated classes of mankind dwelling within our city's walls are the three clock-crowned edifices facing this triangular open space.

The prosperous "fourth estate" is ably represented by the *Herald* building in its ornate Italian garb. But it is its clock which now chiefly calls for our attention. Since March 21, 1895, eight times in each 24 hours the large crowd gathers in front of the 35th St. portal to gaze on the activities of the two heroic bronze figures of workmen who, with their large hammers, sonorously beat out the hours at XII, I, IV and VI. To the rear of these lifelike figures towers a majestic statue of Minerva, goddess of all industrial arts.

That realistic "striking" scene of never-failing public interest is composed entirely of bronze, including the bell, and was imported by James Gordon Bennett from France. The figures of the workmen and Minerva are masterly creations of the brilliant French sculptor-genius Antonin Jean Carlès.

The hammer of the eastern figure weighs 20 pounds and the other 40 pounds. Credit is due to the E. Howard Clock Co. for the intricate, delicate mechanism that so accurately carries out its performance in all weathers. The spark of vitality that creates

the periodical animation of the group is electric. Perhaps a lay explanation of the true inwardness of the mechanism may prove of interest to some readers of *THE CIRCULAR-WEEKLY*.

The clock movement and the mechanism which works the two bronze figures are situated in a small room directly below the figures. From the clock dial a cluster gear

CLOCK, WIND DIAL AND BRONZE FIGURES ON THE HERALD BUILDING.

The Balance of Business

THE
ELGIN
WATCH
Regulates
the
Business
of the
World

Indispensable to modern life, the Elgin Watch is ever in increasing demand—and the balance of business goes to the store that carries a full stock of Elgin Watches.

See Jobbers' list for prices or write the Company.

Every dealer is invited to send for the Elgin Art Booklet, "Timemakers and Timekeepers," illustrating the history and development of the watch.

ELGIN NATIONAL WATCH COMPANY

Factories, Elgin, Illinois, U. S. A.

New York Office, 11 John Street.
San Francisco Office, 206 Kearny St.

carries a rod up six feet, then extends 12 feet east and finally in the building six feet to a regular tower clock. This time-piece is connected by electric wires with the machinery especially made for moving the bronze figures. An electric contact is driven by a wheel on the arbor of the es-

CLOCK OVER MAIN ENTRANCE OF MACY'S BUILDING.

capement wheel of the clock. This contact makes and breaks an electric circuit at exactly XII, I, IV and VI o'clock, both night and day.

When the contact is made, the electric current, passing through a powerful magnet in the mechanism for moving the fig-

CLOCK TOWER UNION DIME SAVINGS BANK.

ures, trips a heavy steel lever from its hold in a programme wheel of the heavy striking movement on the machine. When the lever is released, it lets the power of about 30 weights, aggregating about a ton, which are suspended by a steel cable in another part

of the building, act on the movement.

Two large main wheels carry heavy cam wheels, whose large teeth lift and drop the striking levers. These striking levers connect by a hammer chain to overhead levers, through which the power is transmitted to foot levers, and thence through the foot levers to other overhead levers in the base of the statue of Minerva. These last levers connect directly with the striking figures. The first motion turns them slightly away from the bell, giving the workmen the appearance of getting ready to strike; the next motion brings them back to the bell, causing the hammers to strike a sharp blow.

But why this peculiar selection of hours struck? That question arises in most minds when they learn that at XII, I, IV and VI o'clock only do the hammers acclaim the time. Well, at noon the army of working men stay their labors for their frugal repast and brief respite. At one o'clock they re-

CLOCK AT THE CONTINENTAL HOTEL.

turn to work; at four they lay down their tools after eight hours of toil, and at six the honest workman sits down with his family to enjoy his well-earned supper. From the accompanying illustration it will be noted that a wind dial acts as mate to the clock dial, affording weather information simultaneously with giving the passing public the time of day.

Facing this elegant home of journalism is the inviting clock-adorned façade of the Dime Savings Bank building, which seems to appeal to the toilers from their meagre pecuniary incomes to lay aside those frequent instalments of mites which on arrival of the proverbial "rainy day" will serve to pay passage to the next stage of profitable labor, or with constant yearly growth may aid to comfort those last passing years, when decrepitude denies the bodily powers that earn a daily wage. The savings bank clock's hands point the warning message to the workman that the present, with its possibilities, is rapidly fleeting,

bringing the future, with its unknown needs closer hour by hour.

But the strong influence of the present, to exchange hard-earned dollars for body comforts and adornment appeals to the purse of tempted humanity through the

THEO. A. KOHN & CO.'S STREET CLOCK.

clock face over the spacious entry of Macy's mammoth emporium on the third side of triangular Herald Square. And wealth flocks into those doors, alluring the undecided to join the merry throng, cast thrift to the winds and enjoy life's pleasures while health and wages last.

But, to the visitor who has enjoyed the

CLOCK ON THE BREWSTER BUILDING.

hospitalities of the metropolis, there will remain memories of hostelry in this section, such as the Gilsey House clock, 35 years at its corner, those of the Cadillac, Continental, Fifth Ave., whose time dials face the pedestrian to remind him of vacuities in his internal economy and invite to

breakfast, luncheon, dinner and supper.

Theo. A. Kohn & Co.'s sidewalk clock, nearly in front of the Waldorf's regal caravansary, attracts the attention of its wealthy patrons to gold, silver and gem adornment, but painted in antique bronze coloring to match the façade of their well-known, handsome store, there is a likeness

to the legal right to such clocks furnishing accurate time to the passing crowd, while compensating the owner by steering some of those pedestrians into his store.

Continuing downtown along Fifth Ave. brings one to sidewalk clocks in front of E. M. Gattle & Co.'s store, corner of 38th St., and Jacob Dreicer & Son's.

Along Broadway in this section are located the Bank of New Amsterdam's sidewalk clock, facing the Metropolitan Opera House, and Brewster's old landmark, facing old Longacre Square (later named Times Square). A little further uptown brings one in sight of the handsome bronze finial and clock in the tower of Witmark & Son's "Busy Bee" headquarters on 37th St.

Within these same purlieus lies unbrageous Union Square, where the handsome mounted clock of the Tiffany building did, for so many years, useful public service. Its absence is badly felt by neigh-

proverbial sardine is fully lived up to on that block. And the handsome Howard skeleton dial of the clock set in the face of Stern Bros.' dry goods store is scanned every moment by many thousands of bargain purchasing femininity.

Talking of this block on 23d St. reminds

THE OLD TIFFANY CLOCK ON THE FIRM'S NEW BUILDING.

to so many of these numerous street clocks that no special interest would be attached to it, were it not that it "got into the courts" one fine day; that is to say, when it stood in front of the former store, 56 W. 23d St., suit was brought against the owners to remove the timepiece as an obstruction in-

MERMOD, JACCARD & KING JEWELRY CO.'S CLOCK.

bors. While in its old position that timepiece had an aspect imposing, but by its removal to the gorgeous Fifth Ave. palace it suffers from the splendor of its surroundings almost to obliteration. However, the visitor on Fifth Ave. who is blinded to the Tiffany dial, will assuredly sight that of the Mermod, Jaccard & King Jewelry Co., located in the site rendered historical as the former abode of the world renowned infidel and lecturer, "Bob" Ingersol. The Jaccard clock is of bronze and of characteristic style, taking Western Union time. But a few doors from here is the steeple clock of the Brick Presbyterian Church, corner of 37th St.

It would be hard to find a denser throng of shoppers on any street of the shopping district during the busy hours than will be found on 23d St., between Fifth and Sixth Aves. Hard, because the condition of the

CLOCK TOWER ON JEFFERSON MARKET.

the writer of the same block on 14th St., or, to be more exact, it does not remind him so much as that the moment he turns his back on either he cannot tell one from the other in his memory—the same terrible press of womankind, the same bewildering array of eternal feminine adornment and requirements, each store a repetition of its neighbor, and, to make the similarity more confusing, there is a clock on just the same side of the street and about the same distance from Sixth Ave., but this time it is a sidewalk clock, and the word "Rothenburg's" appears instead of "Stern Bros." And this saves its character, in the writer's mind, after he sees the clock. Of course, to the ladies, dry goods and the stores that hold them are easily recognizable, they are as an "open book"—a school primer.

Then, again, Sixth Ave. is well clock represented. J. A. Linherr's sidewalk clock, opposite the big "14th St. Store," the Lefkowitz clock, of similar description, on the corner of 17th St. And while on Sixth Ave. the majestic clock tower of the Jefferson Market Police Court building, with its magnificent architectural lines, must not remain unmentioned. This Seth Thomas clock, with its dial of over eight feet in diameter, 85 feet above the sidewalk, has, since its installation in 1876, watched the gathering in within the walls of its building of many thousands of the Tenderloin's criminal population. Could its hands write they would tell volumes of sad stories of the bitter fruit of a gay youth and a list of past and present dwellers in the prisons beneath its tower would resemble in size a large city directory. Its timely light at night is seen from quite a distance.

This tower clock is an exemplification of the many ills and perils the lofty public

STREET CLOCK AT FIFTH AVE. AND BROADWAY.

jurious to the neighbor's business. And in June, 1891, the case came up for "hearing." The judge listened patiently to all the evils the complainant could bring against that timepiece, but decided that it could stay, as it was of public use and neither took away light nor otherwise interfered with the complainant's affairs. Thus the Kohn & Co. sidewalk clock established a precedent as

LONDON, ENG.

timepiece is heir to. When first erected the hours were struck on a great bell, whose tones were audible throughout a wide area. But the vibrations were found to affect the tower. And, in fear of the bell's pulsations shattering the very building itself, the hours have been told off by the mute hands alone, to avoid jeopardizing alike the lives of the judge and his officials in the court below and those of the other dwellers perforce.

Another well known and largely consulted timepiece is the elaborately gilded Dorlon sidewalk clock on 23d St., near the corner of Madison Sq.

Meandering along Broadway, one strikes a little bevy of sidewalk clocks, such as

PROCTOR'S STREET CLOCK.

that in front of Proctor's, near 28th St., calling to continuous performances in that home of vaudeville; in front of Lindo Bros.' jewelry store, and still another before Browning, King & Co.'s clothing emporium.

Two very useful sidewalk clocks are located at both entrances of the Lincoln Trust Co.'s building, 25th and 26th Sts.

(To be continued.)

A Handsome "Grandfather's" Clock.

ALL German town halls have, after an old custom, wine cellars of their own, of which the most celebrated is that of the free town of Bremen. Many of these town halls have been rebuilt recently and enlarged according to the greatly increased populations of the greater German towns.

One of the finest buildings of this kind is the new town hall of Leipzig, for whose wine rooms a very peculiar grandfather's clock was presented by one of the wealthy citizens. The clock is made in oak by the well-known firm of Etzold & Popitz. The decorations are chiseled in bronze, and show the insignia of Leipzig as a university and a center of commerce.

Several mottos are engraved round the dial and upon the case, one of which says that "to the happy no clock chimes the hour," and another, that the Aldermen should not forget to moisten the clay of their discussions by a good glass of wine now and then, for "dry lamps would not burn."

Why a Watchmaker Put an Inscription on Lincoln's Watch.

AMONG the jurors serving in the Supreme Court recently was one 84 years young. He said so himself. He looks and acts just as young as he says he feels. This man is Jonathan Dillon, of 46 W. 117th St., New York. He has been engaged in the watchmaking business for the best part of 74 years.

Mr. Dillon, who has a remarkable memory and an interesting fund of reminiscence, tells a new story which has to do with Abraham Lincoln.

"When the Civil War broke out," said Mr. Dillon, "I was in the employ of M. W. Galt & Co., on Pennsylvania Ave., near 7th St., in Washington. I was the only Union sympathizer working in the shop.

"I was working upstairs when Mr. Galt came up. He was very much excited, and gasped:

"Dillon, war has begun; the first shot has been fired."

"At that moment I had in my hand Abraham Lincoln's watch, which I had been repairing. It was a gold, hunting case, English lever watch. The late John Hay told me afterward that it was the first watch Mr. Lincoln ever owned.

"I was in the act of screwing on the dial when Mr. Galt announced the news. I unscrewed the dial, and with a sharp instrument wrote on the metal beneath:

"The first gun is fired. Slavery is dead. Thank God we have a President who at least will try."

"Then I signed my name and the date. So far as I know, no one but myself ever saw the inscription, and I do not know into whose hands Mr. Lincoln's watch fell at his death."

Mr. Dillon was born in the city of Waterford, Ireland, where his ancestors had been watchmakers for generations.

"I have newspapers," he said, "containing my father's and grandfather's advertisements back 150 years. I was never out of work for 24 hours at a time until I retired."

"How long ago was that?" the old watchmaker was asked.

"Well, I wouldn't like to admit that I have quit yet," was the reply. "My eyes are not as good as they were once, but they are still as good as those of any one I know. When I was younger I frequently amazed friends by standing on Jersey City Heights and reading signs in Manhattan. My friends often accused me of locating and learning them before I crossed the river, but that was not the case. I could actually read them at that distance."

The law does not oblige a citizen to serve as a juror after he is 70 years old. Mr. Dillon rather enjoys the work.—*N. Y. Times*.

William G. Langdon, who was probably the oldest clockmaker in active business in the United States, died recently in Boston, Mass., at the age of 95. He had been a clock maker 75 years.

The Neuchatel watch factories are busy over a large order from Japan, which is going to present to its soldiers and sailors watches of special pattern as souvenirs of the war.

A Clock Made of Bone.

AN interesting curio in the possession of Joseph Gibbs, 1306 Franklin Ave., St. Louis, Mo., is a clock made almost entirely of bone, the only exception being the running works. Mr. Gibbs, who purchased the unique clock, about a month ago, from a private family, who did not know its history, thinks that the clock is of English make. It is wound up by means of a main-spring and a chain.

The clock, which is about six inches high,

UNIQUE CLOCK MADE OF BONE.

shows evidence of age. It contains 10 wheels, all made of bone. The carving was all done by hand. The clock keeps perfect time.

Horological Notes.

A CHINESE firm at Chefoo, with an American member, handling a cheap American watch, desires to buy watches of higher price and better quality. This firm handles chiefly American goods, and is extending its business by opening branches.

Retiring Customs Collector John T. Rich, Detroit, Mich., was recently presented with a clock by the employees of the customs service in his office. The clock is of Italian marble, with lacquered gold ornaments at the top. Two lacquered gold candelabras stand beside it, and shed soft rays of light over the marble face. On the base of the clock is affixed a gold plate with the following inscription: "In commemoration presented to the Hon. John T. Rich by the employees of the United States Customs office, Feb. 28, 1906."

False Value In Karat Mark Only

YOU ARE acquainted with the general qualities of gold filled goods. You know that the 12 karat mark alone does not signify value. Of course the gold used is 12 karat, but a very natural question is "how much is used?" $\frac{1}{30}$ - $\frac{1}{40}$ or even thinner shells of gold make a fine appearance on first inspection.

YOU KNOW, however, that these extremely thin shells will not wear and give the satisfaction for which they are often guaranteed. In buying goods for your own use you are pretty certain to look for the quantity figure as well as the karat mark. Your customers, by continued trade, will repay the same consideration.

THE S-Q lines of optical goods always bear the quantity figure. They are thoroughly honest goods, backed up and guaranteed in every particular by a firm which has a reputation for making good.

YOUR OPTICAL DEPARTMENT might get in touch with us. We are always pleased to furnish information; we also feel sure that it would be mutually advantageous.

OPTICAL DEPARTMENT

External Muscles of the Eye and Ocular Paralysis.

(By DUNCAN MATHESON MACKAY, M.D., in the *Optician and Photographic Trades Review*.)

THE action of the individual orbital muscles and the effect of paralysis of one or more of them are admittedly not easy to keep in mind, especially by those who do not have to diagnose cases of strabismus every day. Even oculists find it convenient to employ a diagram, either real or mental, by which they may recognize from the character of the diplopia the particular muscle or muscles which are affected. So far as I am acquainted with the diagrams appearing in the text-books usually available to students and practitioners,

cornea to the left (that is, "wheel-motion" to the left). ("In speaking of the inclination of the vertical meridian of the cornea it is the upper extremity of this meridian which is meant."—Swanzy.) Similarly, isolated contraction of the right inferior rectus would: (a) move the summit of the cornea downward and inward, and (b) incline the vertical meridian of the cornea to the right. The arrows on the horizontal line indicate the direction in which the summit of the cornea moves with isolated contraction of the external or internal rectus.

Further, the starting-point of each inclined arrow on this horizontal line indicates the position in which the cornea must be in order that isolated contraction

adducted the elevating and depressing action of the elevators and depressors is least and when the eye is abducted the "wheel-motion" action of these muscles is least.

As a matter of fact, however, no regard needs to be paid to the "wheel-motion" in the diagnosis, by means of the diplopia, of paralysis, except in the case of examination of the obliquus superior, the action of which muscle is best tested when the eye is adducted.

A glance at the diagram therefore at once reveals, in the case of paralysis of one rectus (superior or inferior), that the defect of movement of the eye is most distinctly seen—or, in other words, that the difference in height between the two images (false and true) is the greatest—if the eye under examination be elevated or depressed while in the position of abduction; that is, for example, in the case of the right eye when it is turned to the right and upward, or to the right and downward.

In the case of paralysis of one oblique the defect of movement is most distinctly seen—or, in other words, the difference in height between the two images is the greatest—if the eye under examination be elevated or depressed while in the position of adduction—that is, for example, in the case of the right eye when it is turned to the left and upward or to the left and downward.

This may be translated into practice thus: if in any case of paralysis of an elevator or depressor the defect of movement of the eye (or the difference in height between the two images) is greater in the abducted position of the eye than in the adducted position, one knows it is a rectus which is paralyzed. In the opposite condition, where the defect of movement (or the difference in height between the two images) is greater in the adducted position of the eye than in the abducted, one knows that it is an obliquus which is paralyzed.

A single example may still further elucidate the diagnosing of the paralysis from the examination of the double images by the use of this diagram. If the flame of the candle placed in the middle line reveals double images separated by distance in height, and if this distance in height increases the more the candle is lifted up, one knows it is an elevator that is paralyzed—and an elevator of that eye, the image of which stands the higher (the image belonging to each eye is recognized, of course, by the aid of a colored disc held before one of the eyes).

Suppose, now, that this is the right eye. If, then, the elevated candle, always at the same height, be moved to the right and

DIAGRAM SHOWING THE POSITION OF THE EYE IN WHICH THE GREATEST "WHEEL MOTION" ACTION IS EXERTED.

there is not one which is, in my opinion, so concise and so easily grasped as that of Prof. Elschnig, of Vienna.

I have therefore ventured to epitomize the article in which he introduced it to his German-speaking confrères and which is published in the *Wiener klinische Wochenschrift* of Aug. 28, 1902. The same subject is dealt with by Prof. Elschnig in the *Encyklopadie der Augenheilkunde*, published by O. Schwarz. The diagram is a modification of one by Prof. Schnabel, which has been much in vogue in Austria up to now.

In the diagram each of the arrows representing the action of the individual elevators and depressors (rectus superior, obliquus inferior, obliquus superior, rectus inferior) indicates (a) the direction in which the summit of the cornea would be moved by isolated contraction of the muscle concerned, and (b) by the inclination of the arrows toward the vertical, the position imparted to the vertical meridian of the cornea, by the same contraction.

For example, isolated contraction of the right superior rectus would: (a) move the summit of the cornea upward and inward, and (b) incline the vertical meridian of the

of an elevator or depressor may have the greatest elevating or depressing effect. That is to say, the rectus superior and the rectus inferior (for example) exert the greatest effect as to elevation and depression of the cornea when the eye is in the abducted position; and the obliquus inferior and the obliquus superior exert their greatest effect as to elevation and depression when the eye is in the adducted position.

Also, since the "wheel-motion" action of the elevators and depressors in each case is in the inverse ratio to the elevating or depressing action—the greater the elevating or depressing action the slighter the "wheel-motion" action and *vice versa*—there is evident from the diagram the position of the eye in which each elevator and depressor is able to exert the greatest "wheel-motion" action; that is, the rectus superior and rectus inferior exert the greatest "wheel-motion" action when the eye is in the adducted position and the obliquus superior and obliquus inferior exert their greatest "wheel-motion" action when the eye is in the abducted position.

The opposite of these two statements is true also—namely, that when the eye is

Optical Department.

left, and if the distance in height between the two images increases as the candle is moved to the right (so that the eye tends to the abducted position) and diminishes as the candle is moved to the left (so that the eye tends to the adducted position), then we know that it is that elevator, the elevating action of which is the strongest in the abducted position, which is paralyzed—that is, in this case the rectus superior of the right eye.

It is important in practice, when the elevators and depressors are being examined, to allow the patient to pay attention only to the distance in height between the images; the lateral interval, whether the diplopia be homonymous or crossed, is not only irrelevant but often perplexing and deceptive.

Further details of the diagnosis of the paralysis of the muscles of the eye by the use of this diagram are to be found in the article in the *Encyklopadie*, already referred to.

With reference to the foregoing article, the following letter appears in the *Lancet*:

Sirs—May I draw Dr. D. M. Mackay's attention to a paper which appeared in the *Clinical Journal* of March 27, 1895, entitled "The Position and Rotation of the False Image in Paralytic Diplopia Represented Diagrammatically"? The diagram which I there published shows the following points: (1) Direction of action of the muscles of the eyeball; (2) primary deviation of the eye in paralytic squint; (3) position of the false image in diplopia; (4) quality of the diplopia; and (5) rotation or torsion of the false image both for vertical and horizontal images. I venture to think that this diagram is as "concise and easily grasped" as the one Dr. Mackay publishes.—I am, Sirs, yours faithfully, R. Bruce Ferguson (M.D.).

Astigmatism Statistics.

OUT of about 3,000 cases of astigmatism, 32 per cent. were affected with simple hypermetropic astigmatism; 26 per cent. with compound hypermetropic astigmatism; 25 per cent. with simple myopic astigmatism; 11 per cent. with compound myopic astigmatism, and 6 per cent. with mixed astigmatism. The meridian of greatest refraction was horizontal in 1,081 cases, vertical in 349, and oblique in 164.

It is claimed by Mr. Van de Borg, who made the report, that even in cases where the astigmatic error was of only 1.00 diopter the visual acuity was seldom quite normal after correction, with a very rapid decrease in visual acuity with increase of error. As a rule, the improvement of vision was greatest when the meridian of greatest refraction was horizontal.

It appears strange that normal visual acuity could not be obtained in cases wherein the error amounts to only 1.00 diopter, and it seems safe to say that had a careful test been made and properly ground and adjusted lenses been supplied, the visual acuity, in these cases, would have been brought up to normal without difficulty.

Anatomy of the Nervous System.

(Lecture recently delivered before the Rochester Optical Society by DR. RALPH H. WILLIAMS.)

KNOWLEDGE of the human body has progressed by gradual stages to the point which it has attained to-day. The first knowledge was practically confined to the bones. Later the gross anatomy became well understood, and in the time of Aesculapeus, the Father of Medicine, no conception was had of the structure and function of either the system of arteries and veins or of the ramifications of the nervous systems. If they observed these tissues they made little study of them and knew nothing of their functions.

Later came Harvey's discovery of the circulation of the blood and its recognition was followed by a wave of medical theory which sought to put the fluid of life into the blood stream which would give everlasting life. Before this time the practice of medicine was based largely upon superstition, and consisted in the administration of the vilest substances that could be concocted by the ingenious mind of the practitioners. With the advent of the knowledge of the circulation of the blood came the first real progress in the science of the healing art. While much of the old was still retained, there was much real investigation instituted, the value of which remains to-day. A more thorough study of the human body was instituted, with the result that vague ideas of the nervous system were secured, though for many years with little result.

To-day there is no portion of the human body, unless it be the lymphatic system, that is so little really understood as is the nervous system. There is no portion of the body upon which there is a greater range of theories propounded, all of which have a goodly following of eminent men, than there is of the nervous system. Its anatomy, gross and microscopic, is indeed as well known as one could ask, but it is only in recent years that its functions have been intelligently studied.

Too much has been taken for granted and conclusions have been drawn without the warrant of experiment. The German investigators have probably done more to give to the world accurate scientific data regarding the functions of the various portions of the nervous system than any other nationality. Foremost among these men is Landis, who has probably paved the way to a more complete knowledge of this inexhaustible field than any other man.

An absolute and complete knowledge of this wonderful mechanism we will never have. We must always stop short of the solution of the principal of life, and that, after all, is the real secret of the nervous system. Much we can know, however, and to thoroughly understand all that is already known to have stood the test of experiment, is no small task and infinitely beyond the possibilities of three necessarily short lectures. If I shall have been able to give you even a limited insight of practical value into the structure and function of the controlling mechanism of our human frame I shall feel that the time has been well spent.

In dealing with the nervous system, I have determined to take it up in three sections. First, the anatomy, gross and microscopic; second, the physiology; third, the

sympathetic system and the reflexes. This will, I believe, divide the subject into its most important divisions, giving each its due time.

The first section, involving the anatomy, is, to all appearances, the larger of the three, and in bulk it is large and correspondingly difficult, but I believe that it is infinitely more important that you get a few good impressions of the function of the nervous system, the sympathetic and its reflexes than to spend much good time in going into the minutia of the anatomy and histological structure of nerve tissue.

The nervous system is primarily divided into two great systems—the cerebro spinal, or the nervous system of animal life, and the sympathetic, or the nervous system of organic or unconscious life. The cerebro spinal, with which we will deal to-night, consists of the brain, spinal cord, and its nerve terminals, and ganglia. Both the brain and cord are constructed of what is termed gray and white matter. The white matter composes the lines of communications, while the gray matter constitutes that portion of the nervous system which receives, co-ordinates and initiates impulses.

The white matter, which is in reality nerve fibers, consists microscopically of a central axis-cylinder or transmitting substance, enclosed by the "White substance of Schwann," and this in turn is covered by a fibrous nerve sheath and a bundle of nerves are bound together by another fibrous sheath called the neurilemma. The whole structure is practically identical with the construction of the common telephone cable. The axis-cylinder represents the copper wire conductor, the white substance of Schwann corresponding with the rubber insulation, and the nerve sheath with the paper or cloth insulation outside of that, while the neurilemma is symbolized, though roughly, by the leaden coating of the cable.

The delicacy of structure and some conception of size can be had from the following facts. The ordinary telephone cable holds, I understand, about 500 wires at the outside and is something over two inches in diameter. On the other hand, the optic nerve, the size of which you are all familiar with, averaging, I believe about one-eighth to three-sixteenths of an inch, contains, it is estimated, about 500,000 nerve fibers, each one of which is capable of breaking up at its termination into an arborization of fibrils.

Nerve fibers originate in nerve cells either in the spinal cord or brain and terminate either in plexuses or end plates, according to their functions. The central termination of nerve fibers is as yet but little understood. The peripheral terminations have been carefully studied under the microscope, and it is possible to state with considerable assurance of accuracy that motor nerves end in the muscular fibers in end plates, while the sensory nerves terminate in the more expansive nerve plexuses which receive impressions. It will be impossible for me to give you more than a superficial idea of the structure of the brain, but I will endeavor to touch upon the plainer points which have the greatest practical value.

The brain is divided into four great divisions, as follow: The cerebrum, cerebellum, pons varolii and medulla oblongata.

The cerebrum, which is the seat of rea-

Optical Department.

son, the special senses, and the final recording center for the entire body, occupies all of that portion of the skull lying above a line drawn around the head from the eyebrows in front to the occipital protuberance behind. Its great size in man in proportion to his weight, and its complexity distinguish the brain of man from that of the lower animals.

The structure of the brain differs from that of the cord by the fact that in the structure of the brain the gray matter is located on its outer surface, while the white matter, or nerve fibers, are situated internally. In the cord this arrangement is reversed.

The cerebrum is divided into two lateral halves or hemispheres, which are connected together by a great white commissure called the corpus callosum (callous body) from the fact that it is hard and dense. This commissure connects the various centers on opposite sides of the brain.

Each hemisphere is divided by fissures into five lobes, as follows: The frontal lobe, which is the largest of the five, extends from the anterior border of each hemisphere extending back to the vertex to a point about even with the crown of the head. From this point draw a line to about an inch and one-half above the upper attachment of the ear and thence to the outer angle of the eye.

The parietal lobe extends from the frontal lobe back to about the parieto-occipital suture, and down to a line drawn from this suture to the point about one and one-half inches above the upper attachment of the ear.

The temporo-sphenoidal lobe lies below and outside the frontal and parietal lobes and extends from the angle of the orbit in front to about one and one-half inches back of the ear.

The occipital lobe occupies the remaining triangular space at the back below the parieto-occipital suture down to the lower line of the cerebrum.

The central lobe of Island of Reil lies in a deep fissure between the frontal and temporo-sphenoidal lobes and is covered by them.

Each lateral half of the cerebrum contains within its substance a cavity known as the lateral ventricle of the brain. These cavities are filled with a spinal fluid and connect with the third ventricle and thence into the fourth, of which I will speak later, and from there on into the central canal of the spinal cord. These cavities are probably to allow for expansion and contraction of the brain, according to the amount of blood drawn to the part. In acute congestion or inflammation of the brain the surface of this cavity is covered with minute red particles showing the exudation of blood into the space.

Directly below the ventricles lies the optic thalamus, the caudate and lenticular nuclei, of which mention will be made later, and the internal capsule. The internal capsule lies between the lenticular nucleus and the optic thalamus and is the bundle of white fibers extending up from the spinal cord, medulla and cerebellum to be distributed throughout the cerebrum. The blood sup-

ply of this capsule is extensive and is liable to disease, resulting in apoplexy or paralysis, according to its severity. The space being so small, a slight hemorrhage will cause sufficient pressure in some instances to entirely suspend the action of the nerves on the side of the brain affected.

In addition to the gray matter of the cerebrum and cerebellum there are the following ganglia lying at the base of the brain:

The olfactory bulbs lie directly beneath the frontal lobes and upon the cribriform plate of the ethmoid bone, directly above the nasal cavity. They are ganglia of the sense of smell and are connected with the two hemispheres by the olfactory tracts.

The optic thalami, the great sensory ganglion, is situated in the floor of the lateral ventricle.

The corpora striata, which is the great motor ganglion, lies in the floor of the lateral ventricle and consists of the caudate and lenticular nuclei.

The corpora quadrigemina, or optic lobes (four in number), lie beneath the posterior lobes of the brain, near the union of the cerebrum with the cerebellum. These form two ganglia for vision.

The tuber annula are in the body of the pons varolii. It is probably the seat of indistinct sensation.

There are in the brain five ventricles, as follows: The lateral, two in number, which have been described. The third ventricle, which is connected with the two laterals and lies between the two optic thalami on the base of the brain. The fourth ventricle, connected with the third, and lying in a space between the cerebellum and the medulla. It is considered by some to be a simple enlargement of the central canal of the cord. In its floor lie the centers of many of the most important nerves and automatic functions of the body. The fifth ventricle is a closed space lying between the membranes, which bind the lateral ventricles internally.

The mid brain comprises those structures which connect the cerebrum with the cerebellum and medulla, and includes the following structures: The pons varolii is the great white transverse commissure that is seen at the base of the brain in front of the medulla. Its fibers connect the hemispheres of the cerebellum with each other and with the medulla.

The crura cerebri, or roots of the cerebrum, extend from the pons to the corpora striata and optic thalami and consist of fibers which pass from the medulla to the ganglia named, and thence upward to the gray matter of the hemispheres through the internal capsule.

The corpora quadrigemina are really a portion of the mid brain. They lie directly back of the third ventricle and under the posterior portion of the corpus callosum. They are four in number, the two anterior being known as the nates and the two posterior and smaller ones, the testes. They are connected with the optic thalami and optic tracts by four bands and with the cerebellum by a white cord on each side. They constitute the center of vision.

THE MEDULLA OBLONGATA.

This ganglia or portion of the brain is really the upper enlarged portion of the

spinal cord extending from the upper border of the atlas to the pons. As the spinal cord passes into the skull it bends forward the anterior surface of the medulla lying upon the basilar process of the occipital bone. Its posterior surface, which is turned up toward the cerebellum, forms the floor of the fourth ventricle. It is divided into two lateral halves by the continuation upward of the anterior and posterior median fissures of the cord. It contains gray matter scattered through its substance in a much less regular manner than in the cord from which the cranial nerves from the fifth to the 12th, inclusive, arise entirely or in part.

In the medulla also lie the centers for the vaso motor and cardiac nerves, of which I will have something to say in a later lecture. There are also the centers for the control of respiration, phonation, deglutition, mastication and expression. The medulla is roughly shaped, like an inverted truncated cone. As it ascends it increases in breadth faster than in its antero-posterior diameter, giving it a flattened appearance.

Roughly speaking, the columns of the cord are continued upward into the medulla, though with a slight rearrangement. For instance, the pyramidal tracts, the great motor tracts of the cord, are crossed over to the other side in the medulla, or a large portion of them do, thus forming what is known as the crossed pyramidal tract, and explaining why in a case of paralysis you will find one side of the body affected, while the opposite side of the face will not be involved.

In addition to the crossed pyramidal tract there is the direct pyramidal tract, which is continued up on the same side to the cerebrum and cerebellum. The fibers of the direct pyramidal tract are said to cross over in the cord, however, at various levels as they progress downward.

In the medulla the pyramids lie on each side of the median fissure. On the outer side of the pyramids are two oval shaped eminences that are not found in the cord. They are known as the olivary bodies and consist of white matter outside and gray and white matter within, and constitute one of the important nerve centers of the medulla.

(To be continued.)

A New Color Theory.

It is reported by the *British Medical Journal* that Dr. Eldredge-Green has for years been propounding a new theory of color vision, which, however, is just beginning to receive due recognition.

The theory does away with the necessity for the theories of Helmholtz and others, and will undoubtedly be generally accepted when fully presented.

Oscar A. Johnson, Elbow Lake, Minn., has sold out to John N. Rovang, formerly of Fergus Falls, in the same State.

D. P. Paul, Norfolk, Va., contemplates erecting a four-story building at the corner of Granby St. and City Hall Ave., at a cost of about \$50,000. Mr. Paul will reserve the first floor and a portion or all of the second floor for his retail jewelry business.

That this department shall prove mutually beneficial to our readers, it is desirable that the members of the trade generally communicate with **THE JEWELERS' CIRCULAR-WEEKLY** regarding any advantageous device or plan which they are utilizing in connection with their business.

Clever Advertising Scheme of a Jeweler in Northern Ontario, Canada.

A CLEVER scheme for reaching the tourist and traveling trade, especially during the Summer months, has been adopted

by J. A. Morrow, Parry Sound, Ont., whose establishment is illustrated this week. Mr. Morrow sends a clerk, or goes himself, to the different Summer hotels and there secures a list of guests each day. In this way he builds up a good mailing list and addresses to each name a neat postal card bearing on one side an interior view of his establishment. At the present time, when the post card craze is about at its height, the scheme ought to be particularly effective. If the cards are not retained by the older tourists they will at least be added to the album collection of the tourists' children and the jeweler will thus receive a generous amount of advertising.

The store is 50 feet long and 13 feet wide, the height of the ceiling being 11½ feet. As may be seen from the illustration there is a goodly amount of show cases, the main wall case being 16 feet in length, eight feet in height, and 27 inches deep. Under the wall case proper are drawers and eupboards.

WESTERN SIDE OF THE STORE OF J. A. MORROW, PARRY SOUND, ONT.

There is a large plate-glass mirror in the center of the wall case, which is equipped throughout with paneled plate-glass windows. On the east side of the store are the five counter cases and silent salesman show case. Each counter case

is six feet long and 42 inches high. All the fixtures and the woodwork are of quartered oak, in the natural finish. A handsome partition separates the store from the workshop. In the center of the partition is placed a large three-ton burglar and fireproof safe. On either side of the latter is a swinging door leading into the workshop. On each side of the safe,

A PERSPECTIVE VIEW OF THE EASTERN END OF THE ESTABLISHMENT.

between the swinging doors and the walls, there are panels of plate-glass mirrors with beveled edges.

The store is lighted by 12 electric lights

of 10 candle power each. In the show window there are two lights of 32 candle power each, while the counter cases contain 12 lights of eight candle power each. The workshop is equipped with every modern device for the repairing and adjusting of watches, and the whole establishment is considered one of the finest in Northern Ontario.

Recent Catalogues and Booklets.

A NOTABLY fine catalogue of 196 pages has been received from John C. Pierik & Co., Springfield, Ill. The catalogue measures 6½x9½ inches. The cover pages are of a straw tint, printed in bluish green and black and embellished in the center by a fantastic design, consisting of two dragons. The first inside cover page shows an interior view of the store, the back cover page shows a view of the Pierik building, while the inside back cover contains a line reproduction of the exterior of the store, displaying to good advantage its spacious plate glass windows.

The first page of the catalogue gives some general instructions to the prospective purchaser in ordering stock. Following this are beautiful large half-tone illustrations of jewelry of all kinds, the half-tones of diamonds being especially good. Interspersed

between the pages of the regular half-tone reproductions there are colored lithographic plates showing necklaces, stone set brooches, La Vallières, etc., in their natural color.

Storekeeping Department.

This is a buyers' guide worth having and one which will certainly not be thrown into the waste basket.

* * *

The Michigan Optical Co., Detroit, Mich., is sending out an attractively printed catalogue, about 7x9¾ inches. The cover pages are of a dark olive hue, printed in gold, the design being a spectacle frame, the extended bows of which form a border to enclose the concern's imprint. There are 40 pages, generously illustrated.

Why Some Advertising Doesn't Pay.

NOT enough is paid for some of it, and not enough attention is paid to some of it.

We very rarely get more than we pay for—oftentimes less. A paper that has "cheap" rates gives "cheap" results. Scattering an advertising appropriation among "cheap" papers instead of putting it all in the few leading and seemingly high-priced papers is the reason why it doesn't pay. Advertising is like the sunbeams—the stronger the glass and the more concentrated the rays, the deeper they burn.

Some say advertising isn't any good because an inch ad. won't keep their shop crowded with orders. Would they say that coal was worthless because a shovelful wouldn't get up steam in a boiler?

Some say that advertising doesn't pay because they put an ad. in a paper and let it stay until its gets mouldy with age—never change it. Wouldn't they stop reading this paper in short order if the reading matter should be the same week after week? Readers have the same right to ignore the ad. that is the same old thing every week.

Some print an ad. with the name, address and goods they manufacture without a solitary reason why their goods are better than the "other fellow's." They'd get rid of a salesman pretty quick who made a practice of calling on people and simply leaving his card. And an ad. is only another kind of a salesman. And on the other hand it's just as big a mistake to try to crowd the contents of a catalogue in a small space.—*Engineering and Mining Journal*.

Publicity Prattle.

"VOT you mean by dose, huh?" queried the member of the little German band.

"You are always blowing your own horn," said the f. b. in explanation.

"Dot vos where you don'd know somedings, meppy," replied the wind jammer. "Dis was a porrowed puggle, alreaty."—*Chicago News*.

* * *

New life is needed in the advertising, when the business of a concern that advertises is not going forward. A business that advertises ought to be going forward, and not simply holding its ground. Ordinary advertising will avail to secure the latter result, but good advertising means positive progress; supposing always that there is nothing in the character or management of a store to counteract its effect.—*Rhode Island Advertiser*.

The Way of the Enterprising.

AN effective advertising scheme was carried out by S. D. Burritt, Rochester, N. Y. for the Easter trade. In his big automobile, Mr. Burritt visited the different high schools and private academies and when the students came forth he presented each with an elegant ribbon book-mark. In several cases Mr. Burritt had to ride from the scene on account of the crowd which gathered about his machine. Friday and Saturday he gave away the souvenirs to all who came to his store, and if he did not sell every one, he did have his name on the lips of many who in the future are more than likely to call on him.

* * *

Ryrie Bros., Ltd., Toronto, Ont., held their Easter opening Saturday, April 7, when the store was tastefully decorated with choice flowers and plants, including azaleas, Boston ferns, large palms and Easter lilies. A special feature was a glass-covered table

ATTRACTIVE JEWELRY DISPLAY BY ED. T. JENISON, DECATUR, ILL.

with a large center vase of brides' roses, the base displaying a profusion of lilies of the valley, etc. During Easter week enormous crowds were attracted by a unique window display consisting of a design representing an Easter dove measuring about one foot from tip to tip and composed wholly of diamonds, no setting being visible. It embraced over 1,200 stones valued at \$65,000 and was displayed upon a black velvet ground with brilliant effect. The crowds who thronged to see it were so large as to interfere with pedestrian traffic.

* * *

C. F. Jakeman, Norfolk, Va., is attracting attention to his display window by "Educational Window Display," articles on which were begun in the issue of THE CIRCULAR-WEEKLY of March 21, 1906, and concluded May 2 last.

Roy Murray, Clay Center, Kans., is now at Altoona, Kans.

F. Willman, Stillwater, Minn., has disposed of his business interests at that place to Peter Gaalaas.

Attractively Designed Window Display Recently Made by a Western Jeweler.

DECATUR, Ill., May 2, 1906.

Editor THE JEWELERS' CIRCULAR-WEEKLY:

I enclose a photograph of my latest window display, which does not show up very well in the photo, although it is good in reality. The pyramid containing cut glass revolves. On the top are wires, bent in a half circle, covered with smilax, and on the ends are hung china cups and white eggs, with prices and descriptions written on the eggs. In the small, long cups are rabbits, holding prices. The words, "Easter, 1906," are in the center of the table, part of which can be seen, and are made of different colored stones.

At the bottom is a duck in full dress, watch, chain, stud, etc. The watch is a silver one, and the duck's four children are presenting to him a more handsome one—a gold watch and chain. At the right is a hen on a setting of diamonds. Several eggs

are nearly broken open, showing diamond rings and watches within, with appropriate cards, some of which latter I took from THE CIRCULAR-WEEKLY. Mr. Duck states he will give his old watch to Hen-rietta.

One card by the side of an egg which contains a diamond reads, "Eggs, \$780 per doz., or \$65 each." The prices are marked on cardboard, cut out in the shape of chicks.

The window was designed and built by me, and I have heard much comment regarding it. I believe I have gotten as much credit for the idea as I have for the attractiveness of the window.

The picture was taken before the window was finished, as two large Easter lilies were later placed in the background.

Yours truly,

ED. T. JENISON,

B. C. Weiler, Armstrong, Mo., has discontinued business.

Mr. Henderson, of Henderson & Clopton, Lufkin, Tex., has sold out his interest in the business, which will be carried on by M. L. Clopton, Jr., alone.

[Answers are also solicited from our readers to the questions published on this page.]

QUESTION No. 1548.—Flux for Gold Sweeps.—Can you kindly tell me the best compound or flux to be mixed with gold sweeps after it has been burnt down?

C. O.

ANSWER:—The usual flux for melting down gold consists of equal proportions of powdered borax and saltpeter added and melted with the whole mass.

QUESTION No. 1549.—Wood Alcohol.—Can you tell me if wood alcohol will spoil the burner in a chafing dish lamp?

C. S. B.

ANSWER:—If wood alcohol is pure, or 95 per cent. proof, it will not harm your lamp.

QUESTION No. 1550.—Gold and Silver Powders.—How can I make gold bronze powder, also light green, pink, brown and silver colors? Please give me the ingredients, also a method for enamel such as painters use on iron and wood, in quantities of 25 to 50 pounds.

M. F.

ANSWER:—You probably would not be as likely to get as good results from recipes for bronze powders and also enamels as you would from both powders and enamels which are now placed upon the market by reputable manufacturers. The cost of preparing them would be greater than if you bought these materials ready for use. These materials are put together in a scientific manner and mechanically mixed and prepared by means of machinery. Results are obtained in their application which can hardly be obtained when they are self-prepared.

QUESTION No. 1551.—Gold Coloring by Dry Battery.—Please inform me of a good gold coloring to use with dry battery. I have several recipes for the zinc strip, but find that it does not answer as well as the electric battery.

L. D. G.

ANSWER:—Dry batteries cannot be used advantageously for gilding or coloring, but a small battery would answer very well. The simplest way to make a gold solution is by dissolving one-quarter pound of cyanide of potassium in one-half a gallon of distilled water and add to this one-quarter of an ounce of chloride of gold, using a gold anode for the deposit. See Workshop Notes No. 1400 (Dec. 6, 1905), No. 1373 (Nov. 1, 1905).

QUESTION No. 1552.—Gold Solders.—I have had a great deal of trouble with the different karats of gold solder which I have purchased. Can you give me the component parts of the different kinds of solder to be used in the general run of making and repairing jewelry.

C. W.

ANSWER:—A very hard solder for 18-karat gold is: Fine gold, 9 parts; silver, 2 parts; copper, 1 part. Soft and easy running solder for 18-karat gold: Fine gold,

12 parts; silver, 7 parts; copper, 1 part. Very hard solder for 14-karat gold: Fine gold, 3 parts; silver, 2 parts; copper, 1 part. Easy running solder for 14-karat gold: Fine gold, 2 parts; silver, 0.5 parts; copper, 0.5 parts.

Solders for less than 14-karat:

	Fine gold.	Silver.	Copper.	Zinc.
No. 1.....	1 part	2 parts.	1 part.
" 2.....	1 part.	2 parts.
" 3.....	1 part.	2 parts.
" 4.....	12 parts.	5 parts.	5 parts.

QUESTION No. 1553.—Sterling Silver Alloy.—Please give me an alloy for sterling silver, something that will not blister very much and will work well under the spinning tool and drawing press. I now use the well-known formula—silver, 925 parts, and copper, 75 parts.

S. S. A.

ANSWER:—It has been found by experiment that the addition of cadmium to the silver and copper improved the sterling so that it can be spun and drawn on the press more successfully than when no cadmium at all is used. The oxide of copper which is formed during the melting is the cause of the difficulty. The more oxide copper contains, the less malleable it is. The same is true of any of the copper alloys. The presence of oxide of copper in sterling silver determines whether the sheet metal will be bad or good. For an alloy that possesses all the required qualities for sterling silver the proportions are: Fine silver, 462.5 ozs.; Lake copper, 35.0 ozs.; cadmium, 2.5 ozs. To produce this properly put the granulated copper in the bottom of the crucible and put the silver on top of it. Then cover with fine charcoal and when the whole is melted add the cadmium by forcing the sticks under the surface, otherwise it would burn away.

QUESTION No. 1554.—To Preserve Gilt Frames.—What is the best method of keeping frames that have been gilded in good condition?

M. G. F.

ANSWER:—Water should never be put on frames which are gilded. They are usually lacquered, and the water would soon destroy the lacquer, so that the frames would have to be continuously polished. Wipe them off with a dry chamois if possible; if this has no effect, then slightly moisten a cloth and wipe off just enough to remove the dust.

QUESTION No. 1555.—Etching Silver Deposit.—How is the etching done on silver deposit for glass or porcelain?

E. S. D.

ANSWER:—According to the Metal Industry, glass or other metallic substances which are being used in the silver deposit industry are completely covered with silver. The design is painted out and the surplus silver is reduced by a current. A five per cent. solution of pure nitric acid and aluminum

plates is used as a cathode. This procedure gives a pure metallic nitrate of silver solution, which can be prepared so as to be added to the regular depositing bath. Owing to the thickness of the deposit, the solution needs repairing very often. A six hour deposit can be reduced in the etching bath very rapidly.

QUESTION No. 1556.—Razor Hones.—Can you tell me how the razor hones are made?

B. W.

ANSWER:—The *Seifensieder Zeitung* gives the following information to make razor hones: "They are often made entirely of alum. The alum is dissolved in an equal quantity of water, and the solution is evaporated. Glycerine, muriatic sublimate and methol are added, and the hot mixture is poured into sheet metal molds. It hardens to a crystalline mass, which is ground smooth with water. The hones are best packed in metallic boxes.

QUESTION No. 1557.—Making Cup-Shaped Articles.—I am trying to make cup-shaped articles out of a flat piece of copper by drawing up the edges. The size is about two inches in diameter and one inch deep. I made a die and forced the proper size, but the pieces have come out badly wrinkled on the edges. Is there any way of preventing the wrinkles without the use of an expensive die and blank holder arrangement?

D. C. S.

ANSWER:—Do the cutting out and pressing up in one operation, with a combination die. This is arranged so that a blank holder is held in place with a rubber bumper which prevents wrinkles forming on the edges. Where one wants to use only the die without the blank holder, then it is best to turn the edges over on the spinning lathe in such a way that they are turned up from $\frac{3}{8}$ to $\frac{1}{2}$ inch. This cup-shaped blank may then be forced through the die, leaving the edges unwrinkled. This method does not only apply to copper, but will work equally as well on brass, aluminum or other sheet metals.

QUESTION No. 1558.—Porous Plaster Molds.—Kindly inform me how to make a plaster mold that can be used for casting the soft metals—silver and brass. I have used the plaster of paris molds for the softer grade of metals, but was not successful with silver and brass.

P. P. M.

ANSWER:—A composition for porous plaster molds has been patented by J. G. Weyer, Providence, R. I., which is claimed to be suitable for molds for fine and delicate lines and for brass, silver and the softer grades of metal. This mold is made by using calcined plaster of paris and finely screened coal ashes. The screened ashes are mixed with water to the consistency of thick cream and the plaster of paris is mixed the same way. The two pastes are then mixed together in about equal proportions. This is used to produce the mold in the usual manner in which plaster molds are made. The ashes with the plaster will produce a mold that is very porous, enabling the castings to run full more readily than by any other method. After the molds are made they should be dried for five or six hours at a heat of about 250 deg. F.

A Plea for the Manufacture of Hard Paste China in England.

A CONTRIBUTOR to *The Pottery Gazette*, of London, argues that if the English manufacturers of china are to hold their own in the home and foreign markets they must make hard paste as well as soft paste china ware. It is argued that while the soft paste gives the maximum of beauty it cannot compete, when cheapness and durability are the desired factors, with the hard paste china of Germany and other countries. The writer says:

How comes it that there is not in England a manufactory of hard paste china? It would not be easy to answer the question without entering into a long, and perhaps not very profitable inquiry concerning the history and requirements of this very beautiful and commercially valuable ware. We have no wish to appear pessimistic or to cry through our pottery towns that the glory is departed from our bone china making districts. Yet is there a manufacturer of that most beautiful ware who does not feel in his heart a foreboding that he has before him a stormy, difficult, not to say impossible, future?

It is admitted on all hands that the soft paste or English porcelain is the most beautiful material in existence for tea, coffee, and dinner services. Its beauty is not denied by anyone, nevertheless we feel assured that in the future the sale of this ware will be more and more restricted, and that, while for high class and elaborately decorated ware it has a long and glorious future, for those articles where it comes into competition with the cheap German ware it cannot hold its own. This sense of danger has made many of the English manufacturers turn longingly to the idea of a duty upon imported china. How far this would help them in the home market is uncertain, but it is pellucidly clear that no help for our export trade is to be found in that direction. In foreign, and especially the American market, we must offer a better article at a lower price than our competitors, or retire from the trade.

Now the simple fact is—and there is no use hinking that fact—that hard china is better from the user's point of view than soft china; it is not merely that the soft china is somewhat dearer, but it has not the life of the hard china. Hard china, simply because it is harder, wears longer, is more difficult to break, keeps its decoration longer, and is at every point, except that of beauty, superior to its soft paste competitor. We do not believe there is anyone in the trade, whatever may be his wishes, but acknowledges in his heart the facts to be as we state. The experience in the American market will, we believe, hear this out triumphantly.

What then must be done? We believe there is only one course open to the English maker, and that is to face the difficulty boldly and determine to overcome it. Hard china can be made of English materials we know, for we have seen it. Nor do we for a moment doubt that Staffordshire possesses men of such energy and intelligence that they will bring the experiments of the laboratory to the test of the warehouse and cost account, and come off triumphant. This may be expensive, but, if the china trade is to be maintained, it must be done, and the china manufacturers must join together to carry out experiments and determine on the best method of procedure, so as to benefit all concerned. To revolutionize a trade, to introduce a new material, to adopt new methods, to accustom the workmen to new ideas of treatment in manufacture, is always a difficult

and serious undertaking, but it is necessary in this case.

We further think these difficulties have been somewhat magnified. It is asserted that the cost of production abroad, especially in Germany and Austria, is so low that English labor cannot compete, that remains to be seen. It has been proved conclusively in other branches of the ceramic trade that English labor is the cheapest in the market. Nothing is more common to find Englishmen who have been a few months in some foreign factory shaking their heads and confessing with regret that they see no chance of England competing with the foreigner, but ask the same men after three or four years' experience, what do they say then? The glamor has worn off, the unskilfulness, slowness, ignorance of the workmen has come to light; the low rate of wages remains, but the rate of production is equally low; and men, who have been hard to speak enthusiastically of foreign workmen on a three months' experience, have been heard to speak just as disparagingly after three years. In spite of everything seeming to the contrary, we believe it will be found that the English artisan potter is the cheapest in the world, and he is undoubtedly far and away the best. We think then there is not much reason to fear results from the point of view of labor.

Where, then, is the great difficulty? Doubtless in method the body is quite different, and has to be discovered and brought to perfection; the method of treatment must be changed; the setting, firing, glazing, must all be relearned, and here it behooves those concerned to walk carefully. What is to prevent our people taking a lesson from the practice of our Continental neighbors? Many an Englishman has been engaged to show the Continental potters how to produce their ware; indeed, there is scarcely a Continental pottery of note where Englishmen are not or have not been employed for this purpose.

Let the china makers take a lesson from this. There are, on the Continent, good men at the head of hard china works, one of whom would, we do not doubt, gladly accept a post as pioneer in this class of work in England. The first attempts would be necessarily slow and expensive, but we should be put at once on the right methods and saved much waste and loss in futile experiments. What is required is bold, united and prompt action. Will our manufacturers take it? It is their question, they must settle it.

Industrial Art Exposition in Paris.

FROM June to October of the present year an International Arts and Crafts Exposition will be held in the Champs Elysees, embracing ceramics, glass, crystal and kindred industries, under the title of "Exposition Internationale des Arts et Industrie du Feu" (International Exposition of Arts and Industry of the Fire). This exhibition will be under the protectorate of the French Ministries of Commerce, of Public Works, of Instruction and of the Fine Arts, as well as under that of a committee consisting of prominent persons.

For the purpose of obtaining information, prospectuses, etc., a card to Monsieur Ch. Bing, General Director, Exposition Internationale des Arts and Industries du Feu, 19 rue St. Roche, Paris, will bring forth all the information an American manufacturer may desire.

Jewelry, Silverware, Clocks and Watches Among the Wedding Presents to the President's Daughter.

WHILE estimates of the value of the wedding presents given to the daughter of President Roosevelt when she became Mrs. Longworth were not much more than guess work, yet the Washington correspondents seem to agree that the articles are not to be duplicated for less than \$250,000, and some of the papers have said that \$500,000 would not be an exaggeration of their cost. Included in the presents were numerous articles of jewelry, precious stones, clocks, watches, cut glass, decorated china and novelties.

From Emperor William of Germany came a bracelet hand wrought in Roman gold and set with diamonds and sapphires. This bracelet came in a case of aluminum leather embossed with the imperial arms of the house of Hohenzollern. The gift of Emperor Francis Joseph of Austria was a diamond and pearl pendant, presented on behalf of his Majesty by Baron Hengelmüller. The King of Italy sent a mosaic table inlaid with gold. King Alfonso of Spain, who is himself a prospective bridegroom, gave the bride several pieces of antique jewelry. The President of France sent a personal present in the form of two Sèvres vases.

A necklace of diamonds, each three-fourths of a carat in weight, was Mr. Longworth's gift to the bride. Mr. Longworth ordered this necklace in Cincinnati soon after the return of the Taft party from the Orient and several weeks before the engagement was announced from the White House.

The gift of Cuba to the daughter of the President on her wedding day was a rope of pearls purchased in Paris by the Cuban Minister there. It was forwarded to Señor Quesada, the Cuban Minister in Washington, and presented by him in behalf of the Government and people of the Island. The President and Mrs. Roosevelt gave to the bride a corsage ornament of emeralds and diamonds. This was presented to Mrs. Longworth about a fortnight before her marriage, and she wore it first at a reception at the White House.

A massive centerpiece of silver and a set of plates made in Baltimore were presented by Secretary and Mrs. Bonaparte. The bowl is exquisitely ornamented with lace work and with open work around the rim.

The Vice-President and Mrs. Fairbanks gave a set of oyster cocktail cups of heavy silver. The stand is of plain silver, engraved with the initials "A. L. R." The holders are of silver lattice work and the cups are of beleeck ware.

Secretary and Mrs. Metcalf gave a silver

tankard. Ex-Secretary and Mrs. Paul Morton gave a Limoges dinner set of 12 pieces. Secretary and Mrs. Shaw contributed a chocolate set of Royal Worcester. Secretary and Mrs. Taft presented a diamond locket. Attorney-General Moody tendered the bride a pair of silver candlesticks, uniquely chased.

Minister and Mme. Quesada gave eight pieces of silver, gold lined, and repoussé work in the *fleur de lis* pattern. Each piece is marked with the monogram of the bride, "A. L. R." Mr. Grip, the Swedish Minister, sent the bride a vase.

Members of the Taft party who visited the Orient last Summer presented a necklace and pendant comprising 18 large and 120 small diamonds set in platinum. The large aquamarine is of a bluish-green tint and is cut in a heart shape. This is said to be one of the finest stones of the class in the country.

The gift of the New York delegation in the House of Representatives, including all of the Republican members and four Democrats, Messrs. Sulzer, Towne, Cockran and Goulden, was a set of glass ware in colors. In the set are five dozen wine glasses and a dozen plates to hold as many finger bowls. There are a dozen champagne glasses, a dozen for port, another dozen for claret, as many for hock and 12 for cordials. The glasses are of special design, and every effort was made to turn out a perfect product in each case. The glasses, plates and finger bowls were all in a large white case lined with white silk. No two pieces are alike.

Members of the Congressional Committee on Foreign Relations presented a loving cup designed by the Gorham Mfg. Co. The cup is of sterling silver and stands 13½ inches in height. It has a capacity of seven and one-half pints, is round and has the regulation three handles. About the rim of the cup is an acanthus leaf border and the handles are beaded on either side. A clover leaf design is arranged about the bowl near the base, and the standard is beaded and chased.

Ten watches and nearly 50 clocks were received, so that there is no reason why the young couple should not know the time of day. The clocks come in almost every variety, from carved wood Swiss timepieces to a French gold clock set with diamonds, the gift of the French Ambassador and Mme. Jüsserand. There is a watch of green enamel with emeralds as a centerpiece. Another watch is ornamented with blue sapphires and diamonds, and a third with turquoise and pearls.

One of the parasols made as a part of the trousseau had a frame of hardened gold and a handle of white enamel topped with rock crystal four inches long. Three others have jeweled handles. One is in a cream-colored enamel ending in a large pigeon-blood ruby, surrounded by diamonds and with a circlet of small pearls at the bottom.

Chas. G. Bruffee, who was arrested a short time ago on a charge of breaking and entering the store of E. A. Whipple & Sons, Springfield, Mass., and stealing five pairs of opera glasses and two telescopes, pleaded not guilty when arraigned in the local police court about a week ago.

Magnificent Candle-sticks for Cathedral of SS. Peter and Paul, Indianapolis.

SIX magnificent candle-sticks, one of which is shown in the illustration, on this page, have recently been completed for the Catholic Cathedral of SS. Peter and Paul, a new edifice in Indianapolis, Ind. These candle holders, which are to be placed upon the main altar, are five feet in height and are made of bronze, heavily plated with gold.

The design, drawn by Wm. Renwick,

MAGNIFICENT CANDLE-STICK FOR CATHEDRAL SS. PETER AND PAUL.

a New York architect, is in the style of the Italian renaissance and calls for much elaborate molding. At the base of each candle-stick, on each of the four sides, is a cherub in relief.

The candle sticks were made at the bronze works of the Gorham Mfg. Co., in Providence, R. I., under the supervision of A. A. Buck.

Branch No. 7, Brotherhood of Silver Workers, held its second annual ball at Trainmen's Hall a short time ago. There was an unusually large attendance.

CHINA BERRY SETS
IN PRETTY EFFECTS.

A MONG the line of china for which Bawo & Dotter, 26 Barclay St., New

York, have experienced a lively demand within a few weeks were the strawberry sets on which the representation of the berries was so realistic that one would readily imagine that the luscious fruit was lying on the dishes, instead of being shown in a painted picture. There are also being shown many berry sets in which roses were painted against a graduated brown tint, with a gold line encircling the outside edge of each piece. Berry dishes and salad sets are also shown with painting representing ideal heads. These pieces represent the latest progress in decalcomanie transfer work, and the unpracticed eye would see no difference between these transfers and genuine paintings. The heads are in multi-color effects, offset with a deep green or brown shaded background, and edged with a border of gold lace, while the rim of each piece is of gold. A pretty assortment of tea cups is from the company's Carlsbad works, showing mythological scenes, true to original paintings, placed on the panels. The cups are thin and graceful in form, with gold lace edging and rich gold handles.

NOVELTIES IN
ROYAL DOULTON.

IN the new sales-rooms of William S. Pitcairn, 44 Murray St., buyers will be

pleased to note the increased facilities for the display of Royal Doulton china and earthen ware in staple lines and novelties. The entire four-story building, except the ground floor, has been leased by Mr. Pitcairn. There has recently been received quite a large number of handsome rail plates for mantel and walls. The centers are painted by well known artists, the subjects ranging from fish and game to flowers and even landscapes. Another attractive line is the Capo di Monte style, ornamented with hunting scenes modeled in relief and painted in colors. This collection includes many pretty vases, tea sets, tobacco jars, candlesticks, claret jugs and mugs. In the earthen ware department the "friar" groups continue prominent, having received a number of accessions, showing the latest fancies of the artists who have been treating this series of subjects. The ware comes in brown background, decorated in black. In another collection the artists have given their attention to automobile subjects, and the result is altogether satisfactory. The scenes are characteristic of the sport and are painted in the brightest of hues. This line of earthen ware includes special pieces, plates, jugs, vases and tankards.

EVERY SMOKER WANTS ONE

The most useful pocket lighter ever invented. Throw away your matches. The "Instanto" produces a steady flame, without matches, by simply removing the cover, as shown in illustration. Lights a cigar, gas jet, kindles a fire, or shows the way in the dark. Useful every day and night of the year.

Pat. June 27, '05

The "Instanto" Pocket Cigar Lighter

("Instanto")
(Trade Mark)

IGNITED BY AIR

("Instanto")
(Trade Mark)

Will not ignite unless exposed to the air. Absolutely safe. Always dependable. Conveniently carried in the vest pocket. With ordinary care is practically indestructible. Sterling Silver, Solid Gold and Gold-filled. Special prices upon application.

Conveniently carried in the vest pocket. With ordinary care is practically indestructible. Sterling Silver, Solid Gold and Gold-filled. Special prices upon application.

The Public and Trade are cautioned against purchasing other Cigar Lighters of a similar nature. The Jewelry Trade, Wholesale and Retail, will find the "Instanto" an unusually good seller, as it is extensively advertised in all the leading magazines.

These High-Grade Combs

and many others are included in our

\$25.00

Sample Assortment

No, you mustn't jump at the conclusion that, because our prices are way down, our goods are not suitable for good trade. In putting up this Sample Assortment we have aimed at—and accomplished—3 things—

- 1.—To give a representative line of high-grade Combs at an acceptable figure—from your point of view.
- 2.—To prove that the designs and patterns in the "Checo" Line please the large majority of ladies and misses.
- 3.—To show you the profit possibilities of a good Comb assortment.

NOW, if you send for this trial assortment of Combs, you are not obliged to keep them if unsatisfactory. Send them back—that's all. We'll give you a square deal—guarantee satisfaction or money back.

Same way with our

\$15 BRACELET ASSORTMENT

which includes a splendid range of attractive, well-made and quick-selling designs. You can order this assortment, and return any or all that don't satisfy you.

SALESROOMS, 9-13 MAIDEN LANE, NEW YORK, 42 MADISON STREET (HEYWORTH BUILDING), CHICAGO

AMONG the various historical styles of decoration suitable for silverware, none has attained a more lasting popularity than that associated with the name of Louis XIV of France, le Grand Monarque. ¶ It is for this reason that the Whiting Company have decided to introduce a novel and original treatment of this favorite form of French Renaissance applied to a very complete line of Hollow Ware, characteristic examples of which will be here shown from time to time.

STERN BROS & Co

The central illustration shows a woman in a dark riding suit and helmet, sitting on a horse and holding the reins. The background is a soft-focus landscape with trees. Surrounding this central image are several circular and rectangular frames containing different pieces of diamond jewelry:

- Top Left:** A heart-shaped diamond necklace.
- Top Right:** A fleur-de-lis shaped diamond brooch.
- Middle Left:** A diamond ring with a large oval stone and a smaller ring below it.
- Middle Right:** A vertical column of five diamond rings with various designs, including oval and round stones.
- Bottom Left:** A diamond bracelet or wide band.
- Bottom Right:** A diamond tiara or crown.

STYLE

Style is a most important factor in diamond mountings.

Our large line of diamond mountings show correct style and perfect finish.

As we are importers and cutters of rough diamonds, we have exceptional facilities for selling.

MAURICE L. POWERS.

JOSH W. MAYER.

Special Announcement.

OUR Mr. MAURICE L. POWERS and Mr. JOSH W. MAYER have returned from abroad after spending considerable time in purchasing large lots of Diamonds, Pearls, Emeralds, Rubies, Sapphires and other precious stones. Many of these stones have been specially selected and cut to order for goods to be used in the productions for our coming exhibition. It is impossible to enumerate the choice quantity and quality of these importations.

Our Designers have lately returned from the foreign countries, after securing the newest and most desirable effects for the coming season's wear. These will harmonize perfectly with the stones procured by this firm.

On account of the unusual number of requests from Jewelers all over the country, who found it impracticable to visit our former exhibitions, we have changed the date for this coming display, to be held in our offices, to August 13th-18th inclusive.

Once a visit always a visit.

POWERS and MAYER,

Tortone Combs

IN ENDLESS STYLES.

There has been an avalanche of orders. The selling has been tremendous among the jewelers handling our **Tortone Shell Combs**.

Tortone Shell Combs are a trade attraction and a sales factor, besides being the nearest like tortoise shell of any comb manufactured. They'll increase the sales of your shell goods department.

Order a few of the styles illustrated and let us add a small assortment of the latest creations. You will be agreeably surprised at the matchless values and distinctiveness of the designs.

Mounted combs are just as appropriate for gifts as jewelry and silver.

TERMS—2 per cent. 10 days; 30 days extra.

Mail your order to-day.

E. & J. BASS,

MAKERS OF TORTONE HAIR ORNAMENTS,

ZIMMERMAN'S ELK MASTERPIECE.

Ever on the alert to improve our already most popular line of Elk emblems, we have added what we consider the most wonderful reproduction of an Elk head in gold ever attempted. This is known as the Zimmerman Masterpiece of an Elk.

This Elk head is an exact reproduction in gold of Zimmerman's masterpiece, "The Elk," which is world famous, having received prizes at every exhibition where shown. Every line in the painting has been faithfully reproduced by us in the emblem.

We are making this head in two sizes (medium and small), in both gold and silver, and in various finishes, also combining it with the dial, with and without diamonds and other precious stones. If your jobber does not handle our line, send for a selection package. Our Phenomenal success has inspired many imitations. There is but one line of FOX Emblems, and all goods of our make are stamped with this trade-mark:  A quantity or low price may sell the first bill, but quality as well is required to get succeeding orders. Our goods are of the highest standard of quality.

THE GUSTAVE FOX CO.,

14-16 East Fourth Street, Cincinnati, Ohio.

Branches in Antwerp and Oakland, Calif. (Temporarily).

Bastian's Class Pins and Badges

When you handle Bastian Bros' Class Pins and Badges, you handle goods that are known to every intelligent person wherever English is spoken. We have advertised extensively and persistently in Leading Magazines until the name of Bastian bears the same relation to class pins that the name Elgin does to a watch.

No other manufacturer can meet our prices—it is an impossibility for him to do so—because we own the only patented process whereby one girl with one machine can do the work of six skilled workmen.

Note these Prices:

Silver-Plated Pins, per doz.,	\$1.00
Sterling Silver Pins, "	2.50
Gold Plate	3.00
Solid Gold	15.00

25% Discount to Retailers

Silver-Plated Pins retail at 10 cents and Sterling Silver at 25 cents. They are finely made of heavy metal, and on the Sterling Silver Pins the best French enamel is used.

We also make to order Badges, Medals and Buttons in either Gold, Silver, Bronze or Ribbon, and we rigidly guarantee everything we make.

AMERICAN CHURCHES

REPRESENTED IN OUR
SOUVENIR GOODS.

A NATION'S CHURCHES are among its most interesting institutions. In addition to their deep religious and social significance, their ecclesiastical architecture often possesses features of great beauty; and a wealth of intimate associations clusters about such edifices.

THE CUT SHOWS TRINITY CHURCH, BOSTON, IDENTIFIED WITH THE FAME OF ITS GREAT PASTOR, THE LATE PHILLIPS BROOKS. THE STRUCTURE IS REGARDED AS THE MASTERPIECE OF RICHARDSON, AMERICA'S MOST NOTED ARCHITECT.

Our Souvenirs represent this and many other interesting Churches, including Old Swede's Church, Wilmington, Del.; St. Paul's Church, Norfolk; St. Louis Cathedral, New Orleans; the Mormon's Temple, Salt Lake; the Cathedral, City of Mexico, etc.

Handsome Trophy Won at Brooklyn Riding and Driving Club Show.

ONE of the chief events of the Brooklyn Riding and Driving Club's show of 1906, which was held in the arena at the Prospect Park Plaza in the week beginning April 23, was the contest for the Loeser cup for Fours. This solid silver cup was offered for the first time a year ago, when it was then won by Alfred G. Vanderbilt. The cup was won this year by W. H. Moore.

This cup is somewhat massive in its proportions and distinctly handsome. On one

Recent Decisions by General Appraisers on Precious Stones, Jewelry and Kindred Lines.

Decisions by the Board of United States General Appraisers in cases involving duties on articles of jewelry, precious stones and kindred lines, were announced last week as follows:

PEARLS, STRING.—Protest of J. M. Colton against the assessment of duty by the Collector at New York. *Neresheimer v. United States* (T. D. 25876) followed, relating to pearls, string.

ROCK CRYSTAL INTAGLIOS.—IMITATION PRECIOUS STONES.—Protest of Nordlinger &

Goodfriend Bros. against the assessment of duty by the Collector at New York. *G. A. 6285* (T. D. 27108) followed, relating to rock crystal intaglios.

IMITATION DIAMONDS.—Protest of H. B. Claflin Co. against the assessment of duty by the Collector at New York. So-called simili were held to have been properly classified as imitation diamonds under Par. 435, Tariff Act of 1897.

PRECIOUS STONES IN THE FORM OF BEADS.—Protest of D. Lisner & Co. against the assessment of duty by the Collector at New York. Under the authority of *G. A. 6097* (T. D. 26586), precious stones in the form of beads were held dutiable under Par. 435, Tariff Act of 1897, as precious stones, cut but not set.

TOY BRACELETS.—Protest of Spiegelberg & Co. against the assessment of duty by the Collector at New York. Certain bracelets were held dutiable as toys under Par. 418, Tariff Act of 1897, as claimed by the importers. *Strauss v. United States* (T. D. 26903) followed.

IMITATION PEARLS.—Protest of H. Nordlinger's Sons against the assessment of duty by the Collector at New York. *G. A. 6088* (T. D. 26554) followed, relating to imitation pearls.

METAL VEST CHAINS.—JEWELRY.—MILLINERY ORNAMENTS.—Protest of Spiegelberg & Co. against the assessment of duty by the Collector at New York. Certain millinery ornaments were held dutiable as manufactures of metal under Par. 193, Tariff Act of 1897, as claimed by the importers. *G. A. 6130* (T. D. 26653) followed. Vest chains composed of metal were held to have been properly classified as jewelry under Par. 434.

GILDED PICTURE FRAMES.—Protest of Ferdinand Bing & Co.'s Successors against the assessment of duty by the Collector at New York. *G. A. 6218* (T. D. 26885) followed, relating to gilded picture frames.

TOY BRACELETS.—Protest of Moses Norris against the assessment of duty by the Collector at Baltimore. A portion of the merchandise in controversy, consisting of bracelets and necklaces, was held dutiable under Par. 418, Tariff Act of 1897, as toys, as claimed by the importer. *G. A. 6297* (T. D. 27156) followed.

IMITATION PEARLS.—Protest 168684 of Benedict & Warner. April 27, 1906. Same as above.

INCRUSTED STONES.—IMITATION PRECIOUS STONES.—Protest of E. A. Bliss & Co. against the assessment of duty by the Collector at New Haven. On the authority of *G. A. 6342* (T. D. 27292) the Board sustained the importers' contention that incrustated stones are dutiable as imitation precious stones under Par. 435, Tariff Act of 1897. The Board also sustained the contention that other articles, consisting of imitation precious stones decorated, were dutiable as manufactures of paste under Par. 112, Tariff Act of 1897. The remainder of the merchandise was held to have been properly classified as metal buttons under Par. 414.

SPANGLED ARTICLES.—Protests, etc., of Veit, Son & Co. against the assessment of duty by the Collector at New York. *G. A. 6323* (T. D. 27240) followed, relating to spangled articles.

THE LOESER CUP FOR FOURS—WON BY W. H. MOORE.

side there is etched an excellent representation of a four-in-hand, with the inscription, "Presented by Frederick Loeser & Co. to the Riding and Driving Club of Brooklyn." On the other side is an etching of a horse's head encircled in a laurel wreath. Above this is a place for the names of the winners. The face is gracefully modeled and ornamented, and the handles are prettily fashioned. The design was the work of Wm. C. Hulick, of Frederick Loeser & Co., and the cup was made by Geo. W. Shiebler & Co., New York.

Mamluck against the assessment of duty by the Collector at New York. *G. A. 6088* (T. D. 26554) and *G. A. 6285* (T. D. 27108) followed, relating to rock crystal intaglios and imitation precious stones.

IMITATION PEARLS.—BEADS.—Protest of Benedict & Warner against the assessment of duty by the Collector at New York. *G. A. 6088* (T. D. 26554) followed, relating to imitation pearls pierced, which were held to have been properly classified as beads under Par. 498, Tariff Act of 1897.

ROCK CRYSTAL INTAGLIOS.—Protest of

ACTIVITY

The Keynote of Our Progress

A series of pictures showing various forms of active life.

JUST OVER

By constant training and endeavor, the pole vaulter—inch by inch—increases the height of his jump. By constantly adding new ideas and patterns to our various lines of rings, we want to merit an increase in our business.

If you will let our salesmen show you our stock of rings—for man, woman and child—you will find many new and attractive patterns in the line. This means we would like more business. May we do it with you?

ELSIE BEE'S FASHIONS.

NOVELTIES SEEN IN A LADY'S RAMBLES AMONG THE JEWELERS.

FOR the Summer girl, gowned in white, is an exquisite little watch of finest white enamel, with chatelaine pin to match, and both are beautifully ornamented with overlaying gold filigree.

*

New parasol mountings, in a case, consist of a twisted tortoise-shell handle with loop end; points and extension top to match.

*

A new ring, recently seen, simulates a small diamond bow, with one large loop on top, in the center of which is a fine diamond.

*

In a bracelet noticeable for the unique effect of contrast, very close and beautiful squares of gold filigree alternate with open squares set with gems.

*

As a novelty in sleeve links some open figures, such as ovals, diamonds, squares and ovals elongated to a point, are shown in gold corded effects, with a single diamond in the center.

*

A blue fan is rather taking embroidered in gold thread in a design suggestive of Japanese art. A black fan has a floral design carried out in appliqué of white lace braid, with white pearl sticks.

*

In contradistinction to the light, open style of setting in the use of diamonds with pearls, or stones of color, is the most elaborate diamond work, as in a large brooch, encrusted with large, round pearls, gray and white.

*

As mentioned some months ago, bangles, and also heavy chain and wide gold bracelets, are pre-eminently the style for out-of-door wear with elbow gloves, which have become a great feature of Spring and Summer styles, and such bracelets, as well as those of more delicate outline, are in great demand. A single bracelet is generally worn at present.

*

Nothing prettier has been shown in the line of ladies' watches for some time than the new style that has a chain to match the watch attached. A charming little model, with richly chased case of yellow gold, is set with diamonds. The long chain is composed of slender, fancy beads of yellow gold, about half an inch in length, alternating with diamonds.

*

Some new fans in the soft pastel shades of blue, pink and red, now so popular in the smartest costumes, are rendered particularly attractive by well chosen treatment. The mounts are of silk, sometimes inset with gold gauze, and decorated with pretty, conventional designs running on a line with the sticks. The sandalwood frames are beautifully treated with a pattern in gold. Both gold and silver spangles are used on the mounts for medium priced fans.

ELSIE BEE.

Reported to the Senate.

Interstate Commerce Committee Acts Favorably on Jewelry Trade's Gold and Silver Stamping Law.

WASHINGTON, D. C., May 9.—The Senate Committee on Interstate Commerce has reported back to the Senate the Jewelry Trade's Gold and Silver Stamping Bill introduced by Representative Vreeland, with only two amendments; one to reduce the fine and imprisonment from six months and \$1,000 to three months or \$500, and the other, to make it operative one year after its passage, instead of six months. No special report will be made.

The bill has made unusually quick progress, having passed the House of Representatives on April 16. It is now No. 3,528 on the Senate calendar.

The act as passed by the Senate is as follows, the words in brackets being those of the House bill that were stricken out and those in italics are new. The bill reads:

In the Senate of the United States, April 17, 1906. Read twice and referred to the Committee on Interstate Commerce, May 8, 1906. Reported by Mr. Aldrich, with amendments.

AN ACT

FORBIDDING THE IMPORTATION, OR CARRIAGE IN INTERSTATE COMMERCE OF FALSELY OR SPURIOUSLY STAMPED ARTICLES OF MERCHANDISE MADE OF GOLD OR SILVER OR THEIR ALLOYS, AND FOR OTHER PURPOSES.

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That it shall be unlawful for any person, firm, corporation, or association, being a manufacturer of or wholesale or retail dealer in gold or silver jewelry or gold ware, silver goods or silverware, or for any officer, manager, director, or agent of such firm, corporation, or association to import or export or cause to be exported into or exported from the United States for the purpose of selling or disposing of the same, or to deposit or cause to be deposited in the United States mails for transmission thereby, or to deliver or cause to be delivered to any common carrier off transportation from one State, Territory, or possession of the United States, or the District of Columbia, to any other State, Territory, or possession of the United States, or to said District, in interstate commerce, or to transport or cause to be transported from one State, Territory, or possession of the United States, or from the District of Columbia, to any other State, Territory, or possession of the United States, or to said District, in interstate commerce, any article of merchandise manufactured after the date when this act takes effect and made in whole or in part of gold or silver, or any alloy of either of said metals, and having stamped, branded, engraved, or printed thereon, or upon any tag, card, or label attached thereto, or upon any box, package, cover, or wrapper in which said article is incased or inclosed, any mark or word indicating or designed or intended to indicate that the gold or silver or alloy of either of said metals in such article is of a greater degree of fineness than the actual fineness or quality of such gold, silver, or alloy, according to the standards and subject to the qualifications set forth in Sections 2 and 3 of this act.

Sec. 2. That in the case of articles of merchandise made in whole or in part of gold or of any of its alloys so imported into or exported from the United States, or so deposited in the United States mails for transmission, or so delivered for transportation to any common carrier, or so transported or caused to be transported as specified in the first section of this act, the actual fineness of such gold or alloy shall not be less by more than one-half of one carat than the fineness indicated by the mark stamped, branded, engraved, or printed upon any part of such article, or upon any tag, card, or label attached thereto, or upon any box, package, cover, or wrapper in which such article is incased or inclosed; except that in the case of watch cases and flat ware, so made of gold or of any of its alloys, the actual fineness of such gold or alloy shall not be less by more than 3-1000 parts than the fineness indicated by the mark stamped, branded, engraved, or printed upon such article, or upon any tag, card, or label attached

thereto, or upon any box, package, cover, or wrapper in which such article is incased or inclosed: *Provided*, That in any test for the ascertainment of the fineness of any article mentioned in this section, according to the foregoing standards, the part of the article taken for the test, analysis, or assay shall be such part or portion as does not contain or have attached thereto any solder or alloy of inferior fineness used for brazing or uniting the parts of said article: *Provided further*, That in the case of any article mentioned in this section, in addition to the foregoing tests and standards, the actual fineness of the entire quantity of gold or of its alloys contained in such article, including all solder and alloy of inferior fineness used for brazing or uniting the parts of such article (all such gold, alloys, and solder being assayed as one piece), shall not be less by more than one carat than the fineness indicated by the mark stamped, branded, engraved, or imprinted upon such article, or upon any tag, card, or label attached thereto, or upon any box, package, cover, or wrapper in which such article is incased or inclosed, it being intended that the standards of fineness and the tests or methods for ascertaining the same provided in this section for articles mentioned therein shall be concurrent and not alternative.

Sec. 3. That in the case of articles of merchandise made in whole or in part of silver or any of its alloys so imported into or exported from the United States, or so deposited in the United States mails for transmission, or so delivered for transportation to any common carrier, or so transported or caused to be transported as specified in the first section of this act, the actual fineness of the silver or alloy thereof of which such article is wholly or partly composed shall not be less by more than 4-1000 parts than the actual fineness indicated by any mark (other than the word "sterling" or the word "coin") stamped, branded, engraved, or printed upon any part of such article, or upon any tag, card, or label attached thereto, or upon any box, package, cover, or wrapper in which such article is incased or inclosed; and that no such article or tag, card, or label attached thereto, or upon any box, package, cover, or wrapper in which such article is incased or inclosed shall be marked, stamped, branded, engraved, or printed with the word "sterling" or "sterling silver" or any colorable imitation thereof, unless such article or parts thereof purporting to be silver contains 925-1000 parts pure silver; and that no such article, tag, card, label, box, package, cover or wrapper shall be marked, stamped, branded, engraved, or printed with the words "coin" or "coin silver" or colorable imitation thereof unless such article or parts thereof purporting to be silver contains 900-1000 parts pure silver: *Provided*, That in the case of all such articles whose fineness is indicated by the word "sterling" or the word "coin" there shall be allowed a divergence in the fineness of 4-1000 parts from the foregoing standards: *Provided*, That in any test for the ascertainment of the fineness of any such article mentioned in this section according to the foregoing standards the part of the article taken for the test, analysis, or assay shall be such part or portion as does not contain or have attached thereto any solder or alloy of inferior fineness used for brazing or uniting the parts of such article: *Provided further*, That in the case of any article mentioned in this section, in addition to the foregoing tests and standards, the actual fineness of the entire quantity of silver or of its alloys contained in such article, including all solder and alloy of inferior fineness used for brazing or uniting the parts of such article (all such silver, alloys, and solder being assayed as one piece), shall not be less by more than 10-1000 parts than the fineness indicated by the mark stamped, branded, engraved, or imprinted upon such article, or upon any tag, card, or label attached thereto, or upon any box, package, cover, or wrapper in which such article is incased or inclosed, it being intended that the standards of fineness and the tests or methods for ascertaining the same provided in this section for articles mentioned therein shall be concurrent and not alternative.

Sec. 4. That in the case of articles of merchandise made in whole or in part of an inferior metal, having deposited or plated thereon or brazed or otherwise affixed thereto a plating, covering, or sheet composed of gold or silver, or of an alloy of either of said metals, and known in the market as rolled gold plate, gold plate, gold filled, silver plate, or gold or silver electroplate, or by any similar designation, so imported into the United States, or so deposited in the United States mails for transmission, or so delivered to any common carrier, or so transported or caused to be transported as specified in the first section

of this act, no such article, nor any tag, card, or label attached thereto, nor any box, package, cover, or wrapper in which such article is incased or inclosed, shall be stamped, branded, engraved, or imprinted with any word or mark usually employed to indicate the fineness of gold, unless such word or mark be accompanied by other words plainly indicating that such article or part thereof is made of rolled gold plate, gold plate, or gold electroplate, or is gold filled, as the case may be, and no such article, nor any tag, card, or label attached thereto, nor any box, package, cover, or wrapper in which such article is incased or inclosed, shall be stamped, branded, engraved, or imprinted with the word "sterling" or the word "coin," either alone or in conjunction with other words or marks.

Sec. 5. That each and every person, firm, corporation, or association, being a manufacturer of or a wholesale or retail dealer in gold or silver jewelry, gold ware, silver goods, or silverware, who or which shall knowingly violate any of the provisions of this act, and every officer, manager, director, or managing agent of any such corporation or association having knowledge of such violation and directly participating in such violation or consenting thereto, shall be deemed guilty of a misdemeanor, and upon conviction thereof in any court of the United States having jurisdiction of crimes within the district in which such violation was committed or through which has been conducted the transportation of the article in respect to which such violation has been committed, shall be punished by a fine of not more than [one thousand] *five hundred* dollars or imprisonment for not more than [six] *three* months, or both, at the discretion of the court. Whenever the offense is begun in one jurisdiction and completed in another it may be dealt with, inquired of, tried, determined, and punished in either jurisdiction in the same manner as if the offense had been actually and wholly committed therein.

Sec. 6. That the expression "article of merchandise" as used in this act shall signify any goods, wares, works of art, commodity, or other thing which may be lawfully kept or offered for sale.

Sec. 7. That all articles of merchandise to which this act applies which shall have been transported into any State, Territory, District, or possession of the United States, and shall remain therein for use, sale, or storage, shall, upon arrival in such State, Territory, District, or possession, be subject to the operation of all laws of such State, Territory, District, or possession of the United States to the same extent and in the same manner as though such articles of merchandise had been produced in such State, Territory, District, or possession, and shall not be exempt therefrom by reason of being introduced therein in original packages or otherwise.

Sec. 8. That this act shall take effect [six months] *one year* after the date of its passage.

Passed the House of Representatives April 16, 1906.

Rochester Optical Society Elects Officers for the Ensuing Year.

ROCHESTER, N. Y., May 9.—The regular meeting of the Rochester Optical Society was held in the office of Clark & Bowen, this city, yesterday at 8 p. m. A well known nose and throat specialist gave an interesting lecture, showing how the optometrist might distinguish headaches caused by nose and throat affections. The matter of Saturday closing was brought up and discussed, and it was the opinion of the society that if the large stores closed the opticians would close also.

Applications for membership were received from Geo. L. Andrus and Chas. F. Vanderpool, of Rochester, and John D. Murdock, Geneseo, and were ordered referred to the executive committee.

The following officers were elected: President, H. M. Bestor; vice-president, A. D. Bliss; secretary, H. I. Sumeriski; treasurer, H. C. Mielke; executive committee, Edward Benedict (chairman), Arthur Pellow, Ellery Handy, Milton Goodman and Parry Newman.

Interesting Quiz at the Regular Monthly Meeting of the Optical Society of the City of New York.

The regular monthly meeting of the Optical Society of the City of New York was held Wednesday, May 9, 1906, at 8 o'clock, in the optical parlors of A. Martin, 17 W. 28th St., New York, with 34 members in attendance.

President Offenhauser, Sr., was absent through illness, and the chair was filled by First Vice-President J. E. Meyer, who called the meeting to order.

Applications for membership were received from Walter Carlin, 380 2d St., Brooklyn (proposed by Mr. Levin); A. F. Mittacher, 341 E. 86th St., New York (proposed by Mr. Hohl); H. Schuman, 1762 Madison Ave., New York (proposed by Mr. Frank).

These were laid on the table, as usual, for action at the next meeting. The recording secretary was empowered to cast a vote for the election of H. J. Pippitt, Port Jervis, N. Y., as a member of this society.

The financial secretary, Mr. Levin, reported that an account had been opened with the Mercantile National Bank in the name of the society, and that 34 members had enrolled as participants in the two years' course, and five more came in on the evening of this meeting, making a total of 39 enrolled thus far.

Mr. Ryer, who was scheduled to speak before the convention of the New England Association of Opticians in Boston, Mass., May 15-16, was elected by the society as a delegate to represent it there. Mr. Dilworth gave an interesting prelude to the quiz by Prof. Lockwood, by reading part of an article, "Eyestrain as a Cure for Diseases of the Digestive Organs," and was listened to with much interest.

He dwelt on the necessity of the members paying great attention to the work in hand and said that all should understand that none, including himself, could successfully pass the examination without coming up to a certain standard. His remarks were followed by a hearty round of applause.

Prof. Lockwood then began his quiz on the first four lessons in Henderson's "Lessons on the Eyes," calling on the various members indiscriminately, and illustrating the various bones, etc., by means of a human skull, which had been provided for the purpose. This first night's work was very successful, and most of the members responded quickly and correctly to the questions asked.

At the end of the Professor's quiz it was decided that the secretary send to each of the members of this section only a list of the questions asked. The members are to bring the answers in at the next meeting, when they will be reviewed and corrected if necessary.

QUIZ QUESTIONS PROPOUNDED AT THE MEETING.

- (1) Name the seven bones of the orbit.
- (2) What is the function of the orbicularis muscle?
- (3) What muscle holds the eyelid close to the eyeball?
- (4) Which muscle runs through a loop or pulley?
- (5) Where is the location of the lachrymal gland?
- (6) Where do most of the nerves of the eye enter the orbit?
- (7) With what is the orbit of the back of the eyeball filled?

- (8) What is Tenon's capsule, and what is its function?
- (9) Name the six extra-ocular muscles.
- (10) Where do they arise?
- (11) Where are they attached to the lobe of the eye.
- (12) Do the ocular muscles pull straight backwards?
- (13) What muscle lifts the upper eyelid?
- (14) What nerves supply the muscles of the eye?
- (15) What gives strength and toughness to the eyelids?
- (16) What are the meibomian glands?
- (17) What are the canthi of the eye?
- (18) Describe the lachrymal gland.
- (19) Describe the excretory apparatus working in conjunction with the same?
- (20) Describe the conjunctiva.
- (21) Where is the fornix of the conjunctiva?
- (22) Describe the eyeball in general terms.
- (23) How many coats has the eyeball, and what are they?
- (24) Describe the cornea.
- (25) Describe the sclera.
- (26) Describe the iris.
- (27) Describe the spaces of Fontana and the canal of Schlemm.
- (28) Describe the ciliary body.
- (29) Describe the choroid.
- (30) Describe the vitreous.
- (31) Describe the retina.
- (32) Describe the optic disk.
- (33) Describe the optic nerve.
- (34) What is the optic commissure and what purpose does it serve?
- (35) Describe the decussation of the optic nerve fibers.

Millville, N. J., Jeweler Looking Up Record of Man He Accused of Larceny.

MILLVILLE, N. J. May 9.—A. M. Kendall, 120 High St., this town, is anxious to learn if any members of the trade have had any transactions with a man named Frank I. Hall or Lafayette Stainrook, who is committed to jail here awaiting trial, next September, on a charge that he swindled Mr. Kendall out of two watches valued at \$50. As Mr. Kendall has been investigating the career of the prisoner he is anxious to learn about any previous transactions he may have had in the jewelry trade, and asks that brother jewelers who may know Hall, write to him at the earliest possible moment.

The alleged crime for which Hall is now in jail was committed April 18, 1892, at which time the complainant says Hall got up an entertainment for a local lodge of Red Men, and obtained the watches on the ground that they were to be voted to the two most popular members. Hall had previously deposited in a local bank a check for \$1,000, drawn on a Boston bank, and on the strength of this deposit obtained credit and standing for his enterprise. After he had left town suddenly it was discovered that the check which he deposited was worthless. He did not attempt to draw upon his account, however, and no charge was made against him by the bank.

Mr. Kendall claims that he had traced Hall to a number of cities and that the latter had operated in Bloomfield, N. J., and in other towns. The prisoner was arrested at Trenton, N. J., April 18, but the local charge against him was waived in order that he might be brought to Millville for trial on Mr. Kendall's complaint.

Hall or Stainrook is about 70 years old, weighs about 150 pounds, is five feet, nine inches high, has blue eyes and gray mustache. He has a scar upon each leg above the ankle and a wound on the wrist.

Controversy Between McKay Co., Washington, D. C., and James C. Buchanan, Taken to the Courts.

WASHINGTON, D. C., May 10.—A suit in equity has been filed by the McKay Co. against James C. Buchanan, in which an injunction is sought. The bill of complaint sets forth that the complainant company was incorporated on Jan. 20, 1906, for the purpose of doing a retail jewelry business. At that time Buchanan was doing a jewelry business at 1115 F St., N. W., and on Jan. 20, 1906, he and his wife executed a bill of sale conveying to the McKay Co. all his stock. In this bill of sale was a provision that the McKay Co. was to occupy one-half of the premises, 1115 F St., and the entire store later, when Buchanan gave up his optical business. It was further agreed that Buchanan was to relinquish his optical business within a few months and turn over the whole premises to the McKay Co.

It is now alleged that Buchanan has since attempted to sell out his optical business coupled with the right of occupancy of said premises; that he was instrumental in bringing proceedings against the McKay Co. by inducing Louis Costaggini to petition the court for the appointment of a receiver for the McKay Co. These proceedings were subsequently dismissed by the court at the instance of both parties to the suit. These acts of Buchanan's, so the complainant company alleges, have injured the business of the McKay Co., and, if they are persisted in, will ruin it altogether.

The court is asked to restrain Buchanan from entering upon the premises, 1115 F St., or in any manner interfering with the complainant company. A temporary injunction was granted.

Texas Jeweler Accused of Smuggling Gems and Jewelry Across Mexican Border.

SAN ANTONIO, Tex., May 9.—Before United States Commissioner Neill last week Louis Leschenger, a jeweler of Houston, waived examination on the charge of smuggling, and was admitted to bond in the sum of \$2,500 to await the action of the United States Grand Jury, which is in session this week.

Mr. Leschenger was brought to this city from Eagle Pass, at which place he had previously been arrested by Collector Dowe and Deputy Collector Baldwin on a charge that he had brought into the United States, without properly declaring the same, diamonds, Swiss watches and jewelry to the amount of \$1,500. Mr. Leschenger, who is represented here by his attorney, Winchester Kelso, has declined to make any statement except to say that he is guilty of no intent to defraud the Government.

Unless the case against Leschenger is immediately dismissed by the Grand Jury an action *in rem* to forfeit the articles claimed to have been smuggled will also be begun in the United States Court.

Mr. Rauber, of the Rauber & Wollensak Optical Co., Inc., Rochester, N. Y., has retired from that firm, and the style hereafter will be Wollensak Optical Co., Inc.

Echoes of the Gattle Failure.

Trustee's Judgment Against David Mayer Reversed on Appeal and Suit Against Herman Levy Decided.

Two decisions were rendered in the last week in the cases growing out of the failure of Hyman Gattle, who was in the diamond business at 65 Nassau St., New York, until June 16, 1903, when a petition in bankruptcy was filed against him. Both cases were brought against creditors on the ground that they had received improper preferences, the defendants being David Mayer and Herman Levy. The decision in Mr. Mayer's case, which was handed down by the Appellate Division, First Department, of the New York Supreme Court, was in his favor, reversing the judgment awarded last June by Justice Fitzgerald and a jury. In the Levy case Justice Fitzgerald now decides on questions of law unfavorably to Mr. Levy in one respect and in his favor on another branch of the case.

The two suits were brought by Simon T. Stern, as trustee in bankruptcy of Hyman Gattle's estate. The Jewelers Board of Trade has been back of the trustee in the litigation, and its attorneys, Hastings & Gleason, represented him in each case.

In the Mayer case the appeal to the Appellate Division was from a judgment ordering the defendant to return a quantity of jewelry valued at \$2,200. The court reverses the judgment, and orders a new trial with costs to the appellant to abide the event. The court was not a unit in so deciding, however. The majority opinion was written by Justice Houghton, the other justices concurring, except Justice Ingraham, who wrote a dissenting opinion.

In the majority opinion the court says that according to the evidence Mr. Mayer called at Gattle's office just prior to the failure and obtained a brooch and other articles of jewelry, saying that he wished to show them to his wife and might buy them for her. Later Gattle demanded the return of the jewelry, and Mayer, who was a creditor for \$3,000, and this was refused. Thereafter Gattle began replevin proceedings, which were interrupted by the bankruptcy case.

The court holds that there was certainly no intention on the part of Gattle to give an illegal preference to Mayer. If any charge can be made, said the court, it is that Mayer obtained the property by deceit, but in such a case the remedy is not to be found in the suit to recover for an alleged illegal preference. The trustee in bankruptcy, who stands in Gattle's shoes, could sue in replevin or in some other action. The court holds that the court below erred in not granting the motion made by the defendant's counsel at the close of the plaintiff's case for a dismissal on the ground that the evidence was at variance with the complaint.

In Justice Ingraham's dissenting opinion he says that while Mayer may have obtained the jewelry originally by deceit, yet he held it as a creditor, and such continued possessions constituted an illegal preference in violation of the bankruptcy law. The Justice says that at the trial, if the defendant intended to raise objection to the character of the action he should have entered his objection when the evidence was being

presented, and should not have waited until after the plaintiff had completed the case. In the Justice's opinion it would be inequitable, after a valid case had been made out against the defendant, to allow him to take advantage of his own deceit. Justice Ingraham says that in his opinion the court below properly allowed the question to go to the jury.

Gilbert & Mayer appeared in this case as attorneys for Mr. Mayer.

It was stated at the office of Hastings & Gleason that new proceedings will be taken at once against Mr. Mayer under a section of the bankruptcy law. It was said that an amended complaint will be served, and as the value of the property has been admitted by Mr. Mayer, the future litigation will be simplified.

In the case against Herman Levy a verdict was rendered Thursday by Justice Fitzgerald in the Special Term of the Supreme Court, New York. Under the terms of the decision Mr. Levy is ordered to turn over to the trustee a quantity of jewelry which has been valued at \$2,000. The trustee, besides seeking to have this jewelry returned, also included in an amended complaint a demand for a much larger quantity of jewelry, roughly valued by various witnesses at \$40,000 and more. The court does not sustain this latter and larger demand.

The jewelry which Mr. Levy is ordered to return to the bankrupt estate consists of 119 articles, and he has admitted from the beginning that he received this merchandise, a list of which was offered in court as "Exhibit I." The other jewelry demanded by the complainant he denied receiving.

The particulars of this case have been mentioned from time to time in THE JEWELERS' CIRCULAR-WEEKLY and were quite fully set forth May 24, 1905, in an account of the trial before Justice Fitzgerald. Just before Gattle failed Mr. Levy took possession of the 119 articles of jewelry as security for his debt. The attorneys for the trustee charged in effect that Mr. Levy, as the creditor on the spot, having an office in the same building where Mr. Gattle did business, had practically taken all the assets, but this contention is not sustained by the court. Justice Fitzgerald in his opinion severely criticizes Gattle and indicates that the court did not believe the testimony given at the trial by Gattle and his wife and their bookkeeper, Masterson. The essential part of the opinion says:

Masterson testified that earlier on the day upon which he delivered to Levy the goods listed upon Exhibit I, he had delivered to him a great quantity of other merchandise; that his only reason for doing so was a request coupled with a statement by Levy, that "he had a customer for some pendants downstairs." He said that on this occasion Levy was accompanied by his son, and that trays of rings and pendants were carried away by these two persons in telescope cases and otherwise, and that all of this was permitted by him to be done without retaining any memorandum or getting a receipt.

The improbability of this tale was emphasized by the manner in which it was told, and the efforts of Gattle and his wife to support it involved them in contradictions numerous and irreconcilable. Mr. Gattle swore that he examined the stock between May 15 and June 10, and that he valued it at \$75,000, but on the 10th of June, in presence of his wife and defendant, he stated its value was between \$40,000 and \$50,000, his wife on that occasion differing from him and insisting that it was worth \$60,000. Upon the trial Mrs. Gattle swore that the value of the stock on June 9 was

\$43,360.73, or \$16,000 less than she had previously claimed.

Gattle's purchases between November, 1902, and June, 1903, amounted to \$62,827.43. During that same period he had raised on pledges of stock \$80,000 and covered up these questionable acts by marking the word "sold" opposite the entries of the numbers in the stock book corresponding with the lot or stock numbers of the goods pawned, and his liabilities amounted to between \$110,000 and \$130,000.

He kept no proper books from which even a shadowy surmise as to the amount of stock at any of these times on hand could be made. He had also endeavored to dispose of the pawn tickets, not hesitating to make false statements in his attempts to deceive prospective purchasers. Mrs. Gattle and Masterson were fully informed of all of these incriminating facts.

A record is thus presented fairly reeking with dishonesty and fraud and without a scrap of reliable evidence to support any finding in plaintiff's favor on the amended averment of the complaint. I am, however, fully satisfied that defendant thoroughly understood Gattle's insolvent condition at the time he received the admitted property. The examination of the safe he then made was sufficient notice of that, and, upon the whole case, it would be a reflection upon Mr. Levy's remarkable shrewdness and cunning to hold otherwise.

Judgment for plaintiff for delivery of articles specified in Exhibit I, with costs. Settle decision and judgment upon notice.

The defendant in this case was represented by Jellenik & Stern.

Police of Binghamton, N. Y., Arrest Man and Woman Whom They Claim Are Noted Jewelry Thieves.

BINGHAMTON, N. Y., May 10.—The police of this city believe they made a most important arrest in taking into custody Frank Kelley and Mary Hennessey yesterday, claiming that the prisoners are well known "pennyweight" thieves. The arrest was made in the jewelry store of J. S. Newing, Court and Collier Sts., about 11 A. M. by Acting Chief Abel and Detective Stephenson.

Kelley was taken only after a hard fight with the detective, and his companion was grabbed by the acting chief as she was about to go away during the altercation. The two had been looking at diamonds at Mr. Newing's counter just previous to the arrest, and when taken to the station house and searched a number of articles were discovered. A diamond ring valued at \$30, which was found on Kelley, was identified by the police as a piece which had formerly been in Mr. Newing's stock. In its place in the tray, they say, a ring with a much smaller stone was found.

The police claim that Kelley's companion's real name is Mary Mack. She is a handsome woman about 26 years old, five feet three inches high, has dark brown hair and blue eyes. From her as well as from Kelley a number of pieces of jewelry were taken. Kelley is about 35 years of age, five feet three inches high, weighs about 125 pounds and has a small sandy mustache.

Mr. Newing swore out a complaint against both prisoners, charging them with grand larceny in the second degree. They were held for examination May 19 in \$2,000 bail, which they were not able to furnish, and were sent to jail.

J. B. Ball has been succeeded in business in Joplin, Mo., by Ball & Putman.

Philip Lyzen, watchmaker, formerly engaged in business on W. Leonard St., Grand Rapids, Mich., has taken a position with Joseph Siegel, at the same place.

San Francisco Jewelers Pluckily Resume Business.

Wholesale and Retail Firms Rapidly Finding Locations—Many Obtain Quarters in the Jewelers' and Silversmiths' Building—Other Towns That Suffered.

SAN FRANCISCO, Cal., May 9.—The wholesale jewelers are already doing business again, and there is a general feeling throughout the trade that the revival will be quick and complete. Several of the wholesale dealers are preparing to go east to look over the situation and make any new arrangements that may be necessary. With one or two exceptions all of the wholesale jewelers will return to this city from Oakland within the next few weeks. As a general rule quarters have already been secured in buildings which are now being constructed.

The retailers will, generally speaking, be a little slower in getting under way. Such concerns as Shreve & Co., Hammersmith & Field, the W. K. Vanderslice Co. and Col. A. Andrews will probably make an early start, but the smaller stores will naturally wait for insurance and building matters to be settled. Some will even postpone reopening until the city has been so far rebuilt that the inhabitants will again have time to think of luxuries.

The most important movement in the trade during the week was the securing of a jewelers' and silversmiths' building here. The former Kamm building, at 717 Market St., has been renamed and will hereafter be known as the Jewelers' and Silversmiths' building. It will be occupied exclusively by wholesale jewelers and silversmiths and by the supply trade.

A. I. Hall & Son, who are located temporarily with H. Morton, at 1151 Broadway, Oakland, expect to get into their new quarters in the Jewelers' and Silversmiths' building, Market St., here about May 15. Some little delay may be caused by the difficulties in transporting the company's two new safes, now in the Southern Pacific Railway yards, to the Kamm building and in hoisting them to the new quarters of the company.

Julius A. Young, now temporarily located in the Globe Hotel, Broadway, Oakland, has arranged for quarters in the Jewelers' and Silversmiths' building, into which he will move before June 1.

H. C. Van Ness & Co., formerly located at 115 Kearny St., opened their safes this week and found all of the stock intact. It was reported that a quantity of melted silver was stolen from the company's quarters by looters before it could be rescued by the owners. This firm will soon open at 717 Market St.

H. Morton, Oakland, Cal., is now opening his new store at 1151 Broadway. He has two new safes in the freight sheds here which will be installed in the new store during the coming week. Mr. Morton hopes to have everything in complete running order by May 15.

Nordman Bros. have opened temporarily at 2505 Clay St., from which place they will shortly remove to the Jewelers' and Silversmiths' building.

The Morgan & Allen Co., which is making its temporary quarters at 1867 Post St., has also arranged for permanent offices and salesrooms in the Jewelers' and Silversmiths' building.

The Nathan-Dohrmann Co. was one of

about two dozen retailers that formed a compact, last week, agreeing to take united action in the matter of a temporary location. The Executive Committee appointed by these retailers selected a site on Van Ness Ave., which will accordingly become temporarily the retail center of San Francisco.

The Columbia Loan Office & Jewelry Store, formerly located at 9 Grant Ave., has now opened for business at the southwest corner of Ellis and Hyde Sts.

Wm. B. Glidden, agent for R. Wallace & Sons Mfg. Co., E. G. Webster & Son, and Wm. S. Hicks & Son, who was burned out here in the big fire, is located temporarily at 1116 Broadway, Oakland. Mr. Glidden will return to this city just as soon as new quarters can be prepared for him in the Jewelers' and Silversmiths' building.

W. E. Graves, a jobber in silverware and cut glass, formerly at 120 Sutter St., is located temporarily in the Globe Hotel building, Broadway, Oakland, from which place he will remove to the Jewelers' and Silversmiths' building here in about two weeks.

Henry M. Abrams, who had been at 708 Market St., will go to the Jewelers' and Silversmiths' building, and expects to be installed there before June 1.

Wm. Glindemann, a jeweler and watchmaker, formerly in the Examiner building, at the corner of 3d and Market Sts., has announced that he will reopen in substantially the same location as soon as the building can be rebuilt.

Armer & Weinschenk have arranged for new supplies on a large scale, and will resume business in the Jewelers' and Silversmiths' building within two or three weeks. This firm was located at 220 Sutter St. before the fire and earthquake.

Anderson & Lewis, wholesale jewelers, who were burned out, will also follow the trade into the Jewelers' and Silversmiths' building within the next few weeks.

Burr W. Freer, formerly in the Spreckles building, at the corner of Market and 3d Sts., will soon be located in the new jewelry center. Mr. Freer represents the New England Watch Co. and other eastern houses.

Ehrenberg & Wurfheim, formerly at 126 Kearny St., in the Thurlow block, have established temporary offices at 1067 Broadway, Oakland, where mail and express matter is being received. The firm has not yet secured a salesroom, but will arrange to remove to this city as soon as suitable quarters can be obtained.

The Alphonse Judis Co. expects to move back to its old quarters in the Mutual Savings Bank building very soon. The concern is at present located on Broadway, near 12th St., Oakland.

F. R. Deremer & Co. are settled in temporary quarters at 217 Church St.

The Gorham Mfg. Co. still has offices at 1103½ Broadway, Oakland, where it will remain until a desirable location can be obtained here.

Shreve & Co. opened offices May 14 at 1103½ Broadway, Oakland.

J. B. Whitney & Co., successors to J. B. Whitney, the new partner being W. J. Browne, are now at 1116 Broadway, Oak-

land, but will shortly move into the Jewelers' and Silversmiths' building, in this city.

The following letter, received by THE CIRCULAR-WEEKLY from Shreve & Co., is self-explanatory:

SAN FRANCISCO, Cal., May 8, 1906.

Editor THE JEWELERS' CIRCULAR-WEEKLY:

This is addressed to you in behalf of the jewelers and silverware workers of San Francisco. The conditions here since the fire are such that an appeal for assistance to their fellow workmen throughout the country is imperative, and in their behalf we address this letter, with a request that you publish it and arrange, if possible, through your publication, to bring this condition and this appeal to the attention of the various trade organizations throughout the Eastern States.

There is now being organized in the jewelry and silverware trades here a Jewelers and Silverware Workers' Relief Association. It will be composed of the wholesale and retail firms, with relief committees selected from among the workmen in these trades, and this association requests that contributions of money and clothing of all kinds, particularly underwear and shoes, be supplied, suitable for all ages from earliest infancy to grown men and women; such contributions should (that is, clothing, where the packages are small) be sent by express immediately, and money by bank draft or money order, payable to the above named association at San Francisco. The conditions which will exist here among the workmen during the next three or six months will be serious, and the organization is being formed anticipating these conditions. The further particulars, as to the officers of the association, will be communicated to you later, as soon as determined, which will be within the next six or seven days.

As funds have already been received from the Mauser Mfg. Co. and their employes and from the Greenleaf & Crosby Co., we expect to turn these funds over to the association when its organization is completed.

We make this appeal for the organization to save time in obtaining results.

Yours very truly,

SHREVE & Co.,
By Bruce Bonny.

Attention has been forcibly called in the last week to the fact that jewelers in the smaller cities of California suffered losses in the earthquake which at any other time would have evoked the utmost sympathy and prompt assistance of people in the trade, but which have been partly overlooked in view of the awful calamity in San Francisco.

G. W. Mabie, of Mabie, Todd & Bard, pen and pencil manufacturers, 30 Fulton St., New York, was on a western trip at the time of the earthquake and on the Saturday following arrived in Chicago. Here, on request, he gave his check for \$500 to the fund being raised by the stationers of that city, and said that he would give an equal amount on his return to New York. By the time he got back to this city he had heard of the misfortune of jewelers in the smaller cities and decided to divide the

GENERAL SELLING AGENTS

JOHN W. SHERWOOD

FRANK E. HARMER

\$500. He accordingly sent \$200 to Santa Rosa, \$200 to San José and \$100 to Oakland. At the same time he called attention of the relief committee of the Board of Trade to the distressed conditions of jewelers in these smaller places, and said that if the committee would expend \$500 in relieving the distress of the Santa Rosa jewelers he would add \$100 to what he had already sent.

Mr. Mabie, since sending his donations to the cities mentioned, has received a number of interesting letters, which set forth quite fully the conditions of the jewelers in those cities. John Hood, of Santa Rosa, gave an especially vivid account of the destruction brought in that city by the earthquake. L. V. Carter, one of Santa Rosa's jewelers, and his wife were killed and all the jewelers in the place practically lost everything they had. The letter to Mabie, Todd & Bard, which is dated May 4, follows:

"We appreciate very much your sympathy and help you have extended to us in the hour of terrible calamity.

"Mayor Overton is an old friend of mine, and I know that whatever you send him will be placed to the best advantage. It is being used to provide employment for those in need. As is often the case, the smaller places may be overlooked, when they really suffer more than the large cities. As it was, the earthquake was more severe here than in San Francisco, and what the earthquake left went up in flames. Our losses in lives and property was more in proportion than theirs. There was not a business house left standing, and 13 blocks out of 16 were burned. We had plenty of water, but were handicapped by the buildings falling on the engines and some valuable teams. The fire broke out in so many places that it was all we could do to keep it from spreading to hotels and some of the lodging houses, where there were a number of persons buried in the ruins.

"Our loss in killed will run close to 100 and several hundred were more or less injured. All the jewelers were caught in the earthquake, and all but Al Sawyer were in the burned district. My loss was \$25,000, with \$8,000 insurance, safe in good condition. Mr. and Mrs. Carter, both killed; loss \$10,000; don't know about insurance; safe not opened. Mr. E. F. Heath, loss \$5,000; no insurance; contents of safe ruined; H. K. Eckstrom, loss \$2,500; insurance \$250; contents of safe ruined. A. P. McGregor, loss \$500; no insurance. Max Noack, \$500; no insurance. Robert Kirk, \$500; no insurance. Al Sawyer, \$250; no insurance; not burned.

"I will have enough to pay my debts if I get my insurance, but I wish to call attention to the other watchmakers and jewelers that were not so fortunate as I was: Mr. Heath, the jeweler, and Messrs. H. R. Eckstrom, A. P. MacGregor, Max Noack and Robert Kirk, who have lost all their tools and nearly everything they had. Four of them have families dependent upon them, and Mr. Noack lost everything but his nightshirt. I was going to suggest that in case you were going to send any more money that, instead of sending it to the Mayor, send them some tools and material. They are placed in a very bad fix, as they

have been buying from San Francisco, which city is not in a position to help them. They are working at anything they can get at present, but in a place like this, where all merchants will be more or less embarrassed, and there will be a number thrown out of employment, they will have a hard job getting work. In San Francisco people had some time to save something, but it was all over with us in 30 seconds. So if you could send them some money or tools and material (the sooner the better), it would put them on their feet again. You could either send it to me or direct to them.

"I will have enough, with what I get from the insurance companies and what I saved from my safe, to pay all my debts, so I am a little more fortunate than the others.

"Hoping you will be able to help them, as I think they are all deserving, and again thanking you for what you have done for us.

Yours truly,

"JOHN HOOD."

Other letters which Mr. Mabie received included the following from the Mayor of Oakland:

OAKLAND, Cal., May 5, 1906.

Messrs. Mabie, Todd & Bard, New York, N. Y.:

Gentlemen—I am in receipt of your check for \$100 to be used for the benefit of the people rendered homeless by the San Francisco disaster. I also notice that you have decided to send \$500 more in addition to your original contribution of \$500, to San Francisco, and you will distribute same among the smaller cities. Your prompt and generous action is greatly appreciated and you may rest assured that the money will be used where it will do the most good. Yours very truly,

FRANK K. MOTT.

Would suggest that Santa Rosa be favored. They need help badly.

Letters from the Mayors of Santa Rosa and San José each acknowledge the receipt of \$200 from Mr. Mabie and return thanks in a most feeling manner.

Mr. Hood, under date of May 7 wrote to THE CIRCULAR—WEEKLY, of which he is an old subscriber, emphasizing the fact that the watchmakers and jewelers of Santa Rosa are placed in a very unfortunate position. He said that they traded mostly in San Francisco, where the jobbers are now unable to render assistance. All the jewelers, he says, are anxious to go to work if they can get tools and material. Mr. Hood adds: "As our loss in life and property was nearly as much as Charleston, S. C., with one-fifth the population, you can imagine how much damage was done. As I am out of my own stationery I have to make use of anything I can get. I expect to get started up as soon as I get a location."

W. L. Carter, whose death is announced in the above letter, was well known in the jewelry trade, as he was a practical jeweler, and had been in the business for over 30 years. Many years ago he conducted a store at Grand Lodge, Mich., but met with reverses, and in 1886 he became manager for the business of his wife, Fanny W. Carter, who died in 1891. For a while he acted as agent for her estate, and a few years later moved to San Luis Obispo, where he remained for some time, and finally settled in Santa Rosa, March, 1898. Here he married again. His second wife, Mrs. L. V. Carter, purchased the business in the estate of his former wife, and since that time it has been conducted under her name,

but run under the management of W. L. Carter.

Contributions to the Jewelers Board of Trade's San Francisco Relief Fund acknowledged up to last week amounted to \$32,619. The board received the following since that time: Emma O. Hartwig, \$50.53; M. Bolotin, \$26; Wallach & Davidson, \$25; Heintz Bros., \$100; Jos. Fahys & Co., \$500; Jas. C. Aikin, \$50; D. C. De Lara, \$5; E. Aron, \$2; S. J. Cohen, \$2, making a total of \$760.53, and a grand total to date of \$33,379.53.

New Members Elected by the Jewelers' Security Alliance.

The regular monthly meeting of the executive committee of the Jewelers Security Alliance was held on Friday, the following members being present: President Sloan, Vice-Presidents Wood and Champenois, Chairman Butts, Treasurer Karsch, Secretary Noyes and Messrs. Abbott, Alford, Bowden, Brown and Stern of the committee. The following new members were admitted:

C. S. Allison & Son, Owosso, Mich.; S. H. Avey & Co., Auburn, Nebr.; Frank R. Cooley, Bound Brook, N. J.; A. Engelmann, Chicago; W. C. Flatau, Omaha, Nebr.; Chas. W. Fleming, Lincoln, Nebr.; Harry C. New England Watchmakers' Club Holds Interesting Meeting at Boston, Mass.

Boston, Mass., May 9.—The New England Watchmakers' Club held a meeting at room 6, Lowell building, Massachusetts Institute of Technology, last evening. There was a good attendance, and it was decided to continue the organization with the present officers and the addition of several non-Boston members to the directorate, so as to increase the interest of watchmakers at other places and to prevent the club becoming exclusively a Boston institution.

Several interesting papers on details of watchmaking and repairing were read by members of the club. Mr. Kendrick, of Kendrick & Davis, watch toolmakers of Lebanon, N. H., who is a member of the club, offered two sets of fine pearl handled watchmakers' screw drivers for the best two papers and the committee on award awarded them to C. M. Smith, who is with Gordon & Bergen, this city, and to F. J. Whilton of 345A Washington St., Boston.

Mr. Smith's paper treated of the balance and escapement on readjusting watches. Mr. Whilton's paper was on rebushing plates and uprighting wheels by the use of a staking tool. After calling attention to the fact that in many watches—especially those of foreign make—the center and fourth wheels are not upright, he spoke of wheels being thrown out of upright by the plate holes becoming too large or elliptical. He then described the method of bushing when the workman had a full set of tools, the method used at the Waltham factory, and the method pursued by workmen who did not have a full set of tools. He offered suggestions of a simple method of uprighting and bushing by the aid of a good staking tool and a few accessories, which he described and of which he showed diagrams. He finished with the description of the operations of bushing the lower center pole and putting a new shoulder or pivot to lower center; operations often necessary in repairing foreign made watches.

One of the committee on award commented on the great practical value of Mr. Whilton's paper.

The club will hold its next meeting May 22. There is some talk of a banquet in the not far distant future.

Death of A. Grebles.

SILVERTON, Colo., May 9.—It was with deep regret that the many friends of A. Grebles, one of the oldest jewelers of the State, heard that he had died suddenly last week of apoplexy. Mr. Grebles is survived by two sons and a daughter.

The deceased was a pioneer of the San Juan, and was about 90 years of age. He was the founder of the Grebles Jewelry Co., which conducted business in Silverton successfully for many years, but owing to his age had for some time not taken active part in the management of the concern. For a while his business was managed by H. O. Woodbury. Mr. Grebles was prominent both as a merchant and a jeweler and was highly respected in the community. In the Masonic Order he stood very high, and the funeral, which took place Sunday last, was under the auspices of that fraternity.

New Step Rate Assessment Plan of the Jewelers' League Now In Operation.

At the regular monthly meeting of the Executive Committee of the Jewelers' League of New York, held recently, the following members were present: President Street, Vice-Presidents Greason, Karsch and Lissauer, Messrs. Gough, Sloan, Hodenpyl, Wormser and Secretary Marsellus. The usual routine of business was transacted and a number of applicants admitted to membership from Chicago, Jersey City, Brooklyn and New York. Nineteen requests were received from members desiring to increase the amount of their insurance, which requests were duly approved and granted.

The plan recently adopted by the League at its annual meeting, held in January last, which went into effect on May 1, is meeting with general approval as it is not only equitable and just, but it places the League on a sound and thoroughly scientific basis and gives assurance to its certificate holders that it will pay the certificates that it has issued or may issue in the future in full.

The plan is generally considered by the management to be the best ever adopted to place on a sound basis a society which has heretofore operated under the post-mortem assessment plan. The League is deemed to have acted wisely in selecting a plan which is a modification of the natural premium and level premium, and such a combination of the two correct plans of life insurance it is believed will commend itself to all the members of the League as well as to persons desiring life insurance at a low cost in a good sound organization.

The new plan which is in operation this month is what is known as the yearly "step-rate," and has the endorsement of the best actuaries and promises to place the organization on a thoroughly enduring basis. The past record of the League shows that it has paid to beneficiaries of deceased members over \$3,000,000, and never disputed or compromised a claim since its organization.

Following is the monthly rate of payments graded according to the age at joining, which began this month.

TABLE OF RATES.

Age.	Sec. 1.	Sec. 2.	Sec. 3.	Sec. 4.	Sec. 5.
	\$1,000.	\$2,000.	\$3,000.	\$4,000.	\$5,000.
21.....	\$0.64	\$1.28	\$1.92	\$2.56	\$3.20

Preparations for Meeting to Form Retail Jewelers' Association of South Dakota.

ABERDEEN, S. Dak., May 9.—Preparations are under way to make the meeting for the purpose of forming a State association of jewelers, which will be held here on June 1, a success in every way. It is the endeavor of those behind the movement to have the meeting about the same time as the State Optical Association, so that the attendance will be large. The first week in June was decided on, as this is the time that the State Traveling Men's Association will meet here, with the result that reduced rates will be given by the railroads on tickets for this town.

A. W. Voedisch, D. G. Gallett and O. B. Tripp are in a great measure responsible for the progress that the movement has made. They have sent letters to jewelers in all sections of South Dakota inviting them to be present at the meeting. The answers which they have received have been most gratifying, indicating that there will be a large attendance. It is expected that the project of forming a State association will be enthusiastically received, and that the jewelers of South Dakota will line up with those of other States in an organization of which they can be proud.

Death of W. H. Loomis.

RAWLINS, Wyo., May 9.—W. H. Loomis, who died suddenly May 5 of pneumonia, was prominent in the retail trade in this section, having been in business in Rawlins continuously since 1892. He was essentially a repairer, but carried a small stock, and was well thought of in the trade and community.

The deceased was prominent in fraternal orders, being Past Exalted Ruler of the Elks in this town and had been elected delegate to the convention of that order, which is to be held at Denver. He was also a member of the Eagles, the I. O. O. F, the W. O. W. and the Jewelers Security Alliance.

Mr. Loomis is survived by a widow and two sons.

Walter Oates, Little Rock, Ark., Goes Into Bankruptcy.

LITTLE ROCK, Ark., May 9.—Walter Oates, a watchmaker, has filed a voluntary petition in bankruptcy in the United States Circuit Court. According to the schedules filed with his petition his liabilities are about \$1,000; among the assets claimed as exempt are merchandise and his homestead.

Mr. Oates began business here about two years ago, and though a practical man of good reputation, industrious and able, he has had little capital. He is a negro and about 32 years old. His liabilities in the trade are not large, and he has practically no creditors in the big centers.

Well Known Swindler Rearrested Immediately After Serving a Three Years' Term in Sing Sing Prison.

ST. LOUIS, Mo., May 9.—Advices have been received here of the arrest while on the way from Sing Sing of Lewis McDowell, alias Albert L. Brown. Immediately before his arrest McDowell had just finished serving a term of three years in the New York State prison for swindling Tiffany & Co., New York, out of a diamond brooch, by passing as J. Pierpont Morgan, Jr., on Nov. 3, 1903.

The charge upon which McDowell is being held now and for which he probably will be extradited from New York, is swindling the Mermod, Jaccard & King Jewelry Co., securing a diamond brooch

LOUIS C. M'DOWELL,
Rearrested on St. Louis charge.

valued at \$1,500 from that firm upon the representation that he was William J. Lemp, Jr., son of a wealthy brewer. The fraud occurred several years ago, McDowell was convicted, but escaped.

McDowell is said to be wanted in a dozen cities for work similar to that above described. He represented himself to be the son of prominent men and, during his career, which, the police say, began in 1896, he practiced many swindles.

McDowell was convicted here and sentenced to three years in prison. While being taken to the penitentiary at Jefferson City, he and another convict to whom he was shackled, jumped from the train at Glencoe, Mo., and both escaped. McDowell is said to be a convincing talker and a fashionable dresser. The brooch which he secured here was never recovered.

The career of Brown or McDowell has been traced at various times in the pages of THE CIRCULAR-WEEKLY. On Oct. 14, 1903, an account was given of his arrest in New York. At that time he was passing in various stores as J. P. Morgan, Jr. He had succeeded in obtaining a diamond pin from Tiffany & Co. and had also swindled other firms. He was sent up on the Tiffany charge.

Charles C. Nowen, Collinwood, O., has been succeeded by G. R. Brainard.

Frank Murdock, Ligonier, Pa., recently moved his stock into larger quarters.

Former Vice-President of Gorham Mfg.
Co. Seeks to Prevent Carrying Out
of Plans Adopted at Annual
Meeting.

PROVIDENCE, R. I., May 12.—A bill of complaint was filed last Friday in the office of the clerk of the United States Circuit Court by George H. Robinson in the suit he is bringing against the following defendants: Edward Holbrook, John S. Holbrook, John F. P. Lawton, Frederick P. Lawton, E. Frank Aldrich, George E. Martin, Henry S. Sprague, Russell Grinnell, Herbert J. Wells and the Gorham Mfg. Co. This action is an outcome of the proceedings taken at a meeting held recently by the stockholders of the Gorham Mfg. Co., at which it was decided to increase the capital stock of the Silversmiths' Co. of New York for the purpose of making certain changes in the system of conducting the several affiliated silverware companies. An account of the action at that meeting was published last week in THE CIRCULAR-WEEKLY. All the stockholders voted in the affirmative, except Mr. Robinson, the vote standing 32,265 shares in the affirmative and 3,251 in the negative. At the time Mr. Robinson intimated that he would appeal to the courts in an effort to prevent the other stockholders from carrying out the plan which they had agreed upon.

In the complaint Mr. Robinson sets forth that the Silversmiths' Co. and the Gorham Mfg. Co. have been under the control of the defendants, and that if they carry through their plan the business of the latter would be diverted to the Silversmiths' Co., involving loss to stockholders in the Gorham Mfg. Co. The plaintiff asked for a preliminary injunction restraining the respondents from carrying out their plans. The hearing on this question was set down for Wednesday of next week at 10 A. M.

To-day the respondents appeared by their counsel, Richard B. Comstock, of Comstock & Canning, and filed a stipulation agreeing to take no action regarding the transfer of stock until the further order of the court. Walter B. Vincent, of Vincent, Boss & Barnfield, representing Mr. Robinson, objected to the stipulation, and asked that a restraining order be issued instead, but Judge Brown held that the stipulation was sufficient until the hearing on the motion for a preliminary injunction.

The respondents in the suit have made no statement as yet as to their position. A gentleman acquainted with the circumstances said: "Mr. Robinson, under the proposed plan, would have the same right as any other stockholders to exchange his stock in the Gorham Mfg. Co. for Silversmiths' stock. If he prefers he may sell his Gorham stock outright, or he may retain it, being treated just the same as all the stockholders. It is absurd to say that anybody desires to divert business from the Gorham Mfg. Co., for every stockholder knows that if the plan is carried through the dividends of the Silversmiths' Co. will depend chiefly on the Gorham Mfg. Co.'s earnings."

E. J. Santhony, formerly at Bedford, O., is now at Carrollton, O.

Death of John J. Cumberson.

LAFAYETTE, Ind., May 10.—John J. Cumberson, a prominent merchant of this town, who for a number of years was connected with the jewelry trade and was head of the old firm of Cumberson & Co., died last night at his home, 245 Wood St., West Lafayette, after a week's illness. The deceased had been in failing health for the past two years, and the immediate cause of his death was cancer of the tongue.

Mr. Cumberson was born in New York, March 30, 1833, and as a young man, in 1851, he came to Lafayette and entered the employ of P. P. Emerson, then a well known local jeweler. With Mr. Emerson he mastered the details of the jewelry business and remained until 1874, when the latter retired and Mr. Cumberson bought out the business. The deceased associated himself with Del K. Rising and Leo Kachlein, forming the firm of Cumberson & Co., which continued business under that style. Mr. Kachlein withdrew in a few years and Mr. Cumberson withdrew in 1891, finally selling out his entire interests to Mr. Rising. He later went into the grocery business, but retired entirely about 1898.

Mr. Cumberson was a quiet and unassuming man, with affable and courteous ways, which made him popular with all who knew him. Careful as a merchant, public spirited as a citizen, he was well thought of in the business community and prominent in all affairs which affected Lafayette. He was a lover of nature and outside of business spent much of his time fishing and on the water.

The deceased was twice married, but survived both wives. He leaves four daughters, Misses Carrie and Lottie Cumberson, Mrs. Bonnell and Mrs. Richard E. Crane, and a son, Perry A. Cumberson.

E. D. Trebilcock, Detroit, Mich., Recovers Stolen Jewelry—Several Arrests Made.

DETROIT, Mich., May 12.—Four colored men and four colored women were taken into custody, Friday night, on suspicion of being implicated in the robbery of E. D. Trebilcock's jewelry store, 324 Woodward Ave., on the night of April 19, when about \$2,000 worth of goods were taken. A sack containing most of the missing jewelry was found at 92 Clinton St., where a number of the suspects were arrested. Mr. Trebilcock identified most of the plunder as stock taken from his store.

The prisoners are not positively known to have had previous police records, except Harry Williams, alias Charles Walker, who, the authorities believe, was the leader. William Kindell left a ring at a jewelry store to be repaired, which was recognized. Walker had a number of diamonds when arrested. Not all of the plunder belonged to Jeweler Trebilcock, and the police believe the loot is part of the proceeds of another robbery.

J. C. Wakefield is a new jeweler in Healdsburg, Cal., where he has succeeded E. L. & L. W. Cheney.

J. W. Taylor, Gadsden, Ala., recently presented to the West Gadsden fire company a handsome stop watch with which the firemen can accurately time their practice races.

National Monthly Import and Export Statistics.

WASHINGTON, D. C., May 8.—The records of the Treasury Department contain the following comparative statistics of interest to the jewelry trade for March, 1905 and 1906, and for the nine months ended February, 1906:

Jewelers Cautioned to be Wary of Masonic Railroad Engineer With Suave Manners.

LAFAYETTE, Ind., May 9.—The trade is warned to be careful in dealing with a man who says he is a railroad engineer and passes as a 32d degree Mason, as he recently obtained a quantity of merchandise and money from merchants of this town. According to C. H. Ankeny & Co., the man obtained the goods on various plausible pretexts and then disappeared. He was last heard of in San Bernardino, Cal.

The man who gave the name of Souser while here, is unusually large, being about 6 feet 3 inches high, and weighing about 280 pounds. He is about 35 years old, has a florid complexion and dark hair. He is a good talker, has a suave manner and tells a plausible story.

Piedmont, W. Va., Jeweler and Clerk Assaulted and Tied Up by Thieves Who Steal Cash and Escape.

PIEDMONT, W. Va., May 9.—The police authorities of this section are doing everything in their power to run down two negroes who, last Saturday, assaulted and robbed James Feaster, a local jeweler, and his clerk, Mr. Callihan. Though some clues have been obtained, the men have not yet been located.

Mr. Feaster started to close his store at 11 o'clock Saturday evening, after having locked the jewelry in the safe, when two unknown negroes entered while he was counting his cash, and, after a fight, succeeded in binding and gagging both Mr. Feaster and his clerk. Owing to the fact that the stock was locked up, the thieves were able to get but little, but they managed to secure \$97 in notes and change, Mr. Feaster's diamond ring and Mr. Callihan's gold watch.

Mr. Feaster and the clerk were left helpless in the store by the thieves, but their predicament was discovered by some persons passing by, a short time later, when they were released and immediately gave the alarm, but by that time the negroes had escaped.

The police Monday received word from Cumberland to the effect that a local policeman had been shot in the stomach at Rockwood by one of two negroes, who had been ejected from a Baltimore & Ohio freight train at Hyndman. It is believed that these were the two men that robbed Mr. Feaster.

Among the indictments reported last week at Cincinnati, O., were two against Grace Ethel, alias Mabel Hall, the bogus Salvation Army girl, who made a specialty of robbing jewelers. One indictment charges her with securing \$91 from the Oskamp Jewelry Co. by means of a forged check and the false representation that she was the daughter of F. D. Prentice. The second indictment charges that she secured \$90 in the same manner from the Duhme Jewellery Co.

American Association of Wholesale Opticians Holds Annual Meeting at New York and Elects Officers.

The annual meeting of the American Association of Wholesale Opticians took place Monday in the Astor House, New York. J. T. Brayton, Chicago manager of the Julius King Optical Co., as president of the association, occupied the chair. Edgar Brown, of McIntire, Magee & Brown, Philadelphia, Pa., acted as secretary in the absence of the incumbent of that position, A. Reed McIntire, who is now abroad.

Following is a list of those who were present: Edwin Beckwith, New York; D. V. Brown and Andrew Brown of D. V. Brown, Philadelphia, Pa.; H. E. White, of the Columbus Pharmacal Co., Columbus, O.; S. Galeski, of the S. Galeski Optical Co., Richmond, Va.; J. E. Brown, of the Geneva Optical Co., Geneva, N. Y.; A. G. Barber, of Globe Optical Co., Boston, Mass.; B. H. Blank, of Hammel, Riglander & Co., New York; John H. Hardin, of F. A. Hardy & Co., Chicago; J. T. Brayton, of the Julius King Optical Co., Chicago; Walter G. King and Leo Wormser, of the Julius King Optical Co., New York; Henry Kirstein, E. Kirstein Sons Co., Rochester, N. Y.; B. Maier, Baltimore, Md.; J. M. Webster, Milwaukee Optical Co.; E. A. Brown, of McIntire, Magee & Brown, Philadelphia, Pa.; C. N. Quimby, Boston, Mass.; Chas. Beard, of Sisco & Beard, Inc., St. Paul; J. E. Spencer, of the Spencer Optical Co., New York; S. Schimmel, of Sussfeld, Lorsch & Co., New York; Ed. J. Kornfield, of Toric Optical Co., New York; J. B. White, of White, Haines Optical Co., Columbus, O.; Michael Woolf, New York.

Morning and afternoon sessions were held. Reports of officers were submitted and in the afternoon new officers for the ensuing year were elected as follows: President, Leo Wormser, of the Julius King Optical Co., New York; vice-president, A. Reed McIntire, of McIntire, Magee & Brown, Philadelphia, Pa.; secretary and treasurer, J. B. White, of White, Haines Optical Co., Columbus, O. Directors—J. T. Brayton, of Julius King Optical Co., Chicago; A. V. Brown, of D. V. Brown, Philadelphia, Pa.; H. E. Kirstein, of E. Kirstein Sons Co., Rochester, N. Y.

In the evening a beefsteak dinner was given at Healy's, 66th St. and Columbus Ave., for which covers were laid for 25, and this closed the session in an enjoyable manner.

Mr. Wormser, the new president, has been vice-president in the last year. The new vice-president, has been secretary and treasurer in the last year.

Special Railroad Rates for Those Attending the Iowa Retail Jewelers' Convention in Des Moines, Ia.

DES MOINES, Ia., May 10.—The Iowa Retail Jewelers' Association will hold its annual convention at the Chamberlain Hotel, in this city, June 14 and 15. The association is preparing an elaborate souvenir programme, which will be sent prior to the convention to those who intend to be present.

Secretary-Treasurer J. H. Lepper, Mason City, Ia., reports that he is of the opinion that the attendance will be exceptionally

large, as correspondence which he has received recently from jewelers throughout the State indicates. In a circular letter which he is sending out, Mr. Lepper requests those who wish to attend to secure a receipt for the amount paid for railroad tickets when purchasing them. This receipt is to be handed to Mr. Lepper at the hotel here, either on June 13 or 14, when the passenger association agent will be present to stamp the tickets so as to entitle the purchaser to return home any time within three days after the convention at one-third fare.

The officers of the association are: President, F. W. Jameson, Ashton, Ia.; vice-president, J. M. Nabstedt, Davenport, Ia.; secretary-treasurer, J. H. Lepper. The Executive Committee includes: Mr. Lepper, F. W. Jameson, J. M. Nabstedt, E. J. Price and M. Hurlbut.

The Iowa State Association of Opticians will hold their annual convention at the same hotel during the two days previous to the jewelers' convention.

Police Say Young Jewelry Clerk Confessed That He Robbed Employers and Stabbed Young Girl Employee and Himself.

Developments in the last week have indicated that Jacob Meyrowitz, the 16-year-old office boy, who was arrested in April on the charge of stabbing Bella Hecht, the stenographer in the office of Meyrowitz Bros., 57 Maiden Lane, New York, had been pilfering from the firm. It is now charged that he took money from letters, and also stole a quantity of reconstructed rubies and perhaps other jewelry. He is said to have destroyed a number of notes or checks, fearing that they might lead to the detection of his thefts. The members of the firm say that the total loss, they are positive, will not exceed \$500. The destruction of the checks and notes puts them to considerable inconvenience, but does not involve any real loss.

The police gave out, Monday, a statement that Meyrowitz had made a confession saying that he had stabbed the girl, who was one year his senior, because he suspected that she had learned of some of his thefts and was about to expose him. The day before the stabbing he had been accused by Miss Rose Meyrowitz, who had been left in charge of the office during the absence of the members of the firm, of taking \$5 from a letter. He denied that he had done so, and concluded that the stenographer had given the information, which led to his being accused. In his confession he said that he approached Miss Hecht from behind, as she was leaving the telephone booth, and this accounts for the fact that she was not entirely certain as to who had done the stabbing. Afterward he inflicted several slight wounds on his arms and legs in order to divert suspicion.

Since the stabbing the boy has been confined to Bellevue Hospital by the direction of the police. Miss Hecht, whose wounds were serious, is recovering.

The reports in the daily papers, as to the amount of the office boy's thefts, are declared by the members of the firm to be greatly exaggerated. Young Meyrowitz, who is a distant relative of the members of the firm, may be sent back to Riga, as there is a disposition not to prosecute him.

Virginia Jewelers Fighting Commission's Award of Contract to Supply Silver Service for Battleship "Virginia."

NORFOLK, Va., May 11.—Few actions have ever incensed the jewelry trade of the entire State as has the decision of the commission created by the Legislature to select and have made a silver service for the U. S. battleship *Virginia*. Although a large number of Virginia jewelers bid for the contract and submitted plans the contract was awarded by the commission to the Bailey, Banks & Biddle Co., Philadelphia, which company had previously made some pieces of silver to be given by the Colonial Dames of this State to the boat. The Philadelphia firm's successful design was in harmony with these pieces.

The jewelers of this State are angry because they understood the service was to be designed by a Virginia artist and supplied by a Virginia firm, and claim they knew nothing about the Colonial Dames' gift, and if the commission wished a silver service of that kind they should have made it known when the bids were solicited.

The agitation which has been going on in the newspapers for some time has resulted in a formal action being taken by the Retail Merchants' Association, of this city, whose Board of Directors met in special session last night and adopted the following resolutions:

Whereas, The Legislature of Virginia passed an act creating a commission to have designed and made a silver service for the United States battleship *Virginia*; and,

Whereas, It appears, from articles in the newspapers, that the contract has been awarded to a firm of non-resident dealers from sketches of some unknown artisan, instead of being designed by a Virginia artist, of whom the State has several of world-wide reputation, and the purchase made through a foreign house, instead of some firm of silversmiths doing business and paying taxes in this State; and,

Whereas, It appears that the Governor of the State and the Speaker of the House of Delegates favored the placing of the order with some Virginia firm of silversmiths, which view was successfully opposed by the three other members of the commission, entertaining sentiments to the contrary; therefore, be it

Resolved, By the board of directors of the Retail Merchants' Association of Norfolk, Va., that it is the sentiment of this association that for a silver service ordered by the State of Virginia, to be used on a United States battleship, built in this State, and named after it, in honor of it, paid out of the funds of this State, with the money of the taxpayers thereof, the design should have been the work of a Virginia artist, and the order placed with a Virginia firm, dealing in this specific line.

Resolved, That the secretary of this association be instructed to ascertain the facts and how the vote stood both by name and office in the commission, in order that due credit may be given to those who favor the Virginia merchants and native talent, and that the said facts and a copy of these resolutions be sent to each of the other retail merchants' associations of this State and the members of the said commission.

Resolved, That if the said service and merchandise has not been definitely contracted for that the merchants of this State be given an opportunity to submit a design, worthy of the purpose for which the contribution was made by the State Legislature, and that the said design be submitted to Virginia merchants, regular dealers in silverware, for competition as to prices.

The secretary of the organization was also requested to communicate with similar organizations in the State as well as the State Retail Merchants' Association to urge them to protest against the act of the commission.

THE DEMAND FOR PEARLS IS ENORMOUS

TAVANNES WATCH CO.,

2 & 4 Maiden Lane, New York.

America's Recognized Leading Jewelry Auctioneer

Established 1885.

At present conducting a sale of the stock of the late firm of Messrs. Edelhoff Bros. & Co., 574 Fifth Ave., New York City. This is one of the highest grade jewelry stocks ever offered at auction in America. Write me for confidential results of this sale or call and hear me sell. Sales daily, 12 noon to 5:30 P. M. I personally conduct all large sales. Write me for advice, terms, etc.; it costs you nothing.

DAN I. MURRAY, No. 3 Maiden Lane, New York.

Established 1885.

In Annual Convention.

Sixth Annual Joint Meeting of Missouri and Kansas Opticians.

KANSAS CITY, Mo., May 11.—The sixth annual joint convention of the Missouri and Kansas associations of opticians was held here May 8 and 9, and it was by far the best meeting ever held in this city in point of attendance and otherwise. It was a convention of workers, as the hall was filled all the time during the reading of the papers and speechmaking, showing that those present were looking for information rather than a good time.

The forenoon of Tuesday was taken up with the preliminary work, the address of welcome by the Mayor and the responses from the two associations, by Claude M. Wheeler for Missouri and F. W. Hunt for Kansas.

The afternoon session followed the programme which had been arranged to the point where gold medals were to be awarded for the best papers on certain subjects, one for each State, and this part of the programme was carried over until Wednesday morning. When the papers were called for there had been none submitted by either State, and as the Meyer Jewelry Co. had the medals there ready for the awarding it was voted that they be given to the presidents of each State organization.

The interesting lectures and papers included: "The Optician As An Advertiser," C. A. Range, Trenton, Mo.; "Light, Health and Lenses," Dr. Arthur F. Campbell, Topeka, Kans.; a "Chalk Talk," Dr. S. W. Lane, and "Suggestion in the Practice of Optometry," Dr. Leo G. Hafner, De Soto, Mo. The latter paper was especially interesting, dealing with incidents to illustrate the idea of the author, which was to show the optician that by mind concentration, if studied and perfected in the right manner, he could so influence the mind of customers as to improve their eyes very materially by suggestion.

An official photograph was taken just before dinner, and after the close of the business session in the afternoon there was a banquet given the visitors at the Midland Hotel, in the evening, by the Kansas City wholesale and manufacturing jewelers.

Optical legislation was the subject of the talk of C. W. Brown, M.D., of Brunswick, Mo., who brought out considerable discussion. It was the opinion expressed by the meeting that optical legislation was needed, not only by the optician, but by the public, as it would place the profession on a higher basis by compelling practitioners to pass an examination before a State examining board.

In speaking of this movement, Dr. A. H. Hatch, Jefferson City, Mo., said: "The prime purpose of this movement is to elevate the profession to the status to which it belongs, with the practitioner of medicine and surgery. The fact is that any one who knows the least bit about the fitting of glasses to the eyes and can tell to a limited degree when a pair of eyes are defective may put out his sign as an optician. This is an injustice to the profession itself, and, needless to say, it is an injustice to the public generally. Why, in this State even a barber must stand an examination as to his competency before he is allowed to follow

his trade, and I don't see why an optician should not be compelled to do the same."

The session was closed by the election of officers by each of the organizations. For the Missouri association the following officers were chosen: President, M. E. Smith, Boonville; first vice-president, C. E. Range, Trenton; second vice-president, F. Hafner, De Soto, Mo.; secretary and treasurer, Elmer Schmidt, Washington, Mo.; Robert D. Worrell, Mexico; Louis Megede, Richmond; Dr. A. H. Hatch, Jefferson City, and J. W. Talbot, Nevada, were elected members of the Executive Board.

The officers elected for the Kansas association were: President, F. W. Hunt, Topeka; first vice-president, J. Q. A. Sheldon, Manhattan; second vice-president, A. A. Marion, Blue Rapids; secretary and treasurer, Walter Starcke, Junction City; Walter Sperling, Seneca; W. J. Lewis, Topeka, and Otto Burklund, Osawatomie were elected members of the Executive Board.

On Thursday morning, following the close of the optical convention, the jewelers present were called together for the purpose of organizing separate associations. This was accomplished in the forenoon without much delay, as those who stayed over for this meeting were almost of a single mind regarding the needs of such an organization and the possibility of united action remedying many of the evils that they now have to contend with. The idea of this meeting was merely to get together and form a working organization, such as was done six years ago by the opticians, and from that nucleus to spread out and cover the entire trade of the State.

The Missouri jewelers organized by electing the following officers: President, R. D. Worrell, Mexico; first vice-president, Claude Wheeler, Columbia; second vice-president, S. J. Huey, Excelsior Springs; secretary and treasurer, C. E. Range, Trenton, and G. W. Kern, Kansas City; G. E. Reed, Lebanon, and F. W. Pilcher, Mexico, were elected as an Executive Committee.

The Kansas jewelers elected the following officers: President, Walter Sperling, Seneca; first vice-president, C. C. Stevenson, Pittsburg; second vice-president, Tom M. Hutto, Kingman; secretary and treasurer, Frank E. Pirtle, Council Grove, and J. W. Phillips, Chanute; J. C. Haupt, Peabody, and Arthur West, Galena, were elected as an Executive Committee.

The following opticians and jewelers were among those in attendance at the joint convention:

Dr. A. H. Hatch, Jefferson City, Mo.; J. W. Talbot, Nevada, Mo.; J. M. Barnes, Sarcocoe, Mo.; G. E. Read, Lebanon, Mo.; W. A. Vawter, Marshall, Mo.; Geo. H. Schriener, Lebanon, Mo.; L. G. Hafner, De Soto, Mo.; Chas. Weber, Lexington, Mo.; C. J. Miller, California, Mo.; C. F. Bass, Louisiana, Mo.; F. W. Pilcher, Mexico, Mo.; W. H. Mayer, Lawson, Mo.; R. F. Mann, Salina, Kans.; Mrs. R. F. Jones, Red Cloud, Nebr.; T. A. Jones, Red Cloud, Nebr.; W. T. Nevitt, Archic, Mo.; Claud Wheeler, Columbia, Mo.; S. J. Huey, Excelsior Springs, Mo.; R. Worrell, Mexico, Mo.; Thos. A. Craig, Mason, Mo.; C. E. Range, Trenton, Mo.; E. L. Thurber, Warrensburg, Mo.; S. M. Bennett, Warsaw, Mo.; Elmer Schmidt, Washington, Mo.; Louis Megede, Richmond, Mo.; A. A. Thacker, Madison, Mo.; J. Kechnel, Hale, Mo.; D. F. Carpenter, Moberly, Mo.; M. B. Gordon, Braymer, Mo.; W. W. Whiteside, Liberty, Mo.; L. O. McKee, Norborne, Mo.; C. C. MeLeese, Davenport, Nebr.; M. E. Schmidt, Boonville, Mo.; W. C. Lambert, St. Louis, Mo.; J. H. Herkill, Lincoln, Nebr.; Geo. L. Evington, Lebanon, Nebr.; C. E. Tieman, California, Mo.; W.

Z. Allen, Stanberry, Mo.; Harry Sturges, Independence, Mo.; S. M. Coffman, Braymer, Mo.; C. A. Clement, Springfield, Mo.; H. T. Carson, Kansas City, Kan.; L. E. Armel, Holton, Kans.; F. W. Hunt, Burlingame, Kans.; F. H. Gaines, Butler, Mo.; C. W. Struby, Green City, Mo.; P. J. Duke, Marceline, Mo.; W. F. Hammond, Manchester, Kans.; J. C. Haupt, Peabody, Kans.; L. S. McNamar, Highland, Kans.; P. H. Young, Dodge City, Kan.; B. A. Strickler, Salina, Kans.; J. F. Nasep, Alva, Okla.; J. W. Day, Stephenville, Tex.; Geo. M. McEckron, Concordia, Kans.; Ed. Sedgwick, Kansas City, Kans.; I. E. Griffin, Elk City, Kans.; C. C. Stevenson, Pittsburg, Kans.; Alfred M. Ward, Abilene, Kans.; H. F. Baier, Salina, Kans.; Willard B. Hale, Weatherford, Okla.; Mrs. W. B. Hale, Weatherford, Okla.; Francis W. Norvell, Stuttgart, Ark.; Frank L. Reid, Grenola, Kans.; Thomas M. Hutto, Kingman, Kans.; T. S. Mendenhall, Burr Oak, Kans.; W. P. Beal, Hutchinson, Kans.; J. A. Lukens, Bucklin, Kans.; J. Q. A. Sheldon, Manhattan, Kans.; C. H. Paxton, Paola, Kans.; W. I. Smith, Stockton, Kans.; A. A. Marvin, Blue Rapids, Kans.; W. T. Lloyd, Washington, Kans.; F. E. Pirtle, Council Grove, Kans.; L. S. Grimm, Jewell, Kans.; J. A. Mosher, Burlington, Kans.; J. M. Ditto, Russell, Kans.; J. W. Phillips, Chanute, Kans.; Violet E. Hunt, Prague, Okla.; Chas. Hoyt, Kansas City, Kans.; J. F. M. Lloyd, Pond Creek, Okla.; H. A. Tibbals, Emporia, Kans.; Mrs. F. W. Hunt, Burlingame, Kans.; T. E. Coffman, Toronto, Kans.; J. O. Van Voorhies, Osawatomie, Kans.; Arthur West, Galena, Kans.; A. G. Madison, Beloit, Kans.; Mrs. P. H. Young, Dodge City, Kans.; Otto Burklund, Osawatomie, Kans.; E. E. Foreman, Greenleaf, Kans.; O. W. C. Smith, Mountain View, Okla.; Walter Fasemeyer, Kansas City, Kans.; Mabelle A. Mears, Denver, Colo.; E. L. Levin, St. Joseph, Mo.; C. D. Ragsdale, Kansas City, Kans.; L. A. Chess, Kansas City, Kans.; Jas. B. Calder, Junction City, Kans.; Harry Z. Paulsen, Albuquerque, N. M.; D. D. Williams, Emporia, Kans.

The visiting ladies attending the optical convention were entertained the evening of May 9 with a banquet of their own at the Midland Hotel, and that was followed by a theater party at the Grand Opera House. The occasion was a very enjoyable one, and was taken part in by the following ladies:

Mrs. Emma Bockris, Atchison, Kans.; Mrs. P. H. Young, Dodge City, Kans.; Mrs. W. B. Hale, Weatherford, Okla.; Mrs. R. F. Jones, Red Cloud, Nebr.; Mrs. Frank E. Pirtle, Council Grove, Kans.; Miss Beatrice Lynch, Ft. Wayne, Ind.; Mrs. H. T. Tibbs, Kansas City, Kan.; Mrs. F. W. Hunt, Burlingame, Kans.; Dr. Violet E. Hunt, Prague, Okla.; Dr. F. W. Norvell, Stuttgart, Ark.; Miss Mabelle A. Mears, Denver, Colo.; Mrs. S. J. Huey, Excelsior Springs, Mo.; and the following from Kansas City, Mo.: Mesdames S. E. Woodstock, Louis Meyer, C. B. Norton, C. A. Kiger, C. L. Merry, Geo. H. Edwards, C. C. Hofer, L. H. Ludwig, Fred Merry, Chas. Sheldon, Harry L. Goodwin, E. L. Chamberlain, Win. E. Huston, A. E. Pittenger, N. J. Williams, and Mrs. C. A. Daly, Helen L. Kestler and E. A. Lane.

Death of C. L. Childers.

ABBEVILLE, Ga., May 9.—C. L. Childers, who has been in business here upward of a year, was found dead last Sunday in his bed. His wife says he retired at 10 o'clock, as usual, and in about one hour's time he waked her with groanings and died shortly afterward. It is presumed that he died from morphine.

Several letters were found in the room addressed to his wife, saying that he soon hoped to be in another world. He leaves a widow and two children.

Mr. Childers came here from Mansfield, Ga., and was highly regarded in this community.

During the fire which broke out at 5 S. Main St., Wilkes-Barre, Pa., a short time ago, the stock of Clark & Engle, retail jewelers, who occupied the ground floor of the building, was damaged by water to the extent of \$450.

AN AUTOMOBILE FREE

Old Reliable W. & S. B. ★

1866 — 1906

Forty years ago W. & S. Blackinton made the first gold filled, hard soldered, fancy link vest chains. By way of celebrating our

FORTIETH BIRTHDAY

we beg to announce a plan of direct interest to the entire jewelry trade.

In January, 1907, we will give to the retail jeweler who uses the greatest number of Blackinton chains between May 1, 1906, and January 1, 1907, an Automobile Touring Car of standard grade and 1907 model.

To the retail jeweler who uses the second greatest number we will give an Automobile Runabout of standard grade and 1907 model.

To the retail jeweler who ranks third in this contest we will give a Motorcycle of standard grade and 1907 model.

The Retail jeweler who ranks fourth in this competition will receive an American Watch Lathe of latest design.

All other retail jewelers who use Blackinton chains will share in the following provisions:

Between May 1, 1906 and January 1, 1907, every Blackinton Old Reliable W. & S. B. ★ 1-10 or Globe Filled $\frac{1}{8}$ vest or Dickens chain will bear an aluminum tag, illustrated herewith. These tags have a definite value and should be preserved.

The sales of Old Reliable W. & S. B. ★ 1-10 chains are enormous and we wish to draw particular attention to our Globe Filled $\frac{1}{8}$ chains, in view of the constantly increasing demand for the highest grades of gold filled chains.

Upon receipt of forty tags from any retail jeweler, we will send free of charge one of our Globe one-eighth gold filled vest chains. For seventy-five tags we will send two Globe chains and for one hundred tags we will give three Globe chains. Retailers should preserve the tags as fast as goods are placed in stock and should decline to receive from jobbers chains that do not bear the coupon tag.

We offer a choice of twelve patterns of Globe one-eighth gold filled chains in selecting premiums, and illustrations will be mailed free on request. Globe one-eighth gold filled chains are guaranteed to assay one-eighth, are gold soldered and are warranted to give satisfaction for twenty years. Old Reliable W. & S. B. ★ 1-10 chains are gold soldered; and are the perfection of design, finish and durability. All Blackinton chains are made by the Wearbest process which hardens the gold and greatly increases the wearing qualities. This process is owned by us and no other chains are made in this manner.

Retailers who find difficulty in obtaining Blackinton chains may, upon written request, receive a list of jobbers handling the goods in their territory, or a selection package will be sent through any jobber whom the retailer may designate. For further particulars, address the manufacturers and watch this space.

W. & S. BLACKINTON CO., North Attleboro, Mass.

Our Traveling Representatives

Benj. Westervelt, of the New England Watch Co., is now making his Spring tour through New York State.

Edgar Kahn, of D. Jacobs & Co., Cincinnati, O., has recovered from his illness and will be on the road again about July 1.

C. B. Goldsmith, with Lindenberg & Fox, Cincinnati, O., is now on his last western trip for the season. Lee Kahn, of this house, is making his last trip of this season in the south.

J. H. Spiro, who represents a number of eastern houses on the Pacific coast, and who formerly had headquarters in San Francisco, is now located at 968 Madison St., Oakland, Cal.

Arthur H. Buck, representing Abel Bros. & Co., was in Oakland, Cal., last week, on a trip along the Pacific coast. He came down from Seattle and Portland and will return east by way of Los Angeles.

Among the traveling representatives who, recently visited in Detroit, Mich., were: J. M. Marrow, American Watch Case Co.; Albert Ginzberg, Eliassof Bros. & Co.; J. C. Bigalke, Bigalke & Eckert Co.

The traveling representatives of eastern jewelry houses have, with one or two exceptions, avoided San Francisco since the big fire. Several who reached Los Angeles, last week, have returned east without going north.

Lancaster, Pa., was visited, last week, by the following travelers: A. E. J. Winter, Alvin Mfg. Co.; H. O. Theohald, J. Hoare & Co.; W. S. Gardner, Bassett Jewelry Co.; Jacob C. Lenden, Jacob H. Keller & Co.; D. Newhoff, Wm. Lehman & Co.

The following traveling representatives were looking for orders in Toronto, Ont., last week: George Smith, Theodore W. Foster & Bro. Co.; Frank Glaenger, Glaenger & Co.; E. F. Kirken-daugh, Oneida Community, Ltd.; H. S. Spang, E. Ingraham Co.; L. W. Arnold, Western Clock Mfg. Co.; M. Liebenstein, Wagner & Gerstley.

The following salesmen were in Boston, Mass., during the week: Samuel L. Howland, Joseph Frankel's Sons; E. M. Knapp, J. A. & S. W. Granbery; Alexander W. Rothschild, Rothschild Bros. & Co.; C. A. Gallagher, Sinnock & Sherrill; George C. Ferris, R. Blackinton & Co.; Charles Theurer, Crane & Theurer; Edward A. Sweet, Sussfeld, Lorsch & Co.

Among the traveling representatives recently in Savannah, Ga., were: V. A. Picard, Pryor Novelty Co.; I. Speyer, Goldsmith Bros.; F. H. Dana, Bip-part, Griscom & Osborn; Arthur Totten, J. B. Bowden & Co.; Geo. H. Wright, Unger Bros.; Jerome M. Lissauer, R. L. & M. Friedlander; Morris Lissauer, Zach. A. Oppenheimer; A. M. Stevens, Enos Richardson & Co.

Among the traveling representatives who visited Buffalo, N. Y., last week, were: Charles Perret, Jules Racine & Co.; E. Horton, Mandeville, Carrow & Crane; Percy D. Lucas, Frank W. Smith Co.; Benjamin Schloss, A. Wallach & Co.; J. C. Corbin, Waterbury Clock Co.; Stephen O. Howard, Wilcox & Wagoner Co.; C. P. Young, White-side & Blank; Mr. Sylvia, Pairpoint Corporation; J. E. Worthington, Worthington & Raymond.

Traveling representatives in Omaha, Nebr., during the past week, included: L. R. Cram, H. F. Hahn & Co.; B. J. Hirschorn, Hodenpyl & Walker; G. D. Lawrence, Reed & Barton; John A. Lassau, Martin, Copeland & Co.; Philip Noel, Rudolph Noel & Co.; S. W. Abbey, E. Ira Richards & Co.; Mr. Buehl, A. L. Blackmer Co.; W. T. Good-fellow, King & Eisele; G. W. Finckenaue, Alvin Mfg. Co.; J. L. Adler, E. M. Weinberg & Co.; John O. Slemmons, J. B. Bowden & Co.; W. F. Adams, Simpson, Hall, Miller & Co.; William Strauss, Louis Kaufman & Co.; Ralph Siegrist, Albert L. Haman; Arthur H. Schmitt, Luthy & Hine; W. S. Adams, P. W. Lambert & Co.; George F. Heidet, C. F. Rumpp & Sons; R. E. Williams, St. Louis Silver Plate Co.; Charles Boss, American Cuckoo Clock Co.; H. E. Hastings, H.

Hohenstein Co.; Fred H. Felger, F. & F. Felger; Mr. Edward, Whiting Mfg. Co.

Among the traveling representatives who called on the trade in St. Louis, Mo., last week, were the following: Charles E. Lochner, Haynes Bros. Co.; Julius S. Mayer, Mauser Mfg. Co.; Arthur H. Schmitt, Luthy & Hine; C. L. Krugler, Mandeville, Carrow & Crane; J. M. Curtis, Meriden Silver Plate Co.; C. L. Harshorn, Krenmentz & Co.; Harry S. Aicher, Alvin Mfg. Co.; F. R. Krugler, Henry A. Kirby Co.; Wallace E. Welch, Hoyt, Obrig & Geiger Co.; J. E. Simonson, Ludwig Nissen & Co.; M. Hulstrom, International Silver Co., successors to Meriden Britannia Co.; W. S. Sharkey, Ziruth-Kaiser Co.; Mortimer C. Adler, Charles Adler's Sons; F. A. Chace, Jr., Charles M. Robbins Co.; W. H. Osborne, R. Wallace & Sons Mfg. Co.; James Nakaf, Whiting Mfg. Co.; Mark Franklin, Bradley King Co.; Mr. Sideman, Redlich & Co.

Among the traveling representatives who visited the trade in Pittsburg, Pa., last week, were the following: Charles B. Burgess, Frank M. Whiting & Co.; Fred H. England, Frolichstein, England & Klein; Mr. Strandberg, Sykes & Strandberg; A. J. Sherrard, Enos Richardson & Co.; Harry E. Berkman, Jones & Woodland Co.; Mr. Stanley, estate of O. M. Draper; John A. Keane, Ostby & Barton Co.; Chas. H. Clark, W. G. Clark & Co.; DeForest Ely, Harbour Silver Co.; Alberto Schweizer, Ansonia Clock Co.; H. J. Hildebrand, H. C. Lindol & Co.; Mr. Ford, Ford & Carpenter; E. M. Bliss, Bliss Bros. & Co.; Mr. Day, Day, Clark & Co.; R. H. Selley, Sloan & Co.; W. H. Race, Meriden Silver Plate Co.; Wm. W. Middlebrook, B. A. Ballou & Co.; Edwin F. Skinner, Roy Watch Case Co.; Mr. Fisher, Furbish, Swift & Fisher; Mr. Franklin, Jules Franklin; Wm. Matschke, A. Joralemon & Son; F. E. Good, Philadelphia Watch Case Co.; H. N. VanBergen, Snow & Westcott; J. E. Simonson, Ludwig Nissen & Co.; H. F. Tourtellot, Waite, Thresher Co.; G. L. Sweet, R. E. Simmons Co.; Charles Perret, Jules Racine & Co.; W. J. Parker, Osmun-Parker Mfg. Co.; E. J. Walther, D. F. Briggs Co.

The following traveling representatives called on the trade in Kansas City, Mo., during the past week: Mr. Rogers, C. H. Cooke Co.; George Southwick, Payton & Kelley Co.; George E. White, White & Rounselle; W. S. Dudley, Rogers, Smith & Co.; R. C. Read, H. F. Barlow Co.; Mr. Williams, Warren & Williams; J. W. Stoneburner, Capron Co.; Fred H. Felger, F. & F. Felger; W. Sharkey, Ziruth-Kaiser Co.; G. Fred Perry, F. H. Sadler Co.; Max L. Jacoby, Manchester Mfg. Co.; Fred H. Carpenter, W. & S. Blackinton Co.; J. E. Simonson, Ludwig Nissen & Co.; B. J. Hirschorn, Hodenpyl & Walker; Chas. E. Lochner, Wm. S. Pitcairn; S. W. Abbey, E. Ira Richards & Co.; C. H. Davison, Coddling & Heilborn Co.; Wm. T. Smith, International Silver Co.; R. B. Carr, Link & Angell; James Baker, Frank M. Whiting & Co.; W. F. Adams, International Silver Co.; Richard Robinson, Bugbee & Niles Co.; F. E. Hyatt, Philadelphia Watch Case Co.; B. A. Noble, Sturtevant, Whiting & Bigelow; H. G. Pfardresher, Geo. L. Brown & Co.; Mr. Moore, F. W. Gesswein Co.; P. A. Wilkinson, J. J. Sommer & Co.; Walter Marble, Marble, Forester & Co.; A. R. Dorchester, W. E. Richards & Co.

Among the traveling representatives who called on the Cincinnati, O., trade, the past week, were: Mr. Goldberg, Untermeyer-Robbins Co.; Helmer Thompson, F. H. Noble & Co.; Irving J. Swartz, L. Barnett & Co.; Mr. Finberg, Finberg Mfg. Co.; Mr. Briggs, D. F. Briggs Co.; M. Donlin, McGraw, Donlin & Co.; A. Sussfeld, Kautzmann & Sussfeld; J. Frank Coupe, D. A. White Co.; Fred England, Frolichstein, England & Klein; Larney Edwards, C. E. Hancock Co.; F. A. Sisson, E. A. Bennett & Co.; I. Foster, Milton L. Ernst; Mr. Joseph, Wildpret & Saacke; W. A. Lamb, Geo. H. Fuller & Son Co.; Stephen C. Howard, Wilcox & Wagoner Co.; Mr. Delano, Day, Clark & Co.; H. E. Vincent, Simpson, Hall, Miller & Co.; William H. Middlebrook, B. A. Ballou & Co.; Lewis L. Squire, F. H. Cutler & Co.; G. C. Bennett, Waite, Mathewson & Co.; Wade W. Williams, Warren & Williams; J. Jacoby, Providence Stock Co.; L. Jones and J. Marsh, C. A. Marsh & Co.; H. R. Sweet, R. F. Simmons Co.; Charles C. Offerman, William Smith & Co.; E. J. Walther, D. F. Briggs Co.; Maurice Kohn, Silberman, Kohn & Wallenstein; C. A. Whiting, Whiting & Davis; William W. Middlebrook, B. A. Ballou & Co.; Charles S. Peckham, J. H. Peckham & Co.; W. D. Sinnock, Ehrlich & Sinnock; Mr. Stanley, estate of O. M. Draper; Charles Clark, W. G. Clark & Co.; Mr. Metcalf, Plainville Stock Co.; A. A. Greene, A. A. Greene Co.; Louis Goldberg, J. Solinger & Co.; Mr. Remington, Carter, Qvarnstrom

& Co.; Arthur Dolan, Moore Mfg. Co.; Mr. White, Geo. L. Vose Co.; Gus Stranberg, Sykes & Stranberg; Mr. Carpenter, Horton, Angell Co.; Mr. Cobb, Daggett & Clap Co.; Ernest Block, Louis Stern; Burt Noble, Sturtevant & Whiting & Bigelow; Harry Scofield, Scofield, Melcher & Scofield; Fred Brigham, Cheever, Tweedy & Co.; Clarence Settle, Manchester Mfg. Co.; Harry Farquaharson, E. D. Gilmore & Co.; W. Sumner Blackinton, S. O. Bigney & Co.; W. R. Shute, Kohn & Co.

Buffalo, N. Y.

T. C. Tanke, Main and Eagle Sts., is soon to increase his shop and salesroom force, in addition to making many needed improvements to his store room.

Peter Fullwood, Wellsboro, Pa., has accepted employment with Mr. Ullenbruch, 519 Main St., as head watchmaker, succeeding Julius Machan, resigned.

Samuel Freed has taken charge of Jireh Kinney's watchmaking department, succeeding the late Wm. T. Lampmann, who died in Thorold, Ont., a few weeks ago.

The Freeman Jewelry Co., 84 Seneca St., recently put three traveling representatives on the road. The company has increased its capital stock and made extensive alterations in the store.

C. F. Chouffet, 379 Main St., has let the contract for the construction in the rear of his store of an extension, in which he will have an elevated private office, which will overlook his main salesroom.

E. A. Eisele, of the wholesale house of King & Eisele, with his wife and daughter, returned on Tuesday of last week from a trip to Europe. Mr. Eisele says he was much benefited in health by the journey.

Paul Foerster, 134 Seneca St., whose store was robbed of a tray of diamonds, a number of weeks ago, has abandoned hope of recovering the bulk of his stolen jewels. Though \$3,000 worth of diamonds were taken, but about \$700 worth were returned to the New Orleans police after the arrest of William Harrington in that city. Harrington is now awaiting trial here on a charge of grand larceny, first degree. William Lobee, arrested in connection with the Foerster robbery in Memphis, Tenn., last week, was released on habeas corpus proceedings, and will probably never be brought to trial here for the alleged crime, as the case against him is regarded by the Buffalo police as a very weak one.

On Tuesday of last week an unusual incident made pedestrians in lower Main St. laugh heartily. Patrolman Casey was passing the pawnshop and jewelry store of Moses Cohen, 201 Main St., and was directly under Mr. Cohen's "three-ball" sign, when it dropped, one ball at a time. The first ball hit the policeman on top of the head, bounced upward, finally striking the sidewalk and rolling into the gutter. Mr. Casey, with angry face, whirled around and looked up just in time to receive, in quick succession, full in the face, the remaining two gilded spheres. Then he ran, for his thoughts were crowded with earthquakes and the like. The shouts and the bystanders' laughter, however, had the effect of checking his flight and restoring his good humor.

J. L. Hastings, Mohawk, N. Y., has sold out to Oscar Day, and will move to Meridian, Ind., where he will open a larger store.

GORHAM SILVER POLISH

THE SAFEST AND THE BEST

¶ Every Jeweler finds himself constantly appealed to by his customers for advice as to the best manner in which they may keep their household silver-ware in good order.

¶ The well-informed Jeweler has but one recommendation to make—the use, namely, of Gorham Silver Polish, which many years of sedulous experiment have succeeded in making the best and safest preparation in the world for the purpose indicated.

¶ The Gorham Mfg. Co., therefore, take the opportunity of reminding the trade in general that Gorham Silver Polish is supplied by them in the form of convenient cakes only.

¶ At the same time for those who desire it, the familiar Gorham Silver Powder is still supplied.

¶ The use of either of these preparations cannot be too highly recommended.

Further Progress of the National Stamping Law.

THAT the merits of the Jewelry Trade's Gold and Silver Stamping Law, introduced by Congressman Vreeland, are appreciated by our Representatives and Senators is evident from the great success the measure has met with so far at the hands of Congress. As already reported in detail, this bill obtained unusual consideration from the members of the Interstate Commerce Committee of the House of Representatives, which committee unanimously reported it favorably; the House taking it up under a suspension of rules it was passed April 16 by an unusually large majority. The bill then went to the Senate, where it was referred to the Interstate Committee, and though practically in the hands of that committee but a few days, has already been acted upon and reported favorably to the Senate, as told in another column of this issue. It is now in the Senate calendar and stands an excellent chance of being passed at this session.

We again call the attention of the members of the trade in all sections of the country to the importance of letting their Senators hear from them in regard to this measure in order that all the members of that body may appreciate how great is the desire on the part of the jewelry trade, retail and wholesale, to have this law enacted, and also how important and necessary such a measure is for the protection of the public as well as the trade in every section of the country. That unanimous approval which has been given to this measure by the manufacturing wholesale and retail trade, and that work has been done in its behalf by jewelers in all sections of the country speaks well for the standard of business morality of the industry as a whole, and no doubt has had much weight with the Members of Congress in the way of proving that the measure is one drawn for the general welfare of all and not in the interest of any particular branch or section of the trade.

This interest in the measure as well as the co-operation of all jewelers should be made manifest now to the greatest extent possible in order to insure a speedy enactment of the law, and there is no better way of showing this than by jewelers writing personal letters or telegraphing to the Senators from their States, calling attention to the merits of the bill and the benefits accruing to the trade and public. The act may come up for consideration at any time now, and the sooner that Senators hear from their constituents the better the chances of the bill.

Cuban Law and American Trade-Marks.

CUBAN trade-marks are just now receiving the attention of the Merchants' Association of New York, which has sent out a circular letter on the subject to business men in various lines, including jewelry. The association is endeavoring to obtain action by the Government which may induce the Cuban Republic to furnish the same degree of protection to American trade-marks that is now given in this country to Cuban trade-marks.

The cause of complaint is found in the Cuban law, which gives to the registrant of

a trade-mark the absolute and exclusive right to the use of that mark. As a result, a citizen of Cuba may register any well-established and valuable trade-mark not already registered in the island and thus become the sole and exclusive owner of that mark in the domains of the Cuban Republic. As pointed out by the association, this may be done without the knowledge of the original American owner, and further, when the American, either directly, or through distributors, tries to place in the island merchandise bearing his original trade-mark, such goods are immediately subject to confiscation. The Cuban who registered the trade-mark has then both a criminal and a civil action against the American owner for infringement.

It is said that a number of American manufacturers have already been subjected to blackmail by irresponsible Cubans, who make a practice of stealing and registering valuable American trade-marks for the sole purpose of demanding tribute of the American owners. In the United States, as is well known, the priority in use of a trade-mark, when established, is conclusive as to the right of ownership, even against registration. Cubans as well as all other people may enforce such rights in the courts of this country, and it is but just and fair that the American should have an equal right to protect his trade-mark and names under the Cuban law.

It is time that Congress or the Administration gave some attention to this important question and obtained from Cuba, by treaty or otherwise, some measure to protect our manufacturers who sell to this island from infringement of rights and blackmail of this character.

Death of James C. Donnell.

BOSTON, Mass., May 15.—James C. Donnell, president of the Ripley-Howland Mfg. Co., died, Saturday last, May 12, at his former home in Saco, Me. The cause of death was apoplexy.

Mr. Donnell had been connected with the Ripley-Howland Co. for 26 years, representing the concern during the greater part of that time in Massachusetts, Rhode Island and Connecticut. On the reorganization of the company, in February last, he was elected president, succeeding William Z. Ripley, who retired from the company.

About a year ago Mr. Donnell was seriously ill for a number of months, but he recovered, apparently, and resumed his trips through the territory which he had visited for so many years, much to the gratification of his many friends in the trade, with whom he had always been one of the most popular traveling men in New England.

Mr. Donnell was a member of the Boston Jewelers' Club, the Boston Athletic Club, and the State of Maine Club. He was about 56 years of age, was born in Saco, Me., and was educated in the public schools of that city. Deceased was a man of sterling and upright character, and possessed a host of friends, who held him in the highest esteem. He was unmarried, and survived by a brother and sister.

Services were held at his former home at Saco, Me., to-day, and at Forest Hills Cemetery, this city, where the remains were cremated.

ARCH CROWN MOUNTINGS IMPROVE DIAMONDS

NOTE CONCAVE TIP

COMPLETED BEARING ARCH CROWN MOUNTINGS INSURE PERFECT SETTING

All Arch Crown Mountings are now furnished with Complete Bearings, the success of which was instantaneous; unsolicited testimonials coming to us daily attesting to its worth. This important improvement in diamond mountings has overcome many vexations owing to inferior stone setting. A perfect result is certain, since bearings and tips are fully prepared in advance and a close contact with the stone must follow.

Samples cheerfully sent on approval, a trial invariably proves convincing.

Columbus, O.

J. R. Kyle, who has been traveling for the White-Haines Optical Co., has resigned and will start a jewelry and optical store at Xenia, O.

Frank B. Ross went to Wheeling, W. Va., Wednesday, having been appointed one of the appraisers of the stock of the I. G. Dillon & Son Co., which has gone into the hands of a receiver.

The Secretary of State last week issued incorporation papers to the Hartman Jewelry Co., of Wapakoneta. The capital stock is \$10,000, and the incorporators are George, R. W., C. S. and Sabina Hartman.

J. H. O'Daniel, who was so seriously injured in an automobile accident, two weeks ago, is able to be out again, in a much dilapidated condition. A blood clot formed on the optic nerve as one result of his injuries, very seriously affecting the sight of the left eye, but physicians think the clot will eventually be absorbed.

F. M. French, Albany, Ore., is holding a sale of hand painted china in order to close out that line.

New York Notes.

The Hoyt, Obrig & Geiger Co. moved last week from 11 Union Sq. to 35 W. 31st St., where offices and factory are now located.

John P. Schmidt, designer for David Kaiser & Co., who is in Europe visiting the jewelry centers, will return early in June.

A Jaffe & Son, diamond importers, formerly of 51 Maiden Lane, recently moved their offices to the Myers building, 49 Maiden Lane.

M. Gattle, of Gattle, Ettinger & Hammel, 68 Nassau St., and Mrs. Gattle returned May 5 on the *Cedric* after passing three months in Europe, principally on the continent.

Cortland E. Hastings, who was a member of the old firm of Carter, Hastings & Howe, sailed last Thursday on the White Star Line steamship *Cretic*, for Italy, where he will pass six months.

Charged with receiving goods in a pawnbroker's shop from a minor, Goodman Edelstein was tried last Wednesday in the Court of Special Sessions, Jamaica, L. I., and was fined \$50.

United States Appraiser Whitehead resigned last week, saying that he intended to engage in business. His resignation was accepted by Secretary Shaw in a letter expressing appreciation of the retiring officer's work.

A quantity of Favril glass was contributed by the Tiffany Studios to the sale conducted last week in the American Art Association's gallery, Madison Sq., for the benefit of the California Artists' Relief Fund.

An announcement is being sent to the trade by Henry C. Haskell, 15 W. 27th St., inviting correspondence from jewelers who desire up-to-date designs for unusual articles. Design plates are sent out free for the asking.

David Kaiser & Co. are now comfortably settled in new offices on the 12th floor of 12 John St., the former office on the 11th floor having been added to the factory, which now comprises the entire floor of 1,800 square feet.

Oscar S. Straus, of L. Straus & Sons, 42 Warren St., gave notice last week that he will not consent to act on the board of trustees of the New York Life Insurance Co. after the expiration in a few months of his present term.

The W. S. Smith Co. was incorporated last week and will have a factory for plating and oxidizing metals. The capital is \$4,000 and the incorporators are: W. S. Smith, A. Smith, Brooklyn, N. Y.; Lewis V. Halse, Hoboken, N. J.

One of the directors of the new national bank, which is to be established in the vicinity of Wall, Beaver and Pearl Sts., is A. K. Sloan, the president of Sloan & Co. The bank will start with a capital stock of \$200,000 and \$100,000 surplus, Martin W. Littleton being the president.

C. E. Settle, who for 10 years represented O. M. Draper and the estate of O. M. Draper, has accepted a position as western representative of the Manchester-Smith Co., Providence, with a New York office at 9 Maiden Lane. Mr. Settle will at once start on the road with a new line of sample chains.

Ralph B. Brahe, who for over three years was connected with the Seth Thomas Clock Co., on May 1 associated himself with Wm. J. Ward, 13 Maiden Lane, as eastern representative. Mr. Brahe, in former years, was salesman for an Attleboro jewelry concern, and is well acquainted through his present territory.

Henry Carpenter, 79 Broadway, Flushing, L. I., last week received a letter from his brother, Wm. Carpenter, who lives in San Jose, Cal., in relation to the earthquake shock. The writer said that the chimney fell on his house which was considerably wrecked, but that no member of his household was hurt.

In speaking recently of the death of Charles S. Shiebler, it was said that after the retirement of A. K. Shiebler & Son from the business, it was thereafter taken up by J. P. D. Shiebler. It should be said, to avoid misconception, that the American Watch Case Co. bought the stock and good will of the retiring company.

G. A. Henckel & Co., who recently removed their offices and factory from 21 E. 13th St. to 536 W. 22d St., have improved their show room. Larger quarters have enabled them to introduce show cases of more liberal proportions than they formerly had, and a much more comprehensive display of their manufactures is now made.

To the fishing streams of Labrador turn the thoughts these days of A. K. Sloan, the president of Sloan & Co.; E. C. Fitch, president of the American Waltham Watch Co., and D. J. Carroll, director of the Chatham National Bank. They will start June 5 on their annual trip and will pass two months angling on the Romaine River and thereabouts.

A verdict in favor of Philip Rodenberg, 3 E. 125th St., was announced last week by the Ninth Municipal Court in a case brought against the jeweler by Charles Stahlhut. The plaintiff claimed that he had left with the jeweler a watch to be repaired and that it had afterward been given to the wrong man. Benjamin Franklin, the jeweler's attorney, in his defense claimed that the disappearance of the watch was due to a plot to mulct the jeweler.

Udall & Ballou will move about July 1 from 499 Fifth Ave. to 574 Fifth Ave., having obtained a transfer of the lease of the store formerly occupied by Edelhoff Bros. & Co., from Rawson L. Wood, the receiver of that company. The sale of the Edelhoff stock and fixtures by the receiver to William Barthman, 174 Broadway, was confirmed last Wednesday by Justice Scott, of the Supreme Court. The price, as finally settled, was \$30,445.

Many jewelers, as members of the Seventh Regiment, participated in the big anniversary banquet given recently by that organization. Among those in the trade who are members of the regiment are the following: Wm. A. Bryant, of M. B. Bryant & Co.; H. C. Perley and C. N. Perley, of Perley Bros.; Joseph P. Meurer and Wm. V. Laurino, of Saunders, Meurer & Co.; Harry Canfield, with the Roy Watch Case Co.; E. F. Pancoast, with the Howard & Cockshaw Co.; George W. Street and H. L. Street, of George O. Street & Sons.

During the San Francisco earthquake, John Heuser, an office boy, saved for the Elgin National Watch Co. the company's insurance policies, 300 watch movements and other property valued at \$2,000. "The first telegram our San Francisco agent sent after the earthquake stated that he was personally safe," said President Charles H. Hurlburt, as repeated in a Chicago paper, "but that the office and stock had been destroyed. Later we learned that Heuser had rushed into the building after the quake and saved the watch movements and other valuable property. I do not think our loss will exceed \$2,500."

Because a quantity of diamonds belonging to L. S. Barnett, an installment dealer, were said to have been swallowed by an elephant at Coney Island one day last week, friends began to extend their sympathy to the loser. It was said in the daily papers that while Mr. Barnett was showing the precious stones, valued at \$5,000, to the lion tamer, an elephant came along, thrust his trunk over the tamer's shoulder and ate the gems. In answer to a question Mr. Barnett said a day or two later that the missing diamonds had been recovered, and it was clear that he is not the man to spoil a good story told by a press agent.

Detectives who have been trying to trace jewelry stolen by Jos. Mateski, called the "Masonic" burglar, last week caused the arrest of B. Konigsberg, jeweler at 616 Second Ave., New York, and his clerk, Samuel Goodman, charging them with receiving stolen property. Highly colored stories, apparently the product of the combined imagination of detectives and reporters, were published in several papers. It was said that of \$100,000 worth of jewelry stolen by Mateski from homes in Flatbush and other parts of Brooklyn portions valued at \$50,000 had been found by detectives in Mr. Konigsberg's jewelry store. One of the papers gave a picture of the store. It was said that when Mateski was placed in his cell two detectives, concealed in an adjoining cell, heard him make an arrangement with a prisoner who was to be released the next day to carry a message to Konigsberg. The burglar's object, it was said, was to get bail and also to warn the jeweler to secrete the property. A day or two later the papers discredited their earlier stories as to the cunning work of the detectives and placed the value of the property seized by the officers in Mr. Konigsberg's store at \$1,000 instead of \$50,000. Mr. Konigsberg told a reporter of THE CIRCULAR-WEEKLY that he had never seen the burglar. The articles taken by the detectives from his store, he said, were 23 in number and had been left with him by various customers to be repaired. The total value, he believed, was not more than \$17 or \$18. Several of his customers, he said, have already identified their jewelry taken by the police. Mr. Konigsberg added that he never buys any metal from strangers or from people outside of the trade and that the charge against him was entirely baseless. In the Tombs Police Court Magistrate Wahle on Friday asked the detectives for their evidence against the jeweler and his clerk. The officers asked for more time and were given until to-day. Geo. R. Simp-

New York Notes.

(Continued from page 57.)

son has been retained by the jeweler as his attorney.

A. M. Bachrach, watch case manufacturer, 51 Maiden Lane, has gone out of business.

Charles Eisen, formerly a jeweler of 692 Myrtle Ave., Brooklyn, was released, last week, from the Manhattan State Hospital at Central Islip, L. I., having been declared competent again to manage his affairs.

Chas. L. Power, of Chas. L. Power & Co., 170 Broadway, accompanied by Mrs. Power, will sail next Saturday for Europe on the *Columbia* and will visit the diamond markets of London, Amsterdam and Antwerp.

Robert E. Lemert, who was formerly in business in Maiden Lane, has brought suit for \$25,000 damages against Mr. and Mrs. Ludwig Juchom, the parents of his wife. He charges that they enticed her away from him.

A certificate was filed last week incorporating the business of W. W. Harrison, umbrella and can manufacturer, 1149 Broadway, under the style of the W. W. Harrison Co. The authorized capital is \$25,000, all paid in.

C. Staiger, formerly member of Jung, Staiger & Klitz, has started in business with his two sons, W. E. Staiger and Hugo M. Staiger, under the firm name of Staiger Sons. Their office will be in the Minden building, 926 Broadway, Brooklyn.

Announcement is made that the buffing and grinding motors of the Holtzer-Cabot Electric Co., Brookline, Mass., are no longer sold through its former agents, and that the company will after this sell the motors direct to the jewelry trade.

L. Lachman, of the Acme Plating Works, 17 John St., has started on a six weeks' trip through the west and will stop at Buffalo, N. Y.; Detroit, Mich., and other cities, calling on the trade. During his absence George Lachman will have charge of the office and factory.

Otto Salzman, Danville, Va., called at THE CIRCULAR-WEEKLY office last Friday on his first trip to the city in 16 years. Mr. Salzman is one of the oldest subscribers to THE CIRCULAR-WEEKLY, having taken it continuously for the past 35 years. He is making his headquarters with H. S. Kramer, 51 Maiden Lane.

W. A. Salmon, of the Riviere Brass & Bronze Works, 330 Seventh Ave., expects to resume his trip on the road about May 25 with a new line of samples. His seven trunks were destroyed in the burning of the Palace Hotel at San Francisco, and he was, therefore, obliged to discontinue his trip until new samples are prepared.

Robert P. Hunter, formerly with Rudolph C. Hahn & Co., has temporarily assumed charge of the New York office of the Geo. L. Paine Co., 9 Maiden Lane, and will continue in charge until George Angell recovers from the serious injuries which he suffered in the fall of an elevator in a Fulton St. building, Brooklyn.

Roger Weiss, a jewelry designer, and Miss Jessie Ballou, 317 Gates Ave., Brooklyn, were married last week by Magistrate Mayo. The bridegroom, in asking the magistrate to perform the ceremony, ex-

plained that he had been sent to Paris by his firm and, therefore, he and his bride concluded to hasten the ceremony so that they could go together.

Dan I. Murray is now conducting an auction sale of the stock of Edelhoff Bros. & Co., 571 Fifth Ave., which was turned over to the receiver at the time of the failure. The sale is to continue daily, beginning at 12 o'clock noon, until the stock is all sold. The store is opened each day an hour before the sale begins in order to give purchasers an opportunity to examine the stock.

Complaints have been made recently by occupants of the Criminal Courts building that the clocks get out of order altogether too often. Magistrate Wahle, of the Tombs Police Court, wrote a letter last week to the custodian of the building demanding that a clock keeping more exact time be placed in his court room. It is said that all the clocks in the building will be subjected to an overhauling.

An injunction is being sought by Thomas McCarty, who carried on a mail order business in New York under the style of the Oriental Perfume Co. and distributed watches as premiums, against the Postmaster-General. A fraud order was recently issued against McCarty, barring him from the use of the mails. He claims that he conducted the business legitimately, and he has begun suit in the District Supreme Court at Washington.

Judgment for \$11,284 was filed last week against Morris A. Forgotson, who had a pawnbrokers' sales store at 178 Bowery, and in favor of L. Schlessinger as receiver of the Federal Bank. Bankruptcy proceedings were begun in February of last year against Forgotson. The judgment, now filed, was taken on a note which was among the assets of the Federal Bank, the note not having been included in the schedules filed by the bankrupt.

On the charge of larceny preferred by his employers, L. W. Sweet & Co., 39 Maiden Lane, John F. Kelly, a collector, was, last week Friday, held in \$1,000 bail in the Tombs Police Court. It is charged that Kelly held back \$178 of money that he had collected on instalment accounts. It is also said that the bond furnished by Kelly when he entered the company's employ has proved worthless. The collector lived at 1051 Avenue D, Bayonne, N. J. It is the intention of his employers to press charges against him in Jersey City also.

At a meeting of the Board of Directors of the Jewelers Board of Trade held last Thursday, M. Luther Bowden, of J. B. Bowden & Co., 1 Maiden Lane, was unanimously elected a director, filling the vacancy caused by the resignation of Henry K. Dyer, who recently retired from the Dennison Mfg. Co. The following firms were unanimously elected to membership: Wm. I. Allsopp, Newark, N. J.; Benedict Mfg. Co., East Syracuse, N. Y.; Dreyer, Lochau & Ohm Co., Chicago; Oscar T. Jonassohn, New York; Lawrence Mfg. Co., Newark, N. J.; Mason, Howard & Co., Attleboro, Mass.; Scott Bros. Co., Chicago, Ill.

According to charges made by Isaac Wolf, 118 Bowery, his junior clerk, Louis Macharowsky, 18 years old, has disappeared with seven diamond rings, two brooches, one pair of diamond earrings and

other jewelry, valued altogether at \$2,000. Mr. Wolf believes that the youth went to Chicago. The day before the disappearance the jeweler reproved the clerk for getting down to work late in the morning, and told him that if he could not come in time not to come at all. When Macharowsky did not report for work the next morning the jeweler looked over the stock and noted that many articles were missing. He then asked the police to look for the clerk. Macharowsky boarded at 9 Goerck St.

A fine of \$20 was imposed last Wednesday on W. F. Boyer, a diamond setter at 16 Maiden Lane, by the Court of Special Sessions, for assaulting Joseph Hoffman, also a diamond setter, who occupies an adjoining office. Mr. Boyer paid the fine. The particulars as to the difficulties between the two men were published in THE CIRCULAR-WEEKLY several weeks ago, when the arrest was made. Mr. Hoffman charged that he was set upon as he was entering his office by Mr. Boyer, and was seriously beaten. The men had quarrelled in relation to the charge for a petty piece of work which Boyer sent to Hoffman to do. Mr. Hoffman claimed that thereafter he was annoyed in a variety of ways by his neighbor, the trouble culminating in the assault.

Salem A. Gemeil, a Syrian, giving his place of residence as 17 Rector St., was brought before Judge Holt in the United States District Court, Monday, and pleaded guilty to a charge of smuggling a quantity of watches and jewelry. He was fined \$100 and paid this amount, besides the duties on the articles. Gemeil was a passenger on the steamship *St. Louis*, arriving in New York in the last week of April. He had a quantity of watches suspended on a string hanging down his back. One of the watches had an alarm attachment and the tinkling of its bell was noticed by Inspector Timothy Donahue, who searched the man and made the arrest. In all there were 43 watches, besides some jewelry. One of the watches was being brought here, it is said, especially for a Stock Exchange broker. It had a dial showing the time in London, Paris, Chicago and St. Louis.

While J. H. Raccicot, jeweler and watch dealer, at St. Johns, P. Q., was buying a ticket for Montreal at the Grand Central Station last Wednesday just before the 7 o'clock train started, his sample case, containing watches, chains and other jewelry, was stolen. He told the police that his case was quite heavy, weighing perhaps 75 pounds, and he placed it on the floor while he paid for his ticket. When he turned around again the case was gone. Mr. Raccicot said that he had been calling for several days on people in the trade. He thought that somebody who knew the value of the samples might have followed him to the depot for the purpose of robbing him. In the reports given out by the police it was said that the property was worth \$3,000, but this figure was somewhat exaggerated. Mr. Raccicot carried little jewelry, most of the stock being in watches. He spends most of his time on the road and travels considerably between Montreal and New York. He is the jeweler whose watches, after he sold them to a New York dealer, were held up at Rouse's Point several months ago by a customs inspector because

ROBT. LEVY, MANUFACTURING JEWELER,
 Green and Columbia Streets, NEWARK, N. J.

of a failure to comply with a technical rule of the department.

Sealed bids for the assets of Edwin C. Heathcote, jeweler at 13 Maiden Lane, who is now in bankruptcy, will be received at the office of the trustee, 258 Broadway, until May 24.

An announcement was sent out yesterday by the Jewelers Board of Trade to the effect that a package of diamonds had been lost some time since May 11. In the package were 20 brilliants, weighing 20 1/4 less 1/32 carats.

Among the jewelers taking part in the 11th annual convention, opened Monday by the National Association of Manufacturers in the Waldorf-Astoria, is Ludwig Nissen, of Ludwig Nissen & Co., who is chairman of the convention committee.

The Aikin-Lambert Co. was recently incorporated to carry on the gold and fountain pen manufacturing business conducted prior to this time under the style of Aikin, Lambert & Co. The capital stock is \$150,000. Directors: J. C. Aikin, H. S. Aikin, New York; W. B. Raymond, Brooklyn.

Austin M. Hill, Jr., formerly with the old house of Heller & Bardell until the dissolution of that firm, and later with Bergstein & Son, and Gustave Schmidt, for 16 years foreman for Bergstein & Son, have formed a partnership under the style of Hill & Schmidt, manufacturing jewelers, at 71 and 73 Nassau St.

About \$2,000 loss was caused last Wednesday by fire in the jewelry store of Simon Lubow, at 1612 Madison Ave. The explosion of a can of gasoline started the flames, which gutted the store and, breaking the windows, were climbing to the upper stories when the fire engines arrived. Mr. Lubow had his stock insured, but not fully.

One day last week a man entered the store of Abraham Koppel, 766 Third Ave., and asked to see some rings. Then the stranger picked up a diamond ring valued at \$150, Mr. Koppel says, and ran. The jeweler gave chase and was joined by Patrolman Fitzpatrick, who happened to be near the store. The man was followed and after a long chase was captured and taken to the 51st St. police station. The police say that they found in his possession the diamond ring that he had stolen and also other jewelry. The man gave the name of August Haack.

Another postponement was granted last week in the case of John B. Brosseau, accused of stealing from Tiffany & Co., by padding the payrolls of the workshop, of which he was long the foreman. The delay was at the request of the defendant's counsel, and Magistrate Wahle said that the case must be heard to-morrow. It is understood that the company has refused an offer made in behalf of Brosseau to make a cash payment in restitution. As the issue is of a criminal character it cannot be settled without the consent of the court, and it is said that the members of the company do not desire a settlement.

The store of Abraham Wolfson, Lawrence, Kans., was broken into one night recently by burglars, who escaped with several hundred dollars worth of miscellaneous jewelry. The safe was blown open by dynamite and the noise was deadened by means of blankets.

Pittsburg.

An auction is being conducted at 505 Wood St.

S. Sable, an auctioneer, has opened up a branch store at 205 Smithfield St.

Sam F. Sipe last week contributed \$100 to the local California relief fund.

D. I. Seifert, Monessen, Pa., is conducting an auction, intending to quit business.

L. Plainer has opened a store at Donora, Pa. He was formerly proprietor of a store in Center Ave., Pittsburg.

Abraham Lewis is rejoicing over the arrival of a boy at his home. He entertained a large number of local jewelers at his home last Sunday.

Among the out-of-town merchants visiting this city last week were the following: A. L. Doberneck, Derry; J. F. Murphy, Dawson and W. R. Hill, Fayette City.

L. J. Seleznick & Co., 143 Smithfield St., are selling out their stock at auction and July 1 will reopen with a big stock of new goods. The present storeroom is to be altered and newly furnished at considerable expense.

A carload of fixtures for the new store of E. P. Roberts & Sons arrived last week. It will be several weeks before the firm will be able to occupy the new quarters, which is several doors above the present location in Fifth Ave.

H. G. Wasson, head of the jewelry department of the firm of Joseph Horne & Co., who has been chairman of the committee investigating charges made against Pittsburg councilmen for grafting, has resigned from the committee because he leaves this week for Europe.

H. M. Seal, a former partner of A. Johnson, in the jewelry business at Carnegie, Pa., who was thought to have been in the San Francisco fire and earthquake, has been heard from. He is safe and well. He sold out his interest in the business to Mr. Johnson, who recently sold his interest to Charles Zugswarth and retired. Mr. Seal writes to friends here that he escaped injury. Much apprehension was at first felt for his safety.

An information was laid last Wednesday by A. Diamond, McKeesport, who swore out a warrant for the arrest of Harry Kessler, charging him with larceny by bailee. Diamond alleges that Kessler has fled with two diamonds, valued at \$190, having borrowed the jewels to inspect them, preparatory to buying them. Kessler is 21 years old, an Austrian, and is said to have gone to Scranton. A telegram has been sent to the Scranton authorities. Mr. Diamond is a diamond dealer and jeweler. If Kessler is caught he will be brought back to Pittsburg for trial.

Steven Baccario, who is charged by N. Gallinger, 1200 Penn Ave., with swindling him out of \$2,400 worth of diamonds and jewelry, was brought back May 11 from Atlantic City, where he was arrested a week or so ago. Baccario had jet black hair, but since his arrest his hair has turned snowy white. It is alleged in the informations that on March 4 he secured jewelry to the amount stated from Mr. Gallinger on the pretext that he was to sell it to a customer, and four days later fled from the city. He was traced to Philadelphia, Washington and New York, and later arrested at the

seashore. Baccario made several attempts to kill himself since his arrest. At the police station in Atlantic City he released a bolt which held the framework of an iron bed against the wall and let it fall on his head, the blow being sufficiently hard to render him insensible. He also made an attempt to hang himself, while he has made repeated attempts to cut the veins in his throat with his finger nails. He declares that he will yet make away with himself. He is being kept under constant surveillance. When arrested at Atlantic City 36 pawn tickets were found on his person, which had been issued by Pittsburg pawnshops. The police will make an investigation of the pawnshops and endeavor to ascertain how they came to do such a large amount of business with one man.

Lancaster, Pa.

Elmer Shertzer, with T. Wilson Dubbs, is on the sick list, suffering from a carbuncle.

Isaac Cohen, who came here from Geneva, Switzerland, has taken a position as watchmaker with M. Edelstein.

G. E. Fleisher, head watchmaker for Ezra F. Bowman's Sons, has returned to his duties, after a serious illness.

A. H. Rosenstein, president of the Lancaster Silver Plate Co., is home from a visit to Philadelphia and Baltimore.

Maurice Shortle, Rochester, N. Y., was in Lancaster County last week looking over the ground, with a view to opening a jewelry store.

Parke Weiseman, watchmaker, who left Lancaster, a few years ago, going to Chicago, will open a jewelry store in Cincinnati next month.

John Cloutier, a jeweler of Montreal, Can., aged 55 years, died here, last week, while visiting a sister. Death resulted from stomach troubles. The body was sent to Montreal for burial.

A man giving the name of Thomas Bigler was arrested last week in Chester County for swindling people with worthless eyeglasses, by representing himself as agent for a reputable concern. He is believed to be the same man who, some time ago, tried this game in several towns of Lancaster County.

Abraham Bitner, who was head of the Hamilton Watch Co.'s factory when it was known as the Lancaster Watch Co., is lying at St. Joseph's Hospital, seriously ill, having had an attack of paralysis. One entire side of the body and his speech are affected.

Alvin A. Joliet, Alliance, O., a former student of the Ezra F. Bowman Technical School, has taken a position at Richmond, Va., with the Nowlan Co. Elmer Pierce, a student of the school, is in Milton, Pa., this week, helping out G. Dal Fox & Bro. during the State shooting tournament.

The retail jewelry store of A. Holzman, 94 Whitehall St., Atlanta, Ga., was flooded with water during a fire which broke out at 92 Whitehall St., a short time ago, and destroyed property worth \$20,000.

D. F. Wetzel, Spokane, Wash., has purchased a large warehouse on the north side of Pacific Ave., west of Front St., that place, for \$14,500. The purchase was made as an investment.

Ball's Official Standard R.R. Watches

WHAT WOULD YOU GIVE FOR A LIFELONG CUSTOMER?

Try this plan.

Sell your next watch customer a "Ball."

Its reliable performance will convince him you are a dealer to be depended on—he'll keep coming back for other things.

The watch will win you his business and friendship for always.

CHICAGO, WEDNESDAY, MAY 16, 1906.

No. 15.

Chicago Notes.

Herman Bloedel, Milwaukee, Wis., was a Chicago visitor last week.

The Union of Working Jewelers recently made a demand for an eight-hour work day.

Loftis Bros. & Co. have incorporated with a capital of \$500,000, the incorporators being Samuel T. A. Loftis, Francis E. Matthews, Edwin C. Gage.

A. C. Becken has bought all the tools and material stock of the Calvin Clauer Co., and has started a new department, making a specialty of these lines.

Mrs. H. Phillip Epstein, wife of the proprietor of Tiffley's Jewelry Co., 146 S. Clark St., has just returned from a two months' visit spent with relatives in New York.

A. P. Dupuis, formerly assistant jewelry buyer for Mandel Bros., has taken the Chicago agency for the Rex cuff button and opened an office in the Hartford building.

S. Schlientz, formerly with Benj. Allen & Co., has taken the Chicago agency of the Century Material Co., and has opened an office at room 19, McVicker's Theater building.

The National Clock & Mfg. Co., of this city, has been incorporated with a capital of \$10,000 to manufacture clocks and novelties. The incorporators are: W. E. Hunter, B. W. Evans and A. C. Fordham.

The scheme of Chicago jewelry workers to bring their fellow workmen who suffered in the San Francisco earthquake to Chicago and divide their work here with them in order to afford them practical relief has fallen through.

Miss Ethel Eberhart, daughter of John Eberhart, 285 92d St., South Chicago, has been chosen May Queen of the annual commencement festival of St. Mary's Academy, Notre Dame, Ind. Miss Eberhart was chosen from among 300 students.

Mr. and Mrs. Henry S. Daniels, 4317 Vernon Ave., will be at home to their friends Sunday, May 20, 3 to 6 p. m. and 7 to 10 p. m., this being the 20th anniversary of their marriage. Mr. Daniels is credit man for Jos. Brown & Co.

"Kid" Connors was arrested last week on a charge of smashing the window of the Bauman Jewelry Co. early in the Winter and stealing a diamond heart and chain valued at \$9,000. Connors was arraigned May 8 and bound over to the Criminal

Court in \$3,000 bail. He was sent to jail.

Amelia M., daughter of Christian Jackle, New York, who was recently married to J. W. Aiken, a well-known traveling man, with her husband, has been spending some time in this city on a wedding trip. Among other cities which Mr. and Mrs. Aiken will visit during their honeymoon is Denver, Colo., after which they will return to New York.

James Reddick, public administrator, has assumed charge of the estate of the late Max Lippert, the Chicago jeweler, who died suddenly in Sioux City, Ia., in April. Mr. Lippert's business in the Columbus Memorial building has been closed, and the stock will be sold. The stock appraisal has not been completed, but will be about \$5,000. With outstanding accounts and cash in the bank the estate will amount to about \$17,000. There are few debts.

Charles H. Hulburd, president of the Elgin National Watch Co., is one of the 32 trustees named to take charge of the affairs of a theater for art in Chicago. The sum of \$55,000 has been raised for the project and Steinway Hall secured for the first season, which will open this Fall. Mr. Hulburd is taking a prominent part in the affairs of the new enterprise, which will have a permanent home in Michigan Ave. if the first season proves a success.

The scheme to rehabilitate the Cash Buyers' Union, First National Co-operative Society, by raising \$500,000 has failed, and on Friday Judge Bethea instructed Receiver E. C. Day to arrange for the sale of \$300,000 worth of the assets of the company. S. O. Levinson, representing the men behind the reorganization scheme stated in court that the failure to raise the necessary \$500,000 to put the company on its feet was due primarily to the San Francisco earthquake, Chicago bankers preferring to keep ready cash on hand for investments that promised greater returns than did the Cash Buyers' proposition. Judge Bethea refused to allow the receiver to conduct an auction sale because the law provides that a trustee to be elected by the creditors must do this unless the property is perishable.

Armell Bros., Holton, Kans., are about to enlarge their store and put in a complete line of new fixtures.

Toledo, O.

Scharbach Bros. have removed from 313 Cherry St. to more comfortable quarters at 505 Summit St.

W. R. McFadden, for 12 years employed by a leading retail jeweler here, has started in business for himself at 407 Summit St.

At a meeting of the Board of Directors and stockholders of the Merrill & Broer Co., held May 7, the old officers were re-elected for 1906.

Norman C. Hascall recently commenced proceedings for remission of the forfeiture of a piece of jewelry, the personal property of his wife, on which the Treasury officials insisted full duty should be paid, when Mr. and Mrs. Hascall returned from Europe some time ago. Mr. Hascall refused to pay and began proceedings to lay the case before the Secretary of the Treasury. An application for this purpose having been filed in the United States District Court at New York, the matter was referred to United States Commissioner Alexander to hear and take testimony. Testimony of witnesses in this city was taken last week on commission and this will be introduced when the proceedings are formally opened in the city of New York.

The trade of this city have been interested in proceedings brought by J. G. Boutelle, a retail jeweler and fancy goods dealer at 111 Summit St., against a watchman. Some time ago the store of John Mitchell, Jr., a pawnbroker and neighbor of Boutelle, was entered by thieves, who were frightened away by a night watchman before they stole anything. The local papers gave the story great prominence, and this did not meet with the approval of Mr. Boutelle, who cut a clipping from a paper, pasted it in front of his store and headed it "Another Fake Robbery." The jeweler's act aroused the ire of a friend of the watchman, who took off the sign and destroyed it. Then Mr. Boutelle had words with the watchman in a restaurant, and the watchman knocked him down and pummeled him. Boutelle at once had the watchman arrested for assault, but the judge discharged the prisoner, saying that Boutelle's act started the trouble. Mr. Boutelle's right eye was badly blacked in the scrimmage.

Cincinnati.

Philip Zoellner, Portsmouth, O., was a visitor here last week.

H. Promnitz is at business again after a three weeks' siege of illness.

Joseph Phillips, of the Sterling Glass Co., has returned from a week's stay in New York.

Word has been received here that A. Herman, of Herman & Loeb, arrived safely at Carlsbad, Ger.

A. A. Spiegel, of the Gustave Fox Co., is calling on the trade in Chicago and the southwest.

John Holland, Sr., of the John Holland Gold Pen Co., spent a part of last week in Columbus, O.

John A. Herschede, of the Herschede Hall Clock Co., is making a business trip through the east.

Richter & Phillips have begun making alterations to their establishment, which will greatly improve their quarters.

Steven Lenbusher, of L. Gutmann & Sons, with his wife, left, Monday, for New York, from which port they were to start on a tour abroad.

J. H. Leitz, watchmaker for Louis Hummel, 9 Emery Arcade, celebrated, May 11, at his home, 1760 Vine St., his 25th wedding anniversary.

Wallenstein, Meyer & Co., about July 1, will be represented in the west by Elmer Wallenstein, who was lately added to the road force of this company.

George W. Newstedt, 4th and Race Sts., and August Newstedt, of Lindenberg, Strauss & Co., are enjoying a 10 days' sojourn at French Lick Springs, Ind.

Charles Lurie, formerly with L. Sive, Elwood, Ind., was here last week purchasing stock for the new jewelry and optical store which he has opened at Marion, Ind.

Out of town dealers who were here during the past week, not elsewhere mentioned, included: J. B. Morross, Dayton, O.; D. A. Lamb, Wilmington, O.; William Shire, Paris, Ky.; J. P. Hess, Fond-du-Lac, Wis.; F. Maier, Bowling Green, Ky.; Andrew Clooney, Maysville, Ky.; Frank B. Carey, Lebanon, O.; Edward Mueller, Hamilton, O.

About 8 p. m., May 7, while William Fink was preparing to close his jewelry store at 1424 Main St., a negro, who had been standing in front of the door for some time, pulled a stone from under his coat and smashed the glass. Hastily grabbing a tray of rings, valued at about \$1,000, the thief ran away and escaped. In the loot were 12 diamond rings, with stones ranging from $\frac{1}{4}$ to $\frac{1}{2}$ carat. It has since developed that the negro disposed of the plunder at a second hand store at 1822 Central Ave., as the second hand dealer's wife started out to sell the rings among the jewelers. The dealers suspected that the goods had been stolen and notified the police, who apprehended the woman as she was leaving one of the stores. The rings were identified by Mr. Fink, who has now recovered much of the stolen property.

M. L. Bowen has sold his business in Fort Madison, Ia., to Mr. Scheffer.

W. H. Griffin has purchased the business of P. B. Guthrie, Hughes Springs, Tex.

Kansas City.

F. G. Puffer, Kansas City, Kans., enrolled at the Kansas City Polytechnic Institute last week.

Eunice Sayre has taken a position as engraver with the jewelry department of the Jones Dry Goods Co.

Sixty of the opticians attending the convention last week were graduates of the Southwestern Optical College, of this city.

A. M. Bennett, Warsaw, Mo., has finished his course at the Kansas City Polytechnic Institute, and returned home ready to practice.

Noble L. Fuller, of the Edwards & Sloane Jewelry Co., left last week for New York, where he will be in the market until about June 1.

E. S. Villmoar, with the C. B. Norton Jewelry Co., which concern he represents in Missouri and Texas, was a visitor to the house last week.

Dr. J. W. Tyrell has finished his course with the Kansas City Polytechnic Institute, and will go to Seattle, Wash., to engage in business for himself.

J. C. Haupt, Peabody, Kans., is another of the boys of the Kansas City Polytechnic Institute who has finished his course and returned home.

Mrs. Lynch, mother-in-law of A. E. Pittenger, of the Kansas City Horological School, died suddenly while visiting in Medford, Okla., recently.

Otto A. Knaul, who covers Missouri, Kansas and Nebraska for the Woodstock-Hoefer Watch & Jewelry Co., was in the city to meet his many friends at the convention, last week.

G. T. Sewell, a graduate of the Kansas City Horological School, is about to locate in Iola, Kans. T. E. Coffman, from the same school, is going to locate in Toronto, Kans., where he has purchased the store of J. A. Robinson.

It was found that a great many of those who attended the convention here had failed to register, including the following: S. Rhodes, Ulysses, Nebr.; J. A. Lukens, Bucklin, Kans.; J. Keehnel, Hale, Mo., and F. S. Shepard, Clarence, Mo.

The following new pupils have just enrolled with the Southwestern Optical College: Ida L. Hale and Wm. B. Hale, Weatherford, Okla.; W. G. Chestnut, Kansas City, Mo.; S. P. Campbell, Kansas City, Mo.; L. T. Medley, Yellville, Ark., and T. M. Hutto, Kingman, Kans.

C. L. Merry, president of the Merry Optical Co., as expected last week, was selected as a member of the upper house of the City Council. His election was by the upper house itself to fill the vacancy caused by the election of one of their number to the presidency of the upper house.

The banquet given the visiting jewelers and opticians by the local manufacturers and jobbers was a success from start to finish, and that meant from 7 p. m. to 12 p. m. There were a number of speeches, some very excellent vaudeville stunts and plenty of good cheer. One of the most interesting speeches of the evening was delivered by Father Dalton, of the Catholic Church, and it was on very short notice. He took as his subject a book he had purchased years ago in an old book store in Europe, giving the early history of optics,

and was able to post all those present on some of the early practices which, while they would hardly do to follow now, were very interesting to listen to.

St. Louis

F. S. Brickey, De Soto, Mo., was among the visiting jewelers in St. Louis last week.

C. F. Mathey, vice-president of the Mermod, Jaccard & King Jewelry Co., served on the jury last week in the Circuit Court.

Julius Harwitz is the latest to enter the retail jewelry field in St. Louis. Mr. Harwitz has opened a store at 1423 Pendleton Ave.

Matthew Gassman, 2740 Hickory St., a brother-in-law of James J. Burke, president of the Brooks Jewelry & Optical Co., died last week.

H. Crompton, of the L. Bauman Jewelry Co., has returned from a visit to New York, Bridgeport, Providence and Attleboro on business for that firm.

Fred Simon, Collinsville, Ill.; L. A. Holdener, Belleville, Ill., and William McKinley, Little Rock, Ark., were among the visiting jewelers here last week.

Joseph J. McKenna, of the Bauman-Massa Jewelry Co., has returned from a trip through Indian Territory and Arkansas. He reports the southwest in a flourishing condition.

Joseph Auer, of the Bauman-Massa Jewelry Co., departed recently for a visit to New York, Providence and other eastern cities on a buying trip. While in New York he will be a guest at the New Astor.

Among the jobbers and manufacturers who visited St. Louis last week were the following: Wade W. Williams, of Warren & Williams; J. A. Granbery, of J. A. & S. W. Granbery, Newark, N. J.; Ernest A. Rose, of Weigle & Rose, Newark, N. J.; J. C. Bigalke, of the Bigalke & Eckert Co., New York.

Sam H. Bauman, president of the Bauman-Massa Jewelry Co., departed Tuesday for New York, whence he will sail on the *Kaiser Wilhelm II.* for an extended European trip. Mr. Bauman will visit London, Amsterdam, Antwerp and Paris during his two months' visit abroad. While in New York Mr. Bauman will be at the New Astor Hotel.

J. J. Samesraugher, manager of the New York store of the Mermod, Jaccard & King Jewelry Co., will return here shortly, as the branch of that firm in the metropolis will be closed. H. C. McCleary, who also went from this city to New York, will likewise return. C. F. Mathey, vice-president of the firm, is authority for the announcement of the closing of the branch store.

License Commissioner Clifford has instituted his annual crusade against itinerant vendors who flock to the city each Summer and neglect to take out licenses. A young man who was recently arrested at 12th and Olive Sts. for attempting to dispose of a tray filled with paste diamonds, gave the name of Anthony Economos. He had \$120 in his possession when taken into custody.

The Vann Mercantile Co. has been incorporated in Albuquerque, N. Mex., to succeed the jewelry and drug business of S. Vann & Son.

Indianapolis.

T. W. Gardner is recovering from a severe attack of pneumonia.

Emil Kernel, watchmaker for Carl L. Rost, is building a double house in Madison Ave.

Charles Bernloehr, watchmaker for Chris. Bernloehr & Bros., is visiting along the Pacific coast.

Carl L. Rost has returned from Logansport, where he attended the State meeting of the T. P. A.

J. H. Reed, who is making a trip through the west, is spending this week at San Francisco viewing the earthquake ruins.

T. B. Westker, formerly with Hart & Raber, Anderson, Ind., has taken a position as watchmaker with Krauss & Sector.

Ernie Newlin has retired from the firm of Newlin & Schmelz, 26 S. Illinois St. The business will be continued by J. W. Schmelz.

John Taylor has taken a position with Gray & Taylor, 365 Massachusetts Ave. He formerly was connected with the First National Bank, at Madison, Ind.

A gold nugget, weighing 3 dwts., 7 grains, was picked up recently on the farm of Ikko Matsumoto, in Morgan County. A company has been organized to prospect for gold on the farm.

A handsome gold badge, studded with pearls, has just been finished by C. B. Dyer. It will be given by the Indianapolis Woman's Whist Club as a prize for the highest score at the national convention of Women's Whist Clubs, to be held at St. Louis next month.

The A. P. Craft Co. is making several additions to its shop force. Three men have been taken on recently and others will be added. The firm is now observing the half Saturday holiday policy. The shop closes at 1 o'clock on Saturdays. Retail jewelers belonging to the Merchants' Association have decided to close their places of business at 5 o'clock every afternoon except Saturday during July and August.

Many out of town jewelers were in the city last week, calling upon the local jobbers and manufacturers. Among the number were: Mr. Barnes, of Barnes & Foster, Spencer; H. A. Pauley, Bloomington; J. F. Harding, Brownsburg; B. Maier, Edinburg; Aaron Pursel, Noblesville; D. S. Whittaker, Lebanon; Mr. Raber, of Clark & Raber, Anderson; J. M. Seifert, Mulberry; C. E. Hodgen, Kokomo; Ross J. Haseltine, Kokomo; J. W. Hudson, Fortville; H. Wheeler, Dana, and J. A. Pickett, New Castle.

South Bend.

Cleiss & Clauer are holding an auction sale prior to remodeling their store. Harding & Gregory are conducting the sale.

J. Lott Losey is offering a solid gold watch charm to the first Central League player who makes a home run before June 1 on the local baseball grounds.

The Elks held a fair in South Bend last week. Frank Mayr & Sons contributed a hall clock, O. P. Noisom gave a silver plated baking dish, Frank C. Toepp gave a cut glass bowl and J. Lott Losey gave a mission clock. The South Bend Watch Co. gave two of its high-grade watches.

CINCINNATI, OHIO.

San Francisco.

Carrau & Green have opened temporary quarters at 1390 Waller St.

F. W. Carter, Santa Rosa, Cal., and his wife were killed by the earthquake.

J. S. Dinkelspiel has opened a pawnshop and jewelry store at 2408 Fillmore St., in the new retail district.

The Alexandria Diamond Palace, formerly located on Market St., continues in business on Fillmore St., near Pine St.

Brittain & Co., formerly in the retail jewelry business at 120 Geary St., have opened a retail hardware store on Van Ness Ave., in the new retail district.

W. R. Landram, representative of Simons Bro. & Co., formerly located at 120 Sutter St., was pleased to find the contents of his safes in a fair condition.

M. L. Levy, of M. L. Levy & Co., formerly in business at 115 Kearny St., opened his safes, yesterday, only to find that everything in them was destroyed or melted.

C. F. A. Sturts, formerly in business in the Adams building, Kearny St., reports that the contents of the safes in his store were found to be but little injured.

The safes of the Harris Loan Office & Jewelry Store, at 105 Stockton St., were dragged from the ruins last week and opened. The contents, valued at \$40,000, were ruined. The insurance amounted to \$15,000.

Sing Woe, formerly in the jewelry business at 935 Dupont St., whose vaults were opened, last week, found the contents either melted or destroyed. Later about \$2,000 worth of melted silver and gold was stolen and cached, but was afterward traced and recovered.

Rudolph Schwartzkopf, manufacturers' agent, formerly located in the Crocker building, has arranged to locate in Los Angeles for the time being. From that point he will cover the coast trade until such time as conditions seem favorable to again establish himself in this city.

G. Marcus, president of the California Jewelry Co., has returned from New York, which place he had reached on his way to Europe at the time of the big fire. It is understood that after completing his arrangements here he will return east and will later go on to Europe. The company is now located in the Delger building, corner of 14th St. and Broadway, Oakland.

The remainder of the old safes of A. I. Hall & Son, in the Aronson building, were opened, last week, and everything was found in good condition, although in some cases there had been a little sweating. It will be necessary to return all movements and watch cases to the factories for repair. The company's diamond safe was opened without difficulty by the combination and the contents were found to be absolutely uninjured. A. W. Huggins, president of the concern, will go east shortly, to arrange for new stock for the company's new store here.

J. B. Whitney & Co., consisting of J. B. Whitney and W. J. Browne, have succeeded J. B. Whitney as representatives of the Holmes & Edwards Silver Co., the Derby Silver Co., the Ingraham Co. and the American Cuckoo Clock Co. on this coast. Mr. Whitney was formerly located at 120

Sutter St., and the new firm is located temporarily at 1116 Broadway, Oakland. The loss at 120 Sutter St. was total. Mr. Whitney's home, at 605 O'Farrell St., this city, was also burned. The home of W. J. Browne, 1251 Willard St., escaped the general destruction. At the time of the earthquake Mr. Browne was at the St. James Hotel, San José, where he escaped with his life, notwithstanding the partial destruction of the hotel. The new firm of J. B. Whitney & Co. has already secured quarters in the Jewelers and Silversmiths' building here, into which it will shortly move.

Detroit.

George Chambers, Mt. Clemens, Mich., was in Detroit, recently, on the way home from a western trip.

J. M. Harrison has taken his old position with the Chas. A. Berkey Co., made vacant by the resignation of Chas. H. France.

Fire last week gutted the Inglis block, at Flint, Mich., causing damage of \$45,000. Among the losers was S. M. Cooley. His loss is covered by insurance.

Roehm & Son, 184 Woodward Ave., deny the report that they have sold their lease to the Caille automatic slot machine concern. They will continue business at the present place.

Geo. Swan, aged 54 years, a brother of Judge Henry Swan, of the United States Court, died recently after a lingering illness. The deceased was for many years well known as a jewelry expert.

After an existence of 20 years, the partnership of Wright, Kay & Co. has been ended and a corporation has been formed under the same name. The paid-up capital is \$300,000 and the majority of the stock is owned by members of the former partnership. Several of the older clerks have taken blocks of stock and four or five business men of Detroit have purchased shares. The business was started March 1, 1872, under the name of Roehm & Wright, and was changed to Wright, Kay & Co., 14 years ago. At a stockholders' meeting of the firm, May 14, H. M. Wright was elected president and general manager; John Kay, vice-president, and F. A. Kelsey, secretary-treasurer.

Pacific Coast Notes.

C. B. Linn, Prescott, Ariz., has returned to his home after a visit to Hot Springs, Ark.

Lindi & Son, San Francisco, and H. Welch are visiting friends in San Miguel, Cal., and will remain until Mr. Lindi can rebuild on the old site of his store.

E. A. Gilson, formerly of Calistoga, Cal., is visiting in St. Helena. Mr. Gilson lost everything in the San Francisco fire and for the present will remain in St. Helena.

J. C. Wakefield has succeeded E. L. & L. W. Cheney, former proprietors of the Red Front Jewelry Store, Healdsburg, Cal., and has ordered goods from the east. Mr. Wakefield will make a specialty of work in the optical line.

The death is reported of J. T. Nelson, of the Nelson Jewelry Co., Cotter, Ark.

Denver

Paul Weiss has returned from a three months' trip to Europe. Mr. Weiss made an extensive visit to the optical centers of France and Germany, and a foot tour through Switzerland, his native land.

William Oppenheim has purchased part of the stock of S. Cohen & Co., Victor, Colo. Mr. Cohen has gone to reside in New York. The balance of the stock was purchased by a Cripple Creek firm.

S. S. Parr, manager of the Columbian Optical Co., here, has stolen a march on his friends and surprised them with the announcement of his marriage to Mrs. Ellen Arnold, who is also connected with the concern.

The will of Stanton Pendery, partner in the Ford Optical Co., who committed suicide March 26, during a fit of temporary insanity, caused by an abscess on the brain, has been probated. His interests in the optical business are to be divided according to the terms of the writ among his three sisters, Beata, Grace and Alice, and his brother, Newton. He also left an insurance policy for \$6,000 and some shares in a mining company. C. E. Ford, his former partner, is named as co-executor. The will was written on an ordinary sheet of note paper, and the language indicates that the testator contemplated suicide while drawing it up.

Several trophies to be given in contests among teams at the convention of the Elks, which meets here this Summer, have been on exhibition during the past week in the windows of the Bohm-Allen Jewelry Co. A handsome loving cup has been donated by the Derby Silver Co., Derby, Conn. A cut glass bowl valued at \$150, is the gift of T. G. Hawkes & Co. A \$200 gold watch has been donated by D. Gruen, Sons & Co. Mouser Bros. are represented by a beautiful silver cup. A gold elk's tooth charm has been presented by Henry Freund & Bro., New York. Three other prizes which are suggestive of Colorado's riches are a bar of silver, given by the citizens of the Silver Plume Mining Camp; a gold bar valued at \$750 from Silverton, Colo., and another bar of silver, presented by the Idaho Springs Lodge of Elks.

Savannah, Ga.

R. Van Keuren, of R. Van Keuren & Co., presented to the Savannah Golf Club a silver cup to be contested for annually. It will be known as the Van Keuren Cup.

Mr. Van Keuren was recently elected a member of the advisory board of the Real Estate Owners' Association of Savannah.

John C. Schwartz, trustee in bankruptcy for Simon & Sternberg, claims the bankrupts have not accounted for property worth \$8,600. He has brought the matter to the attention of A. H. MacDonnell, referee in bankruptcy.

Calvin C. Moyer, Orwigsburg, Pa., is building an addition to the side of his property on W. Market St.

The store of O. J. Dodge, Barre, Vt., was damaged by a fire which broke out at that place last Wednesday afternoon, and destroyed property in the Quinlin block valued at about \$8,000.

Providence.

A number of the shops are still engaged in their Spring house cleaning, boilers being inspected and other necessary repairs made.

The will of Charles Vigneron, whose death was recorded in *THE CIRCULAR-WEEKLY* recently, has been filed for probate and has been referred for hearing in the Municipal Court in this city this week.

The George H. Cahoon Co. has taken out articles of incorporation to manufacture jewelry, with a capital stock of \$75,000. The incorporators are George H. Cahoon, C. M. Van Slyck and E. S. Chaffee. The concern will remain in Providence.

William V. Brown, who died last week, was well known to many of the jewelers and was for many years a journeyman jeweler. He learned the trade in the early '70s, but later drifted away from it and engaged in other pursuits.

The local fund for the relief of the San Francisco jewelers is steadily growing and has reached approximately \$8,000. None of this had up to last accounts been remitted, but will be as soon as a committee is designated by the San Francisco jewelers to handle its disposition.

The Gorham Orchestra recently gave the fourth in its series of socials and the event was one of the most successful the organization has yet held. An entertaining programme was presented and at its conclusion dancing was enjoyed. The affair was held in the Casino at the works and the proceeds will be devoted to the fund for the relief of the San Francisco sufferers.

Miss Mary E. Lowry, who has for some time been in the employ of the Ostby & Barton Co., in the shipping department, was presented last week with several bouquets and a handsome etching, as she had decided to sever her connection with that firm. The presentation took Miss Lowry somewhat by surprise, but she made a fitting response. She has been in the employ of the concern since 1888.

The Rodenberg-Smith Co. has gone out of business and Edwin A. Smith and W. H. Manchester have incorporated the business under the style of the Manchester-Smith Co. The capital stock is \$75,000 and Edwin A. Smith is the president and William H. Manchester is treasurer. M. S. Rodenberg has formed a copartnership with M. J. Dunn under the firm name of Dunn & Rodenberg.

According to the provisions of the will of W. O. Cornell, filed last week, the deceased jeweler made a number of public bequests, the Children's Friendly Society, the Society for the Prevention of Cruelty to Children, Cornell University, Tufts College, Animals, the Society for the Prevention of Cruelty to Children, Cornell University, Tufts College, Home for Aged Colored Women and Shelter for Colored Children being among the beneficiaries.

The employees of Martin, Copeland & Co. had an enjoyable outing at Emery Park, Saturday. The party went down by special cars and on arrival at the grounds proceeded to engage in various athletic sports. The ball game was won by the single men, the bachelor twirler proving too much for the benedicts. At noon a chowder was served and at 4 o'clock a genuine Rhode Island

clam dinner was enjoyed. More sports and a social hour in the Casino brought the day to a successful close.

B. A. Ballou & Co., incorporated last week, the incorporators being Barton A. Ballou, Portsmouth; Frederick A. Ballou, Barrington, and George C. Anderson, Pawtucket. According to the articles filed with the Secretary of State, the concern is constituted for the purpose of engaging in the business of buying, selling and dealing in jewelry and other merchandise and for the transaction of such other business as is connected therewith or is incidental thereto. The capital stock is \$100,000 and an additional \$100,000 in preferred stock.

Attleboro.

Louis J. Lamb, of C. H. Allen & Co., has gone to Philadelphia for medical treatment, having been in ill-health for several months.

John W. Luther, of J. W. Luther & Co., has gone to Maine for recuperation in the wilderness. Mr. Luther's health has not been as good as formerly, and he has experienced particular trouble with his eyes.

A force of linemen is busy making radical changes in the arrangement of poles and wires all through the factory district in the center of the town, which is occupied almost wholly by jewelers. The erection of the new cement shop for Charles H. and William C. Tappan, of the D. F. Briggs Co., is the primary cause of the changes.

The Dunbar, Leach, Garner Co., through Treasurer Edwin F. Leach, last week, filed with the Secretary of the Commonwealth its annual corporation report. The figures show: Manufactures, \$9,914; machinery, \$13,030; cash and debts receivable, \$41,813; merchandise, \$9,092; stock, \$8,000; accounts payable, \$30,483; surplus, \$35,416.

Edgar M. Docherty, who has held a responsible position with the Bristol Mfg. Co. for the past three years, severed his connection with that firm last week, having accepted a similar position with a Providence firm. His associates presented him with a handsome gold watch, a Bigney fob, and a \$20 gold piece.

F. H. Sadler & Co., through Treasurer Frank H. Sadler, last week filed its annual corporation report. The figures show: Machinery, \$5,400; cash and debts receivable, \$32,959; manufactures and merchandise, \$48,158; patent rights, \$5,000; good will, \$5,000; miscellaneous, \$11,649; trade-marks, \$400; stock, \$60,000; accounts payable, \$438; surplus, \$52,683.

Hon. Sidney O. Bigney, of S. O. Bigney & Co., was on the boat bound for New York, a few nights ago, and found a bridal couple on board, the bride a former employe of his jewelry establishment in Attleboro. He insisted on inviting them to lunch, and on their acceptance the "lunch" proved to be a sumptuous banquet.

S. W. Card & Co., manufacturing jewelers, Mansfield, Mass., last week, through Treasurer D. E. Harding, filed with the Secretary of the Commonwealth its annual corporation report. The figures show: Real estate, \$20,000; machinery, \$28,000; cash and debts receivable, \$58,696; manufactures and merchandise, \$15,236; stock, \$50,000; accounts payable, \$74; surplus, \$71,858.

North Attleboro.

George K. Webster is planning to build a handsome residence on Washington St.

Thompson & Remington, Plainville, Ore., are to make an addition 28 by 30 feet to their shop on E. Bacon St.

The factories of the Paye & Baker Mfg. Co. and the Estate of O. M. Draper have granted their employes the customary Spring and Summer half holiday on Saturday afternoons.

Arthur C. Sylvester has resigned as president of the local Fish and Game Association. Because of his residence in Providence he is unable to hold the office.

A tank burst at the Company Shops Friday morning, and caused the offices of the H. D. Merritt Co., Estate of O. M. Draper and E. Ira Richards & Co. to be flooded. But very little damage was done.

Local jewelers are exhibiting much interest in baseball, and teams have been formed among the employes of Maintien Bros. & Elliott, the Codding & Heilborn Co., Sadler Bros. and the W. & S. Blackinton Co.

At the meeting of the North Attleboro Country Club, last week, Orin W. Clifford was chosen president and C. Ray Randall and Edgar L. Hixon vice-presidents. Herbert French, Donald Le Stage and Herbert J. Straker were also elected to office.

The J. F. Sturdy's Sons Co. has been incorporated under the laws of the State of Rhode Island for the manufacture and sale of jewelry, etc. Frederic E. Sturdy, Herbert K. Sturdy and Frank M. Sturdy are the incorporators. The capital is \$300,000.

The burglary at the Miller, Fuller & Whiting factory, which was reported in the last issue of *THE CIRCULAR-WEEKLY*, was a more serious blow to the firm than would seem from the value of the articles taken. The great loss was in pins and brooches on the pattern boards, which made it necessary to recall a line that was on the market in order to secure duplicates. The watchman at the Whiting building has reported to the police that last Wednesday night a second attempt was made to rob firms in that building, but he says he frightened the men away by discharging his revolver.

Omaha.

T. L. Combs, of T. L. Combs & Co., is serving on the jury.

C. S. Peterson, watchmaker, formerly with A. B. Hubermann, has taken a position with Joseph P. Frenzer.

Walter Lodge, of the Mawhinney & Ryan Co., is home from a trip to Hot Springs, S. Dak.

Mr. Patch, with C. A. Tucker, Lincoln, Nebr., was in this city, visiting friends and replenishing stock, last week.

L. A. Borsheim, of Brown & Borsheim, has returned home from a watch inspection tour over the Missouri Pacific Railway.

Edward Niewohner, Columbus, Nebr., president of the Nebraska Jewelers' Association, was here, last week, purchasing stock.

Out of town buyers in this city, last week, were Harry Dixon, North Platte; A. G. Kupka, Schuyler; W. W. Bell, Yutan.

Dr. F. C. Little, Bloomfield, Nebr., has sold his store, and will leave shortly for the west, where he expects to look around for a new location.

Connecticut.

John Lynch, Bridgeport, was recently granted a patent on a design for forks, spoons, etc.

The engagement was recently announced of Miss Mabel Harris to Abram Frank, a retail jeweler of Bridgeport.

The Silver City Cut Glass Co., which was organized about a year ago in Meriden, contemplates moving its plant to another city.

The store of Alexander Weed, Stamford, was slightly damaged by a fire which broke out in the building occupied by him, last week.

Valentine Ashforth, for several years in the employ of the C. F. Monroe Co., Meriden, has resigned and taken a position in New Jersey.

The engagement has just been announced of Miss Evelyn M. Goodsell and Edward A. Jennings, treasurer of Jennings Bros. Mfg. Co., Bridgeport.

The Seth Thomas Clock Co., Thomaston, is among other corporations which are interested in the projected extension of the Terryville trolley system to Thomaston.

Frederick H. Mann, formerly in the employ of the Parker Clock Co., Meriden, is reported to be seriously ill at St. John's Sanitarium in Hartford, where he recently underwent an operation.

The Bradley & Hubbard Mfg. Co., Meriden, has contributed \$100 to the fund for the relief of the family of the late Allen S. Butler, the fireman who lost his life during a recent fire at the concern's factory.

A patent was granted to Wilson E. Porter, New Haven, on a new form of watch barrel arbor, May 8. Among other patents granted was one to A. Bannatyne on a Waterbury wheel for clocks and watches.

Robert Denison, a foreman for some time in the employ of the Waterbury Clock Co., Waterbury, recently received from his fellow workmen a handsome diamond ring on the occasion of his resignation from his position.

The body of John G. Baker, formerly in the employ of J. H. Sessions & Son Co., Forestville, was found floating in a pond on West St., Southington, Thursday night. The deceased had at one time resided in Plainville.

Frank Harman, a traveling representative well known in Danbury, died at his home, Tuesday of last week. The deceased had visited Danbury at frequent intervals during the past 18 years. He is survived by a widow and one daughter.

Geo. H. Wilcox has been chosen vice-president of the Meriden Country Club, and Charles T. Dodd, secretary and treasurer. Mr. Wilcox and Charles T. Dodd, together with Samuel Dodd and W. F. Parker, have also been chosen members of the club's Board of Governors.

The large electric sign which was recently placed upon the side of factory "E," International Silver Co., Meriden, facing the railroad tracks, was illuminated for the first time on Tuesday evening, of last week. The display was made in order to test the wiring and was left in operation for about one hour.

A number of adjusters who had been employed on piece work by the New Haven Clock Co., New Haven, discontinued work

May 9, after a request for higher wages had been denied them by Assistant Superintendent King. According to Mr. King, the strikers' demands were unreasonable. The number of hands involved is comparatively small, and their absence does not embarrass the company in any way.

Newark.

Percy M. Layman and Sydney C. Straus have been admitted into the firm of Schults, Leiss & Co.

Wm. T. Gardner, who formerly had a jewelry store at Park Ave., Paterson, was locked up in the county jail in that city last week on an indictment charging him with forgery.

Edmond C. Chase, who was employed in the silverware factory of the Wm. B. Kerr Co., 144 Orange St., did not return home from work last Saturday, and his wife, becoming anxious, has asked the police to assist in finding him.

Clark & Merigold, electroplaters and colorers, have opened quarters at 46 and 48 Oliver St., Newark, N. J. Mr. Clark was for many years with Geo. H. Cahoon & Co., of Providence, R. I., and Mr. Merigold with Capron & Co. and other eastern houses.

Edward Hasse was arrested last week at Fair Haven, N. J., on the request of the police of Boston, Mass. It is said that he sold spectacles made of plain glass, and also sold a worthless eye wash, taking in part payment the patients' old spectacles, which were of value.

In the District Court at Paterson one day last week the case of Jos. Stouffer, Iowa City, Ia., against Mary Decker to recover \$90, the price of a quantity of cheap jewelry, was tried. The evidence indicated that the jewelry was sold by the Lyon Taylor Co., of Iowa City, to Mrs. Decker's husband during her absence from the store. The company later assigned the claim to the plaintiff in the present suit. The defense was that Mr. Decker had no authority to buy for his wife, under whose name the business is conducted. It was also claimed that when he signed the paper agreeing to pay the \$90 he did not understand the character of the document. It was further said Mrs. Decker placed the jewelry in storage and repudiated the transaction. Judge Lewis, after hearing the evidence, decided that there was no valid claim against Mrs. Decker.

Paris Letter.

PARIS, May 1.—Owing to labor troubles and the general strike of the jewelry employes, who demand eight instead of 10 hours' work on the same salary basis as formerly, the diamond market has been extremely quiet. The agitation expected to-day, when all the various branches of industry will demand the eight-hour day, has hurt business, and, further, as the legislative election in France will take place, the majority of merchants are holding back their purchases until after this event. There have been few transactions with Italy, while business with Spain is not much better.

A new syndicate has been formed under the name of the Union des Diamantaires et Bijoutiers, Mr. Grosfilleix acting as president. The membership has already reached 200.

Leo Weill & Frere is the name of a new firm on the Rue de la Paix, which succeeds the old Philip business. The capital is 200,000 francs.

Boston.

W. H. Weisman has bought the jewelry business of L. C. Sargent & Son, Clinton, Mass.

V. Holy has moved his repairing institute from room 65, Jewelers' building, to 49 Bromfield St., where he will engage in the retail jewelry business as well.

The American Waltham Watch Co. has begun work on the extension to its factory, which will parallel the river and will be 94 by 28 feet. It will be constructed of brick and steel.

Rev. F. L. Hopkins is president and E. S. Walsh is clerk of a corporation, with a capital of \$10,000, which will manufacture combs, hair pins, and hat pins in Baldwinville, Mass.

The Business Men's Association of Waltham, Mass., directed the fourth annual merchants' week in that city last week. The American Waltham Watch Co. Band gave concerts on several evenings.

The Shreve, Crump & Low Co., through Treasurer William P. Shreve, filed, last week, its annual corporation report. The figures show: Machinery, \$5,000; merchandise, \$525,000; cash and debts receivable, \$187,021; capital stock, \$375,000; accounts payable, \$80,552; surplus, \$261,469.

The following jewelers were in Boston during the week: George T. Springer, Portland, Me.; Mr. Chapin, of Bruce & Chapin, Worcester; A. P. Zundborg, Worcester; Mr. Herbert, of the Dean-Herbert Co., Manchester, N. H.; Frank Ricard, Lowell; John Webb, of Alden Webb, Beverly; Mr. Kendrick, of Kendrick & Davis, Lebanon, N. H.; U. C. Smith, Brockton; W. H. Weisman, Clinton; E. F. Welch, Westboro; Frank P. Moore, Stonington, Me.; C. W. Clough, Pawtucket, R. I.; E. C. Chagnon, Woonsocket, R. I.

The Massachusetts Retail Jewelers' Association held a meeting in the American House in Boston, on May 10. There were 26 members present, including W. E. Van Wert and Walter B. Snow, of Boston; U. Charles Smith and Herman S. Hewett, of Brockton; Fred C. Newhall, of Lynn; R. C. Gow, of Cambridge; Charles P. Forbes, of Greenfield, and E. H. Dunbar, of Norwood. Fred C. Newhall, president of the association, presided. The meeting was principally devoted to organizing. J. L. Shepherd, of Philadelphia, was present as a guest of honor. The association will meet on the third Thursday of each month. The officers are as follows: President, Fred C. Newhall, of Lynn; vice-president, Charles P. Forbes, of Greenfield; secretary and treasurer, E. H. Dunbar, of Norwood. Advisory board—Walter B. Snow, of Boston, and R. C. Gow, of Cambridge.

Aid Bros., Gallatin, Mo., have been succeeded by F. P. Wynne.

Hans E. Foss, Broton, Minn., has been succeeded by John Stalker.

H. Piesinger, Montgomery, Minn., has gone to Le Seuer Center, in the same State.

Philadelphia.

Harry Toplis has opened a shop for watch repairing for the trade at 125 S. 7th St.

I. M. Garfinkel & Co. were made defendants, last week, in a suit instituted against them by Stiffel & Freeman, safe manufacturers, to replevin a safe.

The Bailey, Banks & Biddle Co. has already started work on the silver service for the battleship *Virginia*, the contract for which was only recently awarded the firm.

Charles Beerhalter, 719 Sansom St., has leased a retail store on 5th St., below Lehigh Ave., which he will open shortly. Mr. Beerhalter is now a watchmaker for the trade.

The rare coins collected by the late Harlan Smith, New York, were disposed of in this city, last week, at auction, and brought \$23,000, a figure breaking all records for such sales.

A. L. Smyth, 1711 South St., has leased a store at 5123 Baltimore Ave., to which he will remove about June 15, when extensive alterations and improvements will have been completed.

Sol Sickles, of M. Sickles & Sons, who departed recently on an extended pleasure trip through the west, has reached Arizona, according to dispatches received from him in this city.

J. Albert Caldwell, senior member of the firm J. E. Caldwell & Co., sailed, last week, on the American liner *Philadelphia* for Europe on his annual trip, combining business with pleasure.

J. Warner Hutchins, Charles Diesinger and William G. Blair were guests, Saturday, in New York of Charles L. Power, of Charles L. Power & Co., diamond importers, at the wedding of Mr. Power's daughter, and later at a reception held in the new Hotel Astor.

Charles Chamberlain, for years in business in Ambler, Pa., has abandoned his retail store in that suburb and will engage in the contracting and building business. Mr. Chamberlain's abandonment of the jewelry business in Ambler leaves that town without a watchmaker or jeweler.

James G. Maree, formerly one of the best known jewelers of this city, but for some years retired, celebrated his 55th wedding anniversary last week at his home, 424 W. Cheltenham Ave., Germantown. A dinner and musicale in honor of the event was given by his son-in-law, William L. Nassan.

The widow of Josiah C. Siddons, who 25 years ago was a silversmith in this city, died last week at her home, 3240 N. Broad St., at the age of 90 years. She was well known because of her activity during the Civil War in caring for Union soldiers who reached this city on their way to or from the war.

I. M. Garfinkel & Co., 1217 Market St., recently offered creditors, who met at the company's request, a composition of 20 per cent. on all claims. It is proposed to pay 10 per cent. June 10, 5 per cent. July 10 and 5 per cent. Aug. 10. The liabilities of the firm are estimated at \$25,000, and the assets are estimated at \$9,000.

Out of town retailers here during the week included: G. A. Jacot, South Bethlehem, Pa.; Frank Tyack, Reading, Pa.; E. L. Thomas, Phoenixville, Pa.; H. L. Phil-

lips, Smyrna, Del.; J. L. Johnston, Norristown, Pa.; L. C. Reisner, Lancaster, Pa.; David Krause, North Wales, Pa.; C. M. Banks, Wilmington, Del., and Valentine A. Hirst, Altoona, Pa.

Some especially valuable pieces of historic jewelry, plate and ceramics were disposed of by the will of the late Edward Shippen Willing, which was admitted to probate here last week. The pieces are heirlooms, many of them having belonged originally to such families as King Louis Philippe, Ellen Willing du Cuelbrock, Lord Cornwallis, General Washington's secretary, etc. Mrs. John Jacob Astor, of New York, his daughter, receives most of the costly heirlooms of jewelry.

Mrs. Kate Hassler, one of the most picturesque retail jewelers of the city, who for more than half a century has conducted a store at 3416 Market St., was robbed again last week. This time a colored man made off with two gold filled watches only, while her watchmaker, Berthold Thiele, aged 70 years, was in the rear of the store. Two years ago Mrs. Hassler was bound and gagged in her store by thieves and the entire place was looted. As in the first case, there is no clue to the thieves.

Optical Notes and Briefs.

Mr. Wilson, of the Wilson Drug Co., Atkinson, Nebr., has made application for membership in the Nebraska State Optical Society.

Miss E. S. E. Waltz has been placed in charge of the optical department of the J. N. Adam Co.'s store, at 388 Main St., Buffalo, N. Y.

A. T. Gray, member of the Failing Optical Co., 455 Main St., Buffalo, N. Y., is remodeling his beautiful residence, 163 Loring Ave.

H. J. Penfold, of the H. J. Penfold Co., Omaha, Nebr., has gone to Toledo and Chicago on business for the local organization, "Ak-Sar-Ben."

The C. P. Goerz Optical Works have opened temporary offices at 1107 Turk St., San Francisco, Cal. L. J. R. Holtz, of this house, recently arrived from New York with a new stock of lenses and cameras.

Henry Kahn & Co., formerly in the optical business at 642 Market St., San Francisco, Cal., have joined with a number of leading retailers in other lines and selected quarters for temporary use on Van Ness Ave.

The Buffalo, N. Y., Optical Society has issued elegantly embossed membership certificates to the following: E. V. Sytcher, Buffalo; W. Gale, North Collins; C. F. Cushing, Niagara Falls; J. P. Simcox, Buffalo; C. H. Gros, Cuba; L. W. Aldridge, Floy L. Akin, Buffalo.

J. W. Jarvis, optician, 461 Main St., Buffalo, N. Y., returned from a week's visit in New York Sunday. He attended the Grand Lodge of Masons and visited members of the optical trade in the Metropolis. Mr. Jarvis recently increased his shop force in his Buffalo establishment.

The Bacon Optical Co., 411 Essex St., Lawrence, Mass., has sold out to Mathew J. Fowler and Albert E. Nye, who will continue the business. Mr. Fowler was for nine years with the Fox Optical Co., Buffalo, N. Y., and Mr. Nye spent six years

with N. C. Rublee & Co., Fitchburg, Mass.

B. B. Combs, Omaha, Nebr., treasurer Nebraska State Optical Society, reports the officers of the society are preparing a bill governing the practice of optometry for the next Legislature. The bill, it is claimed, is intended to prevent the passage of the medical bill.

Besides those already mentioned the following San Francisco opticians have opened temporary offices as follows: Chinn-Beretta Optical Co., 466 13th St., Oakland, Cal.; California Optical Co., 2109 Fillmore St., San Francisco; Geo. H. Kahn, 2026 Steiner St., San Francisco, and the Bausch & Lomb Optical Co., 1629 Geary St., San Francisco.

Hereafter the Buffalo Optical Society's monthly meetings will be held at the Lafayette Hotel, Buffalo, N. Y., except on special occasions, as next month, when the members will be the guests of C. F. Cushing at Niagara Falls. At the last meeting R. M. Lockwood, editor of the *Optical Journal*, New York, addressed the society on the general outlook in the trade. Dr. Cook also spoke on "Some Diseases Opticians Should Recognize."

Dr. Horace B. Hyde was arraigned in the police court in Rochester, N. Y., May 8, charged with practicing medicine without a license, inasmuch as he prescribed for an eye trouble for Frank Rabshaw. The alleged offense took place, Dec. 31, 1905. The defendant pleaded not guilty, and the case was adjourned until to-day, May 16. The defendant claimed in his defense that he had not practiced medicine, but had sold and fitted eyeglasses.

The fifth annual meeting of the Virginia State Optical Association was held Wednesday, at Murphy's Hotel, Richmond, Va. Two sessions were held, one at 2.30 p. m. and the other at 8.30 p. m. The officers elected for the ensuing year were: President, V. B. Gilbert, Richmond; vice-president, W. T. Blanton, Farmville; secretary, W. Wayt Royall, Martinsville; treasurer, F. S. Bullington, Richmond; Executive Committee—Dr. A. Weck, chairman, Norfolk; W. E. Hull and J. Harris Hales, Newport News; H. L. Lang, Staunton, and L. W. Clark, Radford.

The 12th annual meeting and third convention of the New England Association of Opticians opened last night at the American House, Boston, Mass., and will continue to-day and this evening. An exceptionally interesting programme has been provided and the members believe that the meeting will be one of the most successful in the history of the association. The members registered yesterday morning from 9 to 12 in the exhibition hall on the ground floor of the hotel, where several optical and electrical instruments are exhibited. Among those who are on the programme to address the meeting are: A. Martin, "The Modus Operandi in Eye Sight Testing"; R. Conger, of the Sheldon School of Scientific Salesmanship, "Scientific Salesmanship"; Dr. A. C. Campbell, Topeka, Kans., "The Health Ray Lens"; F. P. Simons, "Is the Time Ripe for a Recognized College of Optometry, and Where Should It Be Established?"; Briggs S. Palmer, "Systematizing an Optical Business." A full report of the meeting will be published in next week's issue of THE CIRCULAR—WEEKLY.

Canada Notes.

H. Gauvreau has bought the business of S. Laporte, Ottawa.

McNichol & Pettrick, Stratford, Ont., are closing up their business.

Henderson & White recently opened a store at Lion's Head, Ont.

Judgment has been obtained against W. J. Allen & Co., Glace Bay, N. S., for \$745.

W. J. Wray & Co. have bought out the Western Jewelry & Novelty Co., London, Ont.

W. Bramley, Montreal, has enlarged his factory and is about to remodel and enlarge his offices.

T. Coffin, Jr., of the Montreal Optical Co., has been touring Ontario in the interest of his concern.

Ewert Bros., Rossland and Nelson, B. C., have dissolved, each partner taking one of the branches.

J. H. Young, recently manager for W. E. Jones, Brantford, Ont., succeeds the latter in the business.

The Smith, Patterson Co. has moved from St. James St. to new premises on St. Antoine St., Montreal.

Ezra C. Fitch, manager of the American Waltham Watch Co., Montreal, was in Toronto, Ont., last week.

A. F. Low, Vancouver, B. C., has sold out to L. A. Doll. He has given Mr. Doll an absolute bill of sale for \$1,000.

W. T. A. Proctor, Toronto, Ont., representative of the Montreal Watch Case Co., left last week on a trip to Europe.

Edgar Arnold, Kentville, N. S., has moved his store to Webster St. and has had the interior attractively fitted up.

M. Cochenhaler has removed from his downtown store and opened a new store at 448 St. Catherine St. W., Montreal.

The stock of P. B. Crews, Kingston, Ont., has been taken possession of under a chattel mortgage. The store is not closed.

Walter J. Barr, manager of the Goldsmiths' Stock Co., Toronto, Ont., has gone to New York on a purchasing trip and will stop at the Manhattan.

Geo. G. Robinson & Co., one of the oldest jewelry firms in Montreal, have retired from business. The stock has been sold by auction.

J. H. Willmott, late traveling representative of the Gorham Mfg. Co., Montreal, has accepted a similar position with Roden Bros., Toronto, Ont.

John Rounds & Son are refitting their premises in the Coristine building, Montreal. This is a branch of the sterling silver works of Sheffield, Eng.

The manufacturing firm of Eaves Bros., Montreal, has removed from St. George St. to Bleury St., the removal having been found necessary owing to increasing business.

Thomas C. Johnson, Halifax, N. S., is having a handsome brick and stone jewelry store built at Truro, N. S., which will be managed by his son, George Johnson, who has been doing business at Truro for several years.

For the second time recently, the jewelry store of Joseph Pony, St. Catherine St., Montreal, has been broken into and a quantity of jewelry stolen. The last time, Mr. Pony, who lives over the store, heard the

noise downstairs and descended, armed with his revolver. The thieves escaped.

A report has been made to Mr. McCaskill, chief of the Quebec provincial police, that several men have been selling valuable jewelry at Joliette, Que., during the past week. The circumstances have given rise to the suspicion that the jewelry is the proceeds of burglaries that have taken place in Montreal, and the authorities are making an investigation.

James L. McDougall, 39 years of age, is charged with having obtained money by false pretenses from D. Spenard, St. Catherine St., Montreal. McDougall bought some goods, for which he tendered a check, stating that it was not to be cashed until the end of the week. He also obtained some cash, the difference between the figures on the check and the price of the goods. McDougall spent the Winter in jail for shop-lifting and is well known to the police.

The premises of the Goldsmiths' Stock Co., on the northwest corner of Yonge and Wellington Sts., Toronto, Ont., have been completely remodeled and greatly extended, the alterations being just completed. The change gives the concern 15,000 feet of floor space and doubles the office accommodation. The main entrance hall, with fittings in quartered oak, is very attractive. The company is henceforth confining itself strictly to the wholesale branch of the trade.

Isaac L. Michalson has registered as the president of I. L. Michalson & Sons, Montreal, diamond merchants and makers of rings. The other members of the company are Harris Michalson, vice-president; Robert Goltman, secretary-treasurer, and I. Michalson, director. The business was established in 1885, and I. S. Goldenstein and Moses Michalson were afterward admitted as partners. These have since retired to set up in business as jobbers in Montreal on their own account.

J. Cornelius, who, for over a quarter of a century, had his jewelry store at Granville St., Halifax, N. S., has just moved to Hollis St. The change was made necessary owing to the Bank of Commerce purchasing the premises in which his stock had been located and which is being torn down to make way for a handsome bank building. Mr. Cornelius' new store has been splendidly fitted up and is one of the principal business thoroughfares of the city.

Walter C. Rix, optician, Ilion, N. Y., has been elected President of that village.

M. E. Wold, Thief River Falls, Minn., has closed his store for the Summer.

The Opticians' Club of Columbus was formally organized at a meeting at the Chittenden Hotel, Columbus, O., last week. It is composed of both dealers and employees. A committee was appointed to secure rooms, where a library will be established and monthly lectures held. The officers are: F. W. Wallis, president; R. E. Cole, vice-president; W. G. Bancroft, treasurer; J. R. Crawford, secretary. Executive committee—J. B. White, chairman; L. W. Lewis, N. E. Harris, Frank McGuire and H. E. White. After the meeting a banquet was enjoyed, the members being the guests of the White-Haines Optical Co.

New Orleans, La.

A. Godbold, well known in the local trade, contemplates engaging in business in one of the smaller towns of the State.

Theodore Vorhaben, of Theo. J. Vorhaben & Bro., 809 Baronne St., is contemplating a short trip to the country.

Gabe Hausmann, of T. Hausmann & Sons, was a leading spirit in the recent burlesque circus given by the local lodge of Elks.

J. Julius Weinfurter, as chairman of the City Park Committee, arranged a splendid programme for the opening of the pleasure ground last Sunday. In the big street pageant, given in the forenoon, Mr. Weinfurter rode in front as grand marshal.

The sale still continues at A. M. Hill's old establishment, 635 Canal St., and goods are knocked down under the auctioneer's mallet every morning and afternoon. When the sale is completed and the judgment satisfied, Mr. Hill will replenish his stock and continue his business as formerly.

Now that the battleship *Louisiana* has been completed and will be turned over to the Government shortly, the committees having in charge the taking up of subscriptions to purchase the vessel a fine silver service have gone to work with new energy. Several meetings have been called to take place at one of the leading hotels, and a big entertainment is planned to add to the funds already collected. The committees want \$2,500, but at the present time they are far short of that amount. The fund for the silver service to be given the battleship *Mississippi* by the people of Mississippi has just passed the \$1,000 mark.

Minneapolis and St. Paul.

The Boasberg Optical Co., 13 S. 7th St., Minneapolis, has been succeeded by Mr. Kobe.

John S. Allen, Minneapolis, has been in Fergus Falls, Minn., serving as a member of the Federal jury.

A. U. Wetsel, Minneapolis, is about to move from 409 Nicollet Ave. to new quarters on S. 7th St., between Nicollet and First Aves., South.

A. F. Pommerleau, of Munns & Pommerleau, was a juror in the Bechtel case, in which was involved a scandal in a Minneapolis life insurance concern.

The R. G. Winter Jewelry Co., Minneapolis, now located at 327 Nicollet Ave., has secured the lease at 608 Nicollet Ave., and will move to the new location about Sept. 1.

The jewelers of the Twin Cities are making use of the new curb lamps in goodly numbers. In Minneapolis recent additions to the list include: W. M. Stone, Edward Olson, A. Schultz, C. M. Erickson, White & MacNaught, Cohen Watch & Jewelry Co., S. Gittelson and others. In St. Paul the gas company is circulating petitions for the work, and it is carried through by blocks, so that all stores are equally favored if the line of curb lights is decided upon.

Oscar Anderson, Velva, N. Dak., was injured in the recent wreck at Clover Creek Junction, Pa. Mr. Anderson was on his way to Berlin, Ger., where he expects to make his home.

News Gleanings.

C. E. Barker & Co., Colorado Springs, Colo., have sold out to W. S. Mitchell.

Willard Levee, Little Falls, N. Y., has made extensive improvements in his store. Edw. M. Timpane, Troy, N. Y., recently had a new plate glass front put in his store.

Vanderbilt & Donnelly will open their new store in Amsterdam, N. Y., on or about June 1.

The stock of the Elite Jewelry Co., Mapleton, Ia., was entirely destroyed by fire, recently.

Elmer L. Gard, Barberton, O., has disposed of his business interests at that place to Schwauer Bros.

S. E. Leshner, Bucyrus, O., has admitted Mr. Dunlap as partner. The firm name is now Leshner & Dunlap.

Several itinerant vendors of bogus jewelry were recently ordered to leave the town of McKeesport, Pa.

O. M. Roseboom, Frankfort, O., has added a millinery department, which he will conduct in connection with his jewelry business.

W. W. Wells, Lodi, O., has moved into his handsome new store in the First National Bank building.

T. Coffman has bought out J. A. Robinson, Toronto, Kans., and will continue the business at that place.

H. W. Clowe, Jr., Winchester, Va., has just leased new quarters in the new Williams building, at that place.

Harry A. Dillon, Gloversville, N. Y., recently returned from one of his periodical fishing trips in the Adirondacks.

J. C. Mitchell, formerly with L. S. Robinson, Glenwood, Ia., has purchased the store of Harry J. Engels, Red Cloud, Nebr.

E. H. Treiber, Scotland, S. Dak., will soon move into new and larger quarters. He will add china ware and cut glass to his stock.

Chas. H. Paris is now fully settled in his new store on River St., Troy, N. Y. He has added a number of new fixtures to his store equipment.

Wright & Co., Coshocton, O., have moved into the Hotel building and have enlarged their business, having added a musical instrument department.

Chas. A. Hagadorn has discontinued his store at Canajoharie, N. Y., and moved his stock to his residence, where he will also include the sale of pianos.

John L. Hastings, Mohawk, N. Y., has sold his business to Oscar E. Day and removed to Sheridan, Ind., where he will continue in the retail jewelry business.

V. E. Jacobs & Co., Jacksonville, Fla., formally opened their newly furnished store at 135 W. Bay St., on Wednesday. Patrons were given souvenirs and regaled with music.

A fire which recently broke out in the building occupied by the jewelry store of W. R. Bell, Murfreesboro, Tenn., wrought considerable damage. The loss is partially covered by insurance.

A. Hermann, optician, Watertown, N. Y., has brought suit for \$10,000 damages for alleged slander against Willard D. Nellis, of the same place. Nellis denies the accusations of the optician.

Harold A. Neece, Williamsport, Pa., recently received as a gift from a relative in

New York a violin which has been in the family for 200 years. The instrument is believed to be a genuine Stradivarius.

E. H. Wetherhold, Allentown, Pa., has just awarded the contract for the erection of an addition to his store at 723 Hamilton St. The new structure will be of brick, two stories high and will measure 13 by 23 feet.

Benjamin Mayer, Atlantic City, N. J., has leased the store at 1616 Atlantic Ave., and moved his stock to that location. He was formerly at 1612 Atlantic Ave. for a number of years. The new premises have been remodeled.

M. Jaffe has sold his interest, in the Jaffe Jewelry & Loan Co., 2009 Second Ave., Birmingham, Ala., to Julius Jaffe, who is now the sole owner. The business will be continued under the same name and at the same place by the new owner, who assumes all indebtedness of the firm.

The partnership of Blakeslee & Lord, Goldfield, Nev., has been dissolved by mutual consent. Walter A. Lord having bought out the interest of George T. Blakeslee. Mr. Lord continues the business and assumes all the liabilities and assets in Goldfield. Mr. Blakeslee is in business at Tonopah, Nev.

W. W. Mitchell, a retail jeweler of Dallas, Tex., recently reported to the Police Department that 16 watches, a diamond ring and several other articles of jewelry had mysteriously disappeared from his establishment. Their disappearance was discovered about two hours after the store had been closed.

A movement recently begun by the jewelry clerks in Richmond, Va., to have their employers close their establishments at 6 o'clock every evening has resulted unsuccessfully, owing to the refusal of one Broad St. jeweler to comply with the wishes of the rest. At present the stores are kept open until seven o'clock.

Charles A. Regnaudin, an aged and well-known resident of Akron, O., who died at his home, 266 E. South St., recently, was for many years a jeweler and was a resident of Akron for the past 38 years. The deceased was 79 years old and was prominent in fraternal circles. He was a Mason and a member of the Summit Lodge No. 50 I. O. O. F. A widow and several children survive. The funeral services were held from his late home, and the interment was in Glendale.

H. M. Niswanner was taken into custody May 7 in Greensboro, N. C., on a charge of being implicated in the robbery of a jewelry store in Baltimore, Md., Nov. 15, 1905. When searched, several watches and chains were found in the possession of the prisoner, and a large amount of jewelry was also found in the man's apartments at 242 E. Washington St. Niswanner declared that the stock belonged to J. B. Ellington, and had been entrusted to him for sale. He denied all knowledge of the Baltimore robbery and, in the absence of any incriminating evidence, was released.

For assaulting J. A. Strachan, a jeweler at 220 Whitehall St., Atlanta, Ga., J. Robinson, a negro, was recently fined \$25 and costs and bound over to the Superior Court. The jeweler went to Robinson's house in search of a customer who was his debtor and, it was alleged, was kicked by the negro.

New Stores and Enterprises.

Gordon Hanson has begun business in Oldham, S. Dak.

John E. Campbell has opened a store in Highmore, S. Dak.

Corinne Rousiel has registered as A. Le Montre, Montreal, Can.

Homer Sharp has started in business on his own account in Dundee, N. Y.

Joseph Fussman last week opened a repairing shop in Moorestown, N. J.

J. L. Sabbath & Co. is the name of a new firm of wholesale jewelers, in Montreal, Can.

Anthony Joseph recently opened a store on Gerrish St., in the Davison block, Windsor, N. S.

J. R. Kile recently opened a watch and jewelry repairing establishment at Cunningham, Kans.

On Monday of last week Frank Sutherland opened his new store at 122 Broadway, Buffalo, N. Y.

Julius Harwitz is a new jeweler in St. Louis, Mo., where he has opened a store at 1423 Pendleton Ave.

Daniel Arthur Ungaro, general engraver, formerly with Strawbridge & Clothier, Philadelphia, Pa., has opened a shop of his own at 717 Sansom St.

G. T. Sewall, who has been in attendance at the Kansas City Horological School, Kansas City, Mo., will open a large store at Iola, Kans., this month.

Edward J. Geibel, watchmaker, formerly with E. P. Percival, 221 N. 8th St., Philadelphia, Pa., has opened a repairing shop for the trade at 1439 N. 10th St., in that city.

W. L. Calkins, formerly in charge of the optical department of Estberg & Sons, Waukesha, Wis., recently began business on his own account at 509 Grand Ave., at the same place.

W. R. McFadden has engaged in the jewelry business on his own account at 407 Summit St., Toledo, O. Mr. McFadden was formerly in the employ of W. H. Broer, of the same place.

The City Jewelry Store, Pelham, Ga., has just been incorporated, with a capital stock of \$2,000. The incorporators were C. L. Taylor, John C. Wilson, F. S. Perry, J. B. Lewis and E. E. Cox.

A certificate of incorporation was filed, recently, by Nathan Dardik, of New York, who will engage in business in Watertown, N. Y., under the name of the Northern New York Optical Co.

The Equity Watch Co. is another new concern which was incorporated in New York, May 13, with a capital stock of \$25,000. The directors are Jacob Katz and B. Luria, New York, and E. Pearsall, Brooklyn.

The Consolidated Optical Mfg. Co. is a new concern which was recently incorporated in New York, with a capital of \$10,000 to deal in optical goods. The incorporators were: Abraham L. Fried and K. P. Fried, of New York, and R. Van Buskirk, Bayonne, N. J.

An engraving school has been opened in the rear of the jewelry store of I. H. McConkey, Johnstown, N. Y., under the name of the National Engraving School. The school has a large number of students, both male and female, and conducts both day and evening sessions.

**Recent Reappraisements of Diamonds,
Jewelry and Kindred Lines.**

Reappraisements of diamonds and jewelry have been announced in the last week by the Board of United States General Appraisers, New York, as follows:

Diamonds from A. Bendas, Antwerp, exported March 20, 1906, entered at New York (File No. 39181); findings of Board No. 2: Prices as published in reappraisal No. 6724, April 16, 1906; reappraised value affirmed.

Manufactures of coral from Francesco de Simone, Naples, exported March 6, 1906, entered at New York (File No. 39321); findings of Board No. 2: Price as published in reappraisal No. 6824, April 25, 1906. Reappraised value affirmed.

Silver filigree jewelry from Bevengi Guiseppe, Genoa, exported Dec. 3 and 22, 1905, entered at El Paso (File Nos. 39398 and 39630); findings of Sharretts, G. A.: Entered at 25, advanced to 25 lire per gram.

Mrs. M. J. Saks, Blossburg, Pa., contemplates moving her stock into new quarters adjoining the First National Bank in Wellsboro, Pa., about June 1.

Lucretia S. Williams, widow of the late T. A. Williams, for many years a jeweler in Orange, Mass., died May 9, at her home at that place, aged 33 years.

Henry Freund & Bro. are now settled in their new quarters in the Cockcroft building, New York. They have a very large space with light on three sides from 14 windows, six of them facing the north, thus giving excellent facilities for the diamond end of the business. Their new safe and fixtures are not yet in place, but sufficient may be seen to indicate that they will have most attractive offices in which all departments will have ample room for expediting the increasing business. This is the third time the firm has had to increase its quarters since it started, 10 years ago, under its present style. The firm will be pleased to welcome at their office members of the trade coming to New York, and every convenience will be placed at the disposal of visitors. Two beautiful specimens of the noble elk will adorn the walls of the new office, calling attention to the firm's business in the line of Elk jewelry.

FANS

Fan Season is here, and we are prepared for it with the choicest line that has ever been imported from Paris. These dainty creations are appropriate for Graduation, Confirmation, Weddings, and in fact for any occasion where taste and exclusiveness are requisite.

UNITED STATES PATENTS.

ISSUE OF MAY 8, 1906.

819,708. WHEEL FOR CLOCKS OR WATCHES. ARCHIBALD BANNATYNE, Waterbury, Conn., assignor to the Bannatyne Watch Co., Waterbury, Conn. Filed June 29, 1901. Renewed Oct. 10, 1905. Serial No. 282,165.

A wheel of the character described comprising an arbor, a wheel and collet on the arbor, and a series of pins extending through both wheel and

collet, each pin having one end headed down and having an integral shoulder, the wheel and collet being secured together between the shoulders and the headed-down ends of the pins, the other ends of the pins being free.

819,713. STEM-WINDING WATCH. NUMA BEGUELIN, Solothurn, Switzerland. Filed Sept. 16, 1904. Serial No. 224,703.

A watch hand setting and winding mechanism comprising a longitudinally-movable winding and

setting pin, a rotatable sleeve, a crown-pinion loosely mounted on said sleeve, a double clutch longitudinally movable on said sleeve, a slide operated by the winding and setting pin, a pin on said slide, a strong spring acting against said pin, a pivoted clutch-operating lever and a spring acting against the tail of said lever in opposition to the first-named spring.

819,714. STEM-WINDING MECHANISM. NUMA BEGUELIN, Solothurn, Switzerland. Filed Sept. 16, 1904. Serial No. 224,705.

In a watch-hand setting and winding mechanism,

a pivoted lever, two pins thereon, a pivoted clutch-operating lever situated between the pins, and a spring acting on one pin, and a second spring act-

ing against the tail of the clutch-operating lever,

substantially as set forth.

819,719. FOUNTAIN PEN. FRANCIS C. BROWN, New York. Filed July 7, 1905. Serial No. 268,711.

In a fountain-pen, the combination of the upper and lower feed-tongues adapted to receive the nib between them, the brace arranged to engage the ink-returner located between the lower feed-tongue and forward portion of the lower feed-tongue and the brace and grooved transversely on the side facing said brace.

819,809. PENDULUM-BEAT ADJUSTER. ERNEST W. SARTOR, Paducah, Ky. Filed July 13, 1905. Serial No. 269,522.

In combination with an escapement-wheel and a verge controlling the same, a verge-carrier rotatably mounted coaxially with said escapement-

wheel; a lever one end of which is connected with said verge-carrier and the other end of which is forked; a cam which controls the forked end of said lever; and an arm for controlling said cam.

819,875. CIGAR-TIP CUTTER. LOUIS E. GARIGUS, Newark, N. J. Filed Oct. 10, 1905. Serial No. 282,144.

A cigar-tip cutter comprising a chambered shell or box, consisting of a pair of oppositely-arranged and centrally-perforated dish-shaped disks formed with an opening in a portion of the marginal edge

of said shell or box, a pin extending from disk to disk, and a cutting mechanism pivotally arranged on said pin, consisting of an enlarged portion provided with a pair of straight and angularly-arranged marginal edges, a curved or segmental arm extending from said enlarged portion, said arm conforming to the configuration of the opening in the marginal edge of the shell or box, and serving

as a closure for said opening, a cutter connected with said segmental or curved arm, a spring secured between said disks, said spring having its free end portion in engagement with either of said straight marginal edge portions of the enlargement of said segmental or curved arm, and a finger-piece upon the enlargement of said segmental or curved arm, extending from the marginal opening of said shell or box, serving to open said cutting mechanism and to limit the outward movement of the same.

819,927. HAIR-FASTENER. FRANK B. ROGERS and CHARLES H. DITTMER, Maddux, Mount, filed Oct. 18, 1905. Serial No. 283,323.

A hair-fastener comprising a pair of forked pins, the prongs of which are presented toward each

other, the head of one of said pins having an opening, and the head of the other pin a socket, and a pin slidably mounted in the aforesaid opening, and extensible into the socket, and removably secured therein.

819,948. OPTICAL INSTRUMENT. AMBROSE SWASEY and GOTTLIEB L. FECKER, Cleveland, O., assignors to the Warner & Swasey Co., Cleveland, O. Filed Nov. 22, 1905. Serial No. 288,617.

In an optical instrument, the combination of a tubular body, a tube slidable in said body, but prevented from rotating therein, a wall in said tube provided with three apertures, the wall having a

recess in one face including two of such apertures, an optical element seated in such recess, a post projecting from said side of the wall, a clip secured on said post and clamping said optical element in said seat, the wall having a recess on its opposite face including the third aperture, and one of said other apertures, an optical element seated in such recess, a post projecting from such latter face of the wall, and a clip secured to said latter post and engaging said latter optical element to secure it in position.

819,950. CALENDAR-CLOCK. ELAH TERRELL, Columbus, O. Filed April 15, 1905. Serial No. 255,682.

In a time-indicating mechanism, the combination with a minute-wheel, an hour-wheel provided in its side with a depression, a day-wheel and a month-wheel, and a fixed projection supported in juxtaposition to the month-wheel, of a plurality of plungers carried by the month-wheel adapted to

intermittently engage with the fixed projection, a pin carried by the day-wheel and arranged to be engaged by one of the plungers and forced into engagement with the depression of the hour-wheel to lock the hour-wheel to the day-wheel when the said plunger engages with the fixed projection.

820,061. ICE-CREAM SPOON. DOSIER H. MOS-TELLER, Chicago, assignor of one-fourth to Ritley N. Baylies and one-fourth to Fred N. Baylies, Chicago. Filed Sept. 26, 1905. Serial No. 280,174.

In an ice-cream spoon, the combination with the bowl and handle of the spoon of a scraper located

and operating in the bowl, a rock-shaft extending longitudinally of and parallel with and carrying the scraper, a return-spring for the rock-shaft, a winding-spool fixed on the outer end of the shaft and a cord, and a lever having the cord attached to its outer end for operating the scraper within the bowl of the spoon.

820,067. POCKET ASH-RECEPTACLE. LAVINIA D. RICHARDSON, Fredericksburg, Va. Filed June 22, 1905. Serial No. 266,511.

A device of the class described fashioned to

simulate a living creature, comprising a unitary hollow elastic body substantially circular in cross-section and provided with a slit in its wall serving

as the mouth of such creature, said body being otherwise imperforate, said slit being reinforced about its edges and being normally closed and adapted to be opened by compressing the walls of said body.

820,123. SPEED-TIMING APPARATUS. ALDEN L. McMURTRY, New York. Filed June 8, 1904. Serial No. 211,685.

In a speed-timing apparatus, the combination of a main electric circuit and source of energy, a series of stop-watches grouped at a desired point, means for simultaneously starting all the watches, local

means controlled by impulses of current in the main circuit for independently stopping the respective watches, and means located at any desired point or points in the main circuit for controlling it to thereby actuate said local means to successively stop the watches.

820,174. LENS-MOUNTING. VINCENT BERTOLINI, Chicago, assignor to F. A. Hardy & Co., Chicago. Filed Dec. 19, 1904. Serial No. 237,536.

As a new article of manufacture, a lens-mounting having a post comprising a pair of parallel arms located one above the other, and a portion

connecting them and forming the inner end of the post, a pair of straps proceeding outward from said arms, respectively, and a pair of hracing-tongues directly jointing the outer extremities of the arms and proceeding upward and outward therefrom.

820,252. WATCH-BARREL ARBOR. WILSON E. PORTER, New Haven, Conn., assignor to the New Haven Clock Co., New Haven, Conn. Filed June 19, 1905. Serial No. 265,855.

A one-piece spring-harrel arbor for timepieces, having an annular flange transversely broken for the production of a hook to be engaged by the inner end of a coiled spring formed at its inner

end with a hole for the reception of the hook which is narrower than the width of the spring and also having two annular shoulders corresponding to each other in diameter but smaller in diameter than the said flange which is located between them, and the said arbor also having two journals on which it runs and being adapted to have a spring-barrel applied to it and the said shoulders preventing the extreme inner end of the spring from tilting and being disengaged from the hook.

820,382. SAFETY-PIN. THERON S. CARROLL, Winsted, Conn. Filed Dec. 24, 1898. Serial No. 700,198.

A safety-pin comprising a pin-bar and a pin-

point shield for the pointed end of the pin-bar, the pin-bar having a segmental bend without a

coil, the pointed end of the pin-bar normally tending to move away from the pin-point shield when disengaged therefrom, and means engaging the pin-bar at the segmental bend and acting to limit said movement of the pointed end of the pin-bar and also acting as a stop to prevent fabric through which the pin-bar is inserted passing to and around said bent part of the pin-bar.

DESIGNS.

37,988. NAIL-FILE. ERNST RUETTGERS, New

York. Filed March 19, 1906. Serial No. 306,935. Term of patent 7 years.

37,999. GLASS VESSEL. BENJAMIN FRANKLIN DAVIES, West Hoboken, N. J., assignor to L. Straus & Sons, New York. Filed March

15, 1906. Serial No. 306,303. Term of patent 7 years.

38,000. CUT-GLASS VESSEL. WILLIAM C. ANDERSON, Lansing, Mich., assignor to the Libbey Glass Co., Toledo, O. Filed March

26, 1906. Serial No. 308,181. Term of patent 7 years.

38,001. CUT-GLASS VESSEL. DENNIS F. SPILLANE, Toledo, O. Filed March 26, 1906.

Serial No. 308,182. Term of patent 7 years.

38,002. CUT-GLASS VESSEL. DENNIS F. SPILLANE, Toledo, O., assignor to the Libbey Cut Glass Co., Toledo, O. Filed March 26,

1906. Serial No. 308,183. Term of patent 7 years.

37,989. SPOON OR SIMILAR ARTICLE. GEORGE CHAMBERS and ROBERT J. STEWART, Mount Clemens, Mich. Filed April 7, 1906. Serial No. 310,580. Term of patent 14 years.

38,003. DRINKING-TUMBLER. HUGO THUEMLER, Pittsburg, Pa. Filed March 23, 1906.

Serial No. 307,727. Term of patent 3 1/2 years.

37,990. HANDLE FOR FORKS, SPOONS AND SIMILAR ARTICLES. JOHN LEECH, Bridgeport, Conn., assignor to the International Silver Co., Bridgeport, Conn. Filed March

31, 1906. Serial No. 309,226. Term of patent 7 years.

37,991. HANDLE FOR SPOONS, FORKS AND SIMILAR ARTICLES. CHARLES T. PAYE, North Attleboro, Mass., assignor, by mesne

assignments, to Chris W. Ernsting, San Diego, Cal. Filed April 5, 1906. Serial No. 310,181. Term of patent 7 years.

UNITED STATES PATENTS THAT HAVE EXPIRED.

[Reported especially for THE JEWELERS' CIRCULAR-WEEKLY by R. W. Bishop, Patent Attorney, Washington, D. C.]

Issued May 7, 1889.

402,620. DRINKING-CUP. JOHN SCHUE, Rochester, N. Y.

402,672. BROOCH-PIN. MENDEL HOWARD, New York.

402,685. CUFF-FASTENER. C. L. MOORE, Worcester, Mass.

402,701. BROOCH-PIN. BRUNO VON BULTZING-SLOWEN and MENDEL HOWARD, New York, said Bultzingslowen assignor to said Howard.

402,769. BAG-LOCK. CHARLES REINISCH, Newark, N. J.

402,823. ELECTRIC CLOCK. E. G. HAMMER, Brooklyn, N. Y.

402,837. INKSTAND. G. R. G. JONES, Louisville, Ky.

402,864. TRAVELING-BAG. MORRIS SCHWERIN, Newark, N. J.

402,864. FOUNTAIN-PEN. L. A. SHATTUCK, Bloomshurg, Pa.

402,914. PENCIL-SHARPENER. J. R. FOSTER, Storcham, Mass.

402,916. COMBINED PAPER-WEIGHT, CALCULATOR AND MUSICAL WATCH. ELLA N. GAILLARD, New York.

402,917. CLOCK-STRIKING MECHANISM. D. J. GALE, Forestville, Conn.

402,969. COFFEE OR TEA POT. G. E. RAYMOND, Chicago, Ill.

402,972. TIMEPIECE. HUGUES RIME, Paris, France, assignor to the Societe Armand Schwab at Frere, same place.

403,003. FINGER-NAIL TRIMMER. C. P. TENER, Hillsborough, O.

403,021. PEN. J. L. ACKERMAN, Lowell, Ind. Designs issued May 9, 1899, for 7 years.

30,714. BREAST-PIN. M. R. SWAN, Manilla, Ia.

BRITISH PATENTS.

(ABRIDGMENTS OF SPECIFICATIONS, 1901, FROM *The Illustrated Official Journal*.)

ISSUE OF APRIL 25, 1906.

29,157. F. M. BRITAIN, Croydon, Surrey. Dec. 30.

Dinner plates are provided with hemispherical

FIG. 2.

receptacles in the rim for the reception of condiments.

29,195. WORKMEN'S TIME RECORDERS. F. M. HOWARD, Liverpool. Dec. 31.

A lever 4, Fig. 1, is turned round a dial to a definite position for each operator, and the end pressed into a hole, thus causing printing wheels 9, 10 to be lowered into contact with a corresponding column on a record drum. Means for centering the minute wheel 9 and sounding a bell, an ink-ribbon feed, and an automatic device for shifting the printing mechanism along the drum at pre-arranged times are provided. The printing wheels 9, 10 are mounted in a pivoted frame 13 which is

connected by a spring to a rod 16 passing through the frame as shown in Fig. 5. This rod 16 is actuated from the operating lever 4 by a push-pin 8 as shown, an in-and-out-of-action piece 31 being provided for disconnecting the mechanism. The minute wheel 9 is driven by a cantilever connection 32 from a clock 33; this allows the printing wheels to be shifted along the record drum 1 by a nut 20 and screwed spindle 21 operated either by a handle 23 or automatically as described below. The spindle 21 also actuates an indicator 29 through rods 27, 28, thus showing the position of the print. The minute wheel is centered by a blade 36 pivoted to the frame 13 and linked to the nut 20, this blade engaging a notched wheel 35 when the frame 13 is lowered. If the blade 36 lodges on a tooth the printing wheels cannot descend. A bell 39, Fig. 5, is struck at each print, but not if the blade 36 does not enter the notch. A bell-hammer is carried by a block 41 pivoted on the main framework and connected by a spring to an adjustable bracket 43. An arm 44 on the block 41 slides along the pivoted frame 13, when the latter is lowered, and meets the rod 16. Further lowering stretches the spring until the rod 16 passes below the frame 13, the spring connection of the frame with this rod allowing this. At this point, the arm 44 is released, and the bell-hammer springs forward and strikes. If the frame is held by the blade 36 resting on a tooth, the spring is not stretched enough for the hammer to strike. In a modified form, the hammer block 41 is pivoted to the bracket 43, raised against a spring and released by a rocking catch on the pivoted frame 13, and pulled by another spring. The printing-mechanism

is shifted along the drum automatically by the escapement device shown in Fig. 9. The clock drives a disk 58 having holes to receive pins 59 which raise an arm 61 at prearranged time. This arm 61 is connected to another 63, both being loose on a spindle 64 having fixed to it two other arms 65, 66. The arm 65 engages a one-notched disk 67 of a spring-driven train, and the arm 66 a stop 68 on another wheel of this train. When the arms 61, 63 are raised, the latter raises the arm 65 and consequently the connected arm 66, the train advancing until the raised arm 63 meets another stop 70. The arms 61, 63 are lowered directly after, allowing the disk 67 to make one revolution. This causes the screwed spindle 21 to be revolved once, through a clutch 73, and the printing wheels shifted a corresponding distance along the recording-drum. The clutch 73 can be disengaged by a push-pin and the printing wheels returned to their initial position by the handle 23. A locking-piece is provided and can be turned to prevent rotation of the spindle 21. A special ink-ribbon feed is driven by a pawl 45 from the centering-blade 36, Fig. 1. A thickened part of the ribbon engages a rocking-piece when the ribbon has to be rewound, and causes the spindle of the wheel 16 to be shifted by a spring. The recording-drum 1 is hollow, and the ends of a ruled time-sheet are inserted through a slit and held by a spring-pulled bar 77.

29,196. WORKMEN'S TIME-RECORDERS. E. S. HOWARD and F. M. HOWARD, both of Liverpool. Dec. 31.

The machine described in Specification No. 23,454, A.D. 1898, is modified so that time records may be obtained upon cards used in ascertaining the cost of work as well as upon the usual time-sheet. Such a card is inserted by hand between

the guide plates B, A of which the former is free to move laterally, while the latter can be adjusted according to the six days of the week by means of a handle X, slot E, and set-screw D, the adjustment being with reference to the plate C, which is fast to, and moves on the same guides as the printing carriage G. The card is slipped under the sheath Q which bears marks for comparison with cross-lines upon the card to aid in positioning the record. The printing-wheels are brought down to impress by the lever and print through an aperture in the guide-plate A.

29,215. TIME-CHECKING APPARATUS. W. M. LLEWELLYN, Bristol. Dec. 31.

In apparatus for recording the time of entry into, and exit from, a lavatory or similar place, two check-operated mechanisms are employed, Fig. 1 being a front view of the first and Fig. 5 a side view of the second. A clock, when inserted through a slot B, moves a pivoted detent lever C and frees

a notched disk C¹. This allows the disk spindles D² to be rotated by external handles. The first spindle D² is turned until a cam disk G on it raises a platen and prints the hour and minute from corresponding type-wheels. A second disk makes an electric contact, and by means of pivoted electromagnets draws back a bolt and causes a plate

F, Fig. 1, to cover the first slot B. The second spindle is turned to withdraw a second bolt b, Fig. 5, allowing the door to be opened, and in this case the check used falls into a pocketed drum S. The drum spindle is connected by ratchet gear to a vertical rack on the door which is moved by a fixed striking-piece when the door is shut. This turns the drum for part of a revolution. The second bolt b can be moved by hand w' or by a spring, and on the closing of the door the drum S is rotated so that the check used is returned by a guide T. Also, a disk on the drum spindle makes a second electric contact, this having the reverse effect to the other. The first slot B is thereby opened, and the first bolt reinserted. Finally, the check returned by the guide T is placed in the first slot B, allowing a second print to be made. The checks correspond to their users, and may ordinarily be kept on a board. Their order in the receptacle P, Fig. 1, corresponds to that of the records. The provisional specification mentions that the printing-mechanism may be that described in Specification No. 1448, A.D. 1904, and that the two checks used may finally be passed into separate slots, both these slots being closed during the occupation of the lavatory.

29,229. ADVERTISING. G. McDONALD, Newcastle upon-Tyne, and G. W. KENYON, Hampstead London. Dec. 31.

Relates to apparatus for advertising in connection with clocks, in which the timepiece controls the display of the advertisements. Fig. 1 shows the clock with the advertisement-carrying drum a below. On the fourth or other suitable wheel c of the timepiece are fixed four pins c¹, equally spaced

apart and acting in turn upon the short arm d¹ of a lever d. The lever d is connected by a cord, wire, or chain e to a lever f, of such length that very little power is required to operate it. The lever f moves between the stops g, g¹, and is pivoted at h by a spindle with which it rotates. Its shorter end f¹, when in the position f² shown in Figs. 3 and 6, prevents the detent lever i from rotating. The clockwork train j, j operating the drum a is thus stopped until the lever f comes into the position shown in Fig. 5, when the detent i is released and makes half a revolution until it meets the stop l. The pin c¹ is then about halfway along the arm d¹; when the arm d¹ is released, the lever f descends, the end f¹ rises and through the spindle h and links m, m¹ raises the stop l. The detent i is thus released, and rotates until it again engages the end f¹, when the process is repeated. The advertisements are mounted on the drum a by means of cards p on wires p¹, the ends of which pass through holes q in the end disks q¹ of the drum, these holes q being so spaced apart that the half-revolution of the detent i allows the train j sufficient motion to change the displayed advertisement. The advertising-mechanism is driven by a spring preferably a little stronger than those generally used in clockwork.

29,239. WORKMEN'S TIME-RECORDERS. J. J. STOCKWELL, London, E. C. Dec. 31.

The going-train of type-wheels driven from the clock-spindle is modified to secure better alignment, locking and quick transfer of the motion between the different wheels; and the printing-handle operates a punching-mechanism whereby the record cards are fed downwards upon completion of each line. The main type-wheel spindle c, Fig. 3, is driven from the clock through a crank with a pin engaging with a slotted wheel, but controlled as to its motion in the slot by means of springs whereby slight relative motion during printing is allowed, and has fixed upon it the minute-wheel and its justifying-wheel z, Fig. 4,

the latter carrying a pin to engage and move at each revolution a toothed wheel on the shaft *p*. The shaft has a pin-and-recess wheel *o* which co-operates intermittently with the justifying-wheel *k* attached to the date wheel *j* and with its aligning-pawl *l* to change the date daily. Normally, the minute-wheel is free, but the operation of the

printing-handle brings a double aligning-pawl *re, x*, Fig. 4, into gear with its justifying-wheel, which carries a spring pivoted piece *3* movable at right-angles to the plane of the wheel by contact with a projection upon the framework. This movement brings a pin *4* on the pivoted piece into gear with the justifying-wheel *2* corresponding to the hours and feeds it one unit, a pin on the locking-pawl *7* and a recess in a ring *10* unlocking the justifying-wheel for the purpose. Fig. 8 shows the record card *20* held in guides before the type-wheels, and resting with one of its lower corners on a small plate. When the card and its carriage have moved transversely until the last entry on a given line is being printed, the punch *18*, operated as shown at each stroke of the printing-handle, cuts off the corner in question so that the card falls into position for recording on the next line.

29,260. CLIP FOR NECKTIES, ETC. C. C. CALDER and R. G. EUSTACE, Bedford Park, both in London. Dec. 31.

The clip is made from a length of metallic wire,

which is bent into the form shown in Figs. 1 and 2 with one or more loops *a* and the reversely curved portions *c* for gripping the tie, etc.

29,522. FIELD GLASSES. K. MARTIN, Rathenow, Prussia, Germany. Dec. 31.

In order to give increased stereoscopic effect in one position, and to allow observations to be taken

from behind cover in another position, a prismatic or other binocular *b*, *b'* carries at its objective ends two tubes, containing prisms *p*, *p'*, *p''*, *p'''*,

or equivalent mirrors. The ends of the prism tubes fit over the ends of the objectives and are held in position by friction. When in the position shown, the tubes give an increased stereoscopic effect, and when they are turned so as to be parallel to one another an observation may be taken from behind cover. The tubes may be detached and the binocular used in the ordinary manner.

29,561. LENSES. H. D. TAYLOR, Mount Villas, Yorkshire. Dec. 31.

To increase the amount of light transmitted by a lens system the loss of reflection is minimized by tarnishing the lens surfaces to a brownish slate tint, by immersion, in the case of the dense barium crown and flint glasses, in a dilute acid mixture of ammonium sulphide and nitric acid. An aqueous solution of sulphuretted hydrogen or sulphurous acid will also produce similar effects. The light-transmitting power of a lens of four surfaces treated in this manner is stated to be increased by about 11 per cent.

29,567. SMOKERS' COMBINATION ARTICLES. A. MYERS and L. MYERS, both of Birmingham. Dec. 31.

A combined stopper and cleaner for tobacco pipes is adapted for the pocket. The stopper consists of a disk *1* formed on the end of a tubular part *2*, while the cleaner consists of a blade or

stem *6* which passes through a hole in the disk *1* and has a clip *5* or other suitable means for gripping and sliding on the part *2*. A bead *8* prevents the cleaner from being withdrawn out of engagement with the hole in the disk. The article may also serve as a pencil-point protector as shown in Fig. 3, as a pencil holder, and as a casing for a pocket pencil case.

Complete specifications accepted April 19, 1906.
1905.

13,731. THREADING ATTACHMENT FOR STUDS. ALFORD & ALFORD.

17,899. BROOCH. WYNN.

19,482. HAIR-PIN DEVICE. JORDAN.

8,998. CIGAR CASE. S. J. DAVIS, Birmingham.

UNITED STATES TRADE-MARKS.

[The following trade-marks have been adjudged entitled to registration under the Act of Feb. 20, 1905, and are published by the Patent Office in compliance with Sec. 6, of said act, which provides: "Any person who believes he would be damaged by the registration of a mark may oppose the same by filing notice of opposition, stating the grounds therefor, in the Patent Office, within 30 days after the publication of the mark sought to be registered, which said notice of opposition shall be verified by the person filing the same before one of the officers mentioned in Sec. 2, of this act. If no notice of opposition is filed within said time the Commissioner shall issue a certificate of registration therefor, as hereinafter provided for."]

PUBLISHED MAY 8, 1906

SER. No. 3,251. STERLING SILVER HOLLOW

WARE, STERLING-SILVER FLATWARE, AND STERLING-SILVER TOILET ARTICLES. R. WALLACE & SONS MFG. CO., Wallingford, Conn. Filed April 27, 1905.

A stag's head, heraldic roll, and the letters "R W & S."

SER. No. 4,138. BLADES FOR POCKET-KNIVES, RAZORS, TABLE-CUTLERY, ETC. A. BALDWIN & Co., LTD., New Orleans, La. Filed May 3, 1905.

The representation of an arrow spanned by the capital letters "I C K," with the letters "u r" and "e e n" above and below the shaft of the arrow, which together form the sentence "I Cut Keen."

SER. No. 6,568. SILVER-PLATED FLATWARE, HOLLOW WARE AND TABLE WARE. WM. A. ROGERS, LTD., New York. Filed May 25, 1905. Used 10 years.

EXTRA {COIN SILVER} PLATE

A pair of opposed braces. Arranged upon either side of the braces are the words "EXTRA" and "PLATE," and within the braces are the words "COIN SILVER."

SER. No. 10,168. WATCHES AND PARTS THEREOF. ADOLPHE SCHWOB, New York. Filed July 12, 1905. Used 10 years.

Tavannes Watch Co.

The name "TAVANNES WATCH CO."

SER. No. 10,170. WATCHES AND PARTS THEREOF. ADOLPHE SCHWOB, New York. Filed July 12, 1905. Used 10 years.

lished March 13, 1906.

A Correction.

The article entitled "Ancient and Mod-
ern Jewelry Compared," which appeared
in THE JEWELERS' CIRCULAR—WEEKLY May 2, was
copied from April issue of *Fabrics, Fancy
Goods and Notions*, and was credited to
that journal in our columns because it was
published therein as an original article.
We learn, however, that instead of this
being original with *Fabrics, Fancy Goods
and Notions* the article was written by
Emil Freund and published in the *Manu-
facturing Jeweler*, Feb. 22, to which jour-
nal credit should properly have been given.

Charles H. Wyman, Colorado Springs,
Colo., has consolidated the businesses which
he carried on at 26 S. Tejon St., that city,
and at his branch at Manitou, Colo., and
will conduct both under one roof in his new
and commodious quarters, 19 E. Pike's Peak
Ave. He will hereafter carry a full line of
jewelry, curios and art goods.

Recent Publications.

SKIASCOPY WITHOUT THE USE OF DRUGS, by R. M.
LOCKWOOD. A practical treatise for the optome-
trist. Published by the Frederick Boger Pub. Co.,
New York. Bound in paper, 50 cents.

NO subject is so keenly interesting to the
optometrist as skiascopy. No book
has done more to simplify and make the test
practical than the one under notice. In his
usual lucid style and practical manner, Mr.
Lockwood has put this subject within the
reach of all, avoiding the complex and
vague expressions that have heretofore
proven a bugbear to the student.

Beginning with the origin and nature of
the test, he leads, step by step, through the
various methods of applying it. He shows
when and why the test may be depended
upon and when and why it is not trust-
worthy. The apparatus needed, the posi-
tion, kind, and size of light, the size and
kind of mirror required, the best size of
sight-hole, are rationally discussed.

The reason for the shadow going "with"
and "against" is explained. The way to
avoid scotomata and the use to which the
oftentimes annoying catoptric images may
be put are points of value.

Other points made clear are: The nature
and use of the schematic eye; methods of
"fixing" the eye under test; the use of a
second mirror as a finder; getting the sharp-
est reflex; the focus of the observer's eye;
the nature and variations of reflexes; the
size and edges of the ocular glow and what
they mean; the qualitative method; the two
principal meridians, their location and their
neutral point; transpositions; checking up
the findings; the effect of the skiascope;
controlling the accommodation; holding the
patient's attention; easy methods; the dif-
ferential test; dynamic skiametry; outline
skiascopy; the retino-skiameter; the oph-
thalmometroscope, and the stigmatometer.

Following the discussion of the above
mentioned topics are a number of illustra-
tive cases that really illustrate. Thirty-
eight illustrations are contained in the book.

Some of the author's own expressions
show with what fairness of judgment and
even tenor he treats his subject, hence we
quote:

"Now, skiascopy has been held by those
who use eyedrops to be valueless without
previous paralysis of the ciliary muscle,
but since the prospective patients are de-
clining to permit the use of drugs, it there-
fore becomes necessary to either devise
some method by which the art can be prac-
ticed without the drops, or else to give up
the shadow test altogether.

"The work is not a résumé of what has
already been done by others, but is to a
considerable extent original in character,
and has led to the following conclusion:
Skiascopy without drugs is far more exact
than skiascopy with drugs, but the practice
of the art in the former case requires far
more deftness, attention to detail and pa-
tience.

"As to the accuracy of the method, the
author has always assumed that the subjec-
tive method is right, and that the objective
method must be made to agree, if possible,
and that when this agreement cannot be
had it is due to the fact that the refraction,
as determined by the skiascope is not along
the same visual line as when the test types

are used, and that, therefore, there is some
irregular condition present, which may or
may not have a diagnostic importance."

Technicalities are avoided, and the test
is herein boiled down to its very simplest,
most understandable form, and affords one
more incontrovertible proof that optome-
trists, and not medical practitioners, are
the proper men to treat the subject of op-
tometry.

DOWNING'S UNITED STATES CUSTOMS TARIFF 1897.
Revised Jan. 1, 1906. Cloth, 16mo, 661 pages.
Published by R. F. Downing & Co., New York.
Price, \$2.

TO the importer in the jewelry and kin-
dred trade there is no more valuable
hand book published than this treatise on
the present tariff law with its alphabetical
list, giving the duty on every article that is
covered by tariff, directly or indirectly, and
the schedules or paragraphs under which
such duty is levied. Although this is a
hand book of the present tariff law passed
in 1897, it has gone through three editions,
and is now in its fourth, the list being re-
vised up to Jan. 1 of this year. Among the
features of the volume besides the full text
of the customs law and the alphabetical ar-
rangement of merchandise, with the rate
of duty, etc., are the text of the French,
Portuguese, German, Italian, Cuban and
Swiss reciprocity treaties, the Customs Ad-
ministration Act of 1890; the Pure Food
Act of March, 1903; a list of parcels post
countries; general shipping instructions and
advice to tourists; rules for ascertaining
duty; a list of the ports to which merchan-
dise may be transported in bond, etc., while
at the back are a number of tables such as
the metric weights and measures; extension
of pounds sterling into dollars and cents;
the value of marks of Germany, and the
Belgian, French and Swiss francs into dol-
lars and cents, as well as Spanish pesetas,
Grecian and Italian liras.

Altogether the volume contains informa-
tion that will answer practically all the
questions that will come before the im-
porter in the ordinary course of his busi-
ness.

A Remarkable Collection of Freak Diamonds.

A REMARKABLE collection of "freak
diamonds" is now reposing at the
Dore Gallery in blissful unconsciousness
of the many thousands of curious and ad-
miring eyes which will be privileged to
gaze upon their beauties, says the *London
Truth*.

The collector, a philanthropic diamond
merchant, who prefers to remain unknown,
has taken endless trouble in acquiring these
rare and valuable gems, and will devote the
proceeds to be accrued from their exhibi-
tion to building a home for poor girls
in South London.

Quaint figures of men, birds, fishes, flow-
ers, flags, daggers, swords, are all to be
seen fashioned out of single stones. An
almost perfect representation of the late
Mr. Gladstone is seen in one gem; whilst
to another the addition of a miniature
tall hat in gray felt has admirably lent
itself to the illusion of a head of John Bull.
A "C. I. V." is depicted with the aid of a
miniature khaki uniform to complete the
mise-en-scene, whilst near him rests a dia-
mond "Ally S'oper."

WALTHAM WATCHES

We beg to announce the issuing of the following described 16 size movements:

THE HOROLOGICAL REVIEW.

How Father Knickerbocker Marks *the* Hours

Prominent Clocks That Give the Time to New Yorkers in Manhattan, Brooklyn and the Bronx.

(Continued from issue of May 9.)

CLOCKS SEEN FROM THE BROOKLYN BRIDGE.

SEEN from a distance, the beautiful lines of the slender spider-web structure of the bow that spans the East River from Manhattan to Brooklyn appears little able to safely carry its hundreds of thousands of

In the crowding of that Rubicon morning and evening during the "rush" hours, time is assuredly "the essence of the contract." And, whether the couraging of the underpaid clerk looking forward to a tongue lashing from the "boss" or the Wall St. broker vowing letters of anathema to the daily papers as he mentally views stacks of dol-

of the perturbed transitory throng than during the morning and evening "rush" hours over Brooklyn Bridge.

The bridge passenger's craving for exact knowledge of the hour, or, rather, the minute, is amply appeased by time dials of a dimension easily readable from the cars. On the north side at the Brooklyn end of the big span is Robert Gair & Co.'s large tower clock. Its 12-foot dial stares boldly out from the new queer looking factory at the foot of Washington St. The building, a modern monolith consisting of a mass of reinforced concrete, representing the very latest form of fireproof structure, is a thing of safety, perhaps, but assuredly not one of beauty. The timepiece, from its 125-foot

TIMEPIECE ON THE ROBERT GAIR CO.'S BUILDING.

toilers daily between the sister boroughs. But the actually capacious advantages imparted to the steel structure by the mechanical genius of its engineers is largely minimized by the incapacity of the transportation companies, into whose merciless care the question of passage has been given. In fact, at times the exasperating conditions reach a point sufficiently extreme to tempt the suspicion of an impish determination to harrow to breaking point the hearts of the traveling horde. As a magnified "bridge of sighs" the Brooklyn autotype buries by its magnificent horrors the Venetian structure into oblivion.

LARGE CLOCK OF THE EAGLE WAREHOUSE & STORAGE CO.

lars slipping away from his grasp through inability to get at the pile of telegrams and correspondence lying unopened on his desk. the vehemence of expletive is equally heartfelt. Hotter feeling would assuredly melt the metal bands that bind those two river banks.

And evenings the returning crowds, fagged with their mental or physical strain, lose more of their largely diminished vitality in renewed vituperation at the wasteful stops and lagging progress as they think of the spoiling dinner, steaming its odoriferous lusciousness on the air, and the good wife's patience oozing away with the waning freshness of the viands.

Never is time more closely concentrated in the human mind; nowhere the outdoor dials more eagerly scanned by all and each

elevation above the sidewalk, is at the most conspicuous position for reading.

On the south side of the bridge stands an old and faithful servant to the traveling public in the form of the big dial in the Eagle Warehouse Co.'s big edifice.

Passing over the bridge the skyline on its northern side is broken by the big clock in the tower of R. Hoe & Co.'s great factory on Grand St., whence issue those mammoth printing presses to stamp in lasting words, on the entire world's newspapers, the thoughts of men that revolutionize humanity and its civic methods. The Hoe dial, distinctly visible from the bridge, is too distant to decipher the position of the hands by the ordinary naked eye, but to one's left (on the south side) peers up from Manhattan's terra firma, as we cross the river,

the *Police Gazette's* characteristic clock, which was installed in its unique structure, the Fox building, many years ago, by the Ansonia Clock Co.

As proof of the powerful claims these public time serving elements have on humanity a recent incident is worth relating. The editor of that well-known sporting paper wrote *THE CIRCULAR-WEEKLY*, a few days ago, that, upon the accidental stoppage for one day of the *Police Gazette* clock, his journal was simply inundated with telegrams, letters and postal cards inquiring why the mechanism had gone out of commission

even thumbpiece, and, with its glazed face, forms an attraction which none could pass without notice. The idea originated in the

formation expressed by numerous sidewalk clocks, such as C. Jackles', which has kept time near 53d St. since 1885. Lambert's

and asking information as to when its useful functions would again be available to the public.

CLOCKS SEEN FROM THIRD AVE. "L."

After crossing the bridge, should we continue up Park Row and the Bowery, we will pass hosts of sidewalk clocks and window timepieces, which serve to recall the fact that this was once New York's great retail jewelry district. No tower clock of any importance, however, strikes our eye until we reach the entrance to Third Ave., there to gaze on one of New York's most noted and useful landmarks.

In the venerable pile of Cooper Institute is located a clock facing south on the Bowery's changing population. Calling to study and civic discussion, this dial has timed for many years the entry of studious hundreds of thousands by day, and by night has called forth congregations to crowd its halls for political harangues of the reformer and to listen to didactic art and science lectures.

Something strictly unique in outdoor timepieces is seen in front of 151 E. 14th St., near Third Ave. It is an exact reproduction on a leviathan scale of an 18 size railroad watch, so close a fac-simile as to contain in its makeup winder, stem, joint,

STEADY DEMAND FOR WATCHES.

WHILE THE DEMAND for most articles fluctuates more or less with varying seasons, the WATCH suffers less from these changes than other products. This is because it is less an article of luxury than of utility; it may be classified among the "necessities." Time is observed in Summer as in Winter; in social engagements as in business; by the tourist as by the stay-at-home.

Whatever the season or the object, these Offices are fountainheads for the supply of Watch demands.

the two upper dials being bare of hands.

Taking the elevated railroad, it brings the traveler uptown in full sight of the handsome clock in its elevated tower of the Ehret Brewery, at 92d St. Continuing one's trip through Harlem, passing the clocks in front of the stores of William Koontz, at 114th St. and E. Laubheim, at

WATCH-SHAPED CLOCK, 14TH ST., NEAR THIRD AVE.

125th St., the traveler passes over the Harlem River and comes in sight of the big clock in the square tower of Estey Piano Co.'s factory, at 135th St. and Lincoln Ave.

Another important clock in the Bronx,

ESTEY CLOCK AT 135TH ST.

which may be seen from the "L" station at 161st St., is that in the hardware factory of William Keil & Son, at 162d St., near Melrose Ave. Situated in a square tower, the four dials of the timepiece are to be seen for many blocks to the north, east, south and west, and for years it has given the hour to the residents of Melrose and West Morrisania.

(To be continued.)

Horological Notes.

A PAMPHLET describing the "Pheils Universal Time Indicator," with drawings and specifications, has just been issued. It is claimed for the apparatus therein described that by showing the longitude and time of every place at a glance, this time indicator simplifies the study of these subjects. It cannot be gainsaid that popular information on this subject is scant, and a great want for educational purposes has been supplied by this invention. Hitherto only mariners, surveyors of geodetic measurement and college graduates have had the full grasp of this subject and the want of knowledge among the traveling public has been shown to great disadvantage and all explanatory publications with illustrations ought to have a wide and unlimited circulation. The only defect which can be rem-

CLOCK TOWER ON EHRET'S BREWERY.

edied is the supplying of equation of time tables as solar time *only* is not sufficiently exact.

A wonderful clock has been finished, according to the "Landindustrie," by a clockmaker named Woszner at St. George, in the Black Forest. This timepiece, which was completed after 18 months' labor, is adorned with various artistic and elaborate carvings in wood. The dial is supported on either side by two allegorical figures representing angels, 16 inches high, holding the arms of the grand duchy of Baden. One of the angels strikes a gong every five minutes. Between these statuettes there are moving figures of a lion in mortal combat with a serpent. The dial is crowned by a moving figure of St. George, which slays the dragon every time the clock strikes the full hour. The whole

structure is surmounted by the German eagle. Herr Woszner used no machinery all the carvings having been done by hand.

Clockmakers were highly honored in past ages, says the *New York Press*. Tompion, the "father of English clockmaking," and Graham, the watchmaker, were buried in the same grave in the nave of Westminster Abbey. A marble slab bore this in-

LAMBERT BROS.' STREET CLOCK.

scription: "Here lies ye body of Thomas Tompion, who died November 20, 1713, aged 75. Also Geo. Graham, Watchmaker and F. R. S., whose curious inventions do honor to ye British genius, whose accurate performances are ye standard of Mechanic

FOUR-DIAL TOWER CLOCK ON KEIL'S FACTORY, 163D ST., NEAR MELROSE AVE.

Skill. He died ye 16th of November, 1751, in ye 78th year of his age." This slab was removed in 1838 and a small lozenge of marble inscribed "Tompion 1713" and "Graham 1751," was substituted.

Watch Repairing.

By H. REINECKE.

(Continued from issue of May 2.)

THE isochronous adjustment for the long and short vibration of the balance is made, as a rule, in the condition of the balance spring, and as the temperature adjustment is made by a specially constructed balance and by changing its center of gyration the mode of adjusting the two can only be harmonized by the use of the fusee and the application of it again becomes a necessity in chronometers and watches of a high grade.

This digression leads to the consideration of the utility of stopworks in watches with the going barrel, of which a number of different styles have been invented, but of

PUNCHING PLIERS.

which the maltese stopwork is the principal survivor. The original object of this and other stopworks by the leading French horologists in the 18th century was to limit the use of some of the coils of the main spring in the going barrel to those which were more equal in tension and free from coil friction, and in this manner to obviate the use of the fusee. The maltese stopwork was probably retained, as it seemed best adapted to the other use of preventing the over winding of the main spring. In this capacity it is at present much used by the Swiss in the manufacture of cylinder watches. In cheap and machine-made watches with the lever escapements it has largely been abandoned.

As the watch repairers meet it almost daily, a few remarks regarding it may be in order. The star wheel, or maltese cross,

A WATCHMAKER'S WINDING BARREL.

revolves with the main spring barrel four times. Each time it passes a finger fixed to the barrel arbor, passes into and out of a slit. At the beginning of the fifth revolution the finger, owing to the form of the star wheel, at the part with which it comes in contact, stops it. The finger should be somewhat longer than the circular part of the star wheel that acts as a stop, which should be of a sensibly larger radius than the rest of the wheel. The finger should be of proper width so that the neck may be left of sufficient strength without coming in contact with the corners of the spaces as the finger enters and passes out.

The screw should be cut with a fine thread and should have a head as large as the star will allow. The employment of the maltese stopworks is often objected to on account of the room needed for accommodating them, and while a cylinder watch is probably better with such a stopwork, a

lever watch does just as well without it, and the increased room is better employed by increasing the motive power, particularly in low-priced watches. Besides the stopwork there are three other points connected with the subject of the main spring, namely, the hook, the punch and the winder.

Hooks are of two kinds; one for the barrel of the fusee watch and one for the going barrel watch. The hooks for the attachment in the former are riveted to the main spring in a round hole and the hook is made of a rectangular square piece of steel of a thickness about one-third of the width of the main spring and about twice as broad or nearly so. The end faces for forming the hook are filed at an angle of about 15 degrees.

The hook for attachment in the case of the latter (the going barrel) is a round stud screwed into the side of the barrel from the inside, the end being finished to the proper shape before the pin is removed from the screw plate. The outer waste end may be used for a holder. The hook should not project in the inside of the barrel much more than the thickness of the spring and its width should not exceed the width of the oblong hole punched in the end of the spring by the punching pliers.

A round hole in the end of the spring, allowing its attachment to the work, is apt to break out very easily. In softening the extreme end of the spring not more should be heated than is absolutely necessary. The end of the spring is apt to break or bend in a knee when the barrel is not properly filled by the diameter of the barrel-arbor and the coiled up spring. In replacing a broken spring in the barrel the proper tool should be used and the one here shown is to be recommended. It is certainly much preferable to the old pattern, in which the spring is coiled up between the fingers, whereby the fingers are often injured and the spring receives the cause of a future break, of being kinked and roughly handled.

This winder consists of a barrel with a slit in the side, as shown, and a false bottom, which may be pushed forward to eject the spring from the winder into the barrel. There are several winding barrels of different sizes to cover the whole range of watch barrels usually met with.

(To be continued.)

E. A. Colburn, who is soliciting subscriptions for a town clock to be placed in the court house tower in McPherson, Kans., reports that over \$800 has already been given. Many of the signers have promised \$50 and \$25 subscriptions and none less than \$5. Mr. Colburn expects to raise \$1,000 in large subscriptions and will then turn the work over to the City Federation of Woman's Clubs, which will complete the canvass.

Paul Wiggins, something of a clock collector, has a novel timepiece in his home which is quite accurate, though antique and clumsy. It is a metal cup with a small hole in the bottom—that and nothing more. It holds about a quart. Wiggins empties it and sets it upon the surface of a tubful of water, where it gradually fills and sinks. The hole in the bottom is of a size to admit just enough water to accomplish the submersion in exactly one hour.

America's First Town Clock.

AN old clock that has done duty in Guilford, Conn., for more than a century, and has been recuperating in a belfry for nearly a hundred years since, is to be brought out for exhibition in a few days to testify that Guilford was the first town in the United States to own a town clock, says the *New York Sun*.

The little town was founded by the Rev. Henry Whitfield in the Fall of 1639. He was a clergyman of the Church of England and came to this country for more religious liberty. He hadn't been here long before the First Church was founded. The society is still in existence.

The members of his flock met with him at his home here, which is now the State Historical Museum. In 1643 the first church building was erected on the Guilford Green and stood until early in 1700 when a new edifice was put up to replace the old building, torn down.

Just as soon as the new church was finished members of the congregation began to make plans for a bell. The bell was secured, but then a steeple had to be built to put it in.

In 1726 the steeple was completed, but the church tower looked lonely to the Guilfordites without a clock. At a meeting of the church officers it was voted that the town must have a clock.

There was no such thing as a town clock in the Colonies. Ebenezer Parmelee was the mechanical genius of Guilford, and the church called upon him to see what he could do in the clock line.

After considerable experiment Parmelee turned out the clock which has since borne his name and which made him famous in the Colony. It is a big, cumbersome affair, made entirely of wood. It was wound by means of a big crank, which the sexton of the church had to operate every Monday morning.

Dials were placed on the four sides of the steeple and this town had the only town clock in the country and the only tower and bell in the Colony.

Whenever the clock got out of order Parmelee was called upon by the church committee to repair it. After some years of labor of this kind his services as clock tinker were rewarded by the citizens of this place, who voted on Dec. 15, 1741, to free him from services in town offices so long as he continued to keep the clock ticking. The old clock did service until a new one replaced it in 1830.

Amid the cobwebs and owls it was left neglected and forgotten for years. Then somebody asked what had become of the old timepiece and searching parties found it, covered with the dust of a century, in the church tower. With it were the weights, composed of barrels of stones, that had been used for many years to run it.

The townspeople then wanted the old timepiece taken down and given a place of honor among the relics of this place, but the church society was unwilling to relinquish it entirely. Recently it was voted at a church meeting to lend the clock to the local historical society, and in a few weeks it will take its final journey to the old Whitfield house, now the village museum.

This illustration shows our main factory exactly as it exists, where 3,000 complete watches are made daily.

LANGENDORF WATCH CO.

CHAUX-DE-FONDS, SWITZERLAND.

It will be of great interest to every jeweler to learn that we are devoting our full attention to this market. The existing conditions in the watch trade have convinced us that there is a long felt want for moderate priced, but accurate Swiss Watches.

We wish to call your attention to our LONVILLE MOVEMENT. It has a lever escapement and is being made in Os, 12s and 16s, fitting perfectly all American cases. This movement is salable and profitable. Our Watches and Movements will be introduced in this market bearing the following names:

OPTICAL DEPARTMENT

The Optometrist's Catechism.

A SERIES OF QUESTIONS AND ANSWERS ON ELEMENTARY OPTICS, IN CATECHETICAL FORM.

By E. Le Roy Ryer.

Copyright, 1903, by THE JEWELERS' CIRCULAR PUBLISHING CO.

(Continued from issue of April 11, 1906.)

Q.—(650) How may we find the position and size of the image of an object formed by a convex spherical lens?

A.—Let AB, Fig. 79, represent the object. Let A be a point not situated upon the principal axis. Starting from A, draw the line ANA', passing without deviation through the nodal point or optic center, N,

FIG. 79.

of the convex spherical lens, LS. Another ray, AL, parallel to the principal axis, BX, will necessarily pass, after refraction, through F', the principal focus. The point, A', where these two rays, AA', and YA', intersect, is the image of A. Having this point, we need only erect upon the principal axis the perpendicular A'B', and A'B' is the image of AB. The above is an example of how the image is formed when the object is beyond the principal focus F, and the center of curvature C, in which case, as

FIG. 80.

will be seen by reference to Fig. 79, the image A'B', is smaller than the object AB, and is inverted and real. The position of the object in relation to the lens will, however, determine the size and position of the image.

Thus Fig. 80 represents the object, OB, at the center of curvature, C, of the convex spherical lens, LS; to find its image, draw the secondary axis, ONO', from O, which

is the line passing undeviated from A through the nodal point or optic center, N, of the lens; then draw OU, representing a

FIG. 81.

ray from O parallel to the principal axis, AX, which will necessarily pass, after refraction, through the principal focus, F'.

FIG. 82.

This line or ray, UF'O', intersects the secondary axis, ONO', at O' and thus O' is the image of the point, O. By similar construc-

tion B' will be found to be the image of the point B, and all intermediate points would be located in a similar manner, and the image of OB found to be located at O'B'. This image will be exactly the same size as the object, and will be real and inverted.

The third example, Fig. 81, shows the object, OB, situated inside of the principal focus, F; that is, between the principal focus and the lens. To find its image, draw from O the ray ONY, passing through the nodal point or optic axis, N, of the convex lens, LS; from O also draw the ray, OJ, parallel to the principal axis, AX, which, after refraction, must necessarily pass through the principal focus, F'. As these two rays are divergent, they can only be made to intersect by projecting them backward toward O', which point is the image of O. This point is, of course, negative. Having this point, we only need erect the perpendicular O'B' of the object, OB. This image will be larger than the object and will be erect and virtual.

Should the object be placed at the principal focus, no image will be formed what-

ever, the refracted rays forming merely a parallel series of rays or a beam of light.

Q.—(651) What relations exist between

HAVE You Signed the EYE-FIX Contract?

WE have adopted the Serial Number Price Restriction Plan, and are now sending contracts to all opticians and druggists in the United States. This contract stipulates that EYE-FIX shall not be retailed for less than 50 cents. As the cost to dealers is \$3.60 per dozen, you can readily see that the

Retail Profit is 66 $\frac{2}{3}$ per cent.

The demand for EYE-FIX is steadily increasing, and there is no proprietary article in the market that can be handled with more confidence and satisfaction.

Opticians will find EYE-FIX a valuable aid in preparing the eyes for a proper measurement for glasses. It is an effective tonic and antiseptic—absolutely harmless and non-irritant—and does not dilate the pupil. As a safe and sure cure for eye trouble of every nature, EYE-FIX has no equal. Dealers can recommend it to do all that is claimed for it. Every package contains a tube of EYE-FIX SALVE, as well as a bottle of liquid.

Samples and further particulars will be furnished the trade upon request.

the object and image, regarding relative sizes and positions? In other words, if it be known at what distances the object and image are from the lens, can their relative sizes be estimated?

A.—Yes; for the size of the image created by a convex spherical lens is, to the size of the object, as their distances from the optical center of the lens are to each other. For example, if it were found that the object was 40 inches away from the optic center of the lens, and the image

istics of the image formed by a concave spherical lens?

A.—The image is always on the same side of the lens as the object, and is therefore always a virtual image. The refracted rays, always being more divergent than the incident, as if they came from a nearer object, cause the image, in all cases, to appear smaller.

Q.—(654) How may the above mentioned magnifying and minifying properties of the convex and concave spherical lens be illustrated experimentally?

A.—Figs. 83 and 84 represent this. In Fig. 83, O represents an object to be looked

FIG. 83.

was 20 inches away, then the image would be just half the size of the object.

Q.—(652) How may we find the position and size of the image of an object, formed by a concave spherical lens?

A.—Fig. 82 shows how an image is constructed by a concave spherical lens. OB represents the object, perpendicular to the principal axis of the double concave spherical lens, SS'; the ray, ONJ, passes through the lens without deviation, inasmuch as it is a secondary axis passing through the

at. When the + 8.00 D. convex spherical lens is held nearer to the object than the focal length of the lens (in this case, inside of eight inches), the image, B, will appear upright and larger; when the lens is further from the object than the focal length the image, T, will appear larger, but inverted. In Fig. 84 O represents an object to be viewed through a concave spherical lens. When the object is inside the focal length the image, B, will appear upright and smaller; when the object is further from

FIG. 84.

nodal point or optic center, N. The ray, OL, parallel to the principal axis, AX, passes out of the lens in a direction as if it came from the principal focus, F, and is directed toward R. Therefore, rays given off from the point, O, are divergent. Prolonging them backward, they meet at O', which is, therefore, the virtual image of the point, O. Letting fall the perpendicular from O', we obtain the virtual image O'B' of the object, OB.

Q.—(653) What are the chief character-

istics of the image formed by a concave spherical lens? The image is always on the same side of the lens as the object, and is therefore always a virtual image. The refracted rays, always being more divergent than the incident, as if they came from a nearer object, cause the image, in all cases, to appear smaller.

Anatomy of the Nervous System.

(Lecture recently delivered before the Rochester Optical Society by DR. RALPH H. WILLIAMS.)

(Continued from issue of May 9.)

A POSTERIOR view of the medulla shows on each side of the median fissure the continuation upward of the posterior or sensory columns of the cords. Only here the column of Goll becomes the funiculus gracilis and that of Burdach, the funiculus cuneatus. These funiculi pass upward to about the upper portion of the medulla, when they practically terminate in nuclei of the same name, the nerves ending in arborizations around cells in the gray matter of its respective nucleus.

These cells in turn give off fibers which pass in various directions, some to communicate with neighboring centers, but the majority joining to form what is known as the fillet or superior decussation or crossing of the pyramids. It is at this point (the fillet), in the pons that the sensory fibers cross over to the opposite side of the brain. You will thus observe that the crossing of control is complete; the motor fibers cross either at the decussation of the pyramids or at various levels in the cord, and the sensory nerves, after leaving their nuclei in the medulla often pass through several such relay stations as they have just left before reaching the cortex of the brain. The funiculus gracilis and cuneatus pass upward vertically until they reach the lower border of the fourth ventricle when they pass deeper into the structure of the medulla.

The fourth ventricle is a diamond shaped space made up on its floor of gray matter, and it is here the greater number of the cranial nerves have their superficial origin.

The cerebellum is composed of three lobes, two large lateral lobes and one flattened central lobe of vermis; it lies in the inferior occipital fossæ, beneath the posterior cerebral lobes. Its structure is similar to that of the cerebrum as regards the presence of the gray matter outside and the white inside, but here the similarity ends. The convolutions of the cerebrum are much greater in extent than in the cerebellum, where they are simply small folds. On cross section the cerebellum presents a peculiar appearance, the white substance looking very much like the branching of a tree or shrub, hence the name given it, of arbor vitæ.

The two hemispheres of the cerebellum are connected with one another and send peduncles upward to the cerebrum and down to the medulla oblongata. The cerebellum is the great center for the co-ordination of organic impulses.

THE SPINAL CORD.

The spinal cord is that portion of the cerebro spinal nerve system which is encased within the spinal column. It is about 16 inches in length, extending from the lower border of the atlas above to the lower border of the first lumbar vertebræ below, where it terminates in the cauda equina, which passes on down the spinal canal, giving off the lumbar sacral and coccygeal nerves at their proper levels.

The spinal cord and brain are covered by three membranes, first, the dura mater, or hard membrane. In the skull this membrane forms the lining membrane of the

Optical Department.

cranial bones and is attached thereto. In the spinal canal this membrane is not attached to the vertebrae, but is connected to them by fibrous connections. The arachnoid is a serous membrane or sack filled with fluid for the protection of the spinal cord and brain. The pia mater is the vascular membrane of the cord and brain, containing within its substance the arteries, veins and nerves which nourish it. In the spinal cord it is connected to the dura mater by a fibrous band of 20 serrations or triangular projections. These projections support the spinal cord in its proper position in the spinal canal.

The cord is composed of gray and white substance. Unlike the brain, the gray matter or nerve tissue lies in the center and is surrounded by the white substance or nerve fibres. On transverse section the cord will be observed to present the appearance in its center of two crescentic masses, with a connecting portion or isthmus. The four horns of these crescentic gray masses are called, respectively, the anterior and posterior horns.

Between both the anterior and posterior horns will be observed a cleft running well into the structure of the cord. These are known, respectively, as the anterior and posterior median fissures. These fissures cut in almost to the gray matter, but leave a slight commissure of white matter at the bottom of each to connect the white matter of each side of the cord.

The spinal cord is not of the same diameter throughout. It has two pronounced swellings, one in the cervical region of the spine and one in the lumbar. In both of these locations the gray matter forms the greater part of the spinal cord on account of the fact that the cord gives off such a large number of large and important nerves at these two points. That is, in the cervical region there is the brachial plexus, which supplies the arms and a considerable portion of the thorax, while in the lumbar region are given off the large nerves supplying the legs and pelvis.

In the center of the gray matter of the cord can be observed with the naked eye a small opening. This is the central canal of the cord which connects with the ventricles of the brain and is filled with a serous fluid.

In addition to the anterior and posterior median fissures there are two antero-lateral and two postero-lateral fissures corresponding with the places where the anterior and posterior horns of the cord come to the surface. These fissures are practically formed by the anterior and posterior roots of the spinal nerves being given off at these points.

The cord is divided, roughly, into four columns on each side: The anterior or pyramidal column, which is continuous with the pyramids of the medulla; the lateral column, which is continuous with the lateral columns of the medulla; the posterior median column, or the column of Burdach, which is continuous with the funiculus cuneatus of the medulla, and the posterior column, or the column of Goll, which passes up to the funiculus gracilis of the medulla.

These divisions are further divided into

ascending and descending tracts. That will be taken up with the physiology of the nervous system. You will bear in mind, however, that the anterior columns represent the motor impulses, while the posterior columns carry sensory impulses. In other words, the anterior columns are sending out to the periphery while the posterior columns are carrying impulses to the centers.

THE SPINAL NERVES.

The spinal nerves, of which there are 31 in number—eight cervical, 12 dorsal, five lumbar, five sacral and one coccygeal—arise each from the spinal cord by two roots from the anterior and posterior horns of the cord; a motor and sensory root, which join together. Before their union, however, we find upon the sensory root a ganglion, known as the sensory ganglion. Each spinal nerve contains both motor and sensory nerves and is divided almost immediately after the union of the two roots, into two branches, the posterior of which is comparatively unimportant, as it simply supplies the muscles and integument of the back, and the anterior branches, which are of more importance, and will be taken up singly.

The spinal nerves are given off corresponding to the vertebrae whose name they bear. Thus the first cervical nerve escapes above the first cervical vertebra, and the remainder through the corresponding intervertebral foramina. Each spinal nerve gives off and receives into its anterior branch a communicating nerve from the sympathetic system. Thus is the nervous system of conscious life coupled with that of unconscious life.

The cranial nerves, of which there are 12 pairs, may be briefly described as follows: (1) The olfactory nerve, governing the sense of smell, arises by two roots, one each from the cerebrum and basil ganglion, the optic thalamus and the corpus striatum. It is distributed over the mucus membranes of the nose. (2) The second nerve, the optic, which principally concerns you, arises from the optic commissure and deeply from the optic thalamus, corpora geniculata, two small ganglions located back of the optic thalamus, just outside the corpora quadrigemina, and make their exit through the optic foramen.

The optic commissure is formed by the optic tracts, which lead forward from the deep origin of the nerve. Its minute structure you are too familiar with for me to presume to add to your information.

The optic nerve is particularly liable to neuritis or atrophy in connection with disease of the central nervous system. The cause of this is a little uncertain, unless it is due to the fact that the optic nerve is sheathless except for covering given it by the membranes of the brain, which continue upon it into the orbit, and the inner or perinural sheath, which is continuous with the pia mater of the brain, passes into the structure of the nerve with the arteria centralis retinae and is intimately connected with the structure of the nerve. Hence any inflammatory process which involved the membranes of the central nervous system could be readily communicated to the optic nerve. After passing into the orbit it receives a communicating branch from the sympathetic ganglion on the fifth nerve (Meckel's).

The third nerve, or motor oculi, the motor nerve of the eye, supplying all the muscles of the orbit except the superior oblique and the external rectus, has its origin in a center located between the third and fourth ventricle. As it passes forward it receives an important filament from the sympathetic and also receives a communicating branch from the ophthalmic division of the fifth nerve.

It enters the orbit through the sphenoidal fissure and supplies all of the recti muscles except the external. It supplies the inferior oblique, the superior palpebral and sends a branch to the lenticular ganglion. It also supplies the contractor fibers of the iris and ciliary muscle.

Paralysis of this nerve is comparatively common and may arise from a variety of causes. Paralysis of some of its fibers sometimes occurs without interference with the function of the others. Paralysis of the fibers to the levator palpebral is quite common, and is at times complete. Dilatation of the pupil may result from the paralysis of the sphincter fibers of the iris and loss of accommodation, as the sphincter pupillae, the ciliary muscle and the internal rectus are paralyzed.

The fourth nerve, known as the patheticus, has for its sole function the supplying of the superior oblique muscle. It arises deeply from a point just posterior to the corpora quadrigemina. There is a communication between the deep root of this nerve and that of the third nerve. It receives fibers from the sympathetic and the ophthalmic division of the fifth. The paralysis of this nerve suspends the function of the sup. obl. muscle and prevents the patient from turning the eye downward and outward. Any effort to do this, causing the eye to turn inward, produces double vision. It is first manifested by the inability of a patient to go downstairs owing to the fact that the double vision produces two separate sets of stairs.

The fifth nerve is the largest cranial nerve. It is a nerve of motion, sensation and taste. It resembles a spinal nerve in that it arises by two roots and has a ganglion developed on its posterior root. It also has a very large part to play in the trophic impulses of the parts it supplies.

It arises from centers in the floor of the fourth ventricle, the motor root being derived from the pyramidal body, while the motor root is derived from the lateral columns of the medulla. It also receives communicating branches from the sympathetic, and it is either through the sympathetic or through ascending columns in the cord that the nerve ultimately receives its origin in the cord from as low as the fifth dorsal vertebra.

As the nerve passes forward there is formed upon the sensory root a large ganglion, the Gasserian, the motor root passes forward beneath this ganglion, having no communication with it, but joins outside the cranium with one of the trunks from it. The nerve is primarily divided into three great divisions, the ophthalmic division, the superior max. and inferior max. The two first divisions are purely sensory, while the third is both sensory and motor, and also carries nerve of the special sense of taste.

(To be continued.)

RETAIL JEWELERS ADVERTISING

The use of this department is open to every retail jeweler and optician. Forward for criticism your newspaper ads., booklets, catalogues, novelties, circulars, etc. Ask advice and offer suggestions. Replies in these columns are unbiased. Make letters as full and particular as you desire. Every letter and ad. sent will receive full attention, though the publication of the matter may sometimes be delayed several weeks.

Decoration Day Advertising.

DECORATION DAY has not only come to be recognized as a good and fitting occasion for window displays, but it is not less a time for the promulgation of special advertisements. For such there can not be a better opportunity. It is as though it had been made to order.

The day stands just at the beginning of Summer. Aside, too, from the significance of the special occasion, the celebration of the reunion of the rent sections of our dear land, all the bitterness gone and the ushering in of the glad outdoor months, it is the time of year when most marriages are imminent. That means, of course, the season for the most general and liberal purchase of all kinds of jewelry and ornaments. In this one respect it ought to compare well with the holiday season. In one respect it ought even be better—the gifts more costly ones.

But it is also the month of graduations, the time of year when every institution of learning for the young pours out its hosts; the schools for the colleges, the special institutions and the wider sphere of life; the more advanced ones for the busier walks of the world.

These latter also make occasion for the purchase of jewelry and kindred wares, secondary only to those made for matrimonial purposes, if in the aggregate they do not indeed equal or exceed the latter. At any rate, enormous quantities of the less costly grades of jewelry are bought at this time.

For scores of such graduates are to be found every year in every community throughout the entire land. Even the cross-roads has its school. Nor are the presents of jewelry intended for the female graduates only. Undoubtedly you will find upon inquiry of the average man that it was upon his graduation from high school or some similar occasion that he received as a present his first watch, probably a silver timepiece or his first studs or sleeve buttons his links or his scarf pin. Then there are the countless other kinds, ranging from the jeweled stylographic or fountain pen, to all the utensils which may be used for smoking, no longer reprehensible for the young man, whatever it may have been or how-ever regarded for the boy.

It is worth while, then, for the jewelry dealer who believes in and does use newspaper space to make a departure in it for and around Decoration Day. It ought not to be difficult for him to strike a chord to which his community will freely respond. The chief trouble with a great deal of this

occasional advertising is that there is often to be seen running through it an obvious straining after effect. The successful advertiser will be very careful not to let the impression rest upon the public that he is trying to be funny, nor that he is pedantic or bombastical.

In the attempt to get away from advertisements that would produce such an impression he might, however, fall into other tendencies equally to be avoided; he should strive not to be too solemn, and above all, he should not be so discursive—get so far away from his subject, from jewelry, that the reader would be apt to say, if indeed he would ever go into it so deeply as to analyze: "I wonder what in thunder the fellow is driving at? What in the world has all this got to do with jewelry?"

The advice which is always given, which has always been given since the modern era of advertising began, is: "Be natural." That is good advice; none better. But it is pretty hard to teach a person to be natural, especially when it is more than likely that just the individual whom you might deem to be incrustated in a layer of affectation deems himself thoroughly natural. The term is a relative one. The best and the safest advice which can be given, and which ought to give offense to none, should read: "Be natural, and if you cannot be natural, be as natural as you can." THE ONLOOKER.

Souvenir Postal Cards as Advertising.

WHEN one contemplates the remarkable popularity of the souvenir postal card, it is not at all surprising that these pretty little devices have entered the realm of advertising. They are just now being resorted to quite liberally by business firms in many different lines as couriers of commerce. This is not only due to their great convenience and to their economy in reaching a list of patrons which is more or less scattered, but to the fact that they are more lasting than any other form of advertising, except the more expensive novelties.

A business card, representing a greater investment, may quickly be consigned to the waste basket, while a post card will be cherished for a long time and may form part of a collection, where it will have a permanent value as an advertisement.

There is such a variety of these cards on the market at the present time that it is a simple matter for a dealer with whom an order is placed to pick out a selection which may be particularly appropriate to any business.

A prominent dealer in stones, who makes a specialty of diamonds, instructed his rep-

resentatives abroad to gather up specimens of such cards as might be regarded of special interest to buyers and dealers in diamonds, with the result that he succeeded in getting together a collection which has considerable interest, illustrating almost every phase of the diamond's history, commencing with a number of views of the great establishment at Kimberley. In these are shown types of the Kaffirs who are largely employed about the mines, the means of inspection to prevent stealing of gems and a view of the interior of one of the safes of the De Beers Consolidated Mines, showing the greatest aggregation of diamonds to be found anywhere.

The thread is then carried to the famous diamond cutting establishments of Europe and the principal operations are shown on half a dozen cards. Another card shows the various ways of cutting shapes and styles of cuttings, while other cards contain full-sized reproductions of the world's most famous stones. The collection is completed with a view of the particular establishment of the firm referred to above. This collection of cards is an education as far as the diamond business is concerned and comprises a very substantial means of advertising.

The possibilities of the jewelry trade for an interesting postal card exposition are numerous. There are specimens of jewelry of historical value in all the great museums which could form the basis of such a series, the newest designs could be exploited in the same manner, or an interior view of the jeweler's store could be used.

The ingenious use of the postal card in this field is almost limitless and any dealer could likely work out some excellent ideas of his own.

What Some Jewelers and Opticians Say.

CLOUDLESS days and our brilliant sunshine tend to bring out eye defects. People need glasses here who never wore them before. It is the inability of an imperfect eye to handle the intense light that causes eye-aches and pains. People often wear smoked glasses for relief when their real need is a pair of correcting lenses. Our expert examination is free and we will gladly tell you if you need glasses or not. R. Ashby, Colorado Springs, Colo.

Grandfather clocks and others. We want you to know that we're constantly adding new stock in this complete jewelry store. Just recently we received a number of handsome mahogany grandfather clocks in new designs, with beautiful chimes. Grandfather clocks, \$150, \$200, \$300, \$400; French clocks, \$25 and up; gilt clocks (American movements), \$16 up. Desk clocks, \$3 up; and, in fact, here is almost every sort of clock at prices to suit every one. W. A. Sturgeon & Co., Detroit, Mich.

A variety of patterns in fine baking dishes. No better silver plate ware is made, either in wearing qualities or beauty of design and finish. In Butler, satin or burnished silver. Separate porcelain inside pan. Engraved with old English text, the baking dish is a rich-looking table object, \$3.50 to \$10. The baking dish has a wide range of use in the serving of vegetables, stews, ragouts, puddings and desserts.—Hofman Jewelry Co., Columbus, O.

That this department shall prove mutually beneficial to our readers, it is desirable that the members of the trade generally communicate with **THE JEWELERS' CIRCULAR-WEEKLY** regarding any advantageous device or plan which they are utilizing in connection with their business.

Decoration Day Window Displays.

Seasonable and Original Suggestions for the Window Trimmer.

DECORATION DAY comes at a most felicitous time. It stands practically at the very beginning of Summer. No holiday precedes it for some weeks. And the holiday that does precede it, Easter, is of so essentially different a character that the two have very little in common. Easter is most decidedly more of a religious character. And though there clusters around that day a secondary sense of joyousness, it is due more to the child-legends that have grown in its wake than to the meaning of the day. Nevertheless it is the latter that have tinged the window displays. These appeal rather to the child within us all than to our adult senses. Not so with Decoration Day. It carries for all of us, especially for those of us old enough to remember, a deeper, nearer, though not holier meaning. Yet withal it comes at so joyous a time that we cannot help hailing it in festal wise. The gray or the black which is festooned 'round the red, white and blue, does not give it a somber effect to our senses. It may make us thoughtful, but it does not make us grave.

Another reason which has added to the stability of Decoration Day in our business observance of it is that there is no holiday preceding it for three months—Washington's Birthday, on which the tradesman can make a decided display. For Easter is a movable feast. Therefore the tradesman loses a grand opportunity if he does not take advantage of it to the full.

The holiday which follows Decoration Day, our glorious Fourth of July, is five weeks away and almost in the heart of Summer. It is, too, of so entirely different a character that the two have very little in common. So that the window displays of Decoration Day can be made absolutely unique.

Herewith are a few suggestions for such window displays. These are all simple ones and made so with a view toward allowing even the dealer in the small country town to construct them himself. If he is at all handy they will require but little time for construction. The only tools which he will need are such as are to be found in every well-ordered household. The materials

likewise are simple and inexpensive; such as he will find at the nearest carpenter's and at his own dry goods store.

But there is one requirement which cannot be so easily supplied or obtained. Nevertheless we will assume that lay figures or dummies can easily be loaned for such occasions either as favors in the smaller communities from some of the neighboring dealers or for a small, merely nominal rental. Almost all of the clothing stores, no matter how small the town, have a few male dummies. The female lay figures are to be found just as surely in the dry goods stores.

The first display requires not even dummy figures. The main object of the display should be a cannon. A pair of rude cart-wheels can easily be secured, and the carriage can be constructed out of the most ordinary wood. Indeed, its main feature should be just a common soap box. As for the gun, any log cut and planed by the veriest apprentice will serve. All this should be painted, and if not desired more elaborately ordinary lampblack will excellently serve. The cannon should stand so that its mouth shall point toward the street into the very faces of those whom the display attracts. The log need not be scooped very deeply; indeed, merely sufficient to hold a nest; perhaps two or three inches. Around the wheels and the rear of the carriage and, in fact, everywhere that they can be trailed, shall be creepers—Virginia wisteria or any kind that may be most easily obtained. Gracefully nestling within the next right in the mouth of the cannon two or three little stuffed birdlets shall be placed. In fact, if it be desired, in their stead bird's eggs will do just as well. But two or three full-grown stuffed birds of some well-known kind that are indigenous to our forests are essential. These can be placed in any way that the taste of the constructor of the display may suggest.

The floor of the window and the sides and the rear and the top shall be covered with bunting in our national colors, consisting of both stripes and stars, the stars, as would naturally suggest itself, predominating at the top.

On the floor, if desired, and, indeed, there is no good reason for not utilizing the otherwise unemployed space at hand, there can be quite a display of jewelry.

To complete this display an appropriate sentiment, preferably in verse, should be prominently shown in the rear, just over the body of the cannon. At this height it will only be slightly above the heads of the on-lookers, and consequently not possible to be overlooked. If nothing more appropriate can be found the beautiful words of Tennyson are not altogether out of place:

"Ring out old shapes of foul disease,
Ring out the narrowing lust of gold;
Ring out the thousand wars of old,
Ring in the thousand years of peace."

Nor is there any need of lay figures in the following display as a second suggestion. This is to reproduce in heroic size the badge or the decoration of the order of the Grand Army of the Republic—a very familiar emblem to almost everybody. It is not necessary to go into a detailed description of how this is to be done; the mere suggestion ought to be sufficient. To make the eagle possible, for, of course, to carve it out or to have it carved out would be inexpedient, the eagle should be cut out of pasteboard and then covered with brown paper. The design is easily enough obtained, for every jewelry store carries a few at least of these decorations in its line of emblems and badges.

Let this be hung at the rear of the window and the rest of the space be treated as in the foregoing case, even down to the matter of the display of the jewelry.

And for a sentiment, the following is singularly appropriate:

"All nature's hue is sad to view
E'er Spring asserts her sway,
It bursts in blossoms, Red, White, Blue,
On Decoration Day."

For a third window display could anything be more appropriate for the day and the occasion than the following, suggested, of course, by the immortal lines of Thomas Buchanan Read:

"The maid who binds her warrior's sash,
With smile that well her pain dissembles,
The while beneath her drooping lash
One starry tear-drop hangs and trembles,
Though heaven alone records the tear,
And Fame shall never know her story,
Her heart has shed a drop as dear
As e'er bedewed the field of glory!"

It may seem strange that in the multiplicity of displays, symbolical and otherwise, which have been utilized, this has apparently been overlooked or neglected. In

Storekeeping Department.

view of this it may seem somewhat bold to adopt it. Yet one great objection may have appeared on analysis is to have been the obstacle. A little further reasoning, however, would have brushed this aside, for seemingly complex as the picture appears and curiously long as would have seemed the quotation, neither really stand in the way. In fact, the quotation, a most lovely word-picture, would have been in effect an added charm.

This aforesaid word-picture so vividly presents and suggests the display that little more description is needed. The figures that are required, but two, a man and a woman, can easily be arranged in suitable costumes, for the woman's consists but of the everyday home-wear of a lady in moderate circumstances. There need be no straining to have it fit the year 1861, for the words are suitable to all times as also all climes. The man's costume is a stock one, that of the "boy in blue," of which doubtless there are scores in every community.

The arrangement of the figures in the window should show the woman as half kneeling before him, arranging some detail of the uniform, while he looks down at her, his attitude conveying love for her, the uniform and accessories sufficiently portraying the other emotions he is intended to represent—pride in the responsibilities he is about assuming, love of country, etc. It will be seen that no reference is made to expression, for it would require an unusually fine set of figures to portray expressions—much finer than the crude ones likely to be obtainable.

As for accessories these, too, ought to be easily obtainable—a gun, a sword, a drum and whatever else may simply represent war and the camp. And a few objects representative of the house would be proper—a sewing machine, a rocking chair; or a table with a few sewing implements thereon, a work basket, etc., etc., not forgetting a vase of flowers, especially suitable to the occasion, and at a time when they should be easily obtainable. (As far as that is concerned, artificial flowers have arrived at such a remarkable degree of perfection and lend themselves so well to ornamentation that on the score of durability and toughness, as also that of price, they are preferable.) The arrangement of the accessories may well be left to individual taste.

The background and all else pertaining to the display may be much the same as that for the other displays suggested.

As for the quotation itself, this may either be cut out in gilt letters of an average size to vary from an inch to two inches, according to judgment and to ability to place them, or they may be stenciled or marked or engrossed, according to the ability of the maker of the display or the facilities he may have at hand. If the former method be employed, let them be tastefully pasted on a sheet of unbleached muslin or some other cheap material. Let the quotation be hung in the background, about at the height of the man's head. Care must be taken to give the onlooker an unimpeded and unbroken view of the entire

quotation, placing the author's name below at the right-hand side.

That suggests that the poem in its other two verses also gives two other splendid opportunities for displays kindred to this, "The Wife" and "The Mother." If a caption is wanted for any one of the three displays obtainable from the poem, what would be finer or more fitting than its title, "The Brave at Home."

The jewelry display in a window picture of this kind would naturally have to be subordinated, or might even have to be altogether omitted. At first blush the dealer might be disposed to reject the display altogether on this account. But let him give the subject a little more thought, and doubtless he will come to the broadminded conclusion that a display of this high character without the room or the fitness for a display of his wares might in the long run do him more good, even in a monetary way than would an inferior display with an ornate array of his wares. At any rate the matter is one for thought and even experiment. No one would be bold enough to propose this to be practised too frequently or freely. Thereby the whole end in view would surely be defeated.

But one beautiful and well carried out window display, by which is meant beautiful and well carried out in symbolism, in which the whole end and aim is the conveying of a lesson in patriotism, cannot fail to reflect credit upon the dealer making that display. Just by the omissions therein will his name and his fame be the better remembered. Is not the experiment one that is worthy of a trial?

THE ONLOOKER.

A Biblical Business Card.

THE following were the rather unique contents of the back of a business card used some time ago by a Michigan jeweler:

IF YOU ARE DOWN WITH THE BLUES

read the 27th Psalm; if you feel lonesome and unprotected, read the 91st Psalm; if you are out of sorts, read the 12th Chapter of Hebrews; if people pelt you with hard words, read the 15th Chapter of John; if you don't know where to look for a month's rent, read the 37th Psalm; if there is a chilly sensation about the heart, read the 6th Chapter of Revelation and the 6th Chapter of Galatians, 7th and 9th verses; if you find yourself losing confidence in men, read the first Chapter of 1st Corinthians; if the stovepipe has fallen down and the cook has gone off in a fret, put up the pipe, wash your hands, read the 3d Chapter of James, and then regain your good humor by calling at

to see the

**GOLD WATCHES,
DIAMOND RINGS,
PRETTY PINS**

and many other nice articles, low in price,
for BIRTHDAY,
WEDDING AND ANNIVERSARY GIFTS.

Unique Display of Diamonds Worth \$200,000.

ONE of the most gorgeous and attractive displays of diamonds that Chicagoans have witnessed for a number of years, is the calla lily design recently displayed in the store of C. D. Peacock, State St. When it is known that the entire production includes \$200,000 worth of the choicest South African diamonds, the beauty of this valuable and artistic "set piece" will be apparent to all, as a mere glance at the photograph reproduced on the front cover page in this issue plainly shows.

Pedestrians wending their way along State St. have stopped and feasted their eyes upon the majestic "diamond lily," until the foot-walk in front of the Peacock establishment was blocked with people.

The entire design is composed of about 1,200 separate diamonds and represents calla lilies in full bloom and otherwise, to be exact, one in full bloom, one about to open, and two in bud. The stems of these are bound together by a large bow-knot. The entire surface is one of sparkling diamonds, crowded together so that the surface actually dazzles with a myriad lights, whose concentrated reflections and hues affect the eyes like electricity.

The lilies are 22 inches high by 13 inches across, and consist of 1,200 stones of different shapes, sizes and values. The stones vary from those of three carats to some of one-half carat, the larger stones predominating. In the heart of the full-blown lily are three elegant rubies of three carats each, which show up to considerable advantage among the mass of diamonds.

As regards color, all of the stones are exceedingly fine, none being of less quality than "white," while many of them are "blue." The stones are technically described as "Jaegers," and all come from the diamond mines of Kimberley, South Africa. The design was placed on exhibition for a week or so, and attracted more than average attention.

Ideas and Schemes.

A CLEVER and very effective window advertising scheme was recently introduced at the store of S. D. Burritt, Rochester, N. Y. It consists of a covered disk pivoted in the center. On the under side of the disk are numerous small electric lights; on top of the disk and keeping it moving all the time are six little mice. The whole thing is enclosed in a glass case, in the corner of which hangs a string, which the mice climb down when ready for food.

An attractive advertisement has been sent out by the Trenner Optical Co., Denver, Colo. A large envelope has a string put under the flap and on the front is conspicuously printed "Pull the String and See." Inside the envelope is an illustrated folder containing information about eyes, glasses and optical goods in general.

C. E. P. Keim, Newport, Pa., has established the reputation of having as beautiful window displays as can be found in inland Pennsylvania, especially before any holiday, when the display is along the line of the holiday in its suggestions. He says these displays pay him handsomely.

[Answers are also solicited from our readers to the questions published on this page.]

QUESTION No. 1559.—Judging Amount of Silver Deposited.—*In making an electrodeposit of silver on articles, I find it difficult to judge the amount deposited, and would like to know of some way without the use of scales by which I can tell if the deposit is sufficient.* J. A. S.

ANSWER:—The simplest method is to take a piece of sheet metal, about 3 by 6 inches, which is not potashed or dipped, but simply covered slightly with emery. Hang this in with the articles to be plated. The silver will not lay close to the plate and can be peeled off. The deposit may be judged by the amount on this plate.

QUESTION No. 1560.—Soft Soldering Fluid.—*Do you know of a zinc that can be dissolved in alcohol to make a soft soldering fluid?* P. H.

ANSWER:—Chloride of zinc dissolved in alcohol will make a soldering fluid, but in soldering with this fluid the metals to be soldered must be scrupulously clean and the surfaces to be soldered must not be touched with the hand. A watery solution of sal-ammoniac will help the process, in the case of nonferrous metals.

QUESTION No. 1561.—Ink for Celluloid.—*Please tell me what kind of ink to use for writing on celluloid. The ordinary writing inks do not "take hard."*

B. W. M.

ANSWER:—Melt 30 grams of pulverized tannin in 100 grains of acetone (pyro-acetone spirit); then melt 20 grams of dry chloride of iron in an equal quantity of the above solution. By mixing thoroughly both solutions, the desired ink is obtained. It is well to remember that acetone is very inflammable.

QUESTION No. 1562.—Mosaic Gold.—*Kindly give me an alloy that closely resembles gold, and that is suitable to be gilded.* M. G.

ANSWER:—An alloy that is very beautiful in color, closely resembling gold and of very fine grain is made of copper, 100 parts; zinc, 50 parts. This composition is known as Mosaic gold, or chrysolin. It is also known as Hamilton's metal.

QUESTION No. 1563.—White Metal for Patterns.—*I would like a white metal alloy suitable for metal patterns; something that will not shrink very much.* W. M. P.

ANSWER:—A white metal mixture, suitable for patterns and non-shrinkable, may be made by using 23 lbs. of lead, 3¼ lbs. of antimony and 3¼ lbs. of bismuth. Or, if a cheaper alloy is desired, take 5 lbs. of zinc, ½ lb. of antimony and ½ lb. of tin.

QUESTION No. 1564.—Brass Solder.—*How can I make an easy flowing brass solder?* B. S.

ANSWER:—A very good brass solder is

made from copper, 51½ parts; zinc, 42½ parts; tin, 1½ parts and lead ½ part. A white brass solder is composed of 34 parts of copper and 66 parts zinc.

The Enameling of Jewelry.

By CECIL H. SHERMAN.

(Copyright, 1906, by The Jewelers' Circular Publishing Co.)

(Continued from issue of May 2.)

PRECAUTIONS IN GRINDING.

ONE cannot take too many precautions in grinding. You can crush the enamel finer by placing the pestle on the big lumps and tapping gently with a hammer. When the bigger lumps are crushed, discard the hammer and crush by bearing your weight on the pestle. When fine enough start to grind (any druggist can show you how to do this). When you get the enamel to the consistency of granulated sugar, fill the mortar with water, stir the contents with the pestle, and when settled for about 10 seconds pour off the water. Fill it up again and repeat the operation until the water is no longer milky. Then remove to the agate mortar, if you have one; if not, continue to grind in the same mortar until the enamel is as fine and free from grit as pulverized sugar, or nearly so. Now carefully wash away all the milky water as before, and place in one of the covered ointment jars. This water is generally scooped from one jar to another with the spatula shaped end of the point. Fill the jar with water and cover.

The finer the enamel is ground the better it works, provided all of the milky substances are washed away. About one-half of the original quantity generally disappears in the grinding and washing.

A good way to tell when the enamel is ground fine enough is to take a little from the mortar with one of the points or needles (never use your fingers), place between thumb and fingers and thus determine if it feels gritty.

Grind only the colors that you have immediate use for. Always keep the enamel covered with water and the cover on the dish when not in use.

When the enamel is cleaned and ground the next thing to do is to fill in the little cavities in the article with ground enamel. Try to get a place at the bench in front of a window where the light is good, but be sure there is no dust, and as a precaution wipe off the bench with a wet cloth. Get out your needles and box of small pieces of blotter; then take the dishes of enamel you are going to use, stir the enamel well with one of the points (spatula end) and throw off all the water. Fill again and re-

peat. Keep a small bottle of filtered water on the bench for this purpose. Tilt up one end of the dish and place the cover under it.

If the pieces have joints or clasps large enough to grasp with the fingers, use them. If not, catch one of them in a pin vise. Do this without touching the face or side which is to be enameled with the fingers. Hold the piece directly in front of the bench so that the surface is a little bit above the level of the bench. Do this with your left hand and rest your left arm on the bench in order to steady it. Dip a small point of steel in the dish, pick up a small quantity of enamel and put it in the required space on the pieces.

There is a place in the dish when tilted, just below the level of the remaining water, where, if you insert the point, you will get about the desired amount. Fill the cavity by repeating the dipping, being careful to have an even coating and sure that the corners are as full as the center. Tap the piece gently with the point (to settle it) and proceed with the next color. It will take a lot of practice to charge an intricate design. If, for instance, you find that the colors run together, charge in what you can of it without getting in trouble and leave the "runny" ones until later.

If you use iron plates, always let them remain in the muffle until they are red-hot; then lay them on the firing table to cool. This precaution is taken because, if a drop of water gets on one of the plates, the scale will fly off in the fire and usually spoil the charged points. When the plates are cool take a couple of strips of sheet iron and bend them round—one, one-half an inch smaller than the plate, and the other enough smaller than the first, so that when the two are laid on the plate the pieces can be set on these rings. Have a few short pieces, a couple of inches long, bent so that one or two pieces could rest on them.

When you have charged the first piece set it on the plate propped up with the bent iron, so that the surface is level with the joint. Do not touch the plate, but grip the edge with tongs and insert in the red-hot muffle. Set it on the bottom of the muffle and watch it closely. When the enamel melts or becomes glossy, take it out (with the tongs, of course), and set it on the firing table. Leave it there until cool. Brush with a dry brush, fill in a second coating fire, then let it cool.

First, about the fire: If you have gas or coal oil, everything is easy. If coal or coke, it is well to build a fire the first thing in the morning or a couple of hours before you want to use the furnace. Start it as you would a stove and when the coal has caught fill it up and don't attempt to use it for firing until you can light a piece of paper by holding it in front of the muffle. In fact, any kind of a furnace should be so tested at first.

Enamels should all be tested before starting to finish a piece of work. They should flow at a low degree of heat, so low that the metal will not burn (warp). It should not be covered with a scum or become dull of lustre when boiled out in an acid pickle. Moreover, all the colors should flow with the same amount of heat.

Use of Copper in Ancient Times.

THE range of metals and alloys at the disposition of the craftsman is really very wide, but he, nevertheless, Prof. Robert Austen says, restricts his efforts within narrow limits, and employs but few materials. The pure metals and fine wrought ironwork are seldom used, and have hardly any applications in art industries, except when in union with other metals. The two series of alloys which have prominence in the history of art metal work are those of copper and tin (the bronzes) and the copper-zinc series (the brasses). Next in importance should come the lead-tin alloys (the pewters). Of the alloys of the precious metals, the gold-copper, the gold-silver and the silver-copper are the most important.

Taking the bronzes first, the important question at once suggests itself whether copper was employed before the general adoption of the alloy of copper and tin in industrial art. Berthelot has given us the analysis of a little Chaldean statuette of a god, now in the Louvre, which is considered to date from 4000 B.C., and it proved to be of metallic copper. There is also an analysis by Berthelot of the scepter of King Pepi I. of the sixth Egyptian dynasty. This scepter, which is now in the British Museum, is believed to be 3,500 or 4,000 years old, and is of pure copper.

From the anthropological point of view copper plays an essentially different part in prehistoric culture now from what was assigned to it a short time ago. Whereas it had been assumed that copper periods existed in Europe only in a few localities, finds of it have recently increased to such an extent that the assumption of a special copper age, which was prior to the bronze age and contemporary with or near the stone age, seems to archaeologists now inevitable. Many of these objects found in Schliemann's first prehistoric city, Thos, were of nearly pure copper. Other articles in the third city were of bronze.

Our knowledge as to the first appearance of bronze has recently received new evidence in a rod found by Dr. W. Flinders Petrie at Meydum, of the fourth Egyptian dynasty (about 3700 B. C.), which proves to be a bronze having about the ratio of nine parts of copper to one part of tin, characteristic of far later and even of modern bronzes. Two works in the South Kensington Museum, one Etruscan and the other Greek, afford clear evidence of the introduction of tin into the art of those nations in the fifth century before Christ. The fact that the presence of lead in bronze enabled it to be more easily fused and also to assume a beautiful, velvety-brown patina, was,

in the opinion of the expert, recognized far earlier than has been supposed.

The use of zinc is indicated in the descriptions in detail by Pliny of the various shades of color presented by bronze. The use of brass, which was common enough in Roman times, does not seem to have prevailed in England until William Austen, in 1460, made of it the magnificent monument of Richard Beauchamp, Earl of Warwick. E. F.

Tariff Decisions on Earthen Ware, Terra Cotta, Glass, Etc.

IN cases involving duties on decorated earthen ware and articles made of terra cotta and glass, decisions were announced last week by the Board of United States General Appraisers as follows:

Terra Cotta Articles.—Protest of Haulsing & Kleppner against the assessment of duty by the Collector at New York. G. A. 6229 (T. D. 26915) followed, relating to articles of terra cotta in the shape of pigs and heads on which grass seed is to be grown.

Decorated Earthen Ware.—Protest of R. F. Downing & Co. against the assessment of duty by the Collector at Boston. The importers contended that the merchandise was improperly classified as decorated earthen ware under Par. 95, Tariff Act of 1897. Protest overruled.

Decorated Earthen Ware.—Protest of J. C. Humes Crocker Co. against the assessment of duty by the Surveyor at Kansas City. Same as above.

Chinese Terra Cotta Teapots.—Protest of Marshall Field & Co. against the assessment of duty by the Collector at Chicago. The merchandise consisted of Chinese terra cotta teapots decorated with raised ornamentation, which were classified as articles composed of earthy or mineral substances, decorated, under Par. 97, Tariff Act of 1897. In default of satisfactory evidence in support of the various contentions of the importers, the Board affirmed the assessment.

Glass Disks, Beaker Covers, Clock Glasses.—Protest of E. H. Sargent & Co. against the assessment of duty by the Collector at Chicago. This protest related to convex disks of cylinder glass, which are five inches in diameter and have ground edges. They were classified under Par. 100, Tariff Act of 1897, relating to blown glass ware, etc., and were claimed by the importers to be dutiable under Par. 192 as parts of clocks. The Board found these articles to be known as watch crystals, but that, by reason of their size, they were not suitable for watch purposes, and by reason of their thinness were not suitable for clock glasses, and that they are used chiefly in chemical laboratories as covers for beakers. Protest overruled.

Marie Antoinette's Earrings Sold at Auction in London.

ACCORDING to a special cable despatch from London, England, to the New York Sun recently, 149 lots of jewelry were sold for \$103,610 at Christie's on that date. Six of them were the property of the late Lady Currie. They brought \$24,350. The chief

items were a Latin cross pendant, composed of six large diamonds, which sold for \$7,500, and a diamond necklace, which was sold for \$5,500.

Plain, large pearl earrings, which once belonged to Marie Antoinette and subsequently were the property of two Duchesses and a Grand Duchess, went for \$2,750. The best remaining necklace, composed of 62 pearls with cluster diamond clasp, brought \$8,600.

The Making of Porcelain.

MAXILE DOAT, of the famous Sèvres factory, has written a practical treatise on the making of porcelain, which the Ceramic Studio Publishing Co., Syracuse, has issued in an attractive volume entitled "Grand Feu Ceramics." This has been translated from the French by Samuel E. Robineau, with notes on the use of American clays by Professor Charles F. Binns. As M. Doat is a master workman, his instructions and observations are of value to those who make or decorate china, and we have a legion in this country that decorates it, any way. He gives directions as to choice of clays and mixtures, of coloring material, of casting, glazing, setting and the rest of it, warning the rash experimenter that "everything threatens the destruction of the works of daring ceramists, if they do not display in their fight against the fire a good deal of skill and thoughtful patience. But all these precautions will readily occur to the mind of a man who risks in the fire six months of artistic work and all the money accruing from former sales."

The book is sufficiently illustrated, not merely with plans of kilns and figures of saggers and other materials, but with examples of the great work of Copenhagen and Sèvres, the frontispiece representing one of M. Doat's plates in hard paste, pate sur pate, a head in cameo symbolizing the snow, while the brown that circles it is a result of chemical action in the furnace.

Among the accomplishments of the potters is a palace front in *gres*, decorated with the whole palette of *grand feu* colors, and measuring 38 feet by 29 feet. Much attention is given nowadays to decoration, which is often overdone and amateurish, but there is less attention than there should be to form and to solid color. Nothing surpasses in beauty the single color pieces of the Chinese, which are to be regarded almost as examples of a lost art; but the promptings offered in this volume may stimulate a new and needed interest in that branch of artistic manufacture.—Brooklyn Eagle.

The RAMBLER'S NOTES

AN ATTRACTIVE PAT-
TERN IN CUT GLASS.

"RAMONA" is the name to the latest pattern in cut glassware from the Libbey Glass Co.'s works. It is to be seen in the store of C. H. Taylor, the company's New York agent at Park Pl. and West Broadway. Wheat sheaves extend gracefully from the center of the bowl to the edge of the flare and between the sheaves are star effects and fine diamond cuttings. Facets are cut and polished quite as sharply as if the material were diamonds, not glass. The lower surface of this diamond cutting, when touched by the hand, feels as though it were a multitude of pin points, so sharply are the edges finished. This pattern is likely to prove one of the most popular of the many that are shown on Mr. Taylor's sample shelves. Besides the regular cut glass on exhibition, there is an extensive assortment of rock crystal patterns.

ODD NOVELTIES IN
FLEMISH EARTHENWARE

FLEMISH earthenware shown at the salesrooms of the Edwin A. Denham Co., 31 Barclay St., New York, comprises many specimens that appeal to those in search of art that is simple and graceful. Besides the staple products which the company sells, it is offering to the trade another class of ware made of finer earth, and with a superior glaze. These vases and bowls are fashioned in the conventional forms suggestive of utility. The colors are brown, blue and green with variations in shading, and it is noticed that no two objects come from the fire exactly alike in tint. An odd circumstance is that some of the vases, subjected to the same process as the others, have, instead of the smooth finish, a lusterless and uneven surface quite suggestive of antique effects. These vases are sold for just what they are and meet with considerable favor. Still another line comes in an evenly dull glaze which is preferred by a part of the trade. Quite an extensive selection of statuettes and busts, modeled in clay, are shown. The subjects are divided between representations of Flemish peasant life and classical reproductions.

NEW LINES OF FINE
LIMOGES CHINA.

SOME very attractive lines of decorated china are being shown to the trade by Charles Streiff, 33 Park Pl., New York, who represents William Guerin & Co., Limoges. Buyers will admire the plates with border patterns in gold and rich shades of purple and green. A new underglaze in purple is one of the most pleasing of the color tones. In the encrusted gold work

laurel leaves and sprigs are used in one of the prettiest and most dainty designs, and there are various other vine effects. In Royal Sèvres blue there is a splendid assortment. A collection of footed cups, artistically decorated in gold and colors, will attract the eye. Quite a number of large Sèvres vases are shown, exceptionally fine works, modeled in the well known shapes and ornamented with original paintings signed by artists famed for this kind of work. A visit to Mr. Streiff's salesrooms is always enjoyed by the lover of beautiful ceramic ware and buyers will find this year's assortment more attractive than ever.

THE RAMBLER.

Recent Reappraisements of Decorated China and Earthen Ware from France and England.

REAPPRAISEMENTS of decorated china and earthen ware were announced last week by the Board of United States General Appraisers, at New York, as follows:

Decorated china from Cheippe & Barbarin, Limoges, exported Jan. 27 and Feb. 24, 1906, entered at New York (File Nos. 39094/95); findings of Waite, G. A.: Table services, 100 pieces, Lionel comp., L., 54080/130, entered at 35.10, advanced to 37.80 francs per set; do., comp., H., entered at 31.55, advanced to 34.36 francs per set. Entered value is less 5 per cent. and 2 per cent., advanced value is net. Add case and packing.

Decorated china from Gustave Balleroy, Limoges, exported Sept. 2, 1905, entered at New York (File No. 37368); findings of Waite, G. A.: Services de table, 100 pieces, Lionel T., entered at 46.21, advanced to 46.437 francs per set; do., R., entered at 47.99, reappraised at 46.376 francs per set. Entered values are less discount of 5 per cent. and 2 per cent. Advanced values are net. Add case.

Earthen ware from John Maddock & Sons, Burslem, exported March 24, 1906, entered at Baltimore (File No. 39552); findings of Hay, G. A.: R. V., white; Peerless, white; Old Savoy, white; Diana, white, unselected, and R. V., white Navarre, entered at discounts of 57½ per cent., 5 per cent. and 5 per cent.; ½ thick vitrified Mouquin Blue Empire thirds, and ½ thick vitrified A408 thirds, entered at discounts of 62½ per cent., 5 per cent. and 5 per cent. Add crates and straw. No advance.

Decorated earthen ware from Glaenger & Co., Paris, reported March 15, 1906, entered at New York (File No. 39292); findings of Hay, G. A.: Majolica plates, invoiced at 5 francs per dozen, Less 10 per cent., 10 per cent. and 5 per cent. Add 10 per cent. Add cases and packing. Importer adds on entry 19.60 francs. Advanced 10 per cent. less importer's addition.

Right to the Letter.

A NEW YORKER was once referring to the stolidity and literal-mindedness of the British shopkeeper, when he was reminded of an amusing experience of a friend in London.

The American had been making several purchases in a jewelry establishment, among others a silver set, and finding that he had with him insufficient funds to defray the entire cost, he asked the clerk to send the set to his hotel, marked "C. O. D."

Due note was made by the clerk; but when the articles arrived at the hotel the purchaser was surprised to find no charges had been collected. Opening the package the American was dumfounded to discover that each piece of silver had been carefully engraved, in a beautiful monogram, "C. O. D."—Success.

Reports on Pearl Fishing in Mexico and Australia.

CONSUL KAISER forwards from Mazatlan an article from a Mexican newspaper which says jewelers are learning the value of Mexican pearls, and this season is proving remunerative. The article continues:

"Adrian Cornejo, a prominent pearl fisher of lower California, says that the pearl fishers along the coast of the gulf are doing an excellent business this year. In this part of Mexico there is more variety in the color of the pearls found than in any other part of the world, and comprise black, gray, red, bluish-green and yellowish. Mexican pearls are fast gaining a good reputation in the world markets.

"There is now about as much prospecting for pearls in the Gulf of California as there is hunting for mines throughout the interior of Mexico, and the entire gulf coast is closely inspected by pearl fishers or prospectors. The best pearls are to be found in the bottom of the pearl beds. Among the most valuable pearls to be found in the Gulf of California are those of a reddish color. Those are discovered only occasionally. They have an exquisite luster, and many of them are large and of the most perfect shape."

RESTRICTIONS ON PEARL FISHING BY AUSTRALIA.

The report on British New Guinea for the fiscal year 1905, just published by the Commonwealth of Australia, contains an amendment to the law relating to pearl shell and *bêche-de-mer* fisheries, under which no ship or boat is to be licensed unless owned by natural born British subjects, naturalized subjects, denizens of British New Guinea or of Australia, and bodies corporate established under the laws of some part of the British dominions. This is said to have been an act of retaliation in view of the German regulations regarding Samoa. The report deals with the natives who are at present in a state of transition. They are said to lead "a most immoral, lazy and sluggish life."

Gold Used in the Manufacture of Jewelry by Various Countries.

ACCORDING to an exchange France heads the list as the country which uses up most gold in the making of jewelry. Her jewelers work up 36,000 pounds weight of gold every year—that is, about 130th of the whole amount produced. Great Britain accounts for an almost equal quantity, and the United States takes 32,000 pounds weight for similar objects, while German craftsmen for that country worked up 30,000 pounds of virgin gold during the past year.

Small as Switzerland is, she absorbed nearly 20,000 pounds weight of fine gold, while Italy and Russia between them took a similar amount. We can procure no accurate statistics from Turkey or India or China, but each of these countries uses a large quantity of gold for purposes of ornament.

AMONG the various historical styles of decoration suitable for silverware, none has attained a more lasting popularity than that associated with the name of Louis XIV of France, le Grand Monarque. ¶ It is for this reason that the Whiting Company have decided to introduce a novel and original treatment of this favorite form of French Renaissance applied to a very complete line of Hollow Ware, characteristic examples of which will be here shown from time to time.

WHITING MFG. CO., SILVERSMITHS

Broadway and 19th Street, New York.

Progression

This word signifies the course, and

Success

indicates the goal attained by

Dueber-Hampden Watches

**Pre-eminently and indisputably the
Successful American Watches**

in all sizes and grades.

Requiring no assistance but their own inherent value to find a market, and depending on no combination to bolster up weakness and lend help to force sales, they should be valued accordingly by fair-minded, independent, self-respecting Americans.

The W. J. JOHNSTON COMPANY,

Wholesale Agents of the Leading American Watch Companies,

Fifth Avenue and Market Street, Pittsburgh, Pa.

Looking Forward

is ever necessary

To the Successful Merchant.

**What you sell to-day is responsible
for your future Reputation
and Prosperity**

If poor judgment is used you are entitled to no more excuse than though you had deliberately sold what you knew to be inferior goods.

There is always **"THE BEST,"** and in watches that term stands out prominently for

Illinois Watches and Hamilton Watches

The W. J. JOHNSTON COMPANY,

Wholesale Agents of the Leading American Watch Companies,

Fifth Avenue and Market Street, Pittsburgh, Pa.

Mr. Coffee Machine—

Mr. Coffee-Pot, I must bid you adieu. I have gained such a prestige with the women of late that your presence disgusts me. Women of high standing have complimented me in the highest degree as an excellent coffee maker. I distill my coffee while you still stick to the old time methods of boiling coffee. Away! You are doomed.

I shall hereafter take up my abode in Jewelry Stores to demonstrate to the women my qualities, whence I will proceed to some private residence to make happy the hearts of the household.

Mr. Coffee-Pot—

Mr. Coffee Machine, I realize the fact that my days are numbered. While I have rendered my services to the public for years and years, you have unquestionably superseded me in my efforts to master the art of good coffee making. I am firmly convinced that my last resting place will be in the depths of the ash-heap.

It is almost impossible for me to secure a position as I am not familiar with modern methods of coffee making. My mistress even rudely ejected me from the house yesterday and hinted strongly at securing your services. You look so nice in your silver-plate attire, most any Jeweler would employ you, and you are so friendly with the ladies, too. Good-by, for ever.

GREAT MANY of the leading jewelers of America are pushing the sale of *ILLINOIS WATCHES* because of their superior quality.

If you are not entirely satisfied with the line of watches you have been selling, we would be glad to have you try a few of our manufacture.

We are sure you will find them satisfactory in every way and of greater value than comparative grades of other makes.

If your jobber does not carry them, write us for price list and discounts.

"We never follow the Fashion, the Fashions Follow Us."

MAURICE L. POWERS.

JOSH W. MAYER.

Brooches and Pendants.

ONE of the strongest features of our coming exhibition, to be held in our offices between August 13th and 18th, inclusive, will be the gorgeous stock of Brooches and Pendants. There is absolutely no limit to our productions. There will be a new era displayed in the designs of these ornaments. In our former exhibitions we have displayed certain periods, but we shall do our utmost to show a most exclusive line of the newer style Platinum work, such as has never been produced in our line of business.

If there is any part of a Jeweler's stock that does not seem to sell readily, there must be a reason for it. Perhaps it may be due to the fact that the styles are commonplace and not up-to-date. We respectfully extend to the Jewelers of this country an invitation to view some of our new and novel productions. It will be a means, no doubt, of infusing new life into Diamond mounted goods. Our designers know how to take advantage of all the little points that make the "Correct Thing" demanded by the season's fashion, and, besides, add that indefinable something which puts our productions in a class by themselves.

POWERS and MAYER,

Makers of Diamond Mounted Goods THAT SELL.

LADIES' COLLAR SUPPORTER.

PATENT NOTICE

LADIES' COLLAR SUPPORTERS

We hereby notify the trade that we have acquired the sole and exclusive rights for the United States of America in the Stevenson patent, No. 759,403, dated May 10, 1904, for Ladies' Collar Supporters—stationary and detachable.

We take this opportunity of warning the trade against buying collar supporters of any description that do not bear the above patent number.

The practical features of our collar supporters have won the approval of the women throughout America. This fact is emphasized by the enormous demand for collar supporters at this time. Dealers everywhere are enjoying a big trade on this item— and incidentally a handsome profit, too.

All pearl, $1\frac{1}{2}$ and $1\frac{3}{4}$ inches in length, per dozen pairs, **\$2.00.**

Celluloid, with turquoise, amethyst and pearl knobs, per dozen pairs, **\$1.50.** We make numerous styles in gold plated and pearl, with plain and fancy knobs, stationary and adjustable, **\$2.00** per dozen pairs and up.

Write to-day for samples and be prepared to supply your customers.

Patented May 10, 1904. Patent No. 759,403.

Wedding Presents of the German Crown Prince and His Bride Recently Exhibited for Charity.

IN the Museum of Industrial Art in Berlin the wedding presents received by the German Crown Prince and his bride were recently on exhibition for purposes of charity, and formed an object of the greatest interest to all visitors, recalling the wonders of the "Arabian Nights." The collection of treasures includes gifts from the sovereigns of all lands, and from the cities and provinces of the empire.

A large glass case holds the jewels, a glittering display of diadems, necklaces and pendants, gifts from relatives, from the Sultan of Turkey (shown in the center of the cut on this page), and from the Rus-

inscription, "Die treuen Ostpreussen, 6 Juni, 1906."

Very interesting is a cabinet containing replicas of the famous antique silver plate of Hildesheim, a gift from Hanover.

The court of the museum where the exhibition is held is tastefully decorated with Oriental carpets, flowers, etc. There is a great display of costly silver plate, pictures and the finest china, of furniture, and the most delicate point lace. Of the silver plate, the most remarkable is the table service given by 453 Prussian towns, and the splendid center-piece (illustrated in THE CIRCULAR-WEEKLY, last Fall, which came from the free city of Hamburg, and represents one of the peculiar boats which bring flowers, fruit and vegetables, every morning, to the community's citizens.

A splendid set of tea and coffee pots, in

Second Quarterly Sale of Ivory at Antwerp, Belgium.

ANTWERP, May 8.—The second quarterly public sale of ivory commenced on May 1 and finished on May 2. The following quantities passed under the hammer: 46,149½ kilos Congo (hard), 2,797½ kilos Congo (soft), 13,165 kilos Angola, 1,599 kilos Cameroon, 1,498½ Senegal, 1,148½ kilos Ambrize, 233 kilos East African (hard), 711 kilos Egypt (hard), 1,711 kilos Egypt (soft), 143½ kilos Abyssinia (soft), 252 kilos cut pieces, 219 kilos mammoth teeth, 53½ kilos sundries, 54 kilos hippopotamus' teeth, a total of 69,735 kilos.

How this compares with former years may be seen from the fact that 97,267 kilos were sold in 1905, 98,046 kilos in 1904, 95,249 kilos in 1903, 84,964 kilos in 1902, 70,285 kilos in 1901, 94,190 kilos in 1900, 78,498 kilos in 1899, 58,334 kilos in 1898, 73,600 kilos in 1897, 66,553 kilos in 1896.

The bidding has been spirited and the 69,735 kilos offered found buyers at prices showing an advance of one to two francs per kilo for heavy and medium Congo and Angola teeth, and an advance of about one to one and a half francs for bangles, teeth for billiard balls and scrivellous.

The advance in the price of soft ivory amounts to two to three francs for heavy and medium teeth and nearly five francs for teeth for billiard balls. The Senegal ivory profited by the same good demand for the other sorts.

The actual stock on hand amounts to 71,000 kilos, against 95,000 kilos in 1905, 96,500 kilos in 1904, 144,500 kilos in 1903, 129,000 kilos in 1902, 110,000 kilos in 1901, 105,200 kilos in 1900, 93,500 kilos in 1899, 58,000 kilos in 1898, 84,000 kilos in 1897, 107,000 kilos in 1896.

The next quarterly public sale will take place July 31.

The average price received during the last eight years, taking no account of the quality or the weight, is established as follows:

Year.	Per kilo. Francs.	Av. weight. Kilos.
1888.....	24.00	9 2.5
1889.....	28.25	12 1.2
1890.....	25.51	10 9.10
1891.....	20.05	9 1.5
1892.....	18.43	8 3.10
1893.....	16.00	8 1.5
1894.....	15.05	7 3.10
1895.....	16.40	8 4.5
1896.....	15.82	6 2.5
1897.....	16.95	9 3.5
1898.....	18.35	8
1899.....	19.85	7 3.5
1900.....	17.93	9
1901.....	19.41	8 3.8
1902.....	20.16	7 1.2
1903.....	19.15	8 2.5
1904.....	21.54	8 2.5
1905.....	23.54	8 2.5

The retail jewelry store of F. E. Brand, 219 S. Main St., Findlay, O., was entered by thieves a short time ago, and jewelry valued at several hundred dollars was stolen. The intruders gained entrance by using a pick axe and a chisel on a rear door, and then boring holes in the door near the lock to form a large hole, through which a hand was thrust and the door unlocked. A reward of \$100 has been offered by Mr. Brand for any information leading to the arrest and conviction of the guilty parties.

JEWELS AMONG WEDDING GIFTS TO GERMAN CROWN PRINCE AND PRINCESS.

sian Imperial family. Bracelets, brooches and rings show every possible kind of gem, in artistic setting. A tortoise shell casket containing two spoons and salt cellars was sent by the King of Siam, and two magnificent cloisonné vases by the Emperor of China.

King Edward of England presented costly gold flasks (shown in the large photo on the front cover, underneath the small plates); two beautifully executed fans were gifts of the Crown Prince and Princess of Sweden, and Duke Ernst Günther.

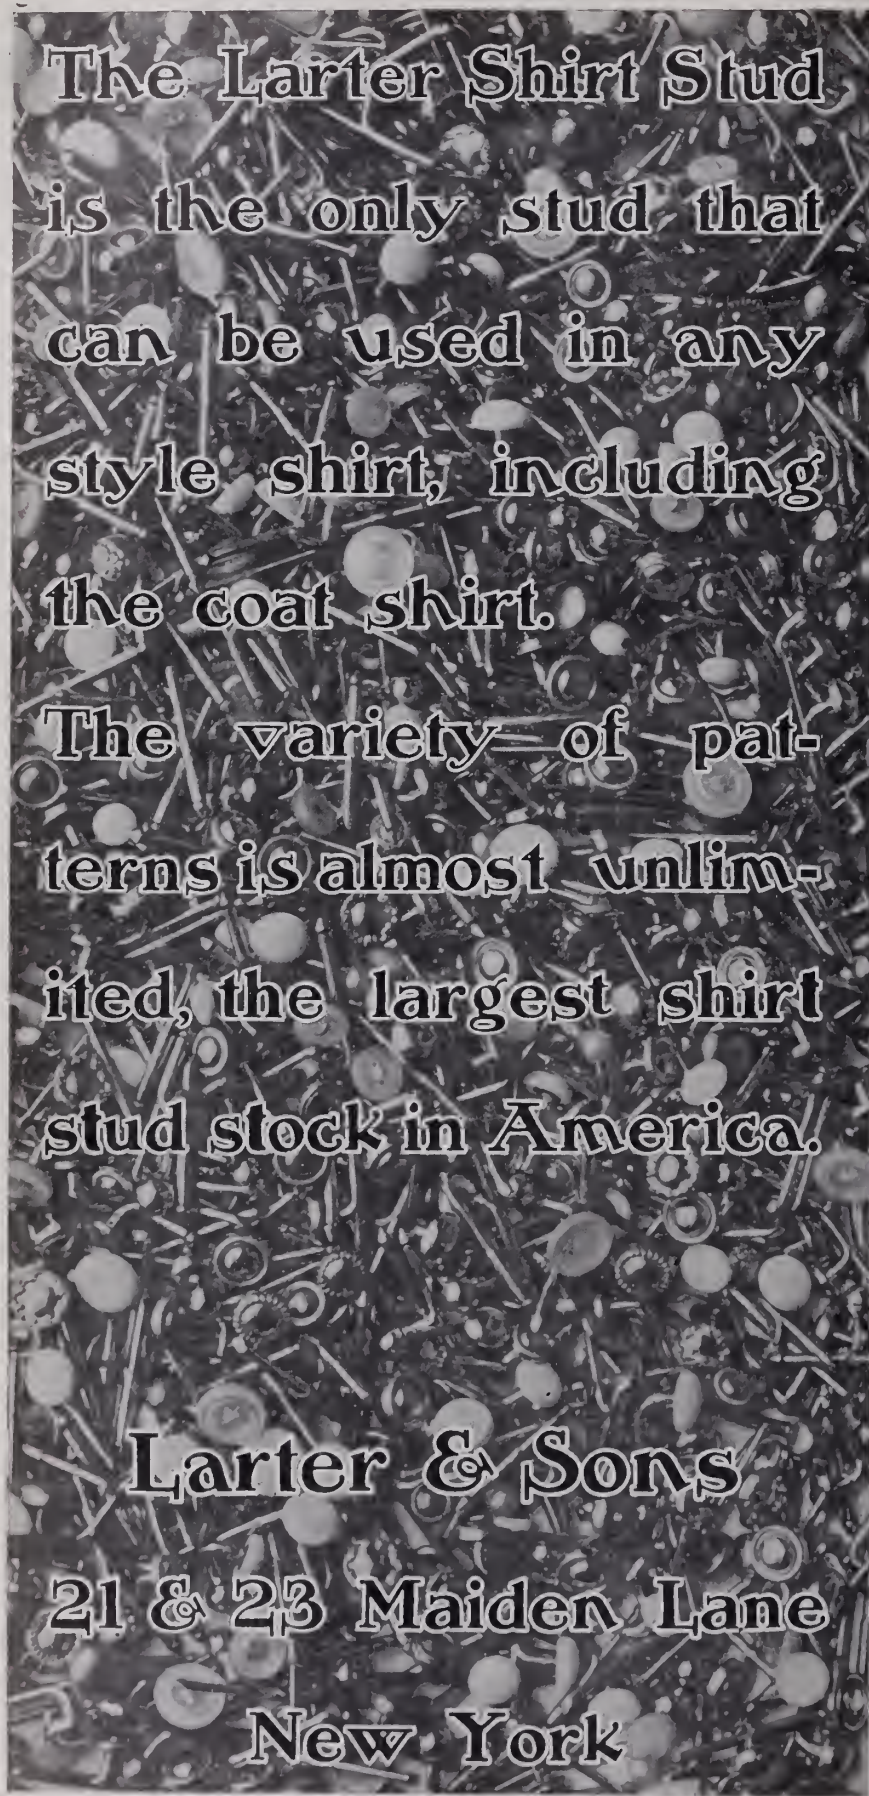

The possibilities of German industrial art are convincingly expressed by the gifts of the provinces and towns. Lack of space prevents notice of each example in detail, but as especially worthy of remark, mention should be made of the gold dessert service from the province of Pomerania, the silver center-piece, in the form of a ship, from the Hamburg-American steamship line, and the silver center-piece from the province of East Prussia. The group of elks in the latter was modeled by Professor Haverkamp, and the decorative part designed and executed by D. Vollgold u. Sohn, Berlin, in rich baroque style. It is more than three feet in length, and weighs 60 pounds. The arms of the Prince and Princess, and of the province, decorate the sides, and the center of the base bears the

antique Etruscan style, is the gift of the King of Italy, made by a Roman silversmith. A dainty tea set in enameled silver was sent by the German colony in Moscow. A wonderful mosaic picture is the present of the Pope, a string of costly pearls, that of the province of Brandenburg.

According to the *Saturday Evening Post*, a clerk in one of the leading Washington jewelry stores was showing his line of clocks to an Irishman who wanted to present one to his wife on the third anniversary of their marriage. The salesman had exhausted all of his stock except some cuckoo clocks on a shelf near by. The Celt asked to see them and the clerk took them down, thinking that at last he would make a sale. After telling Pat the price, the latter asked if they struck the hours. Instead of answering directly, the clerk wound the timepiece and set the hands at a few seconds to 12. As the little door opened Patrick's eyes bulged with interest, but when the chirping ended he plainly showed his disapproval. The man behind the counter said:

"Well, how do you like it?"

Pat thought a moment and then replied earnestly: "Faith an' it's all right, except on one point. It's trouble enough to remember when to wind it without havin' to think of fadin' the bird."

ELSIE BEE'S FASHIONS.

NOVELTIES SEEN IN A LADY'S RAMBLES AMONG THE JEWELERS.

A DIAMOND scarf pin has the head in the form of a circle of diamonds, with a pearl set free on the pin in the center of the circle, with space around it.

*

For cut flowers there is a magnificent tall cut glass vase of flaring shape on a richly decorated silver base.

*

Pear shaped diamonds fringe a costly necklace, in which a chain of large diamonds extend across the front.

*

Parasol handles and handles of the fashionable sun umbrellas take on some odd and interesting shapes in carved wood.

*

Some very rich silk and lace covered parasols have square cut club handles that fold, a convenience often to be desired in this important article.

*

A charming new bracelet displays an open design of fancy ovals formed of a narrow band of green tourmalines interwoven with a similar band of diamonds.

*

A diamond necklace of surpassing beauty is formed of diamond clusters of good sizes, each with a large central stone, from which depend large diamonds, with little space between them.

*

Sets composed of a handsome scarf pin, with sleeve links to match, come in little, silk lined cases and are most attractive. Oblong stones of green or ruby are shown framed in diamonds.

*

The long, rather heavy, handles of sun umbrellas show such designs as the entire figure of a mouse, a cat, and dogs of various breeds, and as large as can be conveniently utilized for the purpose, setting upright on the top of the handles.

*

Handsome lemonade pitchers of cut glass come in conjunction with silver, by way of embellishment, which also adds an appreciable air of richness and solidity. In some the entire top and handle are of silver, with cut glass bowl and base, or the bowl and handle and top may be of the glass on a silver stand.

*

Genuine ox-blood coral from Japan is shown in large graduated sizes of beads forming a necklet of great richness and depth of color, and supplying a unique effect in strings of beads. Rare rose pink coral and large beads of pink, shading from deep to light, are among ornaments for Summer wear with white costumes where a touch of color is desired.

*

Very handsome is a diamond pendant forming a brooch, with platinum chains depending, that are finished with diamond leaves instead of drop stones. From the stem of the maidenhair fern curved to a circle, broke in on one side, with the spreading leaves ornamenting the space from the upper end, and from the curved-in lower end, touching the leaves, the chains depend.

ELSIE BEE.

Jewelry, Clocks, Watches, Silverware and Kindred Lines Exported from New York.

WASHINGTON, D. C., May 16.—The following were the exports of jewelry, silverware and optical goods, clocks, watches and kindred lines from the Port of New York, for the week just ended:

List of Articles Recently Stolen from J. A. Bills & Son, Vinton, Ia.

VINTON, Ia., May 16.—The following is a list of watches and the stock stolen recently from the store of J. A. Bills & Son, of this place. The thieves gained entrance by prying open a rear window:

THE LOOT.

One Crown, 12 size, No. 1555011; 1 Crescent, 12 size, No. 1428719; 1 Crescent, 12 size, No. 1428744; 1 Boss, 12 size, No. 7466879; 1 Pilot, 16 size, No. 999697; 1 Crown, 16 size, No. 1462013; 1 Boss, 16 size, No. 7172871; 1 Crown, 16 size, No. 5028945; 1 Boss, 16 size, No. 7586608; 1 Boss, 18 size, No. 7423603; 1 Boss, 6 size, No. 7574519; 1 Boss, 6 size, No. 7406033; 1 Royal, 6 size, No. 3409101; 1 Boss, 6 size, No. 7246963; 1 Boss, 0 size, No. 7582736; 1 Boss, 0 size, No. 7582973; 1 Wadsworth, 12 size, O. F. Ladies' guard chains, 18-D. & C., mostly Simmons; 2-2 solid gold chains; 1-1 silver; 6 gents' gold filled fob chains; 2 ladies' gold filled fobs; 5 dozen Sadler G. F. set rings; 18 pony vest and Dickens chains; 6 second hand watches; 1 Carman bracelet; 1 Gillette safety razor; several old gold rings; 1 dozen Jackson pearl handle pens; several Aiken-Lambert black ebony handle pens, and 2 dozen gold toothpicks and pencils.

Utica Optical Club Now Known as the Utica Optical Society.

UTICA, N. Y., May 16.—The annual meeting of the Utica Optical Society was held at the Masonic Club, Masonic Temple, here, last evening. The attendance was large, several being present from out of town. The name of the organization was changed to Utica Optical Society, it having been known as a club previously.

The following officers were elected: President, Richard Perlen; vice-president, G. H. P. Stone, Ilion; secretary, C. T. Evans; treasurer, B. T. Clark; member of executive committee, A. M. Kenney; librarian, N. A. Burrill.

Following the business session, a banquet was enjoyed, served by the club steward. The society is in a flourishing condition.

R. S. Huston recently sold his business in West Branch, Ia.

G. W. Goldsberry has sold his business in Craig, Nebr., to Fritz & Bernstein.

Virginia State Optical Association Starts a Jewelers' Section.

RICHMOND, Va., May 16.—The annual meeting of the Virginia State Optical Association was held in the parlors of Murphy's Hotel here, May 10. The first session opened at 2.30 p. m., and after the routine business the election of officers was taken up. V. B. Gilbert was elected president; W. T. Blanton, Farmville, Va., vice-president; W. Wayt Royall, Martinsville, Va., secretary, and F. S. Bullington, Richmond, Va., treasurer. Dr. A. Weck, Norfolk, was elected chairman of the executive committee.

The meeting was well attended, and among the important transactions was the forming of a jewelers' section. It was decided that any jeweler or optician was eligible to this section upon payment of the initiation fee (\$1) and dues (\$1) for the current year, no examination being required. To be eligible to the physiological section an examination is required, with an additional fee of \$4 and dues of 50 cents. Certificates will be issued to members of either or of both sections.

Eight applications were received and passed on, and the new members attended the night meeting. The last meeting was held at 8.30, and after preliminary business the association was entertained by several good talks and papers from Drs. Hale and Weck and Mr. Thompson. At 10.30 the meeting adjourned to the dining-room, where an elaborate banquet was served.

The association will urge every jeweler and optician in the State to make application for membership at once. The next meeting will be held in Newport News, the scene of the coming Jamestown Exposition.

Annual Meeting of the Granite State Optical Association.

BOSTON, Mass., May 16.—The annual meeting of the Granite State Optical Association was held at the American House, this city, Monday. After a bountiful repast the meeting was called to order by President White at 8.30 p. m. Briggs Palmer, of this city, was the speaker of the evening. He gave a very instructive talk on "The True Optometrist's Profession."

This was followed by a discussion: in which the following gentlemen took part: Mr. Brown, Manchester; Mr. Gordon, Hillsborough, and Mr. Martin, Nashua, N. H.

The following officers were elected for the coming year: President, W. E. Burpee, Manchester, N. H.; first vice-president, C. H. Sinclair, Concord, N. H.; second vice-president, F. C. Sanborn, Wilton, N. H.; treasurer, W. L. Fickett, Concord, N. H.; secretary, Joseph Geoffron, Manchester, N. H.

Executive Committee—Chas. F. Hussey, Portsmouth, N. H.; Delmont E. Gordon, Hillsboro Bridge, N. H.; W. H. Mould, Freemont, N. H.; A. K. Forsaith, Manchester, N. H.; N. D. Sawyer, Laconia, N. H.

A vote of thanks was given to the retiring president for his efficient services, and he was elected an honorary member of the association. The association is in a very flourishing condition. The optical library is proving of great benefit to the members.

Kassel Salzman, Who Gave Worthless Checks to New York Jewelers, Sent to Penitentiary on Another Charge.

Kassel Salzman, who was arrested, several months ago, on a charge made by a clothing firm who had dealings with a number of jewelry houses, was last week found guilty of grand larceny, second degree, and sent to the penitentiary for 12 months. Although Salzman was not tried on any charges preferred by jewelers, evidence in relation to his dealings with them was put in the possession of the District Attorney's office.

Among the jewelry houses with which Salzman had dealings was Aisenstein & Woronock, 22 Eldridge St. Mr. Woronock, after Salzman's arrest, called at the Tombs and identified him as a man who had been busy on the East Side buying jewelry and other merchandise and tendering payments with checks, some of which were not of any value. Believing that the trade should be warned of operations of this kind, Mr. Woronock made a collection of these worthless checks and turned them over to the District Attorney.

Mr. Woronock says that the man claimed to be connected with a house at Kingston, N. Y., the name of Salz & Co. being given. The subsequent transactions are detailed by the jeweler. Salzman made one or two purchases of jewelry from Mr. Woronock, paying in cash and good checks. Then the man bought some more jewelry, paying with a check, which was afterward refused at the bank. Salzman also returned a portion of the jewelry and obtained the cash value before Mr. Woronock had heard from the bank as to this worthless check. These purchases were all for less than \$50.

One day, just before the check came back from the bank, the man picked out a bill for \$175 and called for the jewelry after banking hours, presenting a check in payment. To this Mr. Woronock objected and did not allow the jewelry to leave the store. The man gave his address as 282 Broome St., but when Mr. Woronock went there he was unable to find Salzman.

Among others who turned over dishonored checks, said to have been accepted from Salzman, were Korones Bros., 32 Maiden Lane; L. Kroll, 36 Eldridge St., and several merchants in other lines of trade.

Salzman last year sued a man for \$10,000 for slander. Another case was brought by Salzman against a merchant who sold the former stock and afterward seized it on the ground that there had been no payment. While the latter case was being tried in court Salzman was arrested and, instead of being plaintiff, he became defendant in the proceeding which has now resulted in his sentence to the penitentiary.

Death of Solomon Spring.

BRISTOL, Conn., May 17.—Solomon Spring, for many years a well-known clock-maker of this place, died yesterday at his home on Divinity St., after a brief illness. The deceased was born in Granby, Jan. 29, 1826, and was the son of Thomas Spring. He learned the business of clockmaking with Burnham Terry, in Terryville, and

moved later to Bristol, where he spent the rest of his years.

Mr. Spring started in business on his own account in 1864, when he bought out the Birge factory on Riverside Ave. He established a factory in Forestville in 1867. His business prospered at that place, but his building was finally destroyed by fire. It was rebuilt and again burned in 1873. In 1885 his business was merged with the E. N. Welch Mfg. Co., and continued under that name until the Welch concern went out of business. Mr. Spring retired from active business about 12 years ago.

The deceased was twice married, his first wife being Marcia Cornell, of Waterbury, by whom he had two daughters, who are still living. His first wife died in 1883, and his second wife, Catherine Gillette, survives him.

Patent Commissioner's Decision as to Trade-Mark on Watch Cases.

WASHINGTON, D. C., May 16.—The Commissioner of Patents of the United States Patent Office has declared an interference between the application for the registration of trade-marks filed by the Philadelphia Watch Case Co., the Deuber Watch Case Mfg. Co., the Keystone Watch Co. and Byron L. Strasburger & Co., involving the right to the use by the respective companies of the words "silveroid," "Silverine," "silverod" and "silverex" as trade-marks to be used on watch cases. The Philadelphia Watch Case Co. and the Keystone Watch Case Co. moved to dissolve the interference upon the ground that no interference in fact existed between these various words. The Examiner of Interferences and also the Commissioner of Patents denied the motion and held that interference in fact existed.

The meaning of this decision is that the words "silveroid," "silverod" and "silverex," as employed by the Philadelphia Watch Case Co., the Keystone Watch Case Co. and Byron Strasburger & Co., are, in the commissioner's opinion, similar in sound and appearance, and are therefore not entitled to registration following the prior registration of the Deuber Watch Case Mfg. Co. of the word "silverine" for use on the same class of goods.

The Commissioner also held that in view of the fact that the other companies named were not able to allege a date of adoption and use of their respective marks prior to the date of registration by the Deuber concern; that they had not overcome a *prima facie* case, made out by the latter company, and had no standing before the office.

The Philadelphia Watch Case Co. is involved in an interference before the United States Patent Office with the Hampden Watch Co., involving the right of the latter company to use the word "Diadem" and a representation of a trade-mark for use on watch movements. The Philadelphia Watch Case Co. claims the use of the word "Crown" and the representation of a crown as a trade-mark for use on watch movements, watch cases and watch parts. Testimony is now being taken and a decision is expected in the Fall.

N. H. Barber & Co., Fullerton, Nebr., will shortly add a line of drugs to their jewelry stock.

Clocks and Watches Imported by Chile from Europe and the United States.

WASHINGTON, D. C., May 19.—The trade promotion bureau of the Federal Government is advised that clocks are imported into Chile to the extent of about \$30,000 per annum, Germany furnishing about three-fifths and the United States one-third. Cheap American alarm clocks seem to be in particular demand, and there is evidence that our sales of other grades are increasing as well.

The imports of watches are about three times as large as of clocks. Gold and silver watches are credited chiefly to France, but it is probable that many of them are of Swiss origin. Switzerland stands second, selling about half as many as France, while the share of the United States is small—10 per cent. of the total. In watches of "other metals," however, the United States leads with 42 per cent. of the total of \$32,000 worth in 1904. France and Switzerland together send about the same amount as the United States. The strength of the United States, therefore, seems to lie in the demand for the more inexpensive grades of both clocks and watches, good movements in cheap cases, and a larger trade could probably be done by catering to this demand.

The duty on clocks varies from 25 to 35 per cent.; on watches, 15 per cent. on a valuation which for gold watches varies from \$12.60 to \$18 each, for silver watches from \$3.25 to \$7.20, and for those of "other metals" from \$1.08 to \$1.32.

United States Court Hears Argument on Injunction Asked by Geo. H. Robinson Against Gorham Mfg. Co.

PROVIDENCE, R. I., May 17.—A hearing was given yesterday before Judge Brown in the United States Circuit Court on the bill of complaint brought by George H. Robinson against Edward Holbrook, the president and treasurer of the Gorham Mfg. Co., and others. The action was begun, as previously reported, for the purpose of prohibiting the transfer of Gorham stock for stock in the Silversmiths' Co., of New York, and to prevent the other changes agreed upon at the recent meeting of stockholders. The plaintiff was represented by Samuel Untermeyer, of New York, and Walter B. Vincent, of this city; the defendants by Comstock & Canning, of this city, and Olney & Comstock, of New York.

An affidavit by Mr. Robinson was read at the opening of the hearing. In substance Mr. Robinson charges that the plan adopted by the stockholders is for the purpose of enabling Mr. Holbrook to obtain absolute control of the business of the Gorham Mfg. Co. He said that, under the present capitalization, it would cost Mr. Holbrook nearly \$1,000,000 to obtain this control, by buying stock—if any were for sale. Under the plan adopted at the meeting Mr. Holbrook, it was said, could get control by exchanging the portion of the common stock of the Gorham Co. which he owns or controls for Silversmiths' stock and buying an additional amount of the Silversmiths' stock at a cost of less than \$211,000.

The following figures are set forth by Mr. Robinson in his argument. "As he [Mr. Holbrook] owns and controls over 38 per cent. of the common and preferred stock of the Gorham Co., he would be entitled to purchase 38 per cent. of the issue of \$1,750,000 of the Silversmiths' stock; but in order that he might acquire a majority of the \$7,000,000 stock of the Silversmiths' Co. to be issued, it would be necessary that he should exercise this right of purchase only with respect to 13 per cent. of the \$1,750,000 issue. Thirteen per cent. amounts to \$227,500, which, added to \$3,289,400, which he would acquire in exchange, would aggregate \$3,516,900, which is more than a majority of the total issue of \$7,000,000.

The affidavit intimated that the plan as proposed is unfavorable to the holders of preferred Gorham stock, and on this ground Mr. Robinson partly based his objections. It was also claimed that there had not been sufficient notice to stockholders of the meeting when the vote was taken on the proposed changes.

All the charges were contravened in affidavits read by R. H. Comstock, in behalf of the defendants. The affidavit of Herbert J. Wells, a director of the Gorham Mfg. Co., said that there had been no agreement to elect any director or officer of that corporation to a position as an officer of the Silversmiths' Co. An affidavit by John F. P. Lawton, the secretary of the Gorham Mfg. Co., disclosed that at the meeting of the company, when the new plans were adopted, 35,787 shares of stock were represented, of which 32,265 shares

voted in favor of the merger, 3,251 against, and that 271 shares were not voted on.

An affidavit by Edward Holbrook showed that he is a resident of New York; that he has been treasurer of the Gorham Mfg. Co. since 1877; that the company, which began in a small way, had become a large and prosperous concern owning several subsidiary concerns. It was declared that these are conducted as separate concerns, the capital and credit of the Gorham Mfg. Co. being used for the purpose; that a plan was conceived whereby the Gorham Mfg. Co. might be relieved of the burden by means of the organization of the Silversmiths' Co.; that there had been no agreement whereby any of the officers of the Gorham Co. were to become officers or directors of the Silversmiths' Co.

It was conceded by Mr. Untermeyer after hearing the affidavits that the court had no jurisdiction as far as Mr. Holbrook is concerned, as he is a resident of New York, Mr. Robinson also being a resident of that city, and there being no diverse citizenship. By consent of counsel the bill was dismissed as far as it relates to Mr. Holbrook, and the hearing proceeded as against the Gorham Mfg. Co.

Both sides then said that they would like to submit briefs as to the law relating to the power of the Board of Directors of the Gorham Co. to increase the stock of the Silversmiths' Co. Mr. Untermeyer also said that he would cite authorities on the question of the right of a company to sell out to its own subsidiary company, and the court ordered all authorities to be filed not later than Saturday.

The question arose as to whether or not those who had made subscriptions to the new company and were to pay for them June 1 would not be embarrassed by the delay. The court said that a decision on this matter could be speedily reached after the briefs had been filed. The court further said that the standing of the complaint would be the same as previous to the hearing, and the session was adjourned.

Briefs were filed by the several attorneys on Saturday. The position of the Gorham management, as indicated by the argument, is that the charges are in the line of business progress; are especially designed with a view to preserving the individual character of each of the affiliated companies; and in no respect involve unfairness toward any interest. A gentleman familiar with this side of the case said:

"As published in THE CIRCULAR-WEEKLY of May 2, the call for the special meeting, when action was taken on this matter, distinctly stated what general power was sought from the stockholders. At the meeting the matter was laid before the entire body of stockholders there assembled, representing between 35,000 and 36,000 shares out of a total of 50,000 of the stock of the company, and the resolution was voted unanimously, with the exception of Mr. Robinson's stock, and a small amount of stock held by one of the Providence brokers, who responded 'Not voting.'

"This meeting was comprised of holders of both preferred and common stock, and there was no criticism on the part of any of the preferred stockholders that the plan

was unjust to them, nor is any such claim made now. If there were a substantial basis for the claim that this plan was unjust to those stockholders, it is rather singular that out of some 300 or more stockholders, not one joins in this attack upon the plan. So far as can be learned in Providence, the unanimous sentiment of the stockholders, both preferred and common, with the exception of this one protestant, is in favor of the plan."

Stockholders of American Waltham Watch Co. Unanimously Ratify Sale to Waltham Watch Co.

Stockholders of the American Waltham Watch Co. have received in the last week a circular notifying them of the sale to the Waltham Watch Co., under the terms of the proposal published in THE CIRCULAR-WEEKLY of May 2. At the special meeting held May 15 in Waltham the vote was taken and was unanimous. The property of the old company passes to the Waltham Watch Co. in exchange for 40,000 shares of preferred and 70,000 shares of common capital stock of the new corporation, which assumes all liabilities. The directors of the American Waltham Watch Co. were authorized to distribute these shares in the proportion of one share of preferred and 1 1/4 shares of the common stock of the new for every share of the old stock.

The annual statement of the American Waltham Watch Co., as of March 31, 1906, compares as follows:

	ASSETS. 1906.	1905.	1904.
Real estate.....	\$921,005	\$925,193	\$900,556

Death of Louis J. Lamb.

ATTLEBORO, Mass., May 21.—Louis J. Lamb, one of the best known and most respected men in the jewelry trade of this section, died Sunday afternoon at the home of Dr. Bailey in Philadelphia. He went to that city to be under the personal care of the physician and was being treated for Bright's disease. The cause of his death was cerebral hemorrhage. J. L. Sweet, of the R. F. Simmons Co., Mr. Lamb's lifelong friend, has gone to Philadelphia to accompany the body home.

Mr. Lamb was born in 1852 at Charlestown, Mass., but the greater part of his life had been spent in Attleboro. He was the son of Norval B. Lamb, a member of one of the oldest families in this section. Mr. Lamb has always been a prominent jeweler, having been connected with three firms. He

THE LATE LOUIS J. LAMB.

started with W. H. Wilmarth & Co. on County St., which concern manufactured coffin trimmings and fancy metallic ware. Soon after he bought out the Granville W. Smith Co., but continued to make the same articles. Later this firm was changed to C. H. Allen & Co., and the line of goods it manufactured also changed. Twice this last named concern has moved into larger quarters. Mr. Lamb's brother, William H. Lamb, is also connected with him in the firm.

During his life Mr. Lamb held many public offices of trust in Attleboro. For many years he had been one of the Board of Sinking Fund Commissioners. He was a member of the School Committee for several years, and for 20 years was a trustee of the Public Library, being one of the prime movers in the effort to erect the new Public Library building. He was also a director of the Attleboro Savings Bank at North Attleboro, and had been connected directly and indirectly with many of the real estate transactions in this town. His advice was constantly sought on all subjects by many of the leading business men, and when given was usually followed, especially on financial schemes. For many years he was superintendent of the Murray Universalist Sunday School, and was also one of the founders of the church.

Mr. Lamb leaves a wife, Mrs. Elizabeth Becket Lamb, and three sons, Roland Manchester Lamb, Dr. Arthur Becket Lamb, of Harvard University, and Leonard Illman Lamb.

Wisconsin Retail Jewelers Meet at Milwaukee and Form a State Association.

MILWAUKEE, Wis., May 16.—The meeting held Monday in this city to form the Wisconsin Retail Jewelers' Association proved a success in every way, and the organization has now been launched with the names of over 100 members on the charter roll. The objects of the association are many, but essentially it is to protect the members from abuses which have grown up in the trade; to watch carefully the movements that may conflict with the best interests of the craft, and to aid jewelers by preparing methods by which honest dealers may be commended and dishonest goods be condemned.

The meeting, which was held in the rooms of the Merchants and Manufacturers' Association, was enthusiastic from the beginning. The constitution and by-laws of the organization were adopted, and officers elected to serve until the first annual convention, which will be held in this city, June 27 and 28. The officers elected are: President, A. J. Stoessel, Milwaukee; vice-president, Gustave Keller, Appleton; secretary, F. O. Thomson, Milwaukee; treasurer, John P. Hess, Fond du Lac. Directors—George Durner, William Upmeyer and Henry Stecher, Milwaukee, and F. H. Coburn, East Troy. Hereafter the convention will be held annually in June.

Among the many jewelers present were a number from this city, and a good representation from smaller cities and towns of the State.

W. H. Upmeyer acted as temporary chairman and F. R. Wilde temporary secretary of the organization. One of the active workers of the movement was F. O. Thomson.

Death of Abraham Bitner.

LANCASTER, May 21.—Abraham Bitner, 71 years of age, a man long prominent in Lancaster's business life, died, Sunday, from paralysis. Mr. Bitner was best known through his connection with the watch factory now called the Hamilton Watch Co.'s factory.

The original company, which erected for its factory what is now the main building of the Hamilton concern's plant, was in financial straits when Mr. Bitner and a few Lancaster financiers formed the Lancaster Watch Co. in 1887 and bought out the other company. For a while the new organization prospered, but persistence in clinging to certain patents favored by Mr. Bitner eventually brought disaster upon the company, and it, too, like its predecessor, was only saved from worse disaster by reorganization, the Hamilton Watch Co. succeeding the Lancaster concern. Mr. Bitner's experience cost him dearly, for he sunk all he was worth, \$60,000, and his brother, Charles A. Bitner, lost even more, while a number of other Lancaster business men suffered severely. The factory only scored success under its present management.

Assets and Liabilities of Schickerling Bros. & Co. as Shown by Bankruptcy Schedules.

Schedules in bankruptcy were filed Thursday in the United States District Court at New York by Conrad L. Schickerling, in behalf of the corporation of Schickerling Bros. & Co., manufacturers at 28 E. 22d St., New York. Leonard Bronner signed the schedules as Mr. Schickerling's attorney. The total liabilities were placed at \$290,133.12, of which \$55,799.69 is on notes and bills, for which others are responsible. Included in the total is also \$35,210 classed as contingent indebtedness. The secured debts amount to \$94,922 and the unsecured to \$193,952.

The assets are nominally valued at \$91,498.92. This amount includes the face value of insurance policies amounting to \$53,500. The debts due on open accounts amount to \$16,842. The value of the stock in trade is placed at \$20,000. The cash on hand is \$156.

Among the creditors holding securities are: State Bank, \$19,004; H. C. Hardy, \$19,588; James Talcott, \$41,376; David Mayer, \$7,663; L. Heller & Son, \$2,207; L. Tannenbaum & Co., \$3,450; S. W. Wollstein, \$211, and the Commission Merchants' Association, \$120. The value placed on the securities by Mr. Schickerling equals or exceeds that of these debts in all cases except that of Mr. Hardy, who holds notes to the amount of \$13,645. Mr. Talcott has notes of Edelhoff Bros. & Co., now in the hands of a receiver, to the extent of \$37,500. He also holds a transfer of accounts making his total nominal security \$67,161. The jewelry and accounts transferred to the State Bank as security are valued at \$40,000. Mr. Mayer's security, comprising jewelry and the surplus in the State Bank, is valued at \$23,000. Customers' notes are given as the security held by L. Heller & Son and L. Tannenbaum & Co. The Commission Merchants' Association is said to have jewelry and accounts to the amount of \$2,000.

Following is a list of unsecured creditors: Eichberg & Co., \$3,196; Oppenheim & Strauss, \$3,149; John Tichenor & Co., \$878; Mallett & Maxwell, \$2,283; Frederick Wacker, \$346; Ernst Vecek, \$1,004; Eberhard Heller, \$2,676; Eimer & Amend, \$195; Arthur Marson, \$411; Chapelle & Shaubacher, \$142; Azure Mining Co., \$180; R. A. Breidenbach, \$570; Goodfriend Bros., \$804; Mrs. E. O. Schroeder (money loaned and open account), \$29,044; Conrad Schickerling, care L. Bronner (money loaned and merchandise open accounts and creditor holds notes), \$53,881; Hershers Bros., \$179; John Roth, \$162; New York Edison Co., \$135; Gans & Iselin, \$150; Dennison Mfg. Co., \$219; William Reiman, \$377; Stern & Rushmore, \$125; Guy Whit-house, \$216; Schwartz & Co., \$251; Bradstreet Co., \$100; Herring-Hall-Marvin Safe Co., \$200; T. M. Schroeder, \$1,935.

Fred. J. Loos, Mauch Chunk, Pa., has sold out.

Ernest J. Leben, Americus, Ga., recently offered his creditors a composition at 25 cents on the dollar. Mr. Leben was formerly in business at Jennings, La., and in the fall of 1904 opened at 408 Jackson St., in Americus.

San Francisco Jewelers Making Great Progress.

Retail Jewelers Anxiously Watching the Development of a New Retail Jewelry District—An Association Formed to Help the Unemployed.

SAN FRANCISCO, Cal., May 16.—Most of the wholesale dealers are now fairly well settled as far as immediate business is concerned. Those firms which intend to locate in the Jewelers' and Silversmiths' building, at 717 Market St., are preparing to move within a few days, although it looks as though there may be some delay in a few cases. One or two wholesale houses will remain in Oakland for several months to come, while others are already preparing to handle incoming stock from their temporary offices in this city.

This week the main interest centers in the future of the retail trade. Aside from Shreve & Co., none of the big retail houses has announced definite intentions for the future. Most of the larger concerns intend to resume business, but they are not disposed to rush matters in the selection of either temporary or permanent stores. They do not anticipate any great amount of retail jewelry business here for some time to come, and they prefer to await the developments of a permanent retail district in the city before they sign leases.

A number of stores have located along Fillmore St., where a lively trade in cutlery, plated ware, etc., has sprung up. Several pawnbrokers have also opened in the city, and these are doing some business in jewelry, watches, spectacles, etc.

SAN FRANCISCO, Cal., May 16.—The wholesale and retail jewelers and silversmiths of this city held a meeting at 1551 Devisadero St. this week to lay plans for the relief of their former employees. It is estimated that 3,000 jewelers, who were working in this city at the time, have been thrown out of employment without the same prospect for a resumption of work that those in other trades enjoy. The problem of aiding these, which early attracted the attention of the members of the New York Jewelers Board of Trade, is now to be taken up by the local people, who will add their portion to the generous contribution from New York.

At the meeting an organization was effected under the name of the Jewelers' Relief Association, and the following officers were elected: Kenneth Melrose, of the W. K. Vanderslice Co., president; Col. A. Andrews, vice-president; R. F. Allen, of the Morgan & Allen Co., secretary, and Leon Carrau, of Carrau & Green, treasurer. The executive committee consists of A. Hirschman, Bruce Bonny, of Shreve & Co.; John A. Hammersmith, of Hammersmith & Field; B. Schaezlein, of Schaezlein & Burridge; H. H. Adams, Kenneth Melrose, Col. A. Andrews, R. F. Allen and Leon Carrau.

All former employees who may be in need have been asked to report to the association through its secretary, R. F. Allen, 1867 Post St.

The following letter has been received from the officers of the Jewelers' Relief Association of San Francisco, organized to help those formerly connected with the jewelry trade of San Francisco, who may be in need of assistance, and to receive and dis-

burse funds kindly donated for their relief:

1867 Post St.,

SAN FRANCISCO, Cal., May 16, 1906.

Editor of THE JEWELERS' CIRCULAR-WEEKLY:

The prominent wholesale, retail and manufacturing jewelry concerns of San Francisco have organized the Jewelers' Relief Association of San Francisco, for the purpose of extending assistance to those formerly connected with the jewelry trade who have been left in actual want by the great calamity which has recently visited us.

We understand that the various jewelers' organizations, including both the jewelers' boards of trade located in the various cities, and the organizations of both office and shop employees, have been soliciting contributions for the relief of those in their lines in this city who are at present in need of such assistance. This organization has been formed partly for the purpose of receiving such funds and arranging for their proper distribution.

You can help us materially by giving prominence in your publication to the organization of this association and by bringing it in touch with all of those in the trade, including trade organizations.

There are from 2,000 to 3,000 men formerly connected with the jewelry trade in various capacities in this city, who will probably not be able to find employment for some time to come. They will need assistance perhaps worse than any other class of men, but at the same time they should be helped in a systematic and proper manner.

We will keep you advised in regard to the work of the association, and, thanking you for the assistance we know you will be glad to render, we remain, Yours truly,

KENNETH MELROSE, President.
R. F. ALLEN, Secretary.

The Jewelers Board of Trade, New York, received on Monday a circular sent out from San Francisco under date of May 16, announcing the recent formation of the Jewelers' Relief Association, as published in another column. A member of the committee appointed by the Jewelers Board of Trade to receive subscriptions for the San Francisco Relief Fund, said yesterday:

"We were advised directly after we heard of the disaster that the jewelers in San Francisco organized such an association as they have formed. We wrote to Bruce Bonney, of Shreve & Co., and to A. W. Huggins, making such a suggestion. We did not, however, learn that anything had been done toward forming the association until May 16. We sent on that day \$1,500 to the order of Shreve & Co., to be applied for uses of the association. If we had been informed earlier as to the formation of the organization we might have sent it a larger proportion of our fund, but before we heard of what had been done we sent \$25,000 to the general fund represented by ex-Mayor Phelan. Of this amount \$15,000 was forwarded May 1 and \$10,000 May 8. In addition we sent \$600 in cash and a quantity of tools and materials to the jewelers of Santa Rosa. There is now in our fund about \$5,000."

In a letter received by THE CIRCULAR-WEEKLY from Bruce Bonney, of Shreve & Co., writing under date of May 14, he says: "Conditions in all ways are greatly improved in San Francisco, as you must know, and have in no particular been as bad or become as serious as apprehended immediately after the fire. As is usually the case, the reports about shooting and lawlessness of all kinds were greatly exaggerated; also as to the number of lives lost. There has been no epidemic of smallpox or other dis-

eases. There is some apprehension of epidemic with bad water as the cause, because of the breaking of water mains, but the supply is rapidly being improved, and if people will observe the simple rule of boiling the water they can escape all danger.

"We notice a statement in a letter published in your issue of May 2 to the effect that it was supposed that the loss by fire of Shreve & Co. would be from \$300,000 to \$400,000. We do not estimate it as high as this, but cannot state an exact figure, as our store vaults were opened on the 12th inst. and we are now making inventory of their contents. It is our impression that over and above insurance our actual property loss will not reach \$50,000.

"Our store was completely burned out, but the building was left in sound condition, and can be completely restored within a year, requiring (so we are assured by the builders) not six months of actual work for its restoration.

"Our new factory was completely destroyed. We have not at this date opened our factory vaults, but have reason to believe that they are intact. We have a small temporary jewelry factory in operation; also working room for all of our watch repairers, and have commenced the construction of a temporary factory building of timber and corrugated iron, and shall operate this until our permanent factory is restored. We have opened a temporary salesroom in the unburned residence district which we shall maintain until our store at Post St. and Grant Ave. is restored."

MR. FEINTUCH OFFERS SOME CORRECTIONS AS TO STATEMENTS IN A LETTER PUBLISHED MAY 2.

THE CIRCULAR-WEEKLY is in receipt of the following letter from M. Feintuch, 1723 Post St., San Francisco, which is self-explanatory:

SAN FRANCISCO, May 16, 1906.

Editor of THE JEWELERS' CIRCULAR-WEEKLY:

Owing to the very heavy accumulation of second class matter—caused by desire on the part of the postal authorities here to deliver the serious mass of first class matter that gathered itself during the few days subsequent to our great disaster—your issue of May 2 was only delivered to-day. I simply offer this as an apology on the part of many of our citizens for not previously taking umbrage over the contents of a letter printed on page 41 of the above issue, emanating from one of the residents of this city who fled out of town and who wrote his presumed facts from a distance of 40 miles.

As showing some little authority for this reply, I would simply state that I was closely identified with the Citizens' Committee during the dark days that followed our great catastrophe, and while only an humble one of many, still followed the work faithfully and steadily until matters were finally and gradually placed in the hands of the military authorities, where they are now being properly cared for and the citizens relieved to a great extent of its duties.

During the three weeks in which the citizens and military had complete control over the affairs of the city, bringing immediate order out of chaos, nothing transpired of any nature whatsoever of which the authorities in charge were not immediately aware. I can therefore assert upon authority that statements in the letter you publish were written in the excitement of the moment and that the author did not have a single rumor verified. Had he done so, he certainly would not have made the statements he did, though it is just possible that his letter, being purely a personal one and not intended originally for publication, he did not give it the care which a communication of the latter variety properly requires. It would seem, however, that it should have received a censure of some kind at your hands before allowing it to be widely circulated, as was done through the medium of your publication. If you will be good

ADDISON W. WOODHULL, President.

enough to follow the communication referred to, I will point out some of its inaccuracies.

There never was even a rumor that smallpox had broken out, and this is based on the fact that no one ever heard of the disease. Not a single case of this kind has been reported, and it may be accepted as a positive fact that no matter how lax the health officers were obliged to be for a day or two (and even this is not so), the merest rumor of a disease so dread as smallpox would have received instant attention and arrest. It is nothing short of calumny to allow a statement of this kind to go unrefuted when it is absolutely untrue.

He also states that "every day there are dozens of men shot for different causes," etc., etc. This is nothing short of an untruth. I am not attacking the writer for his statement, but why in heaven's name did he not at least attempt to verify such a rumor, if such a rumor reached him. In all the time during which the city was under military and civic control—during all those dark days and nights, nights when we were not even allowed to light a candle after dark—when people left their homes on the latch to wander at random to the parks and hills for protection and there sleep upon the grass, we had but two cases of shooting. Just two, that's all.

Both these cases received immediate investigation, the offenders arrested and are now undergoing proper trial by the proper authorities. The soldiers who committed the deeds acted under orders from their superior officers, and in these two individual cases let no one pass judgment until the facts are properly presented to the courts.

The statement about the riotous acts of the soldiers is without the slightest foundation. No one was shot down nor was it left to the soldier's judgment as to the general right to shoot on sight. I question if the world has ever before seen such an illustration of order and system as was brought about in this city within two hours of a great calamity. The city was in absolute control right from the commencement of the great fire, and it remained so and has remained so up to the present moment. No one questions the ability of the authorities to continue that condition.

As to the statement that "anyone caught charging more than regular prices for goods their stock is taken away"—this is about the only true statement in the letter. That was true—absolutely so—and it shows the quick and commendable spirit of the men in charge. The people were protected in this way. No one's stock was confiscated except by the authorities, and then proper receipts were given and claims requested to be filed against the city. Every legitimate claim will be paid and cheerfully. A proper committee was appointed to prevent overcharging of food supplies. "The people must be protected," said the able men on that committee, and anyone who overcharges must turn over his stock to the city to be paid for at proper prices." And the people were protected. One or two confiscations and the battle was won. No one attempted to overcharge after that.

Within 24 hours after the shock, and while the fire was still raging, every saloon and groggery left standing was drained of its liquor and the stuff poured into the gutters. Every grocery that liquor was found in was served in the same way. Notice was served upon each place of this kind not to open again until further orders, and this was later supplemented by removing all liquor licenses and positively and legally preventing the places to reopen until further orders. These "further orders" have not been given yet, and they will not be for a little while, and then in a very restricted manner. We haven't had a drunk on the streets since the fire began. This is not mere braggadocio, it's a solemn fact, and all this in a wild western town.

I do not care to particularize the many statements made about individual instances of shooting. They are one and all not true, and that is as mild as I care to write about them. There is one statement, however, against which I protest vigorously. It is the prediction that "the worst is yet to come when disease commences to take the population off, that they will die by the thousands, and it does not appear that there is any way to stop it." By what right does this writer assume such a fact. It is absolutely wrong to make such a statement. Disease did not and cannot arise in this city—no matter from what source or cause. The fact remains (and this is the best evidence) that we have had no diseases and that the health of the city was never better than through all this period of darkness and sorrow. Statistics are here for that, and that is proof enough. With all the temporary shelter to thousands of people, temporarily without a roof for people to sleep under,

sleeping and housing themselves in parks and in open lots, with all the discomfort and unsanitary conditions that this means, with the consumption of canned food as the only means perhaps of satisfying hunger, and with a hundred other drawbacks, no one has heard of sickness, and the typhoid fever hospitals so quickly erected are, and have been, without a single patient. Do you want any better evidence than this as to the incorrectness of the statements to which I refer?

San Francisco is destined to be bigger, better and more beautiful than ever. I can't resist using the "three Bs" to describe my opinion no matter how inelegant the expression.

There are still a few big buildings left. They are not all "burned out," and instead of there being "not much" of the residence portion of the city left, let me assure you a great big portion of it is still standing. There never were "thousands going hungry," for people were immediately cared for, thanks to the great big bully heart of the American nation and to the excellent care with which matters were handled here by men who stood by their guns and were not frightened off by a little shake and a big blaze. Yours very truly,

W. FEINTUCH.

Foreman in Tiffany & Co.'s Factory Pleads Guilty to Three Charges of Grand Larceny.

Guilty, was the plea entered Monday by John D. Brosseau, foreman in Tiffany & Co.'s factory, who stole from his employers for several years past by padding the pay rolls. The plea was entered to three indictments, charging him with grand larceny, before Judge Foster of the Court of General Sessions, New York. Ralph M. Hyde, the company's superintendent, said that the concern was not desirous of pressing for a sentence to imprisonment. The Judge announced that the sentence will be delivered on Saturday. The maximum term is 15 years' imprisonment.

An account of Brosseau's arrest was published in THE CIRCULAR-WEEKLY of May 9. It has been said that in each of the last two years he took about \$5,000. His method, as already explained, was to draw upon the cashier for larger sums than he actually paid to the men entrusted to his charge and to pocket the difference.

When Brosseau was first arraigned he declared that he had not gambled nor spent the money in dissipation. He intimated that sickness and other troubles of the members of his family had been responsible for his expending large amounts in excess of his income. In the last week one of the papers has published an article charging that he had really lost large sums of money in a gambling house near his home.

Thief Who Stole Lancaster, Pa., Manufacturer's Satchel of Jewelry Pleads Guilty to Larceny.

LANCASTER, Pa., May 21.—William Fraker, a railroad engineer, pleaded guilty in court at Carlisle last week to the charge of stealing a case containing jewelry valued at \$3,500 from L. C. Reisner, a manufacturing jeweler of this town, several weeks ago. At the time of the theft Fraker and Reisner were riding together on a railroad car to Chambersburg, and occupied the same seat. At Oakville Fraker left the car, carrying along Mr. Reisner's satchel.

Some of the plunder was secreted by the thief in a cross-tie pile, where it was almost immediately found, and the rest was thrown away by the thief. Fraker was arrested on the night of the robbery, and the next day the case and jewelry, worth \$1,850, were recovered near Shippensburg.

News Gleanings.

Sears & Neds, Three Oaks, Mich., have been succeeded by Z. T. Sears.

W. G. Sheppard has moved his stock from Cambridge to Indianola, Nebr.

Mrs. L. M. Kaelin, Nelsonville, O., has completely remodeled her store.

S. E. Williams, Rome, N. Y., is enjoying a two weeks' fishing trip in the Adirondacks.

Joseph Kern, Wilmington, Del., has just added a large new safe to his office equipments.

The stock of the late Geo. W. Sayer, Spencer, Mass., was disposed of at auction about a week ago.

H. Amundson, formerly of Chicago, has taken a position with Chas. F. Halbkat, Watertown, S. Dak.

T. K. Smith has sold his store building at Albia, Ia., and moved his jewelry stock to his store in Oskaloosa, Ia.

Extensive improvements have just been made in the store of J. Frank Allee, Dover, Del. New show cases have been installed.

Chas. Wendell, of Jules Wendell & Son, Oswego, N. Y., left last Thursday for an outing and fishing trip in the Adirondacks.

The medals for the Oklahoma Intercollegiate meet in Oklahoma City, Okla., were recently displayed in the show windows of Boasen Bros.

J. Gomph, Utica, N. Y., is enjoying a two weeks' recreation and fishing trip with a party of friends at Pine Lake, in the Adirondacks.

M. O. Bowser, a retail jeweler, of Ames, Ia., recently recovered in a pawnshop in Des Moines, Ia., a ring which had been stolen from his store some time ago.

Chas. H. Robie, for a number of years in the jewelry business at Olean, N. Y., and since leaving there in Austin, Pa., is now located at Williamson, N. Y., where he began business over 20 years ago.

The old wooden building, formerly occupied by the jewelry store of Mrs. M. Yaeke, at 104 Columbia St., Utica, N. Y., has been torn down and will be replaced by a four-story, up-to-date brick structure.

Plans are now being made for the erection of a new building at the corner of Granby St. and City Hall Ave., Norfolk, Va., by the Paul-Gale-Greenwood Co. The building, it is reported, will cost about \$30,000.

Peter Mathews and John Pegrollaz were tried recently in the Circuit Court of Anderson, Ind., on a charge of attempting to murder and rob Justin Lemon, an aged Swiss watchmaker and pawnbroker, of Alexandria, Ind.

The drug and jewelry store of Mr. Smith, Meeker, Okla., was entered recently by thieves, who stole \$300 worth of miscellaneous jewelry. The burglars are believed to have gone south on the Santa Fé train and to be hiding in Shawnee.

The old clock in St. Michael's Church, Charleston, S. C., has been running very irregularly of late, and notwithstanding the numerous times it has been repaired many citizens believe that a new set of works will have to be installed before the timepiece will keep accurate time.

Joshua D. Howell, for a number of years located at Livonia Station, N. Y., has sold

his business to Floyd J. Wemett and removed to Hanford, Cal. The sale was occasioned by Mr. Howell's health, which has not been the best for a year or more. Mr. Wemett has been in Mr. Howell's employ for the past six years and is well known in Livonia Station.

H. A. Barret, of the Columbian Bifocal Optical Co., Denver, Colo., was in St. Louis, Mo., on a business trip, last week.

Archie Tegtmeyer, 344 Grove St., Milwaukee, Wis., has taken a 10 years' lease of the building at the northwest corner of Grove St. and National Ave. Mr. Tegtmeyer will remodel the first floor, which will be used by him as a jewelry store. The improvements are expected to be completed by the end of July. The new quarters will give the jeweler additional facilities in the way of a larger amount of floor space and more spacious show windows.

The Alabama Optical Society held its first annual meeting in the Cable Music Hall, Birmingham, Ala., yesterday. There was a morning, an afternoon and an evening session. Among the speakers were Dr. S. W. Lane, Kansas City, Mo., president of the South Western Optical College; H. J. Cook, president of the Tennessee Optical Society; C. E. Folsom, of the Georgia Optical Society; M. B. Clason, Columbus, Ga.; William E. Huston, secretary American Association of Opticians.

Newark.

Sylvester G. Van Wart, Englewood, will occupy quarters in the Humphrey building after it is remodeled.

A new clock with striking attachment is to be installed in the tower of the Municipal Building, Main Ave. and Prospect St., Passaic, N. J., as the gift of County Clerk John J. Slater. The presentation is to take place in the near future with appropriate ceremonies.

In the window of J. Wiss & Sons is a quantity of jewelry, watches and novelties scorched and melted into quaint shapes. The collection came from the ruins of the Cam building, 171 Market St., San Francisco, and was sent here by George Allsopp, who is now in the western city in the interest of Newark jewelers. The articles were in one of the safes in a burned building. The works of several watches melted inside the cases.

Strobell & Crane are to have a new factory at E. Kinney and Orchard Sts. Work on the building began this week. The structure will be of brick, four stories high, with basement, and will cover a plot 35 by 125 feet, with a wing 20 by 60 feet. The building, which will cost \$35,000, will be equipped with a power plant and freight elevator. Frederick Fatzler will do the masonry work; the Russell-Robinson Co., the carpentering; Jacob Rau, Jr., the plumbing.

MAKER

Correspondence invited for Special Articles of every description, gold or silver, from exclusive designs.

15 West 27th Street, New York

The Diamond Markets.

ANTWERP, May 12.—Contrary to expectations, sales have not been particularly brisk during the past fortnight. Several large buyers were announced to be here the beginning of May, but some have not come, and those who did have not purchased very large lots. This is due partly to the fact that they have not been able to get the goods that they required, and also to the high prices at which stones are held.

Rough goods are higher and scarcer than ever, and the prices, it is believed, will remain very firm, especially for *Mêlée*. The demand for roses and "six faces" is quiet at present. A number of lots of very good roses have been sold at from 140 to 150 francs per carat.

The following were among the buyers registered at the Diamond Club: Messrs. Rappoport, Villet, Heschelsohn, Mund, Goroolinsky, Langbank, M. Slabotzky, Arm. Levy, M. De Vries, Garabadian, all of Paris; Messrs. Lunzer, Gallop, Twi, Tufeld, Broekhuysen, London; Messrs. Abend, Nix, Erder, Berlin; Mr. Grossbardt, Warsaw; Messrs. Hekster, Asscher, Amsterdam; Mr. Mallak, Salonique; Jacob Strauss, New York; Mr. Myers, Boston; Mr. Lagswir, Moscow; Mr. Bellak, Vienna; Mr. Van Gulk, Goch; Messrs. Monossohn, Alexandroff, St. Petersburg.

AMSTERDAM, May 10.—Business in the diamond trade here continues quiet. Small goods find buyers, but large brilliants are for the present somewhat neglected. Several foreign buyers are expected to arrive this month, and it is hoped that sales will then pick up.

The following are among those who have been here during the past few days: Representatives of Stern Bros. & Co., New York; Fox Bros. & Co., Cincinnati; Kohn & Saul, Antwerp; J. B. Kaufmann, London; Mr. Oppenheim, Frankfurt-on-Main, and Messrs. Prager, A. & E. Worms, and Lambert Frères, Paris.

A general meeting of the shareholders of the "Diamantslpery Maatschappij" took place at the end of April. The report of S. Lehman, the manager, was to the effect that conditions during the year surpassed all previous years. The dividend declared in 1905 was 24 florins, as against 13.20 in 1904. New rooms were rented, in order to establish a sawing shop and a model cutting shop of 23 mills.

Amsterdam, it is expected, will be among the cities to feel the consequences of the San Francisco disaster, as several large houses in this city regularly bought from the diamond cutters here, and of course this trade is not expected to be resumed for some time.

PARIS, May 11.—The general condition of business is now somewhat better among jewelers, though they, as well as others, were affected by the labor agitation which began May 1. The partial end of the strike in the jewelry trade has helped matters to some extent.

At present there is a good demand for fine *mêlée* of about 225 francs per carat and the market shows a better tendency as far as four-grain stones are concerned. Trade in rubies is very quiet now, but small

pearls are in demand. This city did a fair business in pearls and colored stones with San Francisco, and the disaster there will undoubtedly be felt to some extent.

A new firm was recently established here under the style of L. Bloch & J. Levy, with offices at 38 Rue de Chateaudun. Among the failures recently were those of E. Pittet & Co., 8 Rue de Chateaudun, and H. Aboaf, 31 Rue de Maubeuge.

Buffalo, N. Y.

Carl Seifert, Lockport, N. Y., retailer, called on Buffalo jewelers on Wednesday.

Charles F. Smith, credit man with King & Eisele, was in New York City for a long stay on business and pleasure. He came home yesterday.

The bankrupt stock of Philip Fischer, which has been on sale for several weeks in an unoccupied storeroom in Main St., is about closed out.

Charles F. Damm is now firmly established in his new Main St. store. He completed removal from his old Washington St. quarters early last week.

The Dennison Tag Co., dealing in jewelers' findings in Ellicott Sq. for a number of years, has moved into new and more commodious quarters at 627 Main St.

Webb C. Ball, of Cleveland, O., was in Buffalo early last week. Mr. Ball was accompanied by his wife, and made a careful inspection of T. & E. Dickinson & Co.'s store at 472 Main St., and declared it to be one of the most attractive he had ever seen.

E. V. Sycher, with Best & Co., 11 E. Genesee St., for 20 years a prominent worker in the Buffalo Y. M. C. A., has been selected by the trustees of the Lafayette Presbyterian Church to organize baseball and other athletic clubs and manage them for the Summer.

Frank Hammond, 54 Seneca St., is making extensive alterations in his store. He is putting in new and more modern front doors and show windows, and the entire establishment is being redecorated and painted. Mr. Hammond came home from watch inspection on the Boston and Maine Railroad, last week.

Taunton, Mass.

The Poole Silver Co. has gone on its Summer working schedule. The employees will work five days a week, and enjoy a Saturday holiday.

William F. Bodfish and Frank Bauers, of this town, were arrested in Brockton, Mass., last week, charged with being itinerant vendors. The allegation was that they brought jewelry into the city to dispose of at auction. Bodfish was fined \$25, and Bauers was discharged, it appearing that he had been merely retained as auctioneer.

Edward Haase, Fairhaven, N. J., a retail jewelry dealer, is now in custody here, awaiting the attention of the court for various allegations connected with some optical deals of a few months ago. It is claimed that he toured this part of Massachusetts as an optician and received money for eye treatment and for the furnishing of optical supplies to patrons, the latter claiming to find afterward that they had not secured what they supposed they were getting. He was arrested in this State some weeks ago

and escaped from the officer in whose charge he traveled. Last week a Taunton detective watched for him at his home in Fairhaven, N. J., and caught him, lodging him in the jail at Freehold, N. J. Securing extradition papers, he went to the jail, only to see Haase disappearing up the road in a cloud of dust in an auto. Habeas corpus papers had been taken out and the man was on his way to a justice at Atlantic Highlands for a hearing. The detective in another auto beat him to the home of the justice and took him again in custody.

New Stores and Enterprises.

R. D. Strain recently opened a store in Oberlin, Kans.

Arvid Greenland is a new jeweler at 45 Railroad Ave., White Plains, N. Y.

D. S. C. Brimer, Sanborn, N. Dak., will shortly begin business in Page, N. Dak.

It is reported that T. J. O'Connell, formerly of San Francisco, Cal., will soon open a jewelry store at Hancock, N. Y.

Marshall O. Rose, Pendleton, Ore., has purchased the building next to the post-office in Ione, Ore., and is putting in a stock of jewelry.

The Lycoming Jewelry Co. recently opened a new store at 13 W. Market Sq., Williamsport, Pa. Chas. Zuc is the owner of the business.

Ludwig Dlouhy and John Kiley, Rochester, Minn., will engage in the retail jewelry business as partners in Winnebago, Minn., in the near future.

J. E. Whitten has returned to Ensley, Ala., his former residence, where he will engage in the retail jewelry business. He will have quarters on Ave. E.

Steven N. Massey will shortly begin business on his own account at 126 W. 3d St., Chester, Pa. Mr. Massey was formerly employed by the Cross Optical & Jewelry Co.

F. X. Newberger on June 1 will engage in the jewelry and watch repairing business in Spokane, Wash. Mr. Newberger was formerly watchmaker for the Bohm-Allen Jewelry Co., Denver, Colo.

Mr. Johannsen opened a new store at 550 Main St., Dubuque, Ia., about a week ago. Mr. Johannsen signalized the opening of his new establishment by giving every visitor an attractive glass candy dish.

O. E. Rudolph, who for the past four years had been in the employ of J. H. G. Durant, New Haven, Conn., has opened a watch repairing shop at 441 State St., New Haven.

The Perry-Aldrich Co. was recently organized in Kittery, Me., to manufacture watches, with a capital stock of \$15,000. The officers are: President, Horace Mitchell, Kittery; treasurer, S. J. Morrison, Portsmouth, N. H.

The American Jewelry Co., Brooklyn, N. Y., has been incorporated with the Secretary of State, with a capital of \$25,000, and the following as directors: Edward H. Pfeibber, Albert Levy and Howard O. Paterson, of Brooklyn.

David Eaffy & Co. have opened a new store in the Colonial Arcade, Cleveland, O. Mr. Eaffy has been with Burt Ramsey & Co., Cleveland, O., as watchmaker for the past eight years. F. B. Lewis is the other member of the firm. They have a very pretty little store and one that will attract attention.

UNIQUE STONES are our SPECIALTY.

Send for our new booklet containing a list of over 100 precious stones, their distinguishing features and colors, also articles on "THE INFLUENCE OF GEMS ON CERTAIN DAYS" and "THE SIGNIFICANCE OF GEMS," a handy book of reference that will assist you in selling.

The PASSMORE GEM CO., 373 Washington St., Boston, Mass.

North Attleboro.

William F. Maintien returned Wednesday from the west.

Fred E. Sturdy has been at the Rainbow Lake in Maine for the past week on a fishing trip.

The firms located in the Totten building on East St. were obliged to suspend work Saturday because of an accident to the engine pump.

Mrs. Emma Frances Heffron, widow of Frederick D. Heffron, was quietly married on Thursday evening to Edward J. Sullivan, American Consul to Trepizond, Turkey.

The employees of Riley & French have organized an athletic association. Howard Grant has been chosen president; John Murphy, secretary and treasurer, and Edward Collins, vice-president. The association will hold a field day on Saturday at Foxboro.

James R. Bugbee, an old time jeweler, died last Wednesday at the mature age of 89. He formerly was employed by the Whiting Mfg. Co., F. M. Whiting & Co. and C. E. Smith & Co. His brother founded the firm of Bugbee & Niles. A son, George C. Bugbee, the proprietor of a hub-cutting and diesinking establishment, survives.

The tremendous business that the local jewelers have done during the past two years has made the scarcity of tenements oppressive in North Attleboro and Plainville. Not a single house is vacant in either town and hundreds who are employed here are obliged against their will to reside in Attleboro, Pawtucket or Providence. This lack of dwellings has had some effect on manufacturers securing help and now there is a concerted effort being made to remedy matters. A real estate company will be organized this week, with a capital of \$25,000. Maintien Bros. & Elliott, William F. Maintien, Scofield, Melcher & Scofield, John L. Thompson, A. E. Coddington, Alpin Chisholm, George K. Webster and James D. Lincoln are among those who have subscribed to the stock. The company is not formed as a money making scheme, but for the benefit of the working people, and the rental price on the houses constructed will be as low as possible and yet give the investor a fair rate of interest.

Providence.

The compromise offer made by Gustavus H. Emerson, of this city, and accepted by his creditors, has been confirmed by Judge Brown, of the United States Circuit Court. He offered 20 per cent. cash and 5 per cent. notes. Funds of \$1,285 have been deposited to cover the payments.

The various shops are being represented on the diamond this year by teams, but there is no jewelers' league such as there was a few years ago and no indications that one will be formed, though there are a vast number of "fans" among the jewelers who would be glad to see the old movement revived.

The outing held a week ago Saturday by the employees of Ford & Carpenter, was a most enjoyable event, and the employees deeply appreciated the firm's generosity in allowing the whole day for the visit to

Emery Park. In the report of the affair last week the name of Martin, Copeland & Co. was inadvertently used instead of Ford & Carpenter.

Buyers in town last week included the following: Adolph Ritter and M. L. Kahn, Philadelphia; S. Meyer, Los Angeles; David Stone, Chicago; I. N. Hahn, St. Louis; B. J. Hirsch, San Francisco; W. A. Kaufman, Chicago; E. M. and L. Stern, Philadelphia; I. D. Waxman, Chicago; Harry Morris, Chicago; S. Schweizer, Philadelphia; F. M. Solomon, Chicago; H. W. Arnstine, B. V. Arnstine, Cleveland; Joseph Cooper, Baltimore; Alfred Eaves, Montreal; Oscar Kind and L. Block, Philadelphia.

Lancaster, Pa.

T. Wilson Dubbs spent a few days last week in New York.

Alfred W. Moyer, of the Non-Retailing Co., visited New York last week.

Two gold watches were stolen, last week, from a show case at Harry Sobel's store.

The father of Henry T. Kiehl, head salesman for Louis Weber & Son, died last week.

Paul Browngaert, a San Francisco watchmaker, reached Lancaster, last Wednesday, penniless, and was assisted in getting on to New York, his destination.

Among the few jewelers visiting here last week were H. L. Oberlin, Oberlin Bros., Columbia; W. J. Frazer, Lincoln; David Frymier, Groff's Store; S. H. Miller, Mt. Joy; G. R. Peterman, Scranton.

Children playing with matches started a blaze, a few days ago, in the handsome Foltz building, on E. Chestnut St., in which are located the Ezra F. Bowman Technical School and Ezra F. Bowman's Sons. An early discovery of the fire saved the building from destruction.

At a meeting held May 16 by the Non-Retailing Co. the following board of directors was elected: A. F. Hostetter, John W. Eshleman, S. O. Frantz, Milo B. Herr, Dr. H. E. Bowman, M. F. Neidman, Willis B. Musser, H. H. Shomo and E. E. Bruen. The board will organize before the month ends. A regular annual dividend of 6 per cent. was declared and an extra dividend of 4 per cent.

When Ray Portner, 12 years old, was arrested for complicity in several thefts, last week, it was learned that he had stolen a couple of watches, one of them a gold time-piece, which he attempted to sell to John J. Bowman, of Ezra F. Bowman's Sons. He pretended his father had sent him with the watch, but Mr. Bowman was suspicious and told him he would keep the property until his father called. He did not return, and the police were notified and took charge of the watches.

The Sweningsen Co. will, after June 1, be the firm style of the business hitherto conducted under the name of A. Sweningsen, Moorhead, Minn. The concern will do a wholesale and retail jewelry and optical business. An up-to-date lens grinding plant was recently installed in the establishment, and it is the firm's intention to make a feature of the grinding of lenses, for which work it now has every facility.

Attleboro.

A piece of hot metal falling from a window set fire to an awning at the factory of the D. E. Makepeace Co. last week, but the flames were quickly extinguished by employees.

William C. Tappan, of the D. F. Briggs Co., last week, left for Windham Hill, Me., for rest and recuperation. He has his string of race horses there and an excellent practice track.

The night watchman in the factory of the Frank Mossberg Co. last week discovered a brisk blaze on the second floor, the cause of which has not been ascertained. He succeeded in extinguishing it with hand chemical extinguishers. It is thought to have started among some rubbish on the premises.

Wednesday, June 8, has been chosen as the date for the wedding of Clerk of Court Edwin F. Thayer, of Attleboro, to Miss Mabel Ingraham Cobb. The groom-elect is son of Oscar S. Thayer, some years ago a jewelry manufacturer in New York, and the bride-elect is ward of the late Henry Wexel, of H. Wexel & Co., Attleboro.

The James E. Blake Co.'s factory had a distinguished visitor last week in the person of John Herreshoff, the blind yacht builder of Bristol, R. I., designer and builder of international cup defenders. With his wife he was shown over the plant by J. E. Blake. His fingers, made facile by practice in his years of blindness, enabled him to grasp the designs and appreciate their beauty by touch.

Attleboro jewelry manufacturers have seen the press reports of a conference held a few days ago by a large group of jewelry jobbers representing California, Chicago and San Francisco, to take steps to prevent the eastern manufacturers from selling direct to the retail trade in their territory. They have no information beyond these press reports, and some have asked their Chicago representatives to inquire into the matter further.

The Attleboro manufacturing jewelers last week received their periodical bulletin from the Massachusetts Bureau of Statistics of Labor, "tipping" them on foreign trade opportunities. The only one of the 56 opportunities described which related exclusively to the jewelry business was this: "Catalogues of watches, jewelry, fancy goods and photographers' supplies are wanted by Senor J. M. Quevedo, Babahoyo, Province of Los Rios, Ecuador."

A little caution saved Frank W. Weaver, of F. W. Weaver & Co., from losing \$2 on a cheap swindle last week. A man entered his office to solicit advertising for an official programme of a Baptist church benefit entertainment. Mr. Weaver's questions were answered evasively, arousing his suspicion. He had taken out \$2 and given an order for a small advertisement, but decided to ask a Baptist employe about the affair. He left the office a moment for that purpose, and the solicitor fled. He had showed Mr. Weaver memoranda indicating that a number of jewelry manufacturers and others had advertised. The police, who were quickly informed, learned that the use of these names was a fraud, as they had not been visited.

Philadelphia.

TRADE CONDITIONS.

The settlement of the threatened coal strike has already made a perceptible improvement in the trade in this city and nearby towns. Up-State retailers are buying freely of local wholesalers and are among the regular visitors to the trade. A prominent jobber said that if the strike had occurred business in the coal regions would have been practically stopped and that there would have been serious trouble. He says that a number of retailers in mining towns had declared their intention to suspend business entirely in such an event and to have removed to other sections.

L. Spocrhase, 4078 Lancaster Ave., is reported to have sailed for Europe on a pleasure trip.

J. Warner Hutchins and family will open their cottage in Chelsea for the Summer next week.

Clement Weaver, of the Bailey, Banks & Biddle Co., sailed on the *St. Paul* for Europe last week.

L. P. White, 7th and Chestnut Sts., has completely recovered from his recent illness, and resumed his business activity.

Abe Sickles, of M. Sickles & Sons, is expected back from Europe next week. He is reported to have sailed for New York.

E. S. Gehman, Bally, Pa., accompanied by Mrs. Gehman, spent last week visiting relatives and friends in this city and Wilmington.

Thomas Moore, for many years with H. O. Hurlburt & Sons, but who recently retired, has taken a cottage at Atlantic City for the Summer.

I. Bedichimer & Co., 1022 Chestnut St., was awarded the contract last week for medals to be furnished to the Patriotic Order Sons of America.

William Latham, watchmaker, resigned his position, last week, with H. N. Allebach, 120 N. 7th St., to go with M. Sickles & Sons in their material department.

George S. Rublack, a jobbing jeweler, 4246 Westminster Ave., was married last week to Miss Irene Bechtel. Many members of the trade attended the ceremony.

J. E. Caldwell & Co. was given the contract last week for the prize cups and medals to be awarded at the invitation golf tournament of the Huntingdon Valley Country Club.

The firm known as "Marceau," trading in cheap jewelry and imitation diamonds at 928 Chestnut St., finally went out of business in this city, last week, after a career of two years.

J. B. Bechtel, of J. B. Bechtel & Co., is this week down east buying stock. William E. Ross, of the same firm, is traveling in New York, and Andrew Little has departed for a southern trip.

Samuel Mellin, 1903 South St., has put a handsome new bulk window entirely of glass in his store, which has now been made one of the most elaborate jewelry stores in that section of the city.

A. L. Smith will remove from 1711 South St. to his new store on Baltimore Ave., West Philadelphia, June 15, by which time the fixtures will have been completed and extensive alterations made.

Watchmakers in this city learned with regret last week of the death of Fritz Englehart, watchmaker for Julius Kling, 501 Girard Ave. Mr. Englehart was widely known throughout this city's trade. He was

an old-time jobbing jeweler and badge maker.

D. Atlas, of Atlas & Fisher, 7th and Sansom Sts., has returned from a trip to Boston and New York. Mr. Atlas will soon start on a European trip of five or six weeks, sailing for Antwerp about June 9.

The employees of H. O. Hurlburt & Sons have organized a baseball team, which proposes to play games during the Summer with the teams of other wholesale houses in the trade. The project has the indorsement generally of employers in the wholesale district.

Louis Markert, a hotel proprietor, 8th and Sansom Sts., took a party of jewelers from the wholesale district to his country place at Doylestown for an outing last week. In the party were Emil Bracher, Charles Gabler, Thomas Moore, Charles Norman, Emil Zothe and Jules Graff.

Out-of-town retailers visiting the trade in this city during the week included: Joseph Gerz, Minersville, Pa.; H. S. Kratz, Souder-ton, Pa.; George Bowen, Bridgeton, N. J.; D. H. Krause, North Wales, Pa.; William Rudisill, of Rudisill Bros., Altoona, Pa.; M. R. Lummis, Salem, N. J.; A. M. Yeakel, Perkaskie, and M. K. Laudenslager, Souder-ton.

William Ungerer, a retired retail jeweler, who for years was engaged in business on Germantown Ave. until he gave it up two years ago, died last week of Bright's disease at his home on N. Broad St., in Branchtown. He was formerly well known in this city, and enjoyed the confidence and respect of all those in the wholesale jewelry trade with whom he had dealt.

Pittsburg.

J. Loughrey Roberts, of the J. M. Roberts & Sons Co., who has been seriously ill, left, last week, for Atlantic City, in the hope of improving his health.

Jacob Bobbs, Mount Pleasant, Pa., formerly in business at Scottsdale, may lose his eyesight. He was in Pittsburg last week consulting physicians, who gave him little encouragement. Mr. Bobbs is a watchmaker and is well known in this city.

The board of trustees of the Carnegie hero fund met last week and awarded a number of silver and bronze medals. The makers of medals have an excellent opportunity to do business with the hero commission, which has headquarters in the Carnegie building, this city.

Pittsburg storekeepers are preparing to observe the Summer closing hour and, beginning June 15, the jewelry stores will close at 5 p. m., except Saturdays, when a number will close at 1 p. m. Many have considered the advisability of closing at 5 o'clock all the year round.

The annual conclave of the Knights Templars of Pennsylvania is being held in Pittsburg this week, the big parade taking place yesterday. A number of the jewelry stores were handsomely decorated in honor of the event and a large number of out of town jewelers, members of the fraternity, were among the visitors.

The trade extension excursion of the Merchants and Manufacturers' Association to northeast Ohio will be made beginning June 5, when the principal cities and towns

will be covered. About 100 houses will be represented on the tour, including some of the wholesale jewelry establishments. The party will travel by special train.

H. S. Johnston, Apollo, Pa., who more than a month ago started for San Francisco, only got as far as Illinois with his family, when his children became ill and he was compelled to abandon his trip. At last accounts he was still in Illinois. But for his children's illness he would have been in the Golden Gate city at the time of the earthquake.

Among the out of town buyers in Pittsburg last week were the following: L. L. Swan, New Castle; J. F. Zugschwert, Carnegie; B. E. Brown, St. Marys; J. Linnenbrink, Rochester; J. F. Murphy, Dawson; R. W. Brady, Washington; C. A. Hines, Vandergrift; Abe Teplitz, McKeesport; Mr. Brown, Monessen; Mr. Fisher, Greensburg; Henry A. Reineman, McKeesport; Mr. Kennerdell, Tarentum; R. H. Wolf, Smith-ton; J. Wolf, Monessen; W. B. Kegg, Glassport; A. C. Hoechl, Pitcairn.

Some complaint is being made by local jewelers against the express companies for the careless manner in which goods are handled. The Geo. B. Barrett Co. last week shipped a diamond sunburst to New York and the consignee wrote that it had been delivered by a boy who was employed by the Adams Express Co., who, when told to take the package upstairs where the receiver would sign for it, retorted that such action was only a formality. The sunburst, fortunately, fell into the proper hands.

The John M. Roberts & Son Co. has released its present quarters in Market St. for a period of five years at an advance in rent of almost 50 per cent. It had been reported some time ago that the entire block was to be sold. J. R. Reed & Co.'s store and J. C. Grogan & Co. are located on either side of the Roberts house. Mr. Roberts' action in re-leasing, precludes any possibility of selling the block, at least for some time to come. This is one of the busiest sections in the city and the jewelry stores in this block are among the best in Pittsburg.

Rochester.

Henry Solonsky, of this city, has had his name legally changed to Henry Sloan.

Two actions in replevin against Max Weisbuch and Philip Levenson were commenced Thursday in the Municipal Court here as a result of the arrest of Mrs. Margaret Green on a charge by Nolan & McLaughlin, instalment jewelers, that she had stolen jewelry valued at several hundred dollars. Mrs. Green is now in jail, and it is claimed that she disposed of the stolen jewelry to the defendants in the replevin suit. The defendants claim that Mrs. Green was an authorized agent of the plaintiffs and that they had made partial payment for the jewelry sold by her to them, which the firm is now seeking to recover. The articles include three gold chains, four diamond rings, a gold watch, a gold cross, a filled watch, including in all about \$235.

David Shannon, of Shannon Bros., Altoona, Pa., sustained a fracture of the left leg about a week ago, in a runaway accident. He was taken to his home at 100 Washington Ave.

A new elevator is being installed in the factory of the Wm. L. Gilbert Clock Co., Winsted.

R. M. Mansfield, Wallingford, who has been confined to his home for several days, is rapidly improving.

Factory "H," International Silver Co., Meriden, is now being operated four nights a week until 8 o'clock.

Nathan Farrell and Miss M. Burt, both in the employ of the New England Watch Co., Waterbury, were recently united in marriage.

H. H. Swartfinger, Rockville, was a visitor to Boston, Mass., last week, where he attended the convention of the New England Association of Opticians.

The senior class of the Norwich Academy, Norwich, is making arrangements to present a clock to the school. The timepiece will be placed in the lower hall.

Harry Hartwell, Watertown, is the owner of an old timepiece with wooden works. The frame is believed to have been made about the year 1830, at Bristol, by P. Barnes & Co.

W. E. Sessions, of the Sessions Foundry Co., Bristol, attended the banquet of the National Manufacturers' Association, at the Waldorf-Astoria, in New York, last Wednesday.

The Bradley & Hubbard Mfg. Co. is rebuilding the portion of its factory which was recently damaged by fire. The building is 40 by 160 feet, and will be raised an additional story. A new roof will also be put on.

The officials of the New Haven Clock Co., New Haven, filled the places of the adjusters who discontinued work last week because their request for an increase in wages was refused by transferring men from other departments.

Samuel Dodd, Meriden, together with a party of friends and ex-Governor Chamberlain, left Tuesday, of last week, for the annual pilgrimage to the Metabetchuan Club, in Kiskisno, Quebec. George H. Wilcox is steward of the club.

Dr. Robinson, a surgeon of Stamford, is the owner of a clock which has ticked continually for five years without ever running down, until it was stopped on the day of the seismic disturbances in San Francisco. The physician believes the earthquake was the cause of the sudden stoppage.

Daniel M. Davis, who for over a quarter of a century had been associated with the Waterbury Brass Co., Waterbury, where for several years he had been engaged as paymaster, died Wednesday afternoon in the Waterbury Hospital, aged 51 years. Mr. Davis is survived by a widow, one daughter and two sons.

Geo. M. Curtis, treasurer of the International Silver Co., is president of the general committee for Meriden's big centennial celebration, to be held next month. Other members of the committee are: Geo. F. Monroe, president of the C. F. Monroe Co.; C. P. Bradley, director of the Bradley & Hubbard Mfg. Co. C. F. Monroe is chairman of the Manufacturing Exhibit's Committee, and Geo. M. Curtis is chairman of

the Committee on Historical Addresses and Events.

Julian R. Holley, vice-president and general manager of the Bristol Brass Co., Bristol, was surprised Wednesday night by a delegation of eight of the prominent employes of the company, who called at his home on Bellevue Ave. and presented to him a handsome loving cup. The delegation was headed by Assistant Treasurer Samuel B. Harper, who, after Mr. Holley had been greeted by the members of the party, proceeded to present, in a brief speech, the handsome tribute from the employes of the company to their chief.

New Orleans, La.

Gabe Hausmann will leave, early in July, for New York. He will make the trip by steamer, and while in the north will combine business and pleasure.

T. Hausmann & Sons' factory made the badges for the Lake Charles Bankers' Convention, and also the badges for the United Commercial Travelers' Association, which is holding a convention in Vicksburg, Miss.

Simon Levy, formerly well known in the local trade as an associate of his father, who dealt in diamonds, watches and jewelry and who later made quite a reputation for himself as a detective, was, a few days ago, dismissed from the force for having failed to make a gambling raid.

Paul Pilat, a local jeweler, who for the past 20 years was a resident of this city, died recently at his residence, 1019 Dauphine St. Mr. Pilat came to this city from Austin as a boy, and at an early age established a jewelry business. The deceased was 31 years of age, and is survived by his parents.

Boston.

J. Newman has moved his jewelry store from 754 Washington St. to 304 Bowdoin St., Dorchester district.

The American Watch Co. Band will give concerts every Saturday night from June 2 until Sept. 1, both inclusive, at Riverside, Mass., on the Charles River, and every Sunday afternoon from June 3 to Sept. 2, both inclusive, on Fox Island in Waltham, Mass. These concerts are part of the entertainments planned in connection with canoeing on the Charles River, this Summer.

The following jewelers and opticians were in Boston during the week: McLoughlin, of the Watch & Jewelry Co., Yarmouth, N. S.; A. C. Lord, Tilton, N. H.; C. P. Forbes, Greenfield; H. S. Hewitt, Brockton; E. A. Hewitt, Bridgewater; F. R. Vaughan, of Vaughan & Burnett, Brattleboro, Vt.; J. R. Philbrick, Skowhegan, Me.; the junior member of W. F. Parker & Son, Fair Haven, Vt.

At a special meeting of the Rochester Optical Society, recently, Dr. R. R. Williams delivered the last of a series of lectures on the anatomy of the nervous system. After the lecture the society presented the Doctor with a very fine Bausch & Lomb microscope, as an acknowledgment of the society's appreciation of his efforts.

Canada Notes.

C. K. Hamilton, Qu'Appelle, Sask., is dead.

C. O. Demareux, Fernie, B. C., has discontinued business.

D. Myles, Haileyburg, Ont., has taken a partner, and the style of the firm is now D. Myles & Co.

Mrs. Sarah A. Wallace, London, Ont., has sold her jewelry business to W. Y. Young, of that city.

J. A. McEwen and C. Maynard, of the staff of Ryrie Bros. Ltd., Toronto, Ont., have returned from a purchasing trip to Europe.

Harris Michalson, of the firm of I. L. Michalson & Sons, Ltd., Montreal, Can., sailed for Europe, May 19, on his semi-annual business trip.

Mr. Chillas, Jr., son of George Chillas, representative of the Gorham Mfg. Co., Montreal, will cover the ground from Toronto westward to British Columbia for the company.

Out-of-town buyers calling on the Toronto, Ont., trade last week, included: Alexander Moffatt, Brantford, Ont.; A. Gibson, Peterboro, Ont., and D. Taylor, Owen Sound, Ont.

A daring jewelry robbery was perpetrated in daylight at the store of Henry Birks & Sons, 350 Main St., Winnipeg, Man., on the afternoon of Monday, May 14, by a man who smashed the window with a brick and seized a tray of diamond rings. He had skeleton keys in his possession with which he locked the store doors, preventing any immediate pursuit by the staff. He then dashed through the Bank of Montreal, next door, fastening the doors behind him, and so eluded capture. In his haste to escape, however, he dropped 15 out of the 18 rings which the tray contained, which were recovered. The three with which he got away are valued at \$1,250.

Thomas R. Binkley, of Klein & Binkley, Hamilton, Ont., has identified Frank Kelly and Mary Hennessey, now under arrest at Binghamton, N. Y., on a charge of diamond stealing as the couple who stole a \$250 diamond ring from his store in February last. He went to Binghamton for the purpose, and had no difficulty in picking them out from among the 50 prisoners confined in the jail there. An effort will be made to secure the extradition of the prisoners to Canada. There are numerous other charges against them in the United States. As it is said that they have frequently been arrested, but have always escaped by jumping their bail, the Binghamton police are inclined to allow their extradition.

The death is reported of Henry J. Collier, Shreve, O.

In the show window of John F. Giering, Mazareth, Pa., was recently displayed the silver trophy which will be awarded as a prize on the day of the Firemen's parade, at that place.

Adolph Roth, a watchmaker and jeweler, employed at Geo. E. Wilkins' store, Syracuse, N. Y., went to Binghamton last week to look at Mary Hennessey and Frank Kelley, under arrest there, to see if he could identify them as participants in the robbery of \$500 worth of jewelry from Mr. Wilkins' store a month ago.

GORHAM SILVER POLISH

THE SAFEST AND THE BEST

¶ Every Jeweler finds himself constantly appealed to by his customers for advice as to the best manner in which they may keep their household silver-ware in good order.

¶ The well-informed Jeweler has but one recommendation to make—the use, namely, of Gorham Silver Polish, which many years of sedulous experiment have succeeded in making the best and safest preparation in the world for the purpose indicated.

¶ The Gorham Mfg. Co., therefore, take the opportunity of reminding the trade in general that Gorham Silver Polish is supplied by them in the form of convenient cakes only.

¶ At the same time for those who desire it, the familiar Gorham Silver Powder is still supplied.

¶ The use of either of these preparations cannot be too highly recommended.

ONE of the most important optical conventions that has ever been held in this country was that of the New England Association of Opticians, last week, of which a full report will be found in the Optical Department of this issue. Not only in the importance of the matters discussed and the number of interesting papers read does this convention establish a new record in the optical trade, but in the question of attendance alone, and the number and completeness of the exhibits, it far surpassed all other similar gatherings, even those of the American Association of Opticians, which is a national body with members from all sections of the country. This convention will undoubtedly spur those in charge of the next annual gathering of the American Association of Opticians, which takes place in Rochester, Aug. 3 and 4, to renewed effort, and therefore its good effect upon the optical trade will continue long after the association becomes but a memory to the many who attended.

British Watch Industry Suffers from American Competition.

THE recent prominence given to the American watch industry, which has brought to light the figures showing its great development in recent years, caused more than ordinary interest to be attached to the information sent by Consul General Wynne, at London, Eng., to the Department of Commerce and Labor, concerning the great decline in the manufacture of watches in Great Britain. Mr Wynne sends a clipping from the *London Daily Telegraph* on the subject, which says, in part, as follows:

Among English industries which have suffered severely from foreign competition that of watch-making occupies a prominent place. The cheap trade, of which Clerkenwell used to be the flourishing headquarters, has practically gone. It has been captured outright by the enterprising foreigner, and though Clerkenwell road and its purlieus are still the great market center for everything connected with clocks and watches, scarcely a single watch factory survives there. We give some remarkable figures bearing on the influx of foreign watches:

OFFICIAL RETURNS SHOWING THE NUMBER OF WATCHES MADE AT HOME AND ABROAD IN THE LAST FOUR DECADES.

Year.	Continental.	American.	English.
1862.....	2,500,000	50,000	164,000
1872.....	3,000,000	400,000	145,000
1882.....	3,500,000	1,250,000	227,000
1892.....	4,500,000	2,250,000	204,000
1902.....	6,000,000	2,750,000	226,000

In 1904 more than 1,500,000 watches were imported into the United Kingdom from foreign countries, representing the sum of £838,000. This means an average of more than 10 shillings for each watch, and considering the flood of common watches of foreign origin that can be bought for much less than that sum, it is evident that a large proportion of those imported cannot be classed as inferior goods. Switzerland led with 1,100,000 watches; Germany was the next, with 213,000; France was third, with 80,000, and America fourth, with 64,000. Besides this, almost as many clocks as watches entered our ports; Germany in this instance leading the way with 1,000,000, and the United States being second with 250,000.

The effect of the better American watch on the English market has been to make people disinclined to pay more than \$20 or \$30 for a watch for everyday use.

In this connection the recent remarks credited to T. P. Hewitt, managing director of the Lancashire Watch Co., appear significant. In an article in the *Magazine of Commerce* Mr. Hewitt recently drew attention to the great advantages derived by the watch industry in the United States from its

Tariff Law and declared that the watch trade of Great Britain was being gradually transferred to this country. Forty years ago the best known devices in the modern watch were invented by English makers, and at that time, as noted above, but 50,000 watches were made in the United States and 164,000 in Great Britain. In the course of the 40 years the whole situation is reversed, and the American watch is rapidly superseding the English, and, to a great extent, the Swiss of certain lines.

Mr. Hewitt attributes the decay of the watchmaking industry in England to what he calls the "obsolescent assay laws" of Great Britain, and the strict enforcement of them, as well as of tariff conditions. He seems to feel that the English makers, with the open door policy, are at the mercy of the American manufacturers, as they cannot retaliate in the tariff fight.

Whatever be the reason, whether tariff conditions or assay laws, there is no doubt that the progress to the American watch industry and the decline in the English has been one of such steady and increasing development as to cause much concern to our friends across the water, and there is little doubt if the Jewelry Trades Gold Stamping Bill becomes a law, as now seems extremely likely, that our watch cases, as well as jewelry, will obtain a standing among Europeans that they have not at the present time, and that this will surely aid greatly in the development of the trade in complete watches, which may give our British friends even more cause for worry than they have at present.

Bill Passes the Senate.

National Gold and Silver Stamping Law Needs Only the President's Approval.

As THE CIRCULAR-WEEKLY goes to press word comes from Washington to the effect that the Jewelry Trades' Gold and Silver Stamping Bill, introduced by Congressman Vreeland, has passed the Senate of the United States, and now simply awaits the signature of President Roosevelt before becoming a law. Although no details have as yet been received, it appears that the bill has been approved in the form which it was recommended by the Interstate Commerce Committee of the Senate, which leaves the act practically as it was introduced by Mr. Vreeland with the exception of a reduction in the penalty to three months' imprisonment, or \$500 fine; and an extension of the time in which the bill is to go into effect to one year after its passage.

The progress that this measure has made and the rapidity with which it was considered and acted upon by both the House of Representatives and the Senate is most unusual, and shows that the merits of the measure and the absolute necessity of its adoption for the protection of the jewelry trade and public at large was universally recognized by our legislators of the National Congress.

The whole history of the bill speaks well for the standard of commercial morality of the jewelry trade, and shows that in a fight such as this for honest business methods, our national legislators are willing to co-operate and give every aid to a movement of this kind inaugurated by business men.

ARCH CROWN MOUNTINGS IMPROVE DIAMONDS

NOTE CONCAVE TIP

COMPLETED BEARING ARCH CROWN MOUNTINGS INSURE PERFECT SETTING

All Arch Crown Mountings are now furnished with Complete Bearings, the success of which was instantaneous; unsolicited testimonials coming to us daily attesting to its worth. This important improvement in diamond mountings has overcome many vexations owing to inferior stone setting. A perfect result is certain, since bearings and tips are fully prepared in advance and a close contact with the stone must follow.

Samples cheerfully sent on approval, a trial invariably proves convincing.

Jewelers Gold Bars Withdrawn and Exchanged at New York.

Week Ended May 19, 1906.

The U. S. Assay Office reports:
Gold bars exchanged for gold coin.....\$413,494.92
Gold bars paid depositors..... 94,837.75

Total\$508,332.67
Of this the gold bars exchanged for gold coin are reported as follows:
May 14.....\$61,887.81
" 15..... 51,259.81
" 16..... 57,320.17
" 17..... 148,819.21
" 18..... 56,346.98
" 19..... 37,860.04

Total\$413,494.92

New York Notes.

D. & A. Brinker, jobbers, have opened an office in the Myers Building, 49 Maiden Lane.

W. L. Bunnell last week filed a judgment for \$906 against the American Watchman's Time Detector Co.

F. P. Abbott, of Porcelaines G D A, who has been in Europe for several weeks, is expected back next month.

Having been burned out at 1612 Madison Ave., Samuel Lubow has opened convenient quarters next door at 1610.

J. B. Hudson, of J. B. Hudson & Son, Minneapolis, Minn., has been calling on the trade in New York in the last week.

A judgment for \$30 was filed last week against the American Watchmen's Time Detector Co. and in favor of G. W. Varian.

A. Ludwig and E. Ludwig, of A. Ludwig & Son, 75 Nassau St., sailed Saturday on the *Graf Waldersee*, to be gone three months on a pleasure and business trip.

R. Reinhart, 47 Maiden Lane, returned last week on the *Kaiser Wilhelm II.* from an extensive trip to Egypt and the Continent.

Emil Lewy, of Lewy & Cohen, importers at 530 Broadway, will sail Saturday on the *Finland*, intending to make a trip to Paris, Berlin and other Continental cities in search of novelties.

Diamonds and tobacco are a combination that are not to be carried much longer by Durlach Bros., 171 Front St., as they now announce that they will soon retire from the gem business.

A twelve-story office and loft building costing about \$350,000 is to be built on the northwest corner of John and Dutch Sts., on a plot 75 x 113 feet now occupied by four five-story buildings.

In order to move the old clock from the tower of the stone church on Prince St. in Flushing, L. I., the local board last week voted \$200. A more prominent location for the clock is to be obtained.

Staiger & Sons last week sent out an announcement of the opening of their new offices in the Minden building, Broadway and Myrtle Ave., Brooklyn, where they will engage in the importation of diamonds and the manufacture of jewelry.

An indictment was returned, last Thursday, by the Grand Jury against August Haack, accused of grabbing a diamond valued at \$150 in the store of Abraham Koppel, 766 Third Ave., and running away with it, as related in last week's issue.

Charles L. Power, diamond merchant of 170 Broadway, accompanied by his wife, sailed for the European diamond markets on the *Columbia* last Saturday. Mr. Power will combine sight-seeing with business, and expects to return within a few weeks.

Pins for the 1906 class at the Jamaica State Normal School will be furnished by M. H. Woodhull, Patchogue, N. Y. There are 180 members in the class, and the order will amount to \$500. The pins are to be made of 14-karat gold with enamel, and set with pearls.

An announcement was some time ago placed in several papers in which C. N. Grierson, Tacoma, Wash., said that he had discovered diamonds in New Mexico, and he invited correspondence. A letter sent

to the address by a New York man was recently returned unclaimed.

In the window of Wm. Barthman, 170 Broadway, is displayed a collection of rough diamonds, varying in weight from three to 58 carats. "My latest importation from the De Beers mines at Kimberley," is Mr. Barthman's description of the precious stones, the value of which is placed at \$100,000.

Notice was received last Friday by the Jewelers Board of Trade that the Walker Jewelry Co., Bainbridge, Ga., is in the hands of a receiver. Bryant N. Walker carries on the business under the company style. He began at Bainbridge in January of last year and was formerly in business at Dublin, Ga.

Another hearing in the bankruptcy case brought against Edwin C. Heathcote, 13 Maiden Lane, will take place Thursday at 2 o'clock before Referee William Allen, at 67 Wall St. At the same time John J. Hayden, 258 Broadway, the trustee in bankruptcy, will open bids for the sale of the stock and fixtures.

Louis Mann, of Louis Mann & Co., formerly jewelry manufacturers at 51 Maiden Lane, recently called on a number of creditors and obtained settlement of their claims on a basis of 10 per cent. In the bankruptcy proceedings brought against the company, the court denied Mr. Mann's petition for a discharge from his debts.

The Hansen-Pollis Co., whose New York office is in the Flat Iron building, was incorporated last Friday under the laws of Rhode Island with \$50,000 authorized capital stock. The company, which has its factory at 100 Stewart St., Providence, R. I., will continue with increased facilities to manufacture artistic lines of jewelry and novelties.

The Lebolt baseball team played the Alexander team on May 13 for a good dinner, and the jewelers beat the shoemakers by a score of 14 to 8. The game was played on the ball grounds at College Point, and was well contested. The Lebolt team is open for engagements with any team in the jewelry business. For dates, address C. F. Barnes, at Lebolt & Co.'s store, 54 West 23d St.

At a hearing given last week by Mayor McClellan on the bill requiring auctioneers to pay an annual license of \$250, quite a number of men in the business appeared in opposition. It was argued that of the 500 auctioneers in the city, many would be unable to pay the fee. C. A. Nutting, a jewelry auctioneer, favored the bill on the ground that there are too many men in the business, and that the fee would reduce the number.

Testimony will be heard in Abraham Goldberg's bankruptcy case before Referee Wm. Allen, 67 Wall St., Thursday afternoon. A motion was made some time ago to require Goldberg, who was formerly in business on Ridge St., to turn over property to the value of \$10,000 or the equivalent in cash to the trustee in bankruptcy. This motion, made by Mervyn McKenzie, of Hastings & Gleason, in behalf of the trustee, has been opposed by Leonard Bronner as attorney for Goldberg.

All that the assets of Jacob Richter, who was formerly in business as the Richter Watch & Jewelry Co., 444 Third Ave.,

have thus far yielded to the trustee in bankruptcy, John J. Hayden, is the sum of \$48. A quantity of watches and jewelry left for repairs with Mr. Richter are to be sold at 12 o'clock Thursday by Trustee Hayden, but even with this addition it is not expected that there will be sufficient money to meet the legal expenses. Mr. Richter's schedules show that he had liabilities of \$7,647; the nominal value of his assets was \$1,840.

Litigation over a piece of real estate, the title of which is vested in Sigmund Weitzenblum, formerly of 90 Nassau St., has followed upon the bankruptcy proceedings in which he is involved. An action to foreclose a mortgage on the real estate, which is located at Castleton, S. I., was begun in April of this year by Philip Sugarman. The plaintiff names as defendant besides Mr. Weitzenblum, his wife; also the Royal Bank of New York, which has a second mortgage on the property; the Solidarity Watch Case Co., a creditor, and Alphonse Kahn, the trustee in bankruptcy of the Weitzenblum estate. Mr. Sugarman, the plaintiff, is an officer of the Royal Bank. The complaint was served by his attorney, H. S. Murphy. The mortgage was executed on Nov. 2, 1903, and calls for payment of \$3,000 to the trustees named in the will of John Henry Clief. The trustees subsequently assigned the mortgage to the plaintiff. The answer served last week in behalf of Mr. Weitzenblum by his attorney, George Malraison, sets forth that the bond and mortgage were invalidated by a usurious agreement. It is said that in 1903 Mr. Weitzenblum, desiring to pay off an old mortgage on the property, and also to raise money for use in his jewelry business, called on the Van Clief trustees to get a loan on a new mortgage. He says that besides agreeing to pay six per cent. interest he gave to the trustees \$555.85 bonus so that he actually only received \$2,444.15. Hastings & Gleason, as attorneys for the trustee in bankruptcy, have acquiesced in the defense.

Subscriptions to the Saturday and Sunday Association of New York, from the jewelry and silver trades, have recently been collected by Leopold Stern, of Stern Bros. & Co., 68 Nassau St., as follows: Stern Bros. & Co., \$50; Keller & Untermeyer Mfg. Co., \$50; L. & M. Kahn & Co., \$50; J. R. Wood & Sons, \$50; Oppenheimer Bros. & Veith, \$50; Albert Lorsch & Co., \$50; Bruhl Bros. & Henius Co., \$50; Eichberg & Co., \$25; Joseph Frankel's Sons, \$25; Arnstein Bros. & Co., \$25; Chester Billings & Son, \$25; Sussfeld, Lorsch & Co., \$25; S. L. Van Wezel, \$25; Van Antwerpen, Vanden Bosch & Co., \$25; Kastenhuber & Lehrfeld, \$25; Hayden W. Wheeler & Co., \$10; Alfred H. Smith & Co., \$10; Zimmern, Rees & Co., \$10; Jung, Staiger & Klitz, \$10; Charles F. Wood & Co., \$10; Joseph H. Fink & Co., \$10; Jacobson Bros., \$10; Leopold Rosenberger, \$10; H. Z. & H. Oppenheimer, \$10; Freudenheim Bros. & Levy, \$10; William I. Rosenfeld, \$10; J. B. Bowden & Co., \$10; Wm. S. Hedges & Co., \$10; A. Roseman, \$10; Shiman Bros. & Co., \$10; Jonas Koch, \$10; Carter, Howe & Co., \$10; Julius King Optical Co., \$10; Ingomar Goldsmith & Co., \$10; Goodfriend Bros., \$10; David Kaiser

Forceful Facts

Concentration of purchases has ever been regarded as a fundamental principle of sound business. The retail jeweler who spreads his purchases loses every advantage to be gained by concentrating his purchases on a few reputable lines. Small purchases from many lines can never benefit the buyer as large purchases from a few lines.

Particularly is this true in buying chains, and the retail jeweler who confines his purchases to Blackinton chains derives numerous advantages thereby. First and foremost he gets chains that are safe to sell: chains that have earned the distinction of "Old Reliable" because they have always lived up to the guarantee that goes with them.

All Blackinton Vest, Dickens, Waldemar, Pony and Negligee chains are now shipped with an aluminum coupon tag attached to the swivel, and the retail jeweler who buys them can have the tags redeemed in Globe Filled W. & S. B. $\frac{1}{8}$ chains as follows: 100 tags—three chains free—75 tags—two chains—40 tags one chain, making a decided advantage to be gained by buying Blackinton chains.

Retail jewelers who use large quantities of chains have a chance to win either an Automobile, a Runabout, a Motorcycle, or a Watch Lathe; all of which we are to give away in January, 1907. Look for the Coupon Tag.

E. Arnstein, of E. Arnstein Bros. & Co., 65 Nassau St., sailed yesterday for Europe on the *Kaiser Wilhelm II.*

Meyer Goodfriend, of Goodfriend Bros., accompanied by his niece, Miss Cora Goodfriend, will sail to-day on the *Oceanic*.

Adolph Schweiger, Selma, Ala., is in New York calling on the trade. He was accompanied to the city by his wife, who is now making her first visit to New York. They will remain several weeks.

Frank A. Chace, Chicago salesman of the C. M. Robbins Co., Attleboro, arrived in New York several days ago to claim the body of his brother, Edmund C. Chace, who was drowned in the Harlem River.

Contracts are being awarded for the remodeling of the upper part of the Hotel Cambridge property at 33d St. and Fifth Ave. The lease of the property for 63 years from 1901 is held by the Gorham Mfg. Co.

E. A. Khouri & Co. was incorporated last week to deal in art antiques with an authorized capital of \$500. The incorporators are: E. A. Khouri, New York; N. H. Kisbany, Brooklyn, and H. DeLancey Rapson, Germantown, Pa.

Miss Ada Wodiska, daughter of Julius Wodiska, 40 John St., has announced her engagement to Isidor Dilloff. A reception will be tendered next Sunday, from 3 to 6 p. m., at the residence of Miss Wodiska's parents, 206 W. 112th St.

A young woman giving her name as Blanche Golden was arrested last Saturday on the charge of stealing from the jewelry and other departments in Sixth Ave. stores. She was held by Magistrate Whitman in the Jefferson Market Court in \$500 bail.

The many friends of Max Bauman, formerly road representative for A. R. Katz & Laudan Co. and also for E. & J. Bass, will be pleased to hear that he is now manufacturing diamond and gold jewelry as senior member of the firm of M. Bauman & Co., 87 Nassau St.

The trade in New York has been requested by Arner & Weinschenk, San Francisco, to send at once duplicate invoices of all merchandise purchased by them since Jan. 1, in order to assist in adjusting the insurance on their fire losses. The new address is 3370 Clay St.

Isaac Greece, an instalment dealer of 128 Essex St., last Sunday, caused the arrest of Ludwig Jarofsy on the charge of stealing two rings and three chains. The arrest was made just after Jarofsy was married and while the wedding celebration was in progress in New Stanton Hall, 180 Stanton St.

Friends obtained the prisoner's release by furnishing \$1,000 bail.

Carl H. Weidemann, of Borrelli & Vitelli, 101 Broadway, will sail Saturday on the *Neve York* for Europe, and at Paris he will join G. B. Vitelli, who went over several weeks ago. Mr. Weidemann will remain abroad about two months, giving a considerable part of his time to inspecting the offerings in art novelties in Paris and other cities.

Maurice J. Schless, who has been in business under his own name at 1 Maiden Lane, last week formed a partnership with Albert Brod, who was formerly a member of Marx & Brod, and also of Jonas & Brod. The new firm will occupy the quarters at 1 Maiden Lane under the style of Schless, Brod & Co. and will manufacture diamond jewelry.

Frederick P. Moody was arraigned last Thursday in the Court of General Sessions on the charge of grand larceny in obtaining a quantity of diamonds from a Maiden Lane firm by representing that he was employed by another house. His trial was postponed until next week. Moody is the young man who was accused of bigamy and who tried, several weeks ago, to commit suicide.

A pedestrian looking through the show window of the Victor N. Nunes Co., 14 E. 42d St., about 10 o'clock one night last week saw a youth emerge into the optical store through a grating in the floor, and make his way toward the office safe. The policeman on the beat was notified and arrested the youth, who gave his name as James Malloy, 18 years old, of 301 W. 45th St. When asked his occupation he replied, "A burglar, sir," and insisted that he had no other calling.

Word has been received by Joseph Fahys & Co. that the watch cases left in the safes in their San Francisco branch during the fire have not been damaged except by discoloring and possibly some rusting of hinges. Most of them will require nothing more than slight polishing to restore to their former condition. The total loss will, therefore, be small. The entire stock will be brought to this city for repolishing. A quantity of cases, which went through the fire, was received by the company last week from A. I. Hall & Son for repolishing.

Among the resolutions adopted at the annual convention held last week by the National Association of Manufacturers was a declaration in favor of increased reciprocity, especially with Germany and Canada. S. O. Bigney, of S. O. Bigney & Co., Attleboro, Mass., one of the members of the committee, did not sign the report. The convention closed with a dinner given at the Waldorf-Astoria, Wednesday evening, at which Ludwig Nissen, of Ludwig Nissen & Co., New York, was the toastmaster, filling the position with dignity and grace. Secretary Taft of the War Department was the principal speaker of the evening.

W. S. Fulton, the San Francisco representative of the Roy Watch Case Co., is to be married in that city to-day, according to a letter which was received from him by the company's president, Albert L. Stearns. After the ceremony Mr. and Mrs. Fulton are to come on to New York, and will remain here until the requirements

of business call for Mr. Fulton's return to the western city. Mr. Stearns received last week the entire quantity of watch cases valued at upward of \$12,000, which Mr. Fulton buried after the earthquake, as mentioned in *THE CIRCULAR-WEEKLY*, May 2. The watch cases were not damaged except for some slight decoloration, which will be readily removed by polishing.

Members of the 24-Karat Club held a largely attended meeting Monday afternoon in the Astor House. A resolution was adopted to donate \$100 from the treasury for the relief of jewelry workmen in San Francisco, and the amount will be turned over for that purpose to the Jewelers' Board of Trade. It was decided to give the fifth annual outing Saturday, Sept. 8, and the following committee was appointed to make arrangements: J. B. Wood, E. R. Crippen, Alfred Krower, J. R. Gleason and Percy Savory. While no place was selected, there was favorable talk of "Port au Peck," Pleasant Bay, N. J. As usual, there will be a clambake, followed by athletic contests, and an attractive program will be prepared.

Charges made against B. Konigsberg, 616 Second Ave., accused of buying stolen property, were, last week, dismissed by Judge Wahle in the Tombs Police Court. The detectives who made the arrest had no evidence against him. The jewelry which they seized in his store was returned to him, having been identified by his customers as articles left by them for repairs. This is the case in which some of the daily papers published highly colored reports, saying that jewelry to the value of \$100,000, stolen by Joseph Meastki, the so-called Masonic burglar, had been found by detectives in the jewelry store. Mr. Konigsberg, as told in *THE CIRCULAR-WEEKLY* of last week, estimated the value of all the articles seized at \$18. He said that no reason has been given to him to account for the suspicions of the detectives.

W. W. Randall, whose business at 209 Greenburg St. was closed out early in the Fall of 1904, as a result of bankruptcy proceedings, recently discontinued the office which he had since opened at 20 Maiden Lane. Judge Thomas, of the United States District Court, some time ago granted an order directing the bankrupt to pay \$600 to the trustee for the benefit of creditors. This order was obtained by Mervyn McKenzie, of Hastings & Gleason, as attorney for the trustee, after a legal battle in which much evidence was taken before a referee. It was charged that just before the failure Randall went to Niagara Falls and secreted a considerable quantity of jewelry. The court did not decide in the trustee's favor for the full amount which it was claimed that Randall had secreted, but declared that as to the jewelry valued at \$600 there was no doubt of his responsibility. The order of the Court directing Randall to return this jewelry has not been obeyed, and a further order was granted several days ago, directing him to show cause why he should not be punished for contempt.

C. E. Hiatt, formerly of Charter Oak, Ia., had arranged to engage in business in Moorehead, Minn., but the building which he was about to occupy was destroyed by fire.

Ball's Official Standard R.R. Watches

WHAT WOULD YOU GIVE FOR A LIFELONG CUSTOMER?

Try this plan.

Sell your next watch customer a "Ball."

Its reliable performance will convince him you are a dealer to be depended on—he'll keep coming back for other things.

The watch will win you his business and friendship for always.

Write for booklet, and watch this space.

We want to add a lot of new friends to the Ball family of railroad watch dealers.

No. 16.

Chicago Notes.

G. E. Lofgren, Mediapolis, Ia., was a Chicago visitor last week.

Robert Nichols, Kenosha, Wis., visited Chicago jobbers last week.

Theodore Leaf, De Kalb, Ill., was in Chicago buying stock last week.

S. Lazarus, of S. Lazarus & Co., Masonic Temple, has returned from a trip to New York.

Joseph H. Ehrlick, traveler for Goldman Bros., has left the road and is now covering the city trade for the same firm.

Louis Miller, Laramie, Wyo., who passed some time in Chicago last week, has returned home, but promised to come back here in two weeks on another business trip.

The breaking of the main machinery shaft at the plant of the Illinois Watch Case Co., Elgin, recently caused the factory to close down for repairs for a few days.

Miss Susan Jones, the oldest woman employe in the service of the Elgin National Watch Co.'s factory at Elgin, fell while at the home of her brother, recently, breaking her hip. Miss Jones was removed to St. Joseph's Hospital, where it was discovered that the injury may result in her being permanently crippled. Miss Jones has been employed in the watch factory for about 40 years, in train room.

The confession of a thief is reported to have vindicated Policeman Oscar Benson, who, after being charged, last August, with larceny by Mathias Mamer, shot and killed his accuser and then committed suicide. Mamer, who owned a jewelry repair shop, accused Benson of stealing three watches from his store, and declared the patrolman had been seen taking them. Wednesday James Hanratty confessed to the police that he stole the three timepieces.

John G. Neumeister, formerly head of the Roberts Mfg. Jewelry Co., 126 State St., which went out of business last month, has come out as a candidate for Mayor of the city. "Nix for the Lid" is the slogan Mr. Neumeister will adopt, and he expects to be swept into office by a clamorous throng of Chicago voters. Mr. Neumeister has lived in Chicago 50 years and says that he believes he knows what Chicago wants in the way of an administration. He will not

make formal announcement of his candidacy for some months, and declares he will abide by the result of the election next Spring, without making any contest should any other candidate win.

Julius Kahn, president of the defunct Cash Buyers' Union, First National Co-operative Society, \$300,000 of whose assets were ordered sold recently, has been indicted by the United States Grand Jury on charges of using the mails to defraud. The indictment against Mr. Kahn alleges that he misrepresented the extent of his business and made other false claims in obtaining subscriptions to stock. He gave \$5,000 bond to insure his appearance at the next term of court.

"San Francisco may have been wiped off the map by the earthquake and fire, but the disaster did not kill the indomitable spirit of her jewelry merchants," declared A. P. Matthews, Chicago manager of the Roseville Pottery Co., to THE CIRCULAR-WEEKLY correspondent, last week. "Already we have received many inquiries from merchants who lost all in the fire and earthquake, about goods, and we are planning to send men to the stricken city with samples in a few weeks. Some of the California firms have sent their buyers east and they are now ordering goods to replace the stocks destroyed. We have received one or two letters asking how much time would be given on goods purchased, but the majority of those who ask prices are seeking no greater inducements or longer time than is usually allowed. One thing about these western dealers is the fact that they are buying even better goods than they handled before the earthquake there. Every one is an optimist."

American Horological Society Hears Interesting Lecture.

CHICAGO, May 17.—The American Horological Society held its regular monthly meeting last evening at the Shiller Hall on Randolph St. The meeting was well attended, the occasion being the lecture on "Horology," by C. J. Higginbotham, superintendent of the South Bend watch factory.

Mr. Higginbotham reviewed the history of time measuring instruments from the earliest dawn of civilization to the present time, bringing out many interesting

points in their evolution from primitive contrivances to the present complicated and delicately adjusted watch, not generally known to watchmakers. He stated that the all around watchmaker had wholly disappeared in the personnel of the modern watch factory, the work being wholly done by specialists.

Incidentally the lecturer referred to magnetism in watches and stated that, in his opinion no watch was probably entirely free from the influence of this force. He gave some special tests to ascertain the presence of magnetism in watches and exhibited a peculiar delicate magnetic needle of his own invention for that purpose.

Minneapolis and St. Paul.

S. B. Millard, optician, Minneapolis, recently made a brief visit to his old home at Litchfield, Minn.

W. M. Stone, Minneapolis, has improved the appearance of his advertising sign, consisting of a large dummy watch, in front of his store.

Among the out of town jewelers in the Twin Cities, last week, were G. Dillon, Manly, Ia.; L. T. Dillon, Litchfield, Minn.; J. C. Gerde, Paynesville, Minn.

Charles Fales, formerly of Fort Pierre, S. Dak., is at present taking a course in watchmaking in Minneapolis. He expects to engage in business in Fort Pierre.

E. F. English, for a number of years watchmaker for the Minneapolis Jewelry Mfg. Co., has resigned to take a similar position with W. M. Stone, Minneapolis.

The Minneapolis Jewelry Mfg. Co. is about to remove from the second floor of the Andrus block, 510 Nicollet Ave., to new quarters in the new Security Bank building at 4th St. and Second Ave. South, just being completed.

Health Commissioner Ohage, St. Paul, has agreed to pay the stockholders of the Anchor Silver Plate Co. \$2,500 for all interest in four lots on the West Side levee at the entrance to the public baths and the tract will be used for park purposes. This was agreed to at a recent meeting of the Committee on Streets of the Board of Aldermen. Dr. Ohage said the money would be paid in two instalments, half this year and half next, from the public baths fund.

Omaha.

Albert Edholm spent a few days of last week fishing at Blue Lake, Ia.

Gene Carbray, of the Rochester Optical Co., was in this city visiting friends last week.

Charles Dixon and wife, North Platte, Nebr., were among the visitors in this city, recently.

George W. Ryan and wife arrived in New York from Europe, last week, and are expected home shortly.

T. M. Heard, Los Angeles, Cal., patentee of the Heard Patent Eyeglass, was a visitor in the city, last week.

Sol Bergman, of the Sol Bergman Jewelry Co., has returned from a business trip through the western part of the State.

E. J. Anderson has sold his interest in the jewelry business to his partner, N. P. Frandsen. Mr. Frandsen will continue the business as heretofore.

J. L. Jacobson, manufacturing jeweler and treasurer of the Zion Lutheran Church, has taken out a permit to erect at the corner of 36th St. and Lafayette Ave. a \$12,000 church building.

Fred Brodegaard & Co. supplied the handsome chest of silver to the Milwaukee Railroad employees, to be given as a wedding present to the superintendent of the Iowa division at Dubuque, Ia.

The following out of town jewelers were in this city, last week, replenishing their stocks. John Crabill, Plattsmouth; S. H. Avey, Auburn; C. F. Collins, Bennett; C. F. Steiner, Madison, and Chas. Reed, Woodbine, Ia.

The trade here has been notified that a diamond ring, valued at \$350, which was being raffled by the Elks at their clubrooms, for the benefit of "Spud" Farrish, at one time a resident of this city and an Elk, was stolen from the secretary's desk on Tuesday night, last week. It was evident the culprit was familiar with the location of the ring. So far no arrests have been made.

Mae Thomas, a stranger to the police, Friday afternoon, May 11, at the jewelry store of T. L. Combs & Co., 1520 Douglas St., was caught in the act of swallowing a diamond weighing two and one-sixth carats and worth \$350. She was arrested by Detectives Maloney and Dunning and charged at the city jail with grand larceny. The woman pleaded not guilty. During the afternoon a report was sent to the Police Headquarters that a woman had acted in a suspicious manner while posing as a prospective customer at the jewelry store of N. P. Frandsen, 109 S. 16th St. At the Frandsen store she was stopped on her way out and a diamond ring was found in her handkerchief. She was so profuse in her apologies, however, that she was allowed to go, but as a matter of precaution the police were notified and given a description of the woman. Detectives Maloney and Dunning were placed on the case and in due time located the woman at the Combs store. The accused is a Spanish-American and of rather dashing appearance. Later in the day the detectives arrested J. T. Hayes, who is believed to be a companion of the Thomas woman. The case has been the subject of much newspaper notoriety.

Kansas City.

D. S. Kavanaugh and Wm. J. Schmidt, both of Tipton, Mo., enrolled, last week, at the Southwestern Optical College.

Frank W. Swearingen, Topeka, Kans., called on the local trade, last week, having come down to the city in his automobile.

George Edwards, of the Edwards & Sloane Jewelry Co., left last week for New York, to join Noble Fuller on his buying trip. They will return together about June 1.

D. B. Ward has obtained a location for his wholesale jewelry stock in the suite of rooms formerly occupied by the Dorst Co., in the Gumbel building, corner of 8th and Walnut Sts.

Leo H. Ludwig, of the Edwards & Sloane Jewelry Co., and C. B. Norton, of the C. B. Norton Jewelry Co., have just returned with the Commercial Club from a trade extension trip through Kansas and Colorado.

A. E. Howell, who came from Salida, Colo., to this city to take a course at the Kansas City Polytechnic Institute, has finished and gone to Excelsior Springs, Mo., where he has taken charge of a jewelry store.

The death is reported of W. C. Schwaible, Falls City, Nebr., formerly a student at the Kansas City Polytechnic Institute. The deceased had intended to come back and continue his studies. He was formerly with the jewelry firm of Davis & Owens, Falls City.

C. E. Dickinson, Garden City, Kans., was in this city, last week, purchasing new fixtures. He says he is going to have one of the handsomest stores in western Kansas. His city is enjoying a boom, on account of a new beet sugar factory which is being built there.

The following out of town jewelers called on the jobbers during the past week: Walter Sperling, Seneca, Kans.; John Tucker, Tucker Jewelry Co., Higginsville, Mo.; C. E. Dickinson, Garden City, Kans.; Leslie Hutton, Lebo, Kans.; S. F. Ricker, Emporia, Kans.; G. B. Douglas, Pleasant Hill, Mo.; Leslie White, Lees Summit, Mo.; Walter Starke, Junction City, Kans.; C. B. Libby, Weir, Kans.; S. H. Ledden, Sedan, Kans.

Tovie Brenner, a pawnbroker at 117½ E. 5th St., was fined \$50 and costs in Police Court, recently, on a charge of disturbing the peace and resisting an officer. The complaint was made by G. W. Johnson, a laborer living at 627 Broadway, who says that Brenner cursed him and assaulted him because he refused to make a purchase. Detectives Huntsman, Brannon, Oldham and Kinney testified to Brenner's system of doing business by bullying those who refused his wares and said that only a month ago a farmer living at Independence was subject to the same treatment that Johnson was the victim of yesterday. When Brenner was taken to the station yesterday afternoon he objected to being searched at the desk and it took three men to accomplish the task.

Word comes from Oklahoma, Okla., that the opticians of the two territories had a very successful meeting there last Monday, and organized a creditable territorial association. The following attended the meet-

ing: J. C. Eifelder, Chickasha, Ind. T.; J. Watkins, Okmulgee, Ind. T.; A. Y. Boswell, Tulsa, Ind. T.; H. E. Rakeman, Sapulpa, Ind. T.; Mr. Burrows, Jennings, Okla.; R. C. Everts, Weatherford, Okla.; Geo. L. Marquis, Pond Creek, Okla.; J. F. Lloyd, Pond Creek, Okla.; Warner & Co., Mangum, Okla.; W. C. Wolfe, Chandler, Okla.; E. R. Derby, Okarche, Okla.; A. C. Lamb, Perry, Okla.; W. A. Wright, Shawnee, Okla.; N. O. Barnhill, El Reno, Okla.; E. W. Eifelder, Lamont, Okla.; W. K. Grady, Stillwater, Okla.; C. A. Ball, Hennessey, Okla.

St. Louis

James J. Burke, president of the Brooks Jewelry & Optical Co., was in Chicago on business, last week.

P. T. Whelan, of the Whelan Ahle-Hutchinson Jewelry Co., has returned from a business trip to New York.

E. C. Weidlich, of William Weidlich & Bro., was in Buffalo, Detroit and Cleveland last week, on his way home from the east.

Ben Linz, of Joseph Linz & Bros., Dallas, Tex., accompanied by Mrs. Linz, was in St. Louis, last week, on their way to New York.

Charles S. Ahle, of the Whelan-Ahle-Hutchinson Jewelry Co., has returned from a successful hunting trip to Blue Springs Lodge, near Bourbon, Mo.

Miss Eva Pecaut, entry clerk for the L. Bauman Jewelry Co., is confined to her home on account of an accident. She fell and injured her right arm.

E. G. McDill, Sparta, Ill.; A. A. Hainer, Jr., De Soto, Mo.; J. A. Allison, Rolla, Mo., and William R. Davis, Springfield, Mo., were among the out-of-town jewelers here last week.

Among the representatives who called on the trade, last week, were: Frank T. Barton, of George N. Steere & Co., Pawtucket, R. I., and S. C. Powell, of S. C. Powell & Co., New York.

H. C. Edwards has resigned from the traveling staff of the L. Bauman Jewelry Co. on account of sickness. He is at present in this city. His territory was in Missouri and Kansas.

A jolly party, composed of employes of the Mermel, Jaccard & King Jewelry Co., spent the latter part of the week on a brief fishing trip in Beaver Dam Lake, Ill. In the party were the following: W. Lanman, Charles Marshall, A. O. Grimes, Lee Schum, Pullman, E. Eckerman, E. Dorn, W. L. Ely and Charles Buettner.

On the first anniversary of the death of Samuel Eisenstadt, late president of the Eisenstadt Mfg. Co., Friday, the employes of that company placed hundreds of roses and lilies on the grave of their late chief. When Morris Eisenstadt and other members of the family visited the grave they found the flowers there to their great surprise. It was a touching tribute to the memory of the dead jeweler.

A number of prominent jewelers will be present at the conclave of the Knights Templar of Missouri, which convenes at Joplin, Mo., this week. Among those who will be in attendance are: Herman Mauch, president of the Retail Jewelers' Association of Missouri; George Hess, of Hess &

Culbertson; Louis Kurtzeborn, of A. Kurtzeborn & Sons; Martin Hacker and F. W. Drost, of the F. W. Drost Jewelry Co.

Paul Flucks, 616 4th St., was recently fleeced out of a pair of diamond earrings, valued at \$230, by a stranger. Mr. Flucks is said to have sold the earrings to the stranger for \$230. When the stranger counted the money the jeweler is satisfied it amounted to \$230. Mr. Flucks counted the sum again after the stranger departed, and there was only \$30. The police were notified, but no arrests have been made so far.

The Mermel, Jaccard & King Co-operative Association will give a picnic, Saturday, June 30, at Ramona Park, in St. Louis County. The members of the association have invited the women employes, the cash boys and others who are not eligible for membership in the association. President Estes has appointed a committee composed of the following to look after the arrangements of the affair: J. C. O'Brien, chairman; W. A. Boehm, B. P. Logan, E. C. Eiseman and E. W. Bornmueller.

Denver

J. B. Johnson, Walsenburg, Colo., made a flying trip to this city, last week, on business.

Geo. Smith, formerly with the Boyd Park Jewelry Co., has taken a position with Joseph I. Schwartz.

E. C. Loper, Fort Morgan, Colo., was a recent visitor in this city, where he called on the wholesale dealers.

Edward Lehman, of the Edward Lehman Jewelry Co., has returned from a pleasure trip through Colorado and Utah.

W. W. Hamilton, of W. W. Hamilton & Co., has gone, with his family, to Los Angeles and the surrounding country, to spend a three weeks' vacation.

George S. Adams, formerly located in Rawlins, Wyo., was in Denver, recently, on his way to Santa Rosa, Cal., where he intends to engage in business.

F. X. Newberger, watchmaker, employed by the Bohm-Allen Jewelry Co., will move to Spokane, Wash., June 1, to engage in the jewelry and watch repairing business.

Pacific Coast Notes.

Emil Pfund, Aberdeen, Wash., is preparing to put in a gallery on three sides of his jewelry store, which will be finished with mirrors and polished wood.

J. B. Weirick, who opened a store, three months ago, in the Colonial building, Spokane, Wash., reports that a \$200 diamond ring was recently stolen from his show window. The ring was taken while Mr. Weirick was at dinner. It contained two stones, each weighing about three-fourths of a carat.

Max Kuner, a watchmaker and jeweler, Seattle, Wash., reports that a man named Lloyd, aged 50 years, who worked for him up to April 30, has been missing since that time from his home and place of employment. Lloyd had one week's wages due him, which he did not draw, and when he did not appear at the store, May 1, Mr. Kuner reported the matter to the police.

The AMERICA Alarm
is a trade-waker for
dull stores—a special
price on such a neces-
sary article is a good
advertisement that
pays its own way.

The Western Clock Mfg. Co.
LA SALLE, ILL.

Cincinnati.

Joseph Mehmert recently returned from the west and is now in Michigan.

Jerome Thoma, of Thoma Bros., left last week on a three weeks' eastern trip.

Frank Nunn, formerly with Joseph Plaut, is now with the Oskamp Jewelry Co.

J. B. Osthoff, with Joseph Noterman & Co., will visit the trade in northern Ohio this week.

August Newstedt, of Lindenberg, Strauss & Co., left last week for Atlantic City and New York.

P. H. Savory, New York representative of the Wadsworth Watch Case Co., was in this city last week.

Julius D. and Arthur C. Jacobs, of D. Jacobs & Co., started, Saturday, for the east on a purchasing trip.

N. B. Barton, Sr., of the Ostby & Barton Co., was here last week paying his annual visit to the local trade.

James C. Haslam, of the John Holland Gold Pen Co., is making an extended western trip as far as San Francisco.

At the annual election of officers of the Cincinnati Club, A. G. Schwab, of A. G. Schwab & Bro., was chosen president.

The wife of Jacob Lewis received serious injuries last week as a result of a fall from a step ladder at her home at 12th and Vine Sts.

Herman Uhrig, manager for Charles Uhrig, Gallipolis, O., was here, last week, buying fixtures for the former's new store at that place.

Charles Becker, local manager for the Philadelphia Watch Case Co., is on a business tour through the south and will visit New Orleans.

Herman Keck, of the Herman Keck Mfg. Co., left here Thursday for New York, from which port he sailed yesterday on the *Kaiser Wilhelm II.* for Europe.

Joseph Hornback has wound up his material and supply business and hereafter will be a road representative for Albert Bros. He will make his first trip June 1 and visit Ohio, Michigan and Indiana.

J. F. Carr, who purchased the Harris Jewelry Store, Portsmouth, O., last Fall, has notified his friends here that he has completely remodeled the interior of the establishment and improved the exterior by adding new show windows. He has now one of the handsomest stores in southern Ohio.

Out of town dealers purchasing stock in this city last week, included N. H. Jepson, Washington, Ind.; John Selbert, Frankfort, Ky.; Lee Baldwin, of Baldwin Bros., Winchester, Ky.; Mr. Kaiser, N. Kaiser & Co., Atlanta, Ga.; Alvis Carr, La Follette, Tenn.; L. C. Diefenbaugh, Lewisburg, O.; C. Sieglitz, Vevay, Ind.; Aaron McConnell,

Mt. Olivet, Ky.; J. F. Katenbrink, Bear Branch, Ind.; Ashton & Baker, Middletown, O.; L. P. Brockman, Augusta, Ky.; H. E. Battelle, Mason, O.; J. H. Drake, Lebanon, O.

William Fink notified THE CIRCULAR-WEEKLY last week that in the item which appeared in the issue of May 16, telling of the robbery of his jewelry store at 1424 Main St. by a negro, a slight error appeared, inasmuch as it was stated that he had recovered some of the stolen property. Mr. Fink said that he has not identified nor recovered anything up to the present time. Four years ago he had a similar experience with a thief, and the man was indicted by the Grand Jury, but escaped by giving straw bail. At that time, as well as at present, though he recovered none of his property, the newspapers published many articles to the effect that the stolen goods had all been returned.

Indianapolis.

J. H. Reed, who is visiting along the Pacific coast, will return home about June 1.

E. S. Fishback, representing the Hamilton Watch Co., was greeting friends in this city last week.

Augustus P. Craft, of the A. P. Craft Co., has returned from a business trip through the northern part of the State.

A graphic description of the business career of Julius C. Walk, of Julius C. Walk & Son, of this city, accompanied by a half-tone portrait of Mr. Walk, appeared in a recent issue of a local daily, which included an interesting history of the jeweler's start in life.

Out of town jewelers who visited the local jobbers and manufacturers, last week, included: H. Wheeler, Dana; J. A. Pickett, New Castle; C. E. Hodgen and Ross J. Haseltine, Kokomo; J. F. Harding, Brownsburg; H. A. Pauley, Bloomington; Mr. Barnes, of Barnes & Foster, Spencer; B. Maier, Edinburg; Aaron Pursel, Noblesville; D. S. Whittaker, Lebanon, and Mr. Raber, of Clarke & Raber, Anderson.

The attention of the police has been called to a check that was cashed by Arthur Rose, of the Cullen Jewelry & Optical Co., in the Traction Terminal building. The check, which called for \$9, was presented in payment for a ring by a man who gave his name as A. Fernback. The name signed to the check was A. Heller. Rose gave the man \$7 in change. At the American National Bank the check was pronounced worthless. Fernback was a young Jew, who spoke broken English. He was slightly marked, as if by smallpox.

John R. Rakestraw, Lima, O., has retired from business.

JOS. NOTERMAN & CO. DIAMONDS

IMPORTERS AND CUTTERS

Recutting and Repairing odd shaped and chipped stones a specialty. Manufacturers of Mountings and Fine Jewelry. Special Designs Furnished.

CINCINNATI, OHIO.

San Francisco.

S. B. Ross has opened offices in the Hotel Metropole, Oakland, where he is preparing to buy diamonds and other precious stones.

A. I. Hall & Son moved, May 20, from their temporary quarters in Oakland to the Jewelers' and Silversmiths' building on Market St. here.

The Portland Jewelry Co., formerly located at 25 Stockton St., announces that both its stock and its pledges passed through the fire uninjured.

Shreve & Co., now located at 2129 Jackson St., and at 1103 Broadway, Oakland, last week got their temporary factory in this city in working order.

Nordman Bros., who will shortly be located in the Jewelers' and Silversmiths' building, are now making deliveries from their temporary offices, at 2505 Clay St.

The Fleissner-Marshall Co., formerly at 14 Geary St., opened its large safe last week, only to find that the contents were practically ruined. The salvage from the safe was segregated from the ash and other waste by means of a coarse sieve.

Hammersmith & Field, formerly in business at 36 Kearny St., were among the last of the larger jewelers to open their safe. They had some difficulty in locating it. The hope is expressed that the contents will be found in better shape than has been the case with the majority of the jewelers' safes opened thus far.

A man, giving his name as George White, was recently arrested in Oakland, Cal., with a large quantity of loot from some San Francisco jewelry store in his possession. He had on his person 45 watch charms, four revolvers, \$125 in quarters, some melted coin and other property. He was returned to this city, where he is held on a charge of grand larceny.

A mass of gold and silver, valued at \$3,500, containing gold and silver articles melted by the fire in the store of Tai Sing, a Chinese merchant at Washington and Dupont Sts., which had disappeared from the ruins, has been recovered by the police. The loot was found hidden in the ruins at Broadway and Stockton St. The mass was three feet long and 18 inches wide, by six inches thick.

There has been some shifting about among the proposed occupants of the Jewelers' and Silversmiths' building. Nordman Bros., the material men, and the Morgan & Allen Co. will share the second floor, while Henry Abrams, who was to have been on that floor, will be located on the fifth floor.

The Gorham Mfg. Co., formerly represented in San Francisco by Phelps & Adams, at 120 Sutter St., has now opened offices on its own account at 1103 Broadway. The company has its men on the road, and has been for some days supplying the immediate wants of the trade from stock. Arrangements were made last week for additional space at the same location.

Manager Melrose, of the W. K. Vanderlicke Co., formerly in the retail business at 136 Sutter St., is not very enthusiastic as to the immediate prospects of the retail trade in San Francisco, and it is doubtful if this house will resume business before permanent quarters can be had. One of the company's safes was warped open by the intense heat, and the contents were ruined.

The Bohm-Bristol Co., formerly at 104 Geary St., which now has temporary offices in the Union Savings Bank building, on Broadway, Oakland, is engaged in getting the salvage out of the ruins of its store. It is believed that about \$7,000 worth of stock can be recovered. The company's loss was heavy, but the officials announce that it was well insured and will resume business. They are not prepared at present to say when or where, as both place and time will depend entirely upon developments in the city. Henry Bohm, of the company, who came on from Denver after the fire, will probably go east to arrange for new stock as soon as he gets insurance and other matters settled.

Cleveland.

E. C. Crater, New Comerstown, who filed a petition in bankruptcy some time ago, has filed an application for discharge. The hearing is set for June 30.

Burglars entered the store of Frank Brand, Findlay, a few days ago, and succeeded in getting away with about \$600 worth of diamonds and other jewelry.

E. J. G. Galley, formerly of Galley & Co., and F. M. Gear, have formed a partnership under the name of Gear & Galley Co., to deal exclusively in watches. They will be located in the Cuyahoga building.

The firm of Ginsburg & Tronstein, manufacturing jewelers, has been dissolved, Samuel Tronstein purchasing the interest of his partner. He will continue the business in the old location, 143 Euclid Ave.

Herbert W. Burdick, of the Bowler & Burdick Co., and G. L. Sigler, of the Sigler Bros. Co., have returned from a trip through northwestern Ohio, northeastern Indiana and southern Michigan with the wholesale board of the Chamber of Commerce. This is the 16th trip made by that organization to visit their customers, and the merchants stopped at a greater number of towns this time than on any of the others. They express themselves as well pleased with the trip.

J. H. Danforth, of the Cowell & Hubbard Co., has been re-elected president of the retail board of the Chamber of Commerce, as well as a member of the executive committee. In his address at the annual meeting, Mr. Danforth emphasized the fact that the organization as a branch of the Chamber of Commerce is able to do as much good as two independent organizations. The matters of greatest importance the past year, perhaps, were the excursions to Boston and Lorain, O., and the inauguration of an Exposition week before the Winter holidays. The board was also instrumental in securing the passage of an ordinance allowing retail merchants to use certain space on the sidewalks for outside show cases.

The production in gold of the Zimmerman elk head by the Gustave Fox Co., Cincinnati, has been the subject of comment in that city, where the piece is not only admired but considered one of the finest and most exact copies of the artist's masterpiece that has been made.

Pacific Coast Notes.

Alexander Marks, Lawrence, Kans., recently made a business trip to Albuquerque, N. Mex.

The store at Washington and Center Sts., Phoenix, Ariz., will soon be occupied by N. Friedman.

J. Rufener, San Pedro, Cal., has moved into new quarters in the Wells-Fargo building at that place.

E. T. McCarthy, a traveling representative, of Bradford, Pa., has been visiting the trade at Santa Fe, N. Mex.

The Buhrmeister building, at Suisun, Cal., has been remodeled for W. F. Wooster. Mr. Wooster will move into the new place next week.

Mr. Casanova, who conducted a jewelry store in San Francisco before the earthquake and fire, has rented quarters in the Hess building at Petaluma, Cal., where he will soon open a store.

H. W. Schueler, Fortuna, Cal., has remodeled his store. His establishment now has two stories. The middle partition has been removed and a gallery built in the rear end, thus enlarging the store room.

Jewelers from the outside towns in California which were affected by the earthquake report that trade has, in general, shown no falling off that can be traced to the earthquake. F. R. Stearns, San Jose, states that trade in that city has shown a distinct improvement in the repairing line since the earthquake. Sales have been about normal, showing a slight increase over the same weeks of last year.

Toledo, O.

Henry Eells, a local watch repairer, is expecting to shortly improve some of his real estate holdings by the erection of one or more modern residences.

W. H. Broer, 427 Summit St., has added a new department to his store, and hereafter will carry hand painted china from the studios of local and foreign artists.

J. J. Freeman & Co., 313 Summit St., will shortly celebrate their 30th anniversary. Aside from being one of the oldest firms in Toledo, the concern is one of the oldest in the Ohio jewelry trade.

There is some probability that J. Prochaska, who conducts a large jewelry store at 109 Summit St., will be forced to seek new and larger quarters. The property at this address has just been sold.

The jewelry department of W. L. Milner & Co. has the contract to furnish this season's trophies for the Inverness Golf Club, of Toledo. The trophies are nearly two-score in number and include many loving cups, tankards and the like. The number of trophies to be awarded this season will be nearly twice as large as the number awarded a year ago.

F. F. Wallert, Shenandoah, Ia., has succeeded to the business of C. Van Der Elsen, Centerville, Ia.

The meeting which was called for July 3 for the purpose of organizing a State association of jewelers in North Carolina has been postponed until Tuesday, July 10, on account of the State Democratic Convention, which is to be held in Greensboro, July 3.

A CONFIDENTIAL CHAT.

The average jeweler, a man of experience, has sufficient sound judgment to listen to reason. He is eager to learn facts that will benefit his business and further his sales. Well made jewelry in up-to-date styles is the argument we offer. It is the positive side of an argument that has no negative. It is the article that the dealer is safe in handling and ours are the goods that will attract the prospective purchaser. Our

[IN WHICH IS CONTAINED A LIST OF THE LATEST PATENTS GRANTED BY THE UNITED STATES AND GREAT BRITAIN, THE UNITED STATES PATENTS THAT HAVE EXPIRED AND THE REGISTERED TRADE-MARKS.]

UNITED STATES PATENTS.

ISSUE OF MAY 15, 1906.

820,494. EYEGLASS-MOUNTING. CHARLES A. HOFFMAN, Minneapolis, Minn. Filed Nov. 14, 1904. Serial No. 232,576.

In an eyeglass-mounting, a bridge and nose-guards formed from a single piece of metal, the middle portion of which is curved to form the

bridge and provided with forwardly-extending end loops, the ends of said loops being inwardly turned and extended rearwardly substantially parallel with one another to form the guards and finger-pieces projecting forwardly from said ends.

820,532. BUTTON. IRVING M. SYLVESTER, Providence, R. I., assignor to Parks Bros. & Rogers, Providence, R. I. Filed Jan. 17, 1906. Serial No. 296,459.

In a button of the type set forth, the combination with a base, of a bar provided with a

knurled upper end, a sleeve frictionally mounted upon the knurled end of the bar, and a hollow button-head provided with an opening in its lower wall, into which said sleeve is received and forced as a driving fit.

820,533. COMB AND COMB-CLEANER COMBINED. CLARENCE W. TAYLOR, Oak Park, Ill. Filed Aug. 19, 1905. Serial No. 274,948.

The combination with a comb having a depression in one surface near each end thereof, of a cleaner the major portion of its length embracing only one side of the comb and having projections

disposed between the teeth of the comb, the end portions of said cleaner being suitably formed to bear only upon the opposite side of the comb and removably engage said depression to secure the cleaner to the comb.

820,534. COMB AND COMB-CLEANER COMBINED. CLARENCE W. TAYLOR, Oak Park, Ill. Filed Nov. 8, 1905. Serial No. 286,330.

The combination with a comb having a depression in one lateral surface near each end thereof, of a cleaner comprising a side-embracing member

the major portion of its length embracing only one side of the comb and a perforated member adapted to receive the teeth of the comb, said cleaner having its entire end portions 11 formed to pass between the end and first tooth of the

comb, and the end portions 12 formed to bear only upon the opposite side of the comb and having beads 13 for spring engagement with said depressions to removably secure the cleaner to the comb.

820,621. MIRROR. CARL BOMEISLER, New York. Filed Feb. 27, 1905. Serial No. 247,422.

A holder for mirrors and similar articles comprising a frame adapted to hold a mirror and a

back, a handle for said frame, and a reinforcement secured to said handle having its free end extending into said frame and bearing against the opposing surfaces of said mirror and back.

820,625. HAIR-PIN. JUDSON COOK, Philadelphia, Pa. Filed June 19, 1905. Serial No. 265,897.

A hair-pin comprising a relatively short loop-shaped shank having a lateral projection at its top, a pair of relatively long and straight tines, and a pair of V-shaped projections connecting

the said shank with the said tines, said projections being arranged opposite each other in the same plane and having a narrow space between their apices, and the lower parts of the said projections being straight and arranged at an acute angle with each other.

820,645. BRACELET. ROY W. INMAN, Attleboro, Mass., assignor to John T. Inman, Attleboro, Mass. Filed May 24, 1905. Serial No. 262,010.

A bracelet having overlapping ends connected by

a link hinged thereto, and means for holding each overlapping end portion in engagement with both ends of said link.

820,669. CLOCK. WILSON E. PORTER, New Haven, Conn., assignor to the New Haven Clock Co., New Haven, Conn. Filed Sept. 11, 1905. Serial No. 277,917.

In a clock-movement, the combination with front, rear and intermediate movement-plates, of

a center arbor journaled at its front end in the said front movement-plate, a mainspring-arbor arranged concentrically with the said center arbor and having its rear end journaled in the said rear movement-plate and its forward end formed with a trunnion journaled in the said in-

intermediate movement-plate, the said trunnion being formed with a bearing-opening for the reception of the rear end of the said center arbor which is thus journaled directly in the said main spring arbor which has a longitudinal passage to the center arbor for setting the hands and which is adapted to be rotated for winding the main spring.

820,682. BUTTON OR STUD. IRVING M. SYLVESTER, Providence, R. I., assignor to Parks Bros. & Rogers, Providence, R. I. Filed June 12, 1905. Serial No. 264,843.

A stud comprising a head, a tubular L-shape stem and shoe formed integral with one another and secured to said head, said stem being formed

with an opening c^1 , adjacent its juncture with the shoe, a locking-bar slidably mounted in the shoe, said locking-bar having a pointed end projecting beyond the end of the shoe and having its other end projecting through opening c^1 , said bar having a longitudinal flattened surface formed with notches, a plunger slidably mounted in the stem and having its end shaped to engage in said notches of the bar, and a coil-spring acting on the end of the plunger and engaging said head.

820,683. STUD OR BUTTON. IRVING M. SYLVESTER, Providence, R. I., assignor to Parks Bros. & Rogers, Providence, R. I. Filed June 12, 1905. Serial No. 264,844.

In a pipe-stem stud, a head, a hollow L-shape shank forming a tubular stem and shoe, a locking-bar formed with annular grooves extending

in said shoe, said shoe being formed with a pair of longitudinal parallel closely-associated slits intermediate its length, which slits extend to positions adjacent the ends of said shoe, the material between said slits forming a snap supported by each of its ends from said shoe, said snap having a length to engage in said grooves of the locking bar.

820,729. COLLAR OR CUFF BUTTON. DANNE PAMP, Philadelphia, Pa. Filed Ju 21, 1905. Serial No. 266,250.

In a button of the character described, a body portion, a shank extending from said body portion, a spring-eye formed in the outer end

the shank, the walls of said spring-eye adapted to spring away from one another, a head, tongue formed with the head, said tongue being enlarged at its outer end so as to spread, the walls of the eye where it passes through the tongue being formed narrow behind the outer end so that it will fit within the eye with spreading the walls thereof.

820,777. CIGAR AND CIGARETTE HOLDER. GEORGE GRICE AND CHARLES J. BARROW, Birmingham, England. Filed Dec. 18, 1905. Serial No. 292,373.

A cigar or cigarette holder comprising a hole

body, a tube located centrally thereof, and means

consisting of a perforated cap for securing the tube to the holder.

820,704. BARREL CLICK-SPRING FOR TIME-PIECES. JOSEPH KLEIN, Peru, Ill., assignor to the Western Clock Mfg. Co., La Salle, Ill. Filed Aug. 19, 1905. Serial No. 274,940. In a click-spring for timepieces, a movement-plate; two winding barrels journaled in said plate;

a metal strip fastened to said plate by means of its central side projection; two side projections from said strip, each passing through an aperture in said plate and two end projections each of which engages the teeth of one of the barrels.

820,860. COMBINED MATCH AND CIGARETTE BOX. LOUIS DE GOLL, Baltimore, Md. Filed May 22, 1905. Serial No. 261,641. A box provided with a partition dividing it into two chambers, one for the reception of matches, and the other for the reception of cigarettes, a

cover pivoted near one end to said box, said cover being provided over the match-holding chamber with a delivery-hole and an inclined trough leading to said hole, and resilient means for holding the cover closed.

820,894. TIME CHECK OR RECORDER. LESLIE M. SOBER and ELMER E. BROWN, Oklahoma, Okla.; said Brown assignor to James L. McCune, Oklahoma, Okla. Filed June 12, 1905. Serial No. 264,855.

In a time-check and recording mechanism, a casing having a desk portion, a series of dating-wheels, clock mechanism for setting said wheels, said desk portion of the casing including a removable top having an aperture and a transparent portion, a plate held under said top aperture, means

for moving a record-receiving strip over said plate and said wheels, a supplemental segmental wheel having peripheral characters, a carbon-ribbon held over said paper in line with all of said wheels, means for setting said supplemental wheel to bring a predetermined portion of its circumference in line with said plate, means co-operating with supplemental-wheel-setting means, for pressing the ribbon and the record-receiving strip against the several wheels, and means, co-operating with said supplemental-wheel-setting means and said pressing means, for moving said strip with the record from under the top aperture and under the transparent portion of the top.

820,897. COFFEE AND TEA POT. JOSEPH W.

WHITAKER, Noble, Ill. Filed July 17, 1905. Serial No. 270,022.

A coffee or tea pot consisting of a body portion having its wall slightly tapered toward its bottom, a cover, and a close-fitting open-bottom removable cylindricform collecting-holder having a strainer-top, a central bracing-handle extending through said top and holder, and bracing-arms connecting the

handle and the peripheral walls of the holder at the bottom of the holder.

820,916. SPEED-INDICATOR FOR VEHICLES, ETC. CHARLES COULERO-MEURI, Chaux de-Fonds, Switzerland, assignor to Flory, Reimpach & Co., Colchester, Eng. Filed Oct. 6, 1904. Serial No. 227,421.

A speed-indicator for vehicles adapted to be operated during a definite period of time and proportional to the average speed of the vehicle for that time, means adapted to be connected to a

wheel of the vehicle for actuating the indicator mechanism, and index-finger, a sector for returning said index-finger to zero, locking devices for the index-finger and indicator mechanism, means for releasing said locking devices, and a spring-actuated lever adapted to again bring said locking devices into engagement after a definite period of time.

DESIGNS.

BRITISH PATENTS.

(ABRIDGMENTS OF SPECIFICATIONS, 1905, FROM THE Illustrated Official Journal.)

ISSUE OF MAY 2, 1906.

37. INDICATING RULING PLANETS. W. H. LEWIS, Manchester, N. H., U. S. Jan. 2.

A planetary hour dial, indicating also times of sunrise and sunset, is constructed as shown, with planetary signs arranged in circles on a rotatable disk D and ring F. Tables B are placed outside the hour dial showing on it the times of sunrise and sunset for a particular latitude, and the disk D which is adapted to show planetary hours also

hears the names of the days of the week. The ring F is divided into spaces corresponding to four-minute intervals, and is for indicating the sub-planetary influences. The device is shown set for any Sunday near March 23 or Oct. 6, Jupiter being the ruling planet shown by the disk, while the ring shows subplanetary influences for various four-minute intervals. A 12-hour dial may be used instead of the 24-hour dial shown.

52. INDICATORS, STATION, ETC. R. ORNSTEIN, Berlin, and P. DORFF, Schlachtensee, near Berlin. Jan. 2. No patent granted (sealing fee not paid.)

A station indicator for cars, etc., comprises a dial, provided with hour divisions and displaying the names of stations on the route and any other desired information, and a hand driven by clockwork in such a way that in pointing to the time it

also indicates the locality of the car. A series of such indicators may be controlled electrically from a standard clock 13. The names of the stations may be placed upon two removable parts, 9, 10, which may be of distinctive colors, or one may be phosphorescent for use at night. A second index-hand 11, which may be set independently of the first hand, serves to indicate whether, and how much, the car is before or behind time.

122. SAFEGUARDING PURSES, ETC. J. C. B. TOWNSEND, Folkestone, Jan. 3.

A purse, pouch, handbag, or the like A, Figs. 1 and 2, is attached to wearing apparel by means of the safety-pin e, with the spring portion e' on the purse, etc., frame and its point engaging within the intumed portion f' of the catch f. The purse, etc., is concealed by a rosette, flowers, etc., sup-

ported on the shield or plaque a', flexibly attached by spring arms b terminating in hooks c engaging sockets d, or by springs g. Fig. 3, connected to

pieces h mounted on the hinge-pins of the purse, etc., frame. With this latter form, the safety-pin may be mounted on a bar joining these pieces h at the back.

193. WATCH, ETC., PROTECTORS. M. GORDON, South Wimbledon, Surrey, Jan. 4.

A protector for pendent watches, etc., consists of a bar A, to which a safety-pin B is hinged, and from the center of which a number of bars F, D, E, radiate, these bars being bent forward at their ends to form claws. One or more claws J with ring, safety-pin, etc., K, are provided as a further protection. Three arms may be employed, two of

which D, E may be fixed and the third F pivoted and adjustable in length, a spring G controlling the motion of its end. Alternately, the third arm may be fixed in length but pivoted eccentrically to a central enlargement. In another form, all three arms are fixed, two being formed by the safety-pin bar, and the third projecting vertically downwards. Or two fixed arms only may be used, sloping downwards from the center of the safety-pin bar.

214. SCARF-PIN GUARDS. W. H. WHEATLEY, London, W. C.—(C. Nobs, Newark, N. J., U. S.) Jan. 4.

Pins, Scarf, Brooches, Jewelry Fastenings.—A guard for a scarf or brooch pin consists of two metal fingers 1, Figs. 1 and 2, passing through apertures in a spring 8, and encircling a pivot 6.

The scarf or brooch pin is gripped in the space 5 enclosed by the indented portions, and the device is actuated by pressing the ends of the parts 3 between the fingers of the wearer. The ends 10

of the spring press against the fingers 1, and retain the pin in position.

249. EYEGLASSES. M. WEISSMANN, London, E. C. Jan. 5.

The collets *c*, between which the spring *b* is placed, are secured by pressing the lips *d* into nicks

on notches *e* on the sliding bars *a*, and the ends of the spring are passed into the collets or into depressions in the bars.

318. DRESS PINS. C. MANCHESTER, Nottingham, Jan. 6.

Pins, dress and like, are made with two straight or corrugated prongs *A*¹ and an ornamental head *B*.

[Reference has been directed under Patents Act,

1902, to Specifications No. 13,395, A.D. 1895; No. 15,929, A.D. 1895, and No. 3623, A.D. 1900.]

319. TELESCOPES AND RANGE-FINDERS. F. W. ALLEN, Leicester, Jan. 6.

To enable a range-keeping telescope, particularly of the kind described in Specification No. 17,209, A.D. 1902, to be used also as a sighting-telescope for heavy ordnance, the magnify-power is changed quickly by a removable system of lenses. Fig. 3 shows a removable system of lenses 16, 17, 18, similar to an opera-glass system, arranged between an eye-piece of the Ramsden type 5, 6, and an erecting eye-piece 9, 10. The convex lenses 5, 6, are mounted in a tube 8 and the focus of the system coincides with that of the object glass 7. The

FIG. 2.

convex lenses 9, 10, are mounted in a tube 14 and have a common focus at which is arranged a piece of plane glass 11, with a vertical wire or line and a horizontal arrow head to facilitate sighting. The lenses 16, 17, 18 are shown mounted in a thin metal tube 19 which may be moved out of action into a light-proof casing 21, Fig. 2, by a handle 23 pivoted at 24. When brought into operation, the correct position of these lenses is determined by a stop 22 secured to the telescope casing by screws.

THE HOROLOGICAL REVIEW.

How Father Knickerbocker Marks *the* Hours

Prominent Clocks That Give the Time to New Yorkers in Manhattan, Brooklyn and the Bronx.

(Continued from issue of May 16.)

BROOKLYN'S CONSPICUOUS CLOCKS.

THE center of activity of New York's Borough of Brooklyn is considered by most of its citizens to be found in close proximity to its City Hall. Certain it is that the site of City Hall Square is a focus for the largest aggregation of large time dials within a prescribed space, so far as that borough is concerned.

Compared with the clock tower gracing Manhattan Borough's City Hall, Brooklyn's City Hall clock tower is of both more pretentious style and of larger proportions. From the illustration on this page it will be seen that the design is one that never fails to command respect.

The clock, whose works are of the self-winding variety, has four dials of ground glass, having a diameter of five feet four inches. By an automatic device the lamps which illuminate the dials at night are lit at sunset and the same mechanism extinguishes them at sunrise.

The mechanism which controls the hands is a clock tower movement having for its motive power an electric motor, moving the hands forward every half minute. The necessity for weights and ponderous apparatus is, by this contrivance, entirely obviated, and the risk of breakdown is reduced to a minimum by this simplification of machinery.

The action for this movement is controlled by a self-winding regulator located in the upper hall immediately under the tower. This regulator has an electric contact constructed to close each half minute, thereby starting the above-mentioned clock tower movement. By connection with the time service it receives an hourly correction, whereby the public is afforded exact United States Observatory time. The entire system being automatic, it requires attention but once a year for oiling and cleaning of the several parts.

Surrounding the City Hall clock are a number of dials. That in the Garfield building, from its lofty elevation, proves of considerable value to the traveler on the ele-

vated railroad trains. A very much consulted outdoor timepiece is the big dial in the corner of the building of the Brooklyn *Citizen*, boldly showing the flight of time to the many thousands of passengers passing this intricate junction of so many surface car lines.

A few steps further up Fulton St. bring the pedestrian to the Straus clock,

HANDSOME CLOCK TOWER ON TOP OF BROOKLYN CITY HALL.

Wise Dealers Set Store by the ELGIN

The wide-awake dealer knows the value of a good stock of Elgin Watches. He knows that they are a good criterion by which to have the public judge his store.

He knows that Elgin customers are satisfied customers, and that satisfied customers are the very foundation of successful business. The

ELGIN WATCH

is the World's Standard Timekeeper

See Jobbers' List for prices or write the Company.

Every dealer is invited to send for the Elgin Art Booklet, "Timemakers and Timekeepers," illustrating the history and development of the watch.

San Francisco Office, 206 Kearny St.

one of Brooklyn's most familiar landmarks, whose four dials are eagerly scanned by the many passing up and down this busy thoroughfare.

On the sidewalks of Montague St. are several sidewalk clocks, all within a stone's throw of City Hall Square. They are the useful advertising features of thriving trust

CLOCK ON THE GARFIELD BUILDING.

companies and real estate agents, with which this section abounds.

Continuing along Fulton St., one comes across the handsome clock in the ornate entrance portico of the big department store

THE STRAUS'S FOUR-DIAL STREET CLOCK.

of Abraham & Straus, and at 525 Fulton St., Jeweler L. Simon's clock dial apprises passersby of the time from his store front.

Coming to the junction of De Kalb Ave. and Fulton St., Browning, King & Co.'s clock, set over the show window on the second floor, holds a prominent location, facing the large, triangular open space.

In front of Wm. Wise's Son's store, Ful-

ton St. and Flatbush Ave., stood a clock that in the course of years had made its presence familiar to shoppers in that section. Civilization's progress, in the form

THE GREAT SMITH, GRAY CLOCK TOWER, 285 FEET HIGH, AT FLATBUSH AVE. AND FULTON ST.

of ripping up the street for construction of the rapid transit subway, enforced its banishment, but its career of usefulness will be renewed by its resurrection in the near future.

This brings one within sight of the monumental proportions of Brooklyn's highest clock tower, known as the "Smith, Gray Tower." With its 285 feet of elevation, the 15-foot dial of the clock commands a view of the entire vast "City of Churches." The movement that controls the giant hands (the minute hand measures seven feet and the hour hand six feet), is the largest built. Its pendulum is over 14 feet long, with a two-second oscillation. At a distance of no less than three miles the outline of the clock dial is visible with the naked eye, though a glass is necessary to read the time at such a far-off point. The weight controlling this leviathan's works is 450 pounds. Its dial is automatically lighted at sundown by electricity, and is extinguished at sunrise by the same device. The "Smith, Gray Tower clock" has been a Brooklyn landmark since 1898, when the E. Howard Clock Co. installed the gigantic time-keeping mechanism in its lofty location.

On Ryerson St., in that seat of practical learning, the Pratt Institute, is a self-winding mechanism that controls the hands rotating in the dial that looks out onto the public library of that institution. The usefulness of that timepiece is uncontested, instilling, as it does, punctuality (since its installation in 1892), in the adolescent minds of the students who enter the portals of that institution to gain a practical insight into the wage-earning needs in their future careers.

Wandering further into the center of the rapidly growing city, one arrives at the imposing edifice of the Long Island Storage Warehouse. Perched high on the top of this new mammoth structure is a 76-foot bronze tower of refined architectural lines, the apex of which is 186 feet above the sidewalk. Standing on the corner of Nosstrand and Gates Aves., the 66-inch dial of the clock within the tower commands a very extended view of the neighborhood.

This 20th century timepiece started on the first of last January and represents the development of horological science in several respects. The mechanism, which is self-winding, is controlled by a master clock

Philadelphia Watch Case Company,
RIVERSIDE, NEW JERSEY

Let us be Partners

We are advertising the New England Watch to one third of the population of the United States. Next Fall this advertising is going to create a public awakening; is going to cumulatively force business for the Fall and Christmas season, and now, Mr. Jeweler, we want you for a full partner.

Thousands of convinced people are already writing us asking where they can buy the New England Watches. We don't sell to consumers and so we want you to make these sales. We want to refer these inquiries to you, and you get the profits—you make just so many new customers.

We are in earnest about this partnership plan. Your interests are our interests and we are going to work with you and for you. We are sending out men to find out just how we can help the jewelers. We are going to carry out an extensive plan of co-operation with you.

How can we assist you? What can we do to make our partnership more profitable? Write us your suggestions and get the details of our plan.

The New England Watch occupies a field all its own, Mr. Jeweler. It is built distinctly for the general public and advertising is going to make—is making—it the favorite watch of the Great American People.

A letter asking us for our plans will be a letter written in the interest of increased business. Better write it NOW.

Special Offer To the Jewelry Trade

Commencing May 1, 1906, we withdrew from our price lists enameled watches heretofore shown in lists and catalogues under series "S" (ELF) styles. To clear our stock of enamels in the 10 ligne series "S" (ELF) watches, we offer a rearrangement of this style by substituting our new 4-jewel "SS" movement in place of the 12-jewel "S" movement previously used in this watch. This new movement is a superior time-keeper, and it is fully guaranteed. We have a limited stock of the following colors, but guarantee no patterns:

Red, Blue, Green, Electric Blue, Mauve, Turquoise, Pearl, Violet, Black, Miscellaneous.

These cases and colorings are the same as formerly, and all with swivel pendants.

We reduce prices as follows:

Series SS (ELF) Enamel Watches, each, \$7.00.

Series SS (ELF) Enamel Watch, with Fleur-de-lis Brooch, enameled, and box, \$8.00.

No quantity guaranteed, but will be sold at these prices until stock is exhausted.

Can be obtained at Factory, Offices or Distributing Agents.

in the office on the ground floor, which controls five other clocks throughout the building and is itself synchronized from the Washington Meridian Observatory. A novel feature in this time-scoring mechanism is the device by which, by true Washington connection, 250 incandescent bulbs decorating the main architectural lines of the tower are lighted at 8.55 p. m. and extinguished at the second of 9 p. m. Although the illumin-

CLOCK ON THE PRATT INSTITUTE.

ated dials afford a nightly sight of the hours to the population in this section of town, this five-minute-lasting flash and glare of light carries at curfew hour an extension of its radius of usefulness. Already this new timepiece acts as the standardizer of

WM. WISE & SON'S STREET CLOCK.

time for many thousands of Brooklynites.

Extending one's search in the direction of the Williamsburg section of Brooklyn Borough brings into sight the tower clock in the big Batterman department store. This useful timepiece has for a long range of years been consulted by a busy throng of pedestrians, for it is in the very center of

Williamsburg's shopping district, corner of Broadway and Flushing Ave.

One of Brooklyn's prominent thrift-preaching institutions is the Kings County Savings Bank, on Broadway and Bedford Ave. From its useful clock dial's hands

CLOCK ON LONG ISLAND STORAGE WAREHOUSE.

the flight of time and the necessary precautions to prevent impecunious age from overcoming us in its unceasing progress are eloquently spoken to the passer by.

In the massive brick tower of the Tompkins Ave. Congregational Church, on the corner of McDonough St. and Tompkins Ave., is a large clock, much consulted.

Protecting the cranium of so many of Uncle Sam's citizens from Old Sol's too genial shafts, Jack Frost's chilling embraces and the saturating sieges of Jupiter Plu-

BATTERMAN CLOCK AT BROADWAY, FLUSHING AND GRAHAM AVES.

vius, the Knox hat factory, situated in St. Mark's Ave., at Grand Ave., can be considered as rendering in its output a beneficent work. And when the hundreds of factory girls and boys teem into or out from the big building, the large clock in the tower is the "cynosure of all eyes."

Ever seeking for outdoor dials, the wanderer reaches Brooklyn's populous, silent suburb that grows proportionately with Greater New York's increment—Greenwood Cemetery, over whose beautiful entrance the "last" dial ticks forth a requiem for the dead.

(To be continued.)

Do Heart Throbs Affect Rate of a Watch?

DOES your watch persist in going wrong—either too fast or too slow? If so, look out. There is something the matter with the watch, or the watchmaker who tries to keep it in order for you, or with yourself.

Nobody would ever think that something the matter with him would cause something

KINGS COUNTY SAVINGS BANK'S CLOCK.

to be the matter with the watch, but a watchmaker is the cause of much uneasiness in an East End family, in Pittsburg, Pa., and all because he insists he does his best with a certain watch, and that the reason it does not keep good time is because the man who carries it must have an irregular heart beat.

It came about in this wise: The head of the family had a gold watch that cost him \$200 10 years ago. He has carried it ever

CLOCK AT TOP OF KNOX FACTORY.

since, but a year ago it began to act queerly. For some days it lost time, and then it began to gain time; again it would gain time mysteriously and then strangely lose a minute or two a day. It had been to the watch repairer's three times in 12 months, and was still acting irregularly a week ago, when the man's wife took it to

Lorsch Bldg., Room 27. NEW YORK.

the watchmaker for further treatment. "I think I know what is the matter with this watch," said the craftsman. "I don't believe that your husband's heart beats regularly. Now, don't get alarmed. It is not necessarily disease. He may be just one of those men who can't have a watch that keeps good time simply because of their irregular heart beats.

"You see, a watch has a regular, rhythmic movement," said the watchmaker. "It is carried close to the human heart, which ought to have a regular, rhythmic movement, too. Now, while the watch is beating away the heart is beating also. If its pulsations occur regularly, punctuating the rhythm of the watch at specific intervals, the rhythm of the watch movement is undisturbed, but let the heart pulsations occur irregularly, now pulsating with the tick of

CLOCK AT ENTRANCE TO GREENWOOD CEMETERY.
(See text on page 83.)

the watch, again stopping discordantly, in between the ticks, the watch is bound to be affected. Leave this watch here and let your husband carry your watch, which we know keeps regular time. Let him wear it a month and see if I am not right."

So the woman handed her husband her watch to note the result. She wanted him to consult a specialist immediately upon her return from the watchmaker, but he compromised by agreeing to try the test suggested by the watchmaker.—*New York Telegram*.

In the advertisement of Hipp, Didisheim & Bro., last week, it was incorrectly stated that their Locust movements were supplied in 30-year filled cases; this should have been 20-year filled cases. These movements are extra thin model, seven-jewel, lever, pendant set and thoroughly guaranteed by the maker.

Fuller & Scribner have been succeeded in business in Spokane, Wash., by B. G. Fuller.

R. Leighton, Hucoye Falls, N. Y., has moved to a new store, where he has much better light and accommodations.

Two New Regulating Machines.

TWO new regulating machines, which have just made their appearance, are described in the *Deutsche Uhrmacher Zeitung*. The little apparatus shown in Fig. 1 was recently put on the market by Koch & Co., of Elberfeld, and is protected by German Patent No. 236341. It is provided with a standard balance, making 18,000 oscillations in an hour, placed in a compass-shaped frame, c, and made to start oscillating by turning the entire apparatus. In the center of the glass cover

Fig. 1.

of the balance is a metal cavity, d, in which turns the lower pivot of the balance which is to be regulated. On the side of the plate is a vertical support, e, turning on its axis, and which can be fixed in any position by means of an attachment screw, s.

A pair of tweezers, a, is fixed in the cross arm, f, of this support; it is opened by pressing the button, b, and is intended to

Fig. 2.

grip the end of the balance spring which is to be counted.

The method of using this contrivance is probably known to every reader. The outer end of the spring is fixed in the tweezers, a, and set so far sidewise that the lower balance pivot stands concentrically in the cavity, d; then by giving the whole apparatus a turn, both balances are made to start oscillating simultaneously and in the same direction. After a few seconds it will be possible to see whether the balance to be regulated loses or gains as compared with the standard balance. The balance spring is then gripped shorter or longer, as the case may be, and the test repeated until both balances oscillate for a whole minute absolutely in unison.

A much simpler contrivance is the regulating machine shown in Fig. 2. It scarcely deserves to be called a machine; "comparing balance" would perhaps be a more applicable term. The entire apparatus consists merely of a kind of compass, within which is placed, instead of a magnetic

needle, a balance calculated to make exactly 18,000 oscillations in an hour. The balance spring which is to be counted is gripped in the tweezers. The operator holds the latter in his hand and causes the balance to oscillate upon the glass cover of the standard balance case.

This apparatus is made by Henri Picard & Frere, Chaux-de-Fonds. It is patented in Switzerland, No. 12,780.

Competition in Peru Between Clocks and Watches of Germany and those of the United States.

IN the course of a special report on Peru's commercial progress, submitted by Special Agent Hutchinson, to the Department of Commerce and Labor, Mr. Hutchinson says:

In previous reports attention has been called to the success of German competition in clocks and watches in South America. In Peru conditions are different and American sales far exceed German. The imports of clocks and watches to Peru were (values in thousands of United States dollars):

From—	Per annum.	
United States:	1895-1899.	1900-1904.
Clocks	2.8	4.5
Watches	15	19.7
Total	17.8	24.2
Germany:		
Clocks	*1.7	4.8
Watches	*.2	1
Total	*1.9	5.8

*Three years 1897-1899.

These figures and many others which might be given, all serve to illustrate the strength of the United States in Peruvian trade. The obstacles which stand in the way of still more remarkable development are relatively slight. As already indicated, they have to do chiefly with details of packing, shipment, styles, etc., and might be overcome if our exporters would give close heed to instructions and requests which are constantly being sent them by Peruvian importers. These importers, especially the few larger ones who handle the bulk of foreign purchases, are experienced men, and when they give directions as to such minutiae as the above they have reasons for them which perhaps are not appreciated by the American shipper or manufacturer.

Horological Notes.

"I THOUGHT the clocks were queer enough at Naples," said the traveled man, "where you start for Rome at 13 o'clock in the afternoon and get there at five minutes past 23 o'clock at night, but this is what I overheard on a Broadway car the other day:

"What time is it?" asked one woman of the other; "can you see the clock from here?"

"Yes," said the other, craning her neck to look at a tall clock that stood on the sidewalk, it is 25 minutes after N."—*New York Sun*.

Frederick A. Allen, New Bedford, Mass., is the inventor of a watch and chronometer regulator which is said to possess many novel features. Steps have been taken to have the invention patented in this country.

This illustration shows our main factory exactly as it exists, where 3,000 complete watches are made daily.

LANGENDORF WATCH CO.

CHAUX-DE-FONDS, SWITZERLAND.

It will be of great interest to every jeweler to learn that we are devoting our full attention to this market. The existing conditions in the watch trade have convinced us that there is a long felt want for moderate priced, but accurate Swiss Watches.

We wish to call your attention to our LONVILLE MOVEMENT. It has a lever escapement and is being made in Os, 12s and 16s, fitting perfectly all American cases. This movement is salable and profitable. Our Watches and Movements will be introduced in this market bearing the following names:

STEADY DEMAND FOR WATCHES.

WHILE THE DEMAND for most articles fluctuates more or less with varying seasons, the WATCH suffers less from these changes than other products. This is because it is less an article of luxury than of utility; it may be classified among the "necessities." Time is observed in Summer as in Winter; in social engagements as in business; by the tourist as by the stay-at-home.

Whatever the season or the object, these Offices are fountainheads for the supply of Watch demands.

OPTICAL DEPARTMENT

Twelfth Annual Convention of the New England Association of Opticians

The Largest Optical Meeting Ever Held in the United States

Boston, Mass., May 17.—The 12th annual convention of the New England Association of Opticians was held on Tuesday and yesterday, May 15 and 16, at the New American House, this city. It was the largest optical meeting ever held in the United States, either local, State or national. Over 375 persons had registered by Tuesday afternoon, and with Wednesday's registration the attendance exceeded 400.

President Albert A. Carter called the business session to order at 1.30 p. m. Tuesday. The minutes of previous meetings were

read and adopted. Ballots for the annual election were ordered closed after all were given due notice of the nominations. Gasper H. Whitehouse was elected to associate membership in the society. Congratulations in the forms of telegrams and letters were received from the Optical Society of the City of New York, the Optical Society of the State of New York, Rhode Island Optometrical Society, and Southern Tier Optical Society.

W. I. THOMAS, FIRST VICE-PRESIDENT

The election of officers for 1906-1907 resulted as follows: President, Albert A. Carter; first vice president, William L. Thomas; second vice president, R. Wight;

treasurer, W. P. Bullard, and secretary, George A. Barron, all of Boston.

Executive Committee—Howard C. Doane and F. P. Simmons, Boston; S. C. Hewitt,

ALBERT A. CARTER, PRESIDENT.

Salem: W. R. Donovan and W. W. Slade, Boston.

Trustees of Funds—Briggs S. Palmer, A. G. Barber, G. H. Newall, C. N. Quinby, all of this city.

Membership Committee—C. S. Hart, Lynn, Mass.; F. M. Drisko, Dorchester, Mass.; F. A. Barber, Boston, Mass.; N. J. Atherton, Boston, Mass.; W. A. Smith, Melrose, Mass.

Representative to the annual convention of the American Association of Opticians at Rochester, Albert A. Carter, Boston; alternate, Briggs S. Palmer, Boston.

The secretary's report was then called for, which showed that there were now 83 active members, 15 associate members and four honorary members.

President Carter then addressed the meeting along the following lines:

"The New England Association of Opticians extends a most cordial welcome to its

many members and guests, at its 12th annual convention.

"In reviewing the past I am intensely gratified to note that the progress is so far-reaching. The association started with 11 members and now has 132.

"The scientific and educational achievements of the past few years are so marked as to have raised the optometrical standard to a higher plane than was dreamed of a few years ago. Each successive meeting has shown an increase in interest.

"Yet, with all these gratifying results to our credit, we must still remember that there is yet much to be accomplished.

"Three important matters should be given our attention, namely: (1) Introduction and adoption of a proper code of ethics; (2)

R. WIGHT, SECOND VICE-PRESIDENT.

stamping out of all unscrupulous advertising, and (3) creating means for increasing membership.

"The code of ethics adopted by the Rochester Optical Society is acceptable, where in is laid down clearly rules governing the 'Duties of Members,' 'Duties to Patient,' 'Duties to Physicians,' 'Duties to the Public,' and 'Titles.'

"The adoption of this or a similar code would not be one-sided, but would help each optometrist by securing him fair treatment in return from both the public and fellow optometrists.

"I protest most unconditionally against

Optical Department.

much of the advertising that is done by a certain class of opticians, not, happily, members of this or other recognized associations, wherein claims are made that are false.

"For instance, I have made a composite 'ad.' from half a dozen 'ads.' found in various newspapers.

Special offer for 30 days only!

I will sell 2,000 pairs of \$3.50 gold glasses for \$1,000.

If you are troubled with headache, poor vision, nervousness, dizziness, epilepsy, female troubles, piles, neuralgia, indigestion or other functional diseases, call at once and be examined without charge. I can give you relief.

I never fail.

"Such 'ads.' I reiterate, ought to be stopped, when made by other than physi-

GEORGE A. BARRON, SECRETARY.

cians. There is abundance of good material that can be used to far better advantage than this. Tell the truth.

"As to membership, I am often asked:

"Of what benefit will membership be to me?" My reply is that it brings you in touch with the best men in your States, for, while some good men are not members, most are. The educational advantages are many and unquestionably of a high order; and your interests are guarded at all times vigilantly.

"United we can put into practice a code of ethics, we can ask justly and forcibly for legislative recognition, we can elevate the general and individual standard, and we can air our views openly and help each other to an unlimited extent. My hobby is obtaining new members and, with an earnest plea to all to forward this work, I close."

George A. Barron started a spirited discussion by asking "Who or What Are We?"

"Are we refractonist, consulting optician, optometrist, eyesight specialist or Oph. D.?" Opinion varied. Mr. Martin, New York, favored eyesight specialist; Mr. Davis, Rhode Island, and Mr. Hart, Massachusetts, optometrist, and T. Cowan, England, optologist.

The business session adjourned and Mr.

A. Martin, of New York, delivered an address on "The Modus Operandi in Eyesight Testing," which will be found in full on page 93 in this issue.

THE BANQUET.

In a banquet hall, which was exquisitely decorated, 240 members and guests of the New England Association of Opticians were royally feasted as guests of the Globe Optical Co. and the Boston Optical Co. The arrangement of the tables produced a horseshoe effect, and at the head table sat President A. A. Carter, Mr. and Mrs. W. J. Benn, E. Le Roy Ryer, Miss Harriet B. Whittemore, R. M. Lockwood, Rev. G. W. Benn, Miss E. V. Neely, F. A. Stevens, Mr. and Mrs. Frederick Boger, William Moore, A. G. Barber, Mr. and Mrs. G. A. Barron.

Besides these there were 14 tables, each seating 16 persons. The menu was as follows:

Cream of Asparagus.	Consomme Julienne.
Olives.	Radishes.
Baked Cusk in Cream.	
Bebe Potatoes.	
Roast Chicken, Giblet Sauce.	
Delmonico Potatoes.	String Beans.
Maraschino Punch.	
Rissolo of Sweetbread, Neapolitan.	
Sweet Corn Fritters, Maple Syrup.	
Queen Pudding.	
Harlequin Ice Cream.	Assorted Cakes.
Coffee.	

President Carter expressed his appreciation of the Globe and Boston Optical Cos.' hospitality and took that opportunity of thanking the Stevens Co. for the entertainment it afforded Wednesday evening, in the form of a Hippodrome party.

Thanks were offered to W. J. Benn and R. C. Thompson for the excellent manner in which they had arranged the convention. A rising vote of thanks was extended to Messrs. Barber, Hardenbergh and Stevens, in response to a motion made by Mr. Palmer, seconded by Mr. Barron, to present the companies represented by the above named gentlemen with duly engrossed resolutions expressing the society's appreciation of their kindness. A. G. Barber and F. A. Stevens responded.

R. M. Lockwood was next introduced. He congratulated the society upon its complete and unqualified success.

The next speaker was W. J. Benn, who complimented the association, and stated that this was the largest meeting ever held in the United States and that he expected to see 500 at the next annual convention. He felt proud to be a member of the New England Association, because it has been the leader, with but few exceptions, in all important advances. If the Boston College of Optometry was not a success it was merely because the movement was five or 10 years ahead of the times. But a college will come of it yet.

W. Moore, of the Bausch & Lomb Optical Co., followed Mr. Benn. He said in part that Boston inspired men with the determination to advance and fulfil their destinies. From the "Hub" men went all over the world and now form the lifeblood of the great and growing west.

E. Le Roy Ryer was next introduced as ex-president of the Optical Society of the City of New York. As delegate of that society he presented its compliments to the New England Association and went on to say that what the Pilgrim Fathers were to

this great and honored nation, the New England optometrists are to the profession of optometry—the pioneers, the leaders. New Yorkers are as proud of New York as Bostonians are of Boston, but without in any sense lowering his regard for New York, he felt that Boston has now captured honorably all the laurels, but was glad they were in such safe and trustworthy hands.

M. J. Davis, president of the Rhode Island Society, when called upon to speak, wished to discover how the New England Association drew out such an attendance, promising to keep quiet if that were told him.

Rupert C. Thompson was called upon and said that since he had had "convention" for three months, he couldn't say much, except to express his thanks for the unlimited support he had received from the various firms and members of committees.

Dr. A. C. Campbell was then introduced

THE OFFICIAL CONVENTION BADGE.
(Presented by the American Optical Co.)

and lectured most interestingly on "The Health Ray Lenses." The lecture will be given in full in a future issue of THE JEWELERS' CIRCULAR—WEEKLY. This ended Tuesday's session.

WEDNESDAY'S SESSION.

The important features of Wednesday's session were: Lecture by F. P. Simmons, "Is the Time Ripe for a Recognized College of Optometry." This dealt with one of the most important considerations of the day and is full of vital interest to all optometrists. A lecture by Briggs S. Palmer, "Systematizing an Optical Business," was a practical, useful address, and was delivered in Mr. Palmer's usual forceful manner.

On Wednesday evening the members and guests attended the performance at the Hippodrome as guests of Stevens & Co. This formed a crowning touch to the most successful convention ever held in the history of optometrical organization.

THE EXHIBITS.

Without question, this exhibition of optometrical instruments and appurtenances surpassed anything ever seen. The hall was 80 feet by 30 feet in size, and decorated artistically with the official colors, red and white. The booths were not like those usually found, of a mixed character, but all were made uniform by order of the convention committee. Thus the general effect was grand.

Optical Department.

GLOBE OPTICAL CO.'S DISPLAY.

This occupied one-quarter of the entire space and consisted of three sections, viz., a reception room, a refracting room and a workshop. The reception room was richly carpeted and furnished handsomely in old mission and palms. A complete optical library was also herein installed. A stenographer, furnished by the Globe Optical Co., was at the disposal of the members, and from here were distributed the souvenirs, which comprised a metallic screw driver, a sample of grinding wheel in the form of a knife sharpener, and a celluloid frame measure and axis finder.

The refracting room contained a fully equipped dark room, test cases, prescription filing cabinets, optometers, Geneva combined instrument, De Zeng luminous retinoscope, ophthalmoscope, and ophthalmometroscope, and one of the neatest forms of adjusting tables on the market, whose top is glass, through which you can look down into drawers and, upon seeing the plier you wish to use, pull the drawer out and pick up the plier.

The workshop contained edging machines, automatic and regular; lens drills of various forms, and lens cutters, all in actual operation and under the charge of an able demonstrator. The complete exhibit was in care of R. W. Thompson, G. B. Nagel, W. W. Slade, William Bowser and L. E. White.

DE ZENG EXHIBIT.

Henry L. De Zeng was in charge personally and created great interest by his exhibition of his new transilluminator, an instrument that can be placed on the cheek and illuminate the eye so that one can see inside of the eye through the pupil; putting it in one's mouth, one can also see the fundus reflex. The penetrating power of this light is remarkable and the instrument is not any larger than an ordinary pencil. Mr. De Zeng also demonstrated his luminous retinoscope, ophthalmoscope and ophthalmometroscope.

EXHIBIT OF STEVENS & CO., PROVIDENCE, R. I.

The "S. Q." individuality characterized this display. A beautiful show case was shown, with a view of giving suggestions regarding window displays. This was accompanied by an instrument that turned out 148 finished screws a minute, and a complete line of Stevens gold-filled goods. The souvenir was a package of screws and a tap. Represented by F. A. Stevens.

EXHIBIT OF E. KIRSTEIN SONS CO., ROCHESTER, N. Y.

A new line of the well-known Shure-on mountings was shown under the supervision of H. E. Kirstein and Ben H. Hillsbury.

EXHIBIT OF BOSTON OPTICAL CO.

Here were displayed lens cabinets, prescription filing cabinets, lens centering instrument, pliers, chains, cases, tools, auto goggles and a new form of invisible bifocal and a new mounting called the "Truepoise," that has, it is claimed, many superior advantages. Represented by F. R. Hardenbergh and Edward Leonard.

EXHIBIT OF F. A. HARDY & CO., CHICAGO,

The Hardy and Chamber Inskeep models

of ophthalmometers, a mechanical testing cabinet, and a Ryer astigmatometer, were demonstrated by their representative, who also demonstrated for the first time an instrument, not yet on the market, called the oculametroscope, combining subjective and objective tests in a compact form.

EXHIBIT OF BAY STATE OPTICAL CO.

S. J. Clulee graciously explained the merits of his company's frames; he also exhibited special guards and screws, and about 100 patterns of eyeglass chains.

EXHIBIT OF FOX OPTICAL CO.

John Currin demonstrated the value of the Fox screw lock and tubular spring, as well as the advantages of the six styles of Lasso guards and the Fox lock-joint temple, an ingenious device to keep the temple from working loose.

EXHIBIT OF THE STANDARD OPTICAL CO.

The new toric, called the "Hercules" machine, demonstrated by C. E. Quimby, attracted much attention. It grinds with ease a 15.00 D. toric curve on a 6.00 D. base. It is not yet marketed. Lens drills, edging machines, lens cutters, automatic rimless edge grinders, opticians' workbench, were also in operation and the standard lens marking, centering and testing instrument and the improved standard prisoptometer were displayed.

EXHIBIT OF THE W. GREEN ELECTRIC CO.

Here A. B. Davies demonstrated a full line of motors used in optical workshops.

EXHIBIT OF W. F. CUSHMAN.

Wm. F. Cushman had charge of Dr. Agnew's German eye water display, as well as that of the Moore non-leakable fountain pen.

EXHIBIT OF A. D. BLOCK.

Mr. Block himself demonstrated his "Roosevelt Temple," a temple that can be slipped on and off a pair of skeleton eyeglasses at will, turning them into spectacles when desired.

EXHIBIT OF RANDALL-FAICHNEY CO.

A full line of high grade clinical thermometers were displayed by this concern.

EXHIBIT OF THE HUB OPTICAL CASE CO.

Almost 100 styles of eyeglass and spectacle cases were on exhibition at this booth.

EXHIBIT OF THE R. F. SIMMONS CO.

An artistic display of eyeglass chains was seen at this booth. This firm makes thousands of styles of locket, chains, bracelets, etc., and about 400 styles of eyeglass chains.

EXHIBIT OF PAUL MFG. CO.

L. C. Paul exhibited a metal polish and the Egyptian deodorizer and germ killer. He kept the atmosphere of the hall pure and sweet.

EXHIBIT OF NATIONAL CASH REGISTER CO.

The click of cash machines could be heard at all times as the representative displayed the advantages of his machine.

THE REGISTER.

The official list of those present follows:

REGISTRATION LIST OF NEW ENGLAND ASSOCIATION OF OPTICIANS.

W. J. Benn, Philadelphia, Pa.; Geo. A. Barron, Boston, Mass.; R. M. Lockwood and E. LeRoy Ryer, New York; V. W. Hills, Norway, Me.; W. W. Slade, F. M. Drisko, R. C. Thompson, A. A. Carter, A. E. The Modus Operandi in Eyesight Testing.

(Address by A. MARTIN before the 12th annual convention of the New England Association of Opticians, in Boston, Mass., May 16.)

WHEN I was asked to address you, I consented, with some reluctance, remembering my visit to Boston a year ago. I came here to the convention and went home a sadder, but a very much wiser, man. I had found that I knew very little when I got here, and I went away believing that I knew a great deal more, so I was glad when I got home that I had come to Boston. I find the New England Association of Opticians a body of men of whom it is well to be proud. I confess that there were many things that I learned when I was here a year ago. In deciding on a subject, I thought the subject of "Eyesight Testing" would be the most interesting to men who earned their bread and butter in this way.

In order that a man be a successful trout fisher, first, he must have the equipment, and, second, the "know-how." Now, you and I have heard about the fellow who will go down to the stream with a rod which he cuts from a tree and a safety pin at the end of the rod, and he will catch more fish in an hour that we would catch in a day. Now I do not think we believe in that; so it is with the optometrist. We must first have the equipment, and, second, we must have the "know-how." I have often said that if the Angel Gabriel should come down from heaven and test eyes and not have ordinary tact and business ability, he would not be successful in business. It is not always the man who can do the most thorough work who succeeds, but the man who impresses his customer with his knowledge of the business and inspires confidence, so that a patient will do just what he wants him to.

I have divided my subject into three parts: First, the constructive; second, the objective; third, the subjective. To return to the fishing trip: We start out with equipment, which is the constructive end of it. We are thoroughly equipped with the latest and best appliances for testing eyes. Without such an equipment, a man is severely handicapped.

The second is the objective view of the matter, and that is the patient, or the trout, which you are going to catch. If you want to be a successful trout fisher, you will always keep yourself out of the way. I remember very well when I first began to

catch trout. I went up the stream—rather, I went down the stream—and a man came along, and he said, "Do you know what you are doing?" I said, "I am catching trout." He said, "You are beginning at the wrong end. You must go up stream and keep out of sight, so that the trout will not see you." So it is with eyesight testing. If you want to do good testing, keep yourself out of sight. Do not think what a great man you are—in other words, "the only pebble on the beach." That is the objective end of it.

Subjectively, it depends on us. We have our trout. How are we going to land it? Almost any man can catch a trout, but the difficulty is in landing it. How are you going to land your customer? Let us see how we proceed, making this as simple as possible. The patient comes into the office and wants to have his eyes examined. Get your patient in a chair and sit down professionally beside him, in order to have a short talk. Ask what the trouble seems to have been; ask whether glasses have ever been worn before or not, and, if possible, get your patient to understand how you are going to proceed. If possible, let it be known in some tactful way whether you are going to charge for examination or not.

Some men believe no charge should be made for the examination. I believe differently. I believe it is best to raise our profession to the highest plane. Take a man who consumes three-quarters of an hour of his time in examining a case and makes no charge for it. I would like to know how he is going to make up for it, unless he is going to bunco his customer into buying a pair of glasses. I think the finest thing is to find a man or a woman who does not need glasses. It is the best advertisement I know of when I have a man or woman sitting in my chair and I can say, "There is nothing the matter with your eyes. There is no error of refraction. There is something else the trouble with you." You are paid for your examination and the customers go out and are going to be an advertisement for you for years to come; whereas, if you had sold them a pair of glasses for, say, \$3, \$4 or \$5, that they did not need, they know you have fooled them and they will do you harm.

When you find a customer that does not need glasses, glory in it, for you have found the best advertisement possible. The trouble with most men is that when you hold one dollar before their eyes, they miss the \$20 beyond. Now, you try to inspire confidence in yourself by this constructive examination. It is not always wise to say, "We charge so and so for this examination." I never say this, but I bring the patient into such a position that he will ask me, "Now, what do you ask for this examination?" I have inspired his confidence, and I then go on. Now, that you have inspired their confidence, you go on and try to find out something about their trouble—whether they have worn glasses or not, etc., and then you proceed.

We continue the examination. I prefer to do this in a darkened room; some prefer to have them sit in a room and draw the curtains. The first thing we do, we take the ophthalmoscope and we examine the fundus. After we examine the fundus, we

Optical Department.

next examine the cornea, the crystalline lens and the iris. This takes but a few minutes for an expert with the ophthalmoscope, and there is no reason why every man could not be an expert with the ophthalmoscope by putting in a few hours a day. In this way he will soon be able to know almost at a glance whether disease exists. This examination is extremely important, but I would advise every man to have the patient look at a lighted globe. There may be iritis, and it is not wise to expose the eye at first to too strong a light.

You will leave yourself open to a case of law if there should be any trouble because of this. There was a gentleman in this State, only a few years ago, who, because he took a patient into a darkened room and threw the light into his eyes, was involved in a law case. It came out afterward that some oculist had sent the man to the optician, because he knew he would be taken into the darkened room and the eyes would be examined in this way.

The next thing we should do is to examine the refractive media. I prefer to do this with what I call the skiascope—with the regular skiascope—because you have the mirror in your hand. I have used the regular skiascope and the De Zeng retinoscope. Now, with the skiascope, which I referred to, I have the revolving disk, holding plus and minus lenses, ranging from 0.50 to 4.00. This does away with the trial case entirely. I put the round disk in front of the patient's face and I swing it around until I get just what lens I want, marked with red and white letters. Now I have the refraction; I mark it down. Then I estimate the astigmatic condition with the ophthalmometer. Some do not place much confidence in the ophthalmometer. For my part, I have used it many years, and I do not care to give it up. It is not an absolute instrument for measuring astigmatism of all kinds. You will find many cases of lenticular astigmatism which the ophthalmometer does not show at all. In many cases of corneal astigmatism the ophthalmometer will give the refraction by ignoring spasms of accommodation.

Now, having found by the use of the ophthalmometer that there is a certain amount of astigmatism, we find the axis, and I examine the patient. It all depends on me. I have gone so far; I have certain information. I know whether there is myopia, or hyperopia, or astigmatism, or hyperopia and astigmatism, or myopia and astigmatism. I go into my room, and if I find no shadow "against," there is no myopia. I may find a shadow "against"; if so, it indicates myopia, or there may be a spasm; but when I find the shadow "with" me, I know there is hyperopia. If I find 1.50, I know there is 1.50 there, and if I find two, three or four, I know it is there. Now, this is the information the retinoscope gives you.

For the subjective test, I look on paper, and I find 1.00 D. of hyperopia. I put on plus 3.50 to start, and if it is accepted I keep plus it on. This is my method. I bring out all the plus I can by the fogging system. I think the fogging system is excel-

lent, and it is one that I have used for a long time. There are three ways of making this examination. The first way, plus spheres with plus cylinders; second, plus spheres, with minus cylinders, to correct astigmatism. Third way, the one not used much, but which I like best. This is one of the finest tests which has ever been used—minus spheres, with plus or minus cylinders. I have been told in years gone by, "Do not touch minus spheres. Keep away from them. Do not correct with minus sphericals if you can possibly avoid them." First, is the old time plus spheres, with plus cylinders. I must confess that I could never examine a case that way. I do not see how any one can. Perhaps it can be used successfully by a medical optician, or an oculist. I feel certain that both these men will soon become obsolete.

A man who does his own work; a man who puts his life into his work; a man who has been given brains by the Almighty, why should he not do this work as well as a medical optician, or a dentist, who studies the nerves of the head and throat, so that he may know where the teeth are affected. The day will come when we will be compelled to take an examination which will raise us to a higher plane, and elevate the standard of optics. First, is the old way, plus spheres, with plus cylinders. Second, plus spheres, with minus cylinders. The fogging system is an excellent system for compound astigmatism. The old way is to bring up the nearest ray of light with a weak plus sphere. Now, the plus and minus way to correct is to bring up the hindermost rays with a strong minus sphere and bring up the foremost rays with a strong plus cylinder.

The third one, I feel sure, will come in favor before long. Suppose you go into your dark room and find the patient needs plus 2.00 cylinder, axis 90, and you find that the ophthalmometer indicates this also. You come to the subjective test and you place in your trial frame plus 2.00 cylinder, axis 90. You have a young person to examine. Put on all the minus spherical he can stand. If he will stand 1.00, 1.50 or 2.00, pile it on. Try it. You have then stimulated the ciliary muscles. You have not relaxed them. You have stimulated the ciliary muscles until you can do no more, and you hold it fast with your minus spherical. Holding it fast, you proceed to find out how much astigmatism there is there. You begin to reduce by using minus cylinders, reducing and reducing until you can get the best results and get your patient to see. You now have a minus 2.00, which you have been compelled to accept. You have the astigmatism corrected and the ciliary muscles are in a stimulated condition. Pile on all the plus you can, and if that is not satisfactory, try the minus. This method has not been long in vogue, and it is not original. I do not claim it at all, for it is not mine; but I know this, that those who are using it, and who have used it, have derived great benefit from it.

After testing each eye separately, try them alternately, and add or reduce until both eyes see equally; try to add plus. Then test right; then test left; then you find both eyes something like 20/20. How am I going to know that all rays that pass

into the eye are seen? It may be that one is only 20/20 and the other 20/30. I proceed now with the patient to put on a plus in one eye until I throw clear vision into the other, until I have reduced it to 1/2 D. Then I know I have reached the result where both eyes are seeing exactly the same. Now, having found in each eye a strong plus lens, I begin increasing the plus on young people—the strongest they can stand. If you meet a nervous little woman, who has been sick weeks or months, you must consider your patient. If they have not worn glasses before, you can put on an extra plus. If you do not know what torture it is to wear an extra plus lens, try it some day. Now, let us pass on. The accommodation of the eye can be gauged very well by an ideal rule which Donders gives us:

Years.	
10.....	14.00 D.
20.....	10.00 D.
30.....	7.00 D.
40.....	4.50 D.
50.....	2.50 D.
60.....	1.00 D.

After having found out the accommodation of the eyes, you will proceed now to test the muscles. As I come to this, I come with fear and trembling. One famous oculist has said: "If we live 100 years or more, we will not know all there is to know about muscle imbalance." There are many tests for muscle imbalance, and I am sure most of you are interested in some of them. There is the Maddox rod, the double prism, the candle or electric globe. Any one of these is good. Take the candle, for instance. Take the right eye. Placing the prism over the right eye, with base down, the eye inclines inward, the light will move in an opposite direction. If the light inclines outward, the light will move inward.

I make this statement in spite of what has been written in a book by a famous western writer. "What is called esophoria is really exophoria, and when they say it turns down, it really turns outward." I could not understand how any one could come to write anything like this, in the face of anything that could be so easily explained. How can I prove that light moves in opposite directions? Take the eye and push it in toward the nose, so that the image you see moves in opposite direction. Lights always move in an opposite direction from the eye. When the eye moves inward, esophoria; outward, exophoria.

Now, to know how and when to correct muscle imbalance. If we find a case of refraction where we think that is the cause of it, I think we would be very foolish to correct it. We should allow the patient to go on for a little while and we would find that the muscle imbalance would disappear. It is best not to correct muscle imbalance at first, unless there is permanent trouble. If there is, it should be given muscular exercises. We can sometimes help this by using prisms. These make the muscles more elastic, and stronger by exercising. We must, of course, consider the patient and consider whether the patient can stand a prism or not. In dealing with prisms we are dealing with edged tools. I knew a man once out west who said the prisms would cure consumption. He took the position that the eyes are always extending out when a man is dead, and he said

Optical Department.

we must use prisms to keep them straight. A friend of mine said, "I am through with prisms until I can know where they can be used." There are some persons in this room, I am sure, who use muscle exercise, but, of course, it is the same old case of putting strong prisms, base out, in for a little while every day and bringing the weakened muscles out.

Now, as to when an oculist should be consulted. In a year I have sent dozens to an oculist to be operated on. I say to a patient, "I can use prisms." Can you help it? We give correction with a prism, which will relieve the trouble for the time being, but there is no other way than an operation that I know of. Now, there is a most important point in dealing with muscle imbalance: First, when there is exophoria with hyperopia, it should not be fully corrected. When there is marked exophoria with myopia, glasses should be worn constantly. When there is esophoria with myopia, work should be given up. I have these rules typewritten, so that my assistant can see them constantly, so that he will make no mistake in knowing what to do.

Many children who squint—whose eyes turn out—have hyperopia. What are you going to do? Correct hyperopia. I know a worthy man who came from New England. I remember him saying once that he did not believe in a man examining children's eyes with an ophthalmoscope. I believe any man who understands the ophthalmoscope can examine a child's eyes. Shall we give glasses to a child of two and a half or three years of age? Just as soon as the child knows enough to keep glasses on, put them on, if error exists.

Take, for instance, a squinting eye. There is a vision of 20/60, and the vision of the fixing eye is 20/20—the focusing eye, I call it. Pile on plus until it only sees 20/60. Give them glasses to wear a few days, and if they cannot stand them, give them weaker and weaker, and in a few days I am told the squinting will be less and less. I prefer starting at the lower end and coming up higher and higher. I am quoting from an excellent authority in this country, who has tried this with excellent results, using plus spheres, with distance correction and using both spheres together.

Now we come to the reading point. This is very important. We add about 1.00 D. for every five years above 40. For 50 add plus 2.00 to correction for distance, and direct patient to read paper at the ordinary reading distance. They will be inclined to hold it nearer. It should be held about 16 inches away, with ordinary type, until it gets better. You will find in some cases that one eye will accept more plus than the other. Then I go back to the first finding. I balance it up and come back to the reading test. This is very important. Direct them to hold the paper closer until you see how far or how near they can see best. It all depends on what a person does. A man comes in, he is a mechanic; another comes in, he is a lecturer. You must give them glasses. The next step, find out whether they have worn glasses before or not. There are so many opticians who want to see the

glasses when they first come in. This is not a square deal. You are going by another man's work. Fancy a physician coming to you and saying, "What kind of medicine did the other man give you? Let me see the prescription." He does not care for this. He makes his own diagnosis. Now, after you have diagnosed, you want to see those glasses. If those glasses are right what are you going to do, as I have found to be the case sometimes. A friend of mine says to me, "I make the sale. Those are old ones, anyway." I said I would not. Stand up for what is right! Cheat the devil, anyway! Cheat him!

A little while ago a lady came to me. Her glasses were absolutely correct. I told her I could not improve on them. I said, "I do not see why it is you came to me." "I was recommended to you," she said. I do not know who made the glasses. Yesterday a man came in to see me, and I saw that his glasses were wrong. He was about to tell me who made them. I told him I did not care to know. That is one point. Your patient sees you are not trying to run down the glasses.

A while ago a lady came to see me. The trouble was the optician had given her minus lenses instead of plus. A while ago a lady came to me and said a certain party was a fakir. She told me her story, and she said, when I did not say anything, "Have you nothing to say?" I said, "No. I am too busy. I have not time to criticize any of my competitors." I made my sale. I got the case and the patient is entirely satisfied.

Make a note of every case. Make a note on your prescription blank, of what they are wearing. You are now ready for the sale. We will assume a person has come in to buy glasses. Now, the fitting of the frame is a most important matter. In the fitting of the frame, as you all know, you must first take the P. D., and the size of lenses needed. I am not speaking on fitting to-day, so I will make my remarks short on that point, but this is most important. Have the frames so they will fit just right.

We come again to the sale. I think it is most important, where a sale has been made, to have a deposit on the sale, if lenses have been made specially. This is a rule we have made for years, and I think it is most important. Have a charge for examination and, if possible, get a deposit for your work. No man can afford to give away half an hour of his time, and then say, "There is no charge." What would you think of a physician, after he had examined your lungs for half an hour or so, and you asked the charge, to have him say, "Oh, never mind—nothing." I think you would go to another man. When people get good service they are willing to pay for it.

I sat here in this room last year and heard the discussion about examinations, and I hope there will be something done this year. There never was a time, gentlemen, when I advertised "No charge for examination." I walked down street to-day with a man and saw a sign, "Eyes Examined Free." That is something which makes me blush with shame. It is beneath this profession. What man is giving three-quarters of an hour of his time to examine

eyes free? He does not mean to do it, however. He means to bunco that customer. Let each one learn a lesson from these methods. We have raised our business up to a higher plane than it was 10 or 20 years ago. What was optometry 10 years ago? Then we had men at the corner of the street, with a little push cart, selling glasses for 10 to 20 cents a pair. Now, we can get \$10 and \$20 a pair. To-day we are giving good service and we are getting paid for it.

A New Bifocal Lens Grinder.

AN apparatus has been devised for grinding a solid bifocal lens. The finished lens has the advantage of having the lower part of the "down curve" variety. Heretofore the dividing line of a solid bifocal curved upward, making the upper section of the lens smaller than the lower. This, in turn, limited considerably either the upper or lower field. The inventors claim also, that hitherto no solid bifocal lenses were produced out of single pieces of glass, having two distinctly different foci, without a ridge, and yet optically correct. That is, it was impossible to produce a lens in which the optical centers of the two foci could be at any required distance from each other, or from the geometrical centers, and still have the spherical surfaces true and free from rings and tool marks. By ridge is meant a difference in level at the place where the curvatures of the two foci meet.

The amount of the curvature produced has heretofore depended on the form of the grinding tools, which are generally larger than the lenses operated upon, are solid and have a continuous curved grinding surface. The new tools are such as to be entirely independent of the continuous curve of the grinding surface.

The amount of curvature depends upon the relative surface velocity of the tools and the lenses carried by the holders, and the direction in which they are respectively rotated, any alteration in the ratio and the direction resulting in an alteration in the degree of curvature of the lens. The machine grinds the two curvatures of the solid bifocal lens at once.

Optical Notes and Briefs.

A. J. Gray, of the Failing Optical Co., Buffalo, N. Y., is making elaborate improvements in his residence.

Dr. Niles B. Cook, Niagara St., Buffalo, N. Y., delivered a lecture before the Buffalo Optical Society at the May meeting on the subject, "Some Diseases Opticians Can Recognize."

S. L. Weaver, traveling representative of the Fox Optical Co., Philadelphia, Pa., spent Friday and Saturday of last week in Buffalo, N. Y. He reports splendid increase in the optical trade in his territory.

Certificates of membership in the Buffalo (N. Y.) Optical Society, beautifully embossed, have been given to E. V. Sycher, Buffalo; W. M. Gale, North Collins; C. F. Cushing, Niagara Falls; J. P. Simcox, Buffalo; C. H. Gros, Cuba, and L. W. Aldridge and Floyd L. Akin, Buffalo. The certificates are presented to those members of the society who pay their dues in advance.

That this department shall prove mutually beneficial to our readers, it is desirable that the members of the trade generally communicate with **THE JEWELERS' CIRCULAR-WEEKLY** regarding any advantageous device or plan which they are utilizing in connection with their business.

A Representative Retail Jewelry Establishment of Pittsburg, Pa.

IN Pittsburg, Pa., Gillespie Bros. have demonstrated what can be done in the way of erecting attractive second story retail establishments. High rents have forced many dealers to the upper floors of

of the principal business streets of the city. Running through the center of the store are three square columns, which have been made splendid use of. Around these have been built mahogany show cases of neat design, in which are displayed attractive articles of jewelry. They add materially to the store's attractiveness.

of the three columns are also placed show cases of modern design.

The interior is so arranged as to call forth much admiration. The floors are covered with linoleum of a hardwood pattern, the imitation being such as to deceive almost any one at first glance. There are at least a dozen second story jewelry stores in Pitt-

INTERIOR VIEW OF THE RETAIL JEWELRY STORE OF GILLESPIE BROS., PITTSBURG, PA.

buildings. Gillespie Bros., 10 years ago, opened a retail second-story store in the Park building, and have been so successful that recently they acquired just double the room formerly occupied, and without doubt have at present one of the most attractive establishments in that city.

The present store room, which is square, is 52 by 40 feet, and faces Fifth Ave., one

As one enters the establishment the eye immediately catches a glimpse of a handsome display of cut glass on a table supplied with mirrors, the background also being set with mirrors. This table is about 25 feet long and is exceedingly attractive. The show cases, which are of mahogany finish, are lighted by electricity. These occupy the four sides of the store. Around the outside

burg. In fact, second story stores are proving immensely popular in that city.

The death is reported of Peter E. Osterholm, Essex, Ia.

Wm. E. Trein, Ashton, Ill., recently purchased an interest in a store in Dixon. He will close out his stock at Ashton and move shortly to the new territory.

Storekeeping Department.

Coloring Incandescent Globes.

NEW YORK, May 16, 1906.

Editor THE JEWELERS' CIRCULAR—WEEKLY:

In a recent issue of THE CIRCULAR—WEEKLY were given instructions for producing color effects in electric incandescent bulbs. Mention was made of using dissolved shellac for outdoor use. For such purpose, or where the frosted bulb (from use of alum solution) is objectionable, a clear glass effect is obtained, as stated, by aniline dyes, in shellac. But most aniline, or coal-tar dyes, are not soluble in alcohol, and are, therefore, useless for coloring a shellac solution.

The ambitious bulb manipulator must, therefore, be sure, in purchasing his dyestuff for this purpose, to especially demand that the color be "spirit soluble." But again many of those, if not most, who dispense coal-tar dyes are not aware which one will dissolve in alcohol, and which will not. So, perhaps, further assistance will be rendered by enumerating a few that are spirit soluble. And as the over 600 different coal-tar dyes have several names for one and the same chemical preparation, according to the maker, a further hindrance may occur in getting your color dealer to determine which dyestuff you require. In order to make this clear the number of the Schultz and Julius tabulation is also appended to the following list, so that any color dealer who knows exactly what colors he has in stock can know whether he can supply you.

S. & J. NITRO COLORS.

No. 8. Martin's yellow or naphthol yellow (the ammonium salt is spirit soluble but the sodium and the calcium salts are not).

AZO COLOR.

- No. 31. Wool yellow, or patent fustine.
 - No. 32. Alizarine yellow, G. G.
 - No. 48. Palatine scarlet.
 - No. 62. Fast red, B. T. (slightly soluble in alcohol).
 - No. 64. Scarlet crystals, 6 R.
 - No. 66. Palatine red (blue red solution).
- #### TRI-PHENYL METHANES.
- No. 285. Malachite green.
 - No. 286. Brilliant green.
 - No. 298. Victoria blue.
 - No. 300. Fuchsine (red solution).
 - No. 303. Methyl violet, B.
 - No. 313. Alpine blue.
 - No. 335. Aurine, or rosolic acid (golden yellow).
 - No. 344. Eosine (red, with green fluorescence).
 - No. 355. Phlorescine (bluish red solution).

Perhaps it would be well to add the remark that, while the tri-phenyl methane colors are very brilliant and attractive, they have mostly, if not all, the reputation of not being fast to light; that is to say, they fade in a bright light. Hence this latter list may not be of lasting value for incandescent bulb purposes. C. W. C.

S. Jacobs & Co., Minneapolis, had an Easter window attraction which called forth a great deal of comment and attention. It consisted of a number of young chickens which had been dyed different colors, so that they looked as though they were hatched from Easter eggs. They were very much alive and eagerly eating grain which was scattered around for them.

Novel "Wink" Light Effects.

THAT latest of incandescent bulb lighting effects known as the "wink" light, which periodically extinguishes itself automatically, should be possible of many very startling and artistic methods of manipulation.

As a suggestion the following color scheme should be highly effective:

Having a series of colors, say, red, blue and yellow bulbs, alternately placed around the framework of the window, they could be so arranged as to have but one color alight at one time. The reds could be switched by themselves, the blues by themselves, and so on. By having only the reds alight at one time and the blues flashing out as the reds are extinguished, and the yellow bulbs becoming incandescent when the blue bulbs fade out, beautiful effects would be accomplished. By this means an artistic chromatic spectacle that was so startlingly used on the fountains in recent industrial exposition grounds would be duplicated in show window displays.

By arranging the flashes so that, before the reds are extinguished, the blue lights flash up, a lovely blend into violet rays would be brought about. Or on similar plan the blue and the yellow would blend into a green, to give place to yellow when the blue becomes extinguished.

The effects of gradual blending from primary to secondary and even tertiary colors allow a wide range of chromatic possibilities. Of course, care must be taken to avoid the effect of bringing together complementary colors, unless a white light be desired at intervals. Perhaps, for the use of those not well versed in the science of colors it would be useful here to give a table of the complementary colors of the principal divisions of the spectrum:

Red.....	Bluish green.
Orange.....	Deep blue.
Yellow.....	Ultramarine blue.
Greenish yellow....	Violet.
Green.....	Reddish violet.

Of course, these are but suggestions opening up numerous other color combinations and fantastic effects that can be wrought by aid of "wink" lights.

Philosophy of Hans the Advertising Expert.

DOND blame der newspaper auf your adferdisement dond bull, auf you dond know how to write a bulling adfertisement.

* * *

Honesty vas der best policy game, esbpecially auf you vas an adferdiser, und dond oexpect to make a woluntary pankrubtey of your peeziess.

* * *

"It is not der hen dot cackles most dot lays down der most eggs," also likewise, it is not der adferdisement dot haf der most words inside dot sell der most goots yet, esbpecially if der words are cackle words.

* * *

A beird in der cage is weart finfisig cent more as two on der ving. Likewise also an adferdisement in a goot paper is weart ein tausend vot you dink py your head insite, but neffer py your adferdising agent oxeocoot an order for.

Catch phrases, descriptions and arguments which retail jewelers and opticians have used in their newspaper advertisements.

WITH the tide means smooth sailing all ways. Same in business. Keep what the public wants; go after it with an ax, if necessary, but get it! Then the public, when wanting jewelry, will sail in and sail out with your goods, especially if your prices are right, "with the tide" and in the same boat, both storekeeper and customer. C. C. Miller, Massillon, O.

Jewelry.—Delicate and new designs in rich ornamental jewelry that will please customers for fine goods. Diamonds and other precious stones in beautiful combinations. Our stock always comprises the best quality and designs that are produced. Rowe Bros., Chicago.

Diamonds are just as good an investment as improved real estate, even better; because they will never depreciate in value, and are less trouble to keep. You are mistaken if you think buying diamonds is an extravagance intended for the rich alone. A person in moderate circumstances could find no better investment. A point to be well considered, however, is how you buy the diamond. Don't buy cheap diamonds and don't pay too much for good diamonds. Buy them right. Our immense stock and good reputation as reliable merchants are open for your investigation. Come and make a paying investment to-day. Albert Pfeifer & Bro., Little Rock, Ark.

Expert watch repairing, expert jewelry repairing, expert engraving—our watch and jewelry repairing and engraving courts investigation. Take them up one at a time, be as critical as you like, so long as you are just. We are experts on repairing watches and the only expert engravers in Massillon. Get on our satisfied list. All work guaranteed. Hutchinson & Myers, Massillon, O.

Concerning your eyes. A part of this store's good service is devoted to keeping Portland eyes right. It is a service conducted on the highest plane of excellence. A graduate optician who has been here for years is at your command always. Your eyes will be subjected to a careful and complete examination without charge. If they are all right and simply tired, we will tell you so. If they need corrective glasses, we will tell you so; and, if you wish it, will make glasses properly and for less expense than reliable glasses usually cost. Be sure your eyes are right. It is a duty you owe to yourself. The L. C. Henrichsen Co., Portland, Ore.

John Schroeder, Iona, Minn., is opening a new store in Graceville, Minn.

QUESTION No. 1565.—**Polish for Metals.**
—Kindly give me a few recipes for metal
polishes. T. W.

ANSWER:—One is: Carbonate of mag-
nesia, 5 lbs.; elutriated colcothar, 6 ozs.,
7 drms. Another is: Carbonate of mag-
nesia, 5 lbs.; calcium carbonate, 5 lbs.; fer-
ric oxide, 8 $\frac{3}{4}$ lbs. Mix thoroughly.

QUESTION No. 1566.—**Silvering Wood
and Metals.**—How can I silver wood and
metals without the use of the electric cur-
rent? S. W. M.

ANSWER:—The following preparation is
excellent for the silvering of wood or metal,
and can be painted on the objects to be
treated. Melt 24 grammes of pure tin in
an iron ladle, and add the same quantity
of bismuth. Stir with an iron wire until
all is melted. Take from the fire, add 24
grammes of mercury, mix thoroughly and
pour the mixture on a stone for cooling.
When used, dilute with the white of egg,
gilders' vermilion, or alcohol, to which a
little gum arabic has been added. After
applying, burnish the object.

QUESTION No. 1567.—**German Brown
Color on Copper.**—During a recent visit to
Germany I noticed many pieces of copper
articles, especially lamps and novelties, that
were finished in a beautiful brown color.
How is this produced? A. G. B.

ANSWER:—Der Metalarbeiter gives a very
good method for finishing copper articles,
as follows: The metal is first made per-
fectly clean and a paste composed of 1 to 3
parts of English red and 1 part of graphite,
thoroughly mixed with spirits diluted with
one-half water, is applied with a soft brush,
or a mixture of 2 parts of verdigris, 2 parts
of cinabar, 5 parts of sal ammoniac and 5
parts of alum, finely powdered, ground with
spirits of water, and with a little blue vitriol
may be used. The metallic object is then
heated very hot in an oven, and kept at a
high temperature for several hours. After
this the dry coating is brushed with soft
brushes. The whole process is repeated
several times, until the desired brown color
is obtained. Finally, a mixture of equal
parts of wax and turpentine is applied with
a soft brush or with a wad of cotton.

A Hint from a Subscriber.

ELMIRA, N. Y., May 16, 1906.

Editor THE JEWELERS' CIRCULAR—WEEKLY:
In your workshop notes and queries, in
the issue of THE CIRCULAR—WEEKLY of
April 25, I note your answer to R. F., on
alloying gold, which is very good. As this
question seems to puzzle a great many, I
submit a simple calculation, that was taught
me in my apprenticeship days, whereby
any quantity of gold can be alloyed to any

quality desired. The method is as follows.

Multiply weight of gold by quality. Di-
vide by karat to be made, then subtract
original weight of gold from amount and
you have the quantity of alloy to be added.
Example:—Suppose you have 25 dwts. of
18 karat gold and you desire to alloy to
14 karat.

Weight of gold.....	25
Quality of gold.....	18
.....	200
.....	25
.....	400
Quality to be made, 14.....	450
.....	42
.....	25
.....	30
.....	28
.....	2

So you have 7 dwt. 2 grains of alloy to be
added. A. R. S.

The Enameling of Jewelry.

By CECIL H. SHERMAN.

(Copyright, 1906, by The Jewelers' Circular Pub-
lishing Co.)

(Continued from issue of May 16.)

MOST enamel manufacturers and dealers
in enamel have an assortment of colors
that meet this requirement. It is well to send
to two or three of these dealers for samples
and pick out, say, two colors from each,
grind them and charge a thin layer of each
on a piece of metal (properly cleaned). Mark
the ground color and place on the
metal, so that you can remember which
is which, and then hold this metal with a
pair of soldering tweezers over the blue
flame of a bunsen burner with the enamel
side up. You can thus watch the enamel
melt or "run." If you will take the first
color that glosses over or "runs" as a
standard, and try all of the others, picking
out those that run at the same degree of
heat, you will be pretty safe to order cor-
rectly.

After an article has been given two coat-
ings of enamel, the next process is called
stoning, or filing. Take a pine stick, about
eight inches long, one-quarter of an inch
thick and one inch wide. Cut notches or
dents on the flat side, so that the article to
be stoned will rest flat on the wood, enamel
side up, and one edge will be about one-
eighth of an inch from the end. Then cut
the sides so that the same amount of wood
projects beyond the article, and shape the
other end so that you can grip it in the
hand firmly.

With your medium and fine emery or
carborundum files and a bowl of clean
water, seat yourself at the bench in a good
light; place the bowl under the bench, peg
in the tray (which all jewelers' benches
have), place the enameled piece in the

notches, grip the stick with the left hand
so you can use the thumb to hold the piece
flush with the stick if necessary, and then
file off the surplus enamel, resting the stick
on the bench peg. Use the coarser emery
file, dipping it in the bowl of water every
few seconds.

In filing a flat article, use the stone the
same as a file. If "domed," be sure to
follow the shape, and if an irregular sur-
face it will be necessary to use the corner
in a scraping manner. When the line or
letters begin to show up light, change to a
finer file, and be sure not to take off any
more enamel than is necessary to bring up
the lines or edges; when the edges are
nearly "up," use your scraper. It takes
some time before one can determine when
all the lines are up, when the pieces are
wet. If you have filed until you are sat-
isfied, and you find that the surface (when
wiped dry) is not dull all over, but has
glossy spots on it, the coats of enamel were
not changed evenly. The beginner can,
without much difficulty, stone shallow spots,
which can be determined by their lighter
shade (when the stoned pieces are wet).

Take the stoned piece, wash with wet
brush and clean water; then have the rub-
ber developing tray half full of equal parts
of hydrofluoric acid and water. Dip the
washed pieces in this solution by means of
tweezers or by stringing them on a wire
for a fraction of a second; then rinse in
clean water and dry with a clean cloth, one
that is free from pit holes. Set on the rings,
one of the plates and place them in the
front of the muffle furnace, turning the
plates around until all the steam has dis-
appeared. Then place them in the back of
the muffle and turn every few seconds until
a smooth gloss appears upon them. The
first gloss is a wrinkly effect, which soon
becomes smooth. If the pieces be left in
too long, the colors fade or the joints and
catches come off or rot.

This operation is the test for the respec-
tive fusibility of enamels. If they all
fuse at different heats, that is, if one runs
smooth before another, there is trouble, un-
less the extra amount of heat which it
takes to run them does not change the color
or cause the softer colors to look as though
they had sunk below the edges.

The next thing to do after "firing" the
fired pieces smooth is to let them cool and
place in the pickle pan. Cover with sul-
phuric pickle (not too strong) and boil
them out. Rinse in clean water. For some
purposes that ends the enameled work.
The edges are buffed bright and colored
or plated, as the jeweler sees fit.

The electroplater or colorer often causes
lots of trouble with enamel work. When a
job is finished and given to the colorer it
often comes from him with the enamel al-
lipped out and will have to be done over.
This usually happens on some article that
you are in a hurry for, and may occur two
or three times on the same piece. The most
successful colorer of enameled articles
known to the writer was a man who derived
his electric current from batteries.

(To be continued.)

A Porcelain Room in a Spanish Palace.

ANYTHING Spanish has a topical interest just now, and it is worth while to note that two of the palaces which King Alfonso will shortly share with his fair English bride possess "porcelain rooms." This form of decoration was employed by King Charles III. in the latter half of the 18th century. E. Dillon, in his valuable book on "Porcelain," says:

"The porcelain fever that raged at times in the rest of Europe seems to have left Spain untouched until the advent of the half-French half-Italian King in 1759. Charles III. . . . was an enthusiastic potter, and his first care, even before leaving Naples, was to see to the transshipping to Spain of practically the whole of the staff, to say nothing of the molds and other appliances in use at the Capo di Monte factory.

Nineteen modelers and 14 painters sailed for Alicante in a vessel specially chartered for this purpose. Among these Italian emigrants two names are worthy of mention—Buonicelli . . . and Gricci, the designer of the famous porcelain chamber at Aranjuez.

"The new factory, known as 'La China,' was erected in the garden of the Buen Retiro, a palace in the suburbs of Madrid. Here for the next 30 years; that is, until the death of Charles III., in 1788, supported by a large yearly grant, and surrounded by the strictest secrecy, was made the porcelain destined for the decoration of the royal palaces and for presentation to other courts. Only in the time of Joseph, Napoleon's brother, and of Ferdinand VII. was the ware from the royal works allowed to come into the market, and this was during a period of decline.

"The Buen Retiro gardens were the scene of desperate fighting between the English and the French in the year 1812, during which the porcelain works were completely destroyed. We hear, at the commencement, of quarrels between the Spanish and Italian workmen, and of breakdowns in the kilns. But Charles and his director, Buonicelli, must soon have surmounted the preliminary difficulties, for, during the years 1763 and 1765 (as we learn from an inscription on one of the slabs) Giuseppe Gricci was occupied in decorating the porcelain chamber, the famous 'Gabineto' of the palace at Aranjuez, which surpassed in magnificence the earlier room of the same description at Portici.

"The large plaques which surround this chamber are decorated with groups of Japanese figures in high relief, carefully modeled and painted. Between these plaques rise tall looking glasses brought from the

king's new glass works at La Granja, and the porcelain frames of these mirrors are elaborately decorated with fruits and flowers. There is another of these porcelain cabinets in the Royal Palace at Madrid;

PORTION OF PORCELAIN PANEL AT MADRID.

at this place the plaques are ornamented with children in high relief."

It is a panel in the decoration of the latter room which is the subject of our illustration.—*Pottery Gazette*.

Reappraisements of Decorated China and Glassware.

REAPPRAISEMENTS of decorated China and glass ware have been announced in the last week by the Board of United States General Appraisers, New York, as follows:

Decorated glass ware from Hermann Holzner, Karlsbad, exported Feb. 17, 1906, entered at New York (File No. 39230); findings of Sharretts G. A.: 12 porter service, No. 6, walzen and rococo decor.; entered at 120, advanced to 160 crowns for 12 sets; 12 Bordeaux, entered at 110, advanced to 150 crowns for all; 12 champagne flach; entered

at 110, advanced to 150 crowns for all; 12 sherry, entered at 65, advanced to 95 crowns for all. And similar goods. Add packing.

Decorated china from Balleroy, Mandavy & De Mavaleix, and Gustave Balleroy, Limoges, exported Dec. 31, 1904, to Nov. 25, 1905, entered at New York and Baltimore (File Nos. 36128-29, 36568, 36753, 36800, 37277, 37360, 27369-70, 37552, 37796 and 31445); findings of Board No. 2: Prices as published in reappraisement No. 6049, Feb. 13, 1906. Reappraised value affirmed.

Blown glass ware from Anton Kopp's Son, Janstein, exported Dec. 20, 1905, entered at New York (File No. 38532); findings of Sharretts, G. A.: Entered at sample discount of 25 per cent. and discount of 5 per cent. Add case. Packing included. Advanced by disallowance of deduction of sample discount.

Opal glass ware from Robert Kuppert, Saron, exported Dec. 6, 1905, entered at New York (File No. 39662); findings of Sharretts, G. A.: Advanced by addition of packing charges.

Opal glass ware from Gebr. Hoffen, Bernsdorf, exported Feb. 28, 1906, entered at Boston (File No. 39664); findings of Sharretts, G. A.: 10-in. Welsbach domes, entered at 1.45, advanced to 1.60 marks per dozen. Add cases and packing. Discount 2 per cent.

Auction Room Prices for Old China Glass, Etc., in England.

IN a recent sale at Halesworth a Lowestoft fluted cup and saucer, and another cup and saucer with bouquet of flowers, sold at 75s., and two Liverpool jugs made 36s. and 22s., while two Leeds teapots fetched 44s. and 28s. An embossed jug with silver lustre edge realized 30s., a pair of silver lustre goblets and an ewer 50s., and a brown teapot, sugar basin, and cream ewer 42s.

The groups and figures in Walton, Salopian, and Staffordshire ware were a feature of the collection, but several of the most valuable were damaged. A pair (cows and calves) sold at 32s., and three pairs of spotted deer at 32s., 24s. and 18s.; a fine pair (cow and bull) made 5 guineas. Two—emblematical of Air and Fire—realized 54s., and a pair of musicians 52s. A watch case group in a garland of foliage realized 65s., three other groups 75s., 70s. and 75s., and a fine centerpiece, with two detached groups of sheep and lambs, 95s. A group of the four seasons sold for 50s., two figures of harlequins 50s., and a pair of Rockingham groups (Pointers), 52s. Twelve antique glasses, with intaglio stems, made 75s., and a pair of diamond-cut candlesticks, 48s.

Some pieces of old porcelain came up for sale at Christie's on March 16. In eggshell were a pair of oviform vases, 7¼ in. high. Yung-Chin period, 880 guineas; a bottle, 8 in. high, of the same period, enameled with rocks, peonies, and sparrows, 390 guineas; eight saucer-plates, 6¼ in. diameter, 425 guineas. A pair of old Chinese figures of boys, 11½ in. high, Ming Dynasty, fetched 650 guineas.—*Pottery Gazette*.

WADSWORTH PERMANENT

THE WORD "PERMANENT" naturally carries weight. Purchasers want *lasting quality*. This is as true of filled cases as of solid—maximum of wear is the final test.

"WORTHY OF ITS NAME."

The above phrase is linked with the WADSWORTH "PERMANENT" WATCH CASE. To Durability is added Style; and to both, Inexpensiveness. Jewelers endorse these claims.

Forceful Facts

Concentration of purchases has ever been regarded as a fundamental principle of sound business. The retail jeweler who spreads his purchases loses every advantage to be gained by concentrating his purchases on a few reputable lines. Small purchases from many lines can never benefit the buyer as large purchases from a few lines.

Particularly is this true in buying chains, and the retail jeweler who confines his purchases to Blackinton chains derives numerous advantages thereby. First and foremost he gets chains that are safe to sell; chains that have earned the distinction of "Old Reliable" because they have always lived up to the guarantee that goes with them.

All Blackinton Vest, Dickens, Waldemar, Pony and Negligee chains are now shipped with an aluminum coupon tag attached to the swivel, and the retail jewelers who buy them can have the tags redeemed in Globe Filled W. & S. B. ★ $\frac{1}{8}$ chains as follows: 100 tags—three chains free—75 tags—two chains—40 tags one chain, making a decided advantage to be gained by buying Blackinton chains.

Retail jewelers who use large quantities of chains have a chance to win either an Automobile, a Runabout, a Motorcycle, or a Watch Lathe, all of which we are to give away in January, 1907. Look for the Coupon Tag.

BLACKINTON

Is There a Watch Trust ?

Is a Live Topic at the Present Time in Congress.

This Question Will be Fully and Able Elucidated

and every jeweler is urged to keep posted on this subject, as it will be not only instructive, but profitable to know of abuses that are of vital interest to all who sell Watches.

Why should the retail jeweler have to pay more for Watches than do department stores and mail order houses and scheme trades? is an old question.

And now comes another question of discrimination that is worthy of long discussion in the Congress of the United States.

The essence of the question is:

Why can American Watches be bought in other Countries for little more than half of what Americans at home have to pay for them ?

All who have the interest of the Watch business at heart can have copies of the speeches on this subject sent on application.

"We never follow the Fashion, the Fashions Follow Us."

MAURICE L. POWERS.

JOSH W. MAYER.

Fashions.

FASHION is never stationary—never of one mind for two Seasons. Her mission this Fall is to modify fads. Fashion is cleverly expressed in our new productions. Each piece of our goods has behind it the guarantee of a responsible maker, and back of that thirteen years of successful effort to realize an ideal by means of the best brains, the best finished mountings, the best material and best style American genius commands.

The question may be asked, what may be produced by simple means? The possibility of creating a certain distinction in one's own line of exquisite jewelry is given broad field for expression in our goods for the coming exhibition.

Simplicity in its refined phases shows its surpassing form in every possible piece of Diamond Jewelry in this conception. We point particularly to our exhibit of Platinum effects bearing that distinctive HALL MARK of Powers and Mayer.

In reference to our coming exhibition, to be held in our offices between August 13th and 18th, inclusive, we desire to state that the features advertised in the former issues of this weekly will, no doubt, create a new impression among the jewelers visiting this display of what can be accomplished in our line.

Once a visit always a visit.

The Bowden Rings

ARE COMPLETE IN VARIETY, CORRECT IN
QUALITY AND PERFECT IN FINISH. WE
MAKE EVERY VARIETY OF FINGER RINGS.

J. B. BOWDEN & CO.,

1 Maiden Lane.

NEW YORK.

QUITE frequently you get a call for a cheap, good watch. Here is where the Betsy Ross comes in; a seven jewel, nickel, pendant set movement, in 20 year case, both case and movement guaranteed by the Keystone Watch Case Co. Sold at a very inviting price. Not listed. You can make a good profit and sell a satisfactory article. Put some in your stock and you will be more than pleased with the result. We have disposed of a good many and had lots of re-orders.

ZIMMERMAN'S ELK MASTERPIECE.

Ever on the alert to improve our already most popular line of Elk emblems, we have added what we consider the most wonderful reproduction of an Elk head in gold ever attempted. This is known as the Zimmerman Masterpiece of an Elk.

This Elk head is an exact reproduction in gold of Zimmerman's masterpiece, "The Elk," which is world famous, having received prizes at every exhibition where shown. Every line in the painting has been faithfully reproduced by us in the emblem.

We are making this head in two sizes (medium and small), in both gold and silver, and in various finishes, also combining it with the dial, with and without diamonds and other precious stones. If your jobber does not handle our line, send for a selection package. Our Phenomenal success has inspired many imitations. There is but one line of FOX Emblems, and all goods of our make are stamped with this trade-mark:  A quantity or low price may sell the first bill, but quality as well is required to get succeeding orders. Our goods are of the highest standard

THE GUSTAVE FOX CO.,

14-16 East Fourth Street, Cincinnati, Ohio.

Branches in Antwerp and Oakland, Calif. (Temporarily).

Tortone Combs

Jewelry stores everywhere are having a big run on **TORTONE SHELL COMBS**. Each mail is bringing scores of orders—better add yours to the incoming volume.

TORTONE SHELL COMBS are the only logical substitute for tortoise shell, and besides they wear better. They offer the widest choice—artistic and exclusive designs, rich and novel effects unmatched elsewhere. We make the largest shell line shown in America.

You can make a handsome profit selling **TORTONE SHELL GOODS** and still be giving your trade astonishing values. We'd like to submit samples on their merits. If they are not satisfactory return them. Terms—2 per cent., 10 days; 30 days extra.

Write to-day.

"The Armlet"

Gifts of Silverware by Citizens of Montreal to Ex-Mayor Laporte.

A SHORT time ago, in the Montreal (Can.) Board of Trade Hall, the gift of the citizens was presented to Hormidas Laporte, in recognition of his inestimable services as Alderman and Mayor of Montreal. The gift was a handsome and most elaborate cabinet of solid silver, comprising a complete tea service with tray, and a full service of solid silver knives, forks, spoons and serving pieces. It is a fine testimonial to the ability and progress of Canadian manufacture. Henry Birks & Sons produced the gift in its entirety, including the cabinet, which is massive, the size being 22 inches wide, 29 inches long and 23 inches deep. It is made of genuine Spanish mahogany, highly polished, with solid brass trimmings, including a plate bearing the recipient's name.

The silver tea service is displayed upon

One of the Many Ways in Which Bogus Antiques Were Distributed.

By G. E. FARR.

A VERY common forgery in England is the engraving of old crests and inscriptions on bogus antique plate. One dealer in Dublin, some years ago, was very great at this (as well as other kinds of forgeries) and had brought it down to a fine art.

His *modus operandi* was to attend the important auction sales, especially that of a nobleman or well known connoisseur, and purchase at the sale porcelain, pottery, furniture, silver, jewelry, etc. He had plenty of capital, and if things went cheap he was a very heavy purchaser and took good care that his name was heard in the auction room and was mentioned in the local press afterward. If things went for high prices he still bought for the advertisement and to get hold of some of the pieces for future

some paper, in which case he would be sure to have the illustration at hand. The greater portion, however, was new goods, principally modern "antiques," especially in the furniture, prints, china and silver.

He would buy immense quantities of old spoons and forks and engrave the crests of the various noblemen whose names he was using on them (engraving in England is very cheap, and he could readily get the crest engraved for three to four shillings per dozen), and sell them as if they came from the sale of that nobleman's effects.

This dealer was a magnificent salesman, and had kissed the Blarney stone. I can see him in my mind's eye walking up and down the salesroom, cracking a joke here and making a witty remark there, with his mind always fixed on the main chance. One favorite remark of his was, when prices were not coming up to the usual standard:

"Well, ladies and gentlemen, this is slaughter. However, the goods have to be sold—it is compulsory. What the vendor will say when he hears the prices the goods have fetched I do not know. However, ladies and gentlemen, that is your gain and his loss. Here, ladies, is a George II. chased hot water jug going for 10s. per oz. less than one-third its value. (and one London dealer made hundreds of them out of tankards and sold them for 8s. 6d. per oz.). I have just read in your local paper that a George II. hot water jug, the same shape as this, fetched 30s. per oz." (The notices, which were perfectly correct, he put in the press in the form of reading matter himself).

Such was his persuasive ability that I have personally seen the article run up to well over 20s. per oz. and the buyers go away thoroughly pleased with the "treasure" he had secured. I know of one instance in which a lady bought a "Cromwellian" cream jug for £15 (a piece of plate very dear at £2), and which, when shown to me, I readily recognized as a small gill mug often used as a spirit measure, and of George II. period, the hallmarks being indistinct; the maker's name being distinguishable was that of a man whose mark was not registered till 1727. On the lady taking it back to the dealer, such was his persuasive ability that she actually came back to me and told me that I did not know what I was talking about—that it was just trade jealousy that made me call her lovely old "Cromwellian" cream jug a forgery. It was no use pointing out to her that cream jugs of that description were not in use in Cromwell's time. She had been fully convinced that I was doing it out of jealousy, Mr. ——— was such a gentleman (?) that any argument on my part was useless.

This man carried on a very lucrative business for many years and must have got rid of tons of bogus antiques. So gullible is the general public that they would go to his sales and readily give 10s. to 12s. an oz. for spoons and forks that could be bought of any ordinary dealer for half the price, simply because they had the crest of a nobleman engraved on them (at a cost of less than \$1 per doz.), and out of which the purchasers could weave a nice little romance to their immediate friends.

People have come to me with pierced salt cellars which they had bought for 12s. to

CHEST SHOWING SILVER SERVICE PRESENTED TO MONTREAL'S EX-MAYOR.

opening the lid. This is composed of hot water kettle, coffee pot, teapot, cream jug and sugar bowl, all in Duchess of York design, with massive hand-engraved tray to match. The tray bears the following inscription: "Presented to Hormidas Laporte, Esq., by citizens of Montreal, in token of their appreciation of the valuable service rendered by him as Alderman and Mayor of the city of Montreal, and in grateful recognition of the reforms accomplished through his work and influence. Elected Alderman of the City of Montreal, Feb. 10, 1897; appointed Chairman of the Water Committee in 1899, and of the Finance Committee in 1900; elected Mayor, Feb. 1, 1904, retiring Feb. 1, 1906." The Duchess of York design is most elaborately hand-chased, and is an exact reproduction of the tea service presented to the Duchess of York upon the occasion of her marriage.

Under the tea service are the three drawers containing the complete service of solid silver spoons, knives and serving pieces, etc. in New Queen's design. Besides the elaborate decoration of these designs, each article is engraved with the letter L in old English.

The gift as a whole is a most choice and worthy one, and bears with it the good wishes of the citizens of Montreal to one who is held in their highest esteem.

use. He advertised pretty extensively and would buy, privately, either a single piece of furniture, china, silver, etc., or buy up a whole collection *en bloc*. He visited various towns, such as Manchester, Bradford, Leeds and other large manufacturing towns, where there were plenty of rich manufacturers and tradesmen with money to spend and with wives anxious to secure anything that was antique, whether a piece of mahogany furniture of the Chippendale or Sheraton period, or an old oak chest, with an inscription on it which proved it to be 300 or 400 years old, or a piece of antique silver, with a Dutch inscription and hallmark (made in Birmingham). He would advertise his sales as, "A valuable collection of antique furniture, pictures, china, silver and bric-à-brac formed by a well known connoisseur and containing examples from the collections of the Earl of Kars, Viscount Kilmorton, Canon Eccles, Northampton Castle, G. F. Cole, F.S.A.," etc., and from other sources (the greater portion being from other sources), etc., etc., using the names of well known noblemen or collectors whose effects had been sold. These sales had a few authentic pieces in them, which were rarely sold unless they fetched a high figure, but were used as decoys at his different sales, being well known, probably at some time having been illustrated in

15s. per oz., for which, had they been genuine, any dealer would have gladly given 20s. per oz. When the forgery had been pointed out to them and their common sense appealed to they have generally seen how utterly ridiculous it has been of them to expect that all the dealers were asleep and none of the fraternity about when the "bargains" were being sold.

It is a very good plan for any ordinary man who is in the habit of straying into salesrooms on visits to England, to act with great caution and to be very careful what he buys, especially when he glances around the salesroom and notices that dealers "are conspicuous by their absence." If he pauses to think, he will become assured there is a reason for it, and may rely on it there is something wrong, for, as sure as the night follows the day, if the sale is genuine "the trade" will be represented.

The Morosini Cup For Speedway Trotters.

THE cup to be presented by Miss G. P. Morosini to the New York Road Drivers' Association for the horse winning the greatest number of heats in the Speedway brushes is one of the handsomest trophies thus far offered for this purpose. A cup given last year by Miss Morosini was illustrated in THE CIRCULAR-WEEKLY, May 10, 1905.

The new prize is in the form of a large silver vase of Roman type, with two handles and cover, the shape having been suggested by some of the beautiful antiques in the Boscoreale collection. The top is surmounted by a model of a spirited horse, which also serves as a handle to the cover. Conventional palm leaves, symbolizing success, are worked in high relief on the handle where it joins the body of the cup. The trophy is illustrated on the front cover of this issue.

On the front of the vase appears the inscription, "The Morosini Cup, Presented by Miss G. P. Morosini to the New York Road Drivers' Association for Horse Winning Greatest Number of Heats, Speedway Brushes, 1906."

In its entirety the trophy, which measures 19 inches in height, 11 $\frac{3}{8}$ inches in diameter and contains about 180 ounces of sterling silver, is fitted in a handsome oak chest. It was recently completed by Tiffany & Co. New York.

To the other services which it is rendering its members and the business community, the Merchants' Association of New York has recently added a most convenient pocket guide of New York, comprising 21 pages, cut in a convenient size and neatly bound. The information contained in the volume is most comprehensive, including just the things that strangers want to know and that even old New Yorkers have occasion to ask about every now and then. The topics include hotels, railroads, ferries, steamships, public buildings of all kinds, hack rates, distances, and numerous other divisions and subdivisions. Several excellent maps add to the value of the publication. The book will be distributed free to visiting merchants, at the office of the Association, and to members, while a nominal charge will be made to those wishing large quantities for distribution to customers.

Additional Census Statistics as to Jewelry Trade in Providence, Pawtucket, Indiana and Missouri.

The Department of Commerce and Labor of the Federal Census Bureau issued last week a new set of reports containing much interesting data about the jewelry and kindred industries of Rhode Island, and several western States. The reports are boiled down to tables, which give at a glance the number of concerns engaged, and figures which show their size, capital, output and so forth. The figures follow:

Jewelry, Clocks, Watches, Silverware and Kindred Lines Exported from New York.

WASHINGTON, D. C., May 23.—The following were the exports of jewelry, silverware and optical goods, clocks, watches and kindred lines from the Port of New York for the week just ended:

Adelaide: 35 packages plated ware, \$1,651; 22 packages clocks, \$348.
Bombay: 1 package optical goods, \$1,070.
Bremen: 1 package plated ware, \$350; 3 packages jewelry, \$778; 1 package watches, \$117.
Buenos Ayres: 45 packages plated ware, \$5,429; 40 packages clocks, \$1,037; 15 packages plated ware, \$1,726; 1 package optical goods, \$530; 24 packages clocks, \$378.
Calcutta: 35 packages clocks, \$728; 41 packages clocks, \$678.
Capetown: 50 packages clocks, \$1,277; 3 packages plated ware, \$655; 1 package optical goods, \$325.
Corinto: 5 packages clocks, \$113.
Genoa: 2 packages jewelry, \$585; 1 package engravers' machinery, \$134.
Glasgow: 68 packages clocks, \$578.
Gottenburg: 5 packages clocks, \$110.
Guayaquil: 1 package watches, \$229.
Hamburg: 2 packages clocks, \$145; 3 packages optical goods, \$617.
Havana: 1 package optical goods, \$1,128; 1 package jewelry, \$228; 4 packages optical goods, \$237; 6 packages jewelry, \$2,408; 8 packages clocks, \$165.
Havre: 2 packages jewelry, \$590.
Hobart: 7 packages plated ware, \$415; 23 packages clocks, \$132.
Iliquee: 1 package watches, \$500.
Las Pamas: 8 packages clocks, \$126.
Limon: 12 packages clocks, \$212.
Liverpool: 27 packages clocks, \$471; 3 packages watches, \$550; 3 packages thermometers, \$135; 3 packages clocks, \$196; 1 package jewelry, \$1,000; 1 package silverware, \$423.
London: 13 packages clocks, \$2,028; 1 package optical goods, \$345; 2 packages plated ware, \$175; 4 packages engravers' material, \$299; 6 packages jewelry, \$610; 3 packages scopes and views, \$680; 41 packages watches, \$6,297; 4 packages clocks, \$608; 10 packages optical goods, \$3,007.
Melbourne: 55 packages clocks, \$527.
Montevideo: 11 packages clocks, \$135; 8 packages clocks, \$262; 13 packages plated ware, \$1,501.
Panama: 3 packages plated ware, \$264.
Rotterdam: 1 package watches, \$320.
Sheffield: 1 package jewelers' sweepings, \$880.
Southampton: 1 package watches, \$330.
St. John: 2 packages plated ware, \$102; 15 packages clocks, \$202.
Tampico: 13 packages plated ware, \$850.

Ornamented Imitations of Rock Crystal Held to be Dutiable at 45 Per Cent.

Imitation rock crystal intaglios, ornamented by paintings, are dutiable at 45 per cent. as manufactures of paste, under a decision announced last week by the Board of United States General Appraisers, New York, overruling a protest by Nordlinger & Manluck against an assessment of duty by the Collector at Providence, R. I. In the same decision a protest by the firm against an assessment of duty on multi-colored stones, under one inch in dimensions, was sustained.

In the accompanying opinion General Appraiser Sharretts says:

There is no dispute relative to the facts in this case, and we find on the official samples, without the introduction of evidence, that the merchandise consists of:

1. Imitations of precious stones composed of paste, not exceeding one inch in dimensions and made to resemble rock crystal molded or pressed into the form of intaglios, the indentation on the under surface thereof representing a cat's head, the latter subsequent to molding having been ornamented by hand painting. The completed articles imitate hand-painted rock-crystal intaglios, which by decision of the Circuit Court of Appeals, second circuit, in *United States v. Benedict* (T. D. 27032) are dutiable at 10 per cent. ad valorem under Par. 435 of the present Tariff Act.

2. Imitations of precious stones composed of paste, not exceeding one inch in dimensions, known as multicolored stones and identical with those covered by G. A. 6155 (T. D. 26723).

The importers contend that the assessment of duty by the Collector on all of said merchandise at the rate of 45 per cent. ad valorem, under the provision of Par. 112 for manufactures of paste, is erroneous, claiming it is properly dutiable at 20 per cent. ad valorem, as imitations of precious stones, under Par. 435, Tariff Act of 1897.

On the authority of G. A. 6155 (*supra*), we sustain the protest so far as it relates to the goods included in our second finding.

Regarding the imitations of hand-painted rock-crystal intaglios, we are of opinion they are excluded from classification under Par. 435 by terms. It is true that this Board has uniformly held that the decoration or ornamentation referred to in the paragraph named imports, a superadded process. Adhering to the correctness of this ruling, we find in the present case that the imitation intaglios became imitations of precious stones when they were removed from the mold or press, and that the subsequent painting applied to them was decorative in character; hence they are clearly imitations of precious stones ornamented or decorated.

It is contended by the importers that the painting applied to the intaglios is part of the process of making the imitation precious stones or, to quote from Judge Wheeler's opinion with regard to incrustated stones in *United States v. Downing* (T. D. 26076), "they are not engraved or painted or otherwise ornamented or decorated than in constituting the imitation which they simply are." Conceding this to be correct with regard to several descriptions of imitations of precious stones assembled in the form of a cluster and not painted or engraved or otherwise ornamented or decorated, it does not follow that every form of imitations of precious stones is included in Par. 435. On the contrary, only such are included as have not been ornamented or decorated.

Imitation cameos and intaglios, if molded or pressed only, would not be ornamented or decorated, but similar stones made cameo or intaglio by engraving would be; so the intaglios in dispute, if imported unpainted, would fall within the enumeration of Par. 435, but when ornamented by painting they are by terms excluded therefrom.

In accordance with these views we overrule the protest and affirm the Collector's decision relative to the goods covered by our first finding.

The new factory of the Silver Plate Co. has been started at Pacousett, near Portland, Conn.

The C. F. Monroe Co., Meriden, Conn., will have an elaborate display at Hanover during the Centennial.

British Watch Manufacturers and Dealers Form Guild to Stop Serious Price Cutting—Legislation for Opticians.

LONDON, May 20.—At the British Horological Institute, May 7, a meeting of watchmakers, watch factors, assistants and journeymen was held under the presidency of R. W. Cole. The meeting was not under the ægis of the Horological Institute, but had been convened by Bahne Bonniksen (the inventor of the Karrusel movement) in order to bring the watch trade of Great Britain together to effect by means of organization certain necessary reforms.

The British watch trade has been in rather an unfortunate position for some time past, and the state of affairs has been such that even the factors of foreign watches have found cutting prices somewhat too much for them. I have known cases in which watches have been factored at a profit of 1d. or 1½d. per watch. I have also known cases in which British watches have been manufactured and sold at a loss. That is the point of view which must appeal to the actual British manufacturer and the factor whether dealing in British, American or Swiss made watches. So far as the shopkeeper is concerned the cutting in the price of repairs has been lamentable. You will see in almost any British city or town a notice in watchmakers' windows to the effect that they will clean your watch for 1s. or 1s. 6d. or even set a mainspring for 1s. So far as the men are concerned their wages are pitifully low, and I know of one instance where an old-time Clerkenwell watchmaker, with a good reputation, is now actually sweeping the roads in that district and receiving 6s. a week, more than he was able to earn as a watchmaker or repairer. No wonder then, that the Hall of the British Horological Institute was filled to overcrowding, and that those present agreed to form a Guild which will compromise all members from the bottom to the top of the trade. I noticed a large number of representatives of our most important British manufacturing houses, also representatives of the leading foreign houses doing business here, and if matters are carried on as enthusiastically as they were discussed and dealt with at the meeting, the British Watchmakers' Guild will become an important organization. Briefly, the objects of the Watchmakers' Guild are: To endeavour to stop the cutting of prices in both the sale and repair of watches, to encourage technical education and the apprenticeship system, also to establish a system of marking watches which have been made by members of the Guild. These are the salient points, but there are a number of others which will be dealt with when the Constitution is drawn up and the rules formulated. Among those present at the meeting were delegates from the Sheffield, Manchester and other local associations, but the National Association of Goldsmiths was not represented.

LEGISLATION FOR OPTICIANS.

The attempts which have been made to obtain Parliamentary recognition of sight-testing opticians are not likely to be very successful, largely due to the fact that one society out of about a dozen representing

the British optical industry has refused to work in harmony. On behalf of the General Board of Opticians the Worshipful Company of Spectacle Makers has introduced a bill into the House of Lords, rather a round about way of going to work, and has drawn fairly considerable discussion. The General Board of Opticians has made an appeal to the opticians of Great Britain, but up to date of writing the response has been fairly small. In my opinion there is little likelihood of the sight-testing opticians' position being placed upon a legal basis for some time.

ST. GEORGE.

Jewelry, Clocks, Watches and Plated Ware Shipped to Alaska, Hawaii, Porto Rico and the Philippines.

WASHINGTON, D. C., May 23.—Details of the commerce of the United States with its non-contiguous territories during certain periods in clocks, watches, jewelry, etc., have just been compiled as follows:

ALASKA.—Clocks to the value of \$3,900 were shipped to Alaska during the nine months ending March, 1906, as against \$3,208 shipped during the same period of 1905. During these same periods the watch shipments were \$1,306 and \$541, respectively. During March last \$6,045 worth of jewelry was shipped to Alaska, the value in March a year ago being \$1,021. During the nine months' period these shipments increased from \$25,054 in 1905 to \$50,051 in 1906, while the shipments of plated ware increased from \$3,673 to \$6,350.

HAWAII.—Clocks to the value of \$881 were shipped to Hawaii in March, 1905, increasing to \$2,315 in March last, while the nine months' shipments increased from \$6,305 in 1905 to \$9,802 in 1906. Watch shipments declined from \$157 in March a year ago to \$5 in March last, but increased from \$1,305 to \$2,196 during the nine months' period. A decided falling off in the shipments of jewelry is noted. The value in March, 1905, was \$16,460, decreasing to \$1,026 in March last, while the shipments during the nine months' period fell from \$124,984 in 1905 to \$81,571 in 1906. Plated ware shipments likewise fell from \$4,162 in March, 1905, to \$478 in March last, and from \$48,358 to \$24,439 during the nine months' period.

PORTO RICO.—During the nine months of 1905 there were \$1,970 worth of clocks shipped to Porto Rico, increasing to \$4,156 during the same period of 1906, while watch shipments increased from \$2,071 to \$2,629 during the same period. Jewelry shipments also increased from \$7,135 to \$12,559 during the same period and plated ware from \$4,838 to \$7,163.

PHILIPPINE ISLANDS.—The Philippine Islands bought \$1,777 worth of clocks from the United States during the nine months of 1905, the purchases increasing to \$2,970 during the same period of 1906. Watch purchases, however, declined from \$1,734 to \$924 during the same periods. Shipments of jewelry to the Philippines increased from \$1,557 to \$2,146 and plated ware from \$877 to \$4,328 during the same periods.

Harry R. Greyer, Muncie, Ind., is offering his creditors 20 cents on the dollar.

Recent Customs Decisions on Jewelry, Gems and Kindred Lines.

Decisions by the Board of United States General Appraisers, New York, in cases involving duties on jewelry and kindred lines, have been announced in the last week as follows:

STRUNG BEADS.—Henry E. Frankenberg Co. v. United States. United States Supreme Court, April 30, 1906. No. 698. On petition for writ of certiorari to the Circuit Court of Appeals, second circuit. Petition granted. For decisions below see T. D. 27,188 (C. C. A.), T. D. 26,455 (C. C.), and G. A. 5,878 (T. D. 25,891). The importers contend that beads when strung temporarily are dutiable under Par. 408, Tariff Act of 1897, as "beads * * * not threaded or strung."

PARTS OF JEWELRY—SNAPS.—Protest of Manhattan Chain Co. against the assessment of duty by the Collector at New York. On the authority of G. A. 6,330 (T. D. 27,255), certain snaps, which were classed as parts of jewelry, were held dutiable as manufactures of metal under Par. 193, Tariff Act 1897.

IMITATION PEARLS.—Protest of R. A. Breidenbach against the assessment of duty by the Collector at New York. The Board sustained the importer's contention that imitation pearls are dutiable as imitation precious stones under Par. 435, Tariff Act of 1897.

TOY BRACELETS AND CHAINS.—Protest of J. & H. Rosenberg against the assessment of duty by the Collector of Customs at the Port of New York. Certain bracelets and chains were held dutiable as toys under Par. 418, Tariff Act of 1897, as claimed by the importers. G. A. 6,297 (T. D. 27,156) and Abstract 10,046 (T. D. 27,114) followed.

IMITATION PEARLS.—Protest of H. F. Barrows & Co. against the assessment of duty by the Collector of Customs at New York. G. A. 6,088 (T. D. 26,554) followed, relating to imitation pearls.

IMITATION PRECIOUS STONES—HALF PEARLS.—Protests, etc., of R. A. Breidenbach against the assessment of duty by the Collector of Customs at New York. Protests sustained on the authority of G. A. 6,289 (T. D. 27,112), G. A. 6,088 (T. D. 26,554), G. A. 5,914 (T. D. 26,113), and T. D. 27,193, relating to imitation precious stones, imitation pearls, incrustated stones, and half pearls.

MILLINERY ORNAMENTS.—Protest of Viet, Son & Co. against the assessment of duty by the Collector of Customs at New York. G. A. 6,130 (T. D. 26,653) followed, relating to millinery ornaments.

IMITATION PEARLS—HALF PEARLS—IMITATION PRECIOUS STONES—KEYSTONES.—Protests of Albert Lorsch & Co. against the assessment of duty by the Collector of Customs at New York. G. A. 6,088 (T. D. 26,554), G. A. 6,236 (T. D. 26,922), G. A. 6,167 (T. D. 26,770), G. A. 6,155 (T. D. 26,723), G. A. 5,915 (T. D. 26,014), G. A. 5,914 (T. D. 26,013), G. A. 6,053 (T. D. 26,388), G. A. 6,097 (T. D. 26,586), and United States v. Downing (T. D. 27,193 and T. D. 27,250) followed, relating to imitation pearls, imitation precious stones, incrustated stones, keystone, precious stones in the form of beads, and half pearls.

AMETHYST

In Siberian, Brazilian and D'Auvergne qualities, in all shapes and sizes. Golden and Madeira topaz. Half, round and bouton pearls. Reconstructed rubies, opals, garnets, and doublets in the fancy colors and fancy shapes—uniform grades, especially selected for the American Market.

Last Honors Paid to the Late Louis J. Lamb, at Attleboro.

ATTLEBORO, Mass., May 25.—Attleboro closed her shops and stores and stilled the busy hum of trade Wednesday last in order to do honor to Louis J. Lamb, late head of C. H. Alden & Co. Mr. Lamb was one of Attleboro's staunchest citizens, of unusually high ideals and standards of life, able and progressive in business, charitable to a degree only appreciated by a few close friends, and modest in the extreme. Though repeatedly urged to accept legislative honors he refrained, preferring the activities of his business and his many personal lines of work. He served with unostentatious but effective interest on the town's school board and sinking fund commission.

The funeral services were held in Murray Universalist Church, of which Mr. Lamb was one of the most loyal supporters, and was attended by scores of the principal manufacturers and business men, besides others friends innumerable. Rev. Hendrick Fossemma, Rev. Thomas W. Illman and Rev. J. Harry Holden officiated. C. H. Alden & Co., the New England Jewelers' and Silversmiths' Association, and many business associates and friends sent flowers. The eulogy spoken by Rev. Mr. Illman was an uncommonly able and true tribute to the man. Since his departure the banks with which he was connected have adopted appropriate resolutions, and other bodies have shown their grief at losing so strong a supporter.

Mr. Lamb was for 22 years with W. H. Wilmarth & Co., now the W. H. Wilmarth Co., rising from a subordinate office position to the management. He then bought out Granville W. Smith, a competitor, but after a short time sold the plant to his own former employers, and with William H. Lamb and Charles H. Allen started C. H. Allen & Co. For some 10 years this has been one of the most prosperous and growing firms in the town. Mr. Lamb had unique executive ability, was ingenious and inventive, but above all scrupulously upright in every dealing.

Call Issued for Retail Jewelers to Organize in Twenty-Six States July 10.

From present indications it would appear that the meeting to be held at Rochester, N. Y., Aug. 3, 4, for the purpose of forming a National Association of Retail Jewelers will be attended not only by delegates from the many organizations in the jewelry trade now in existence and recently formed, but also by delegates from a large number of States which at present have no association, but in which an organization will be formed before the convention. According to word received from Chicago last week, as a result of a systematic organization now on foot, meetings will be held in about 25 or 26 States on July 10 for the purpose of forming organizations of retail jewelers who will send delegates to the national convention and make this, the new organization to be formed in the Fall, truly representative of the entire jewelry trade.

According to the present plan the States in which organizations will be formed in July and the cities in which the meetings will be held are as follows: Arkansas, Little

Rock; California, Oakland; Colorado, Denver; Connecticut, Hartford; Georgia, Atlanta; Idaho, Boise City; Indian Territory, Chickasha; Kentucky, Louisville; Louisiana, New Orleans; Maine, Portland; Maryland, Baltimore; Mississippi, Meridian; New Hampshire, Concord; New Jersey, Trenton; New York, Albany; North Carolina, Greensboro; Ohio, Columbus; Oklahoma, El Reno; Oregon, Portland; Pennsylvania, Pittsburg; Rhode Island, Providence; South Carolina, Charleston; Tennessee, Nashville; Texas, Dallas; West Virginia, Parkersburg, and Washington, Seattle.

Government Brings Suit to Forfeit Jewelry and Watches Alleged to Have Been Smuggled Over Mexican Border.

SAN ANTONIO, Tex., May 23.—An action *in rem* has been commenced in behalf of the United States to declare forfeit, for non-payment of duty, on a quantity of watches, gems and jewelry, which were recently seized from Louis Leschenger, of Houston, by Customs Collector R. M. Dean. The suit, which was begun in the United States Court by the Federal District Attorney, Henry Terrell, was simply against the gems, but Leschenger, who was represented by Judge Winchester Kelso as attorney, will put in a claim and a hard legal fight is expected.

Leschenger was recently indicted by the Federal Grand Jury on the charge of smuggling the gems in question. The value of the article is stated by the customs authorities as being \$19,057.50. Leschenger has been held in \$2,500 bail. He claims that he is not guilty of any intent to defraud the Government and will fight the criminal as well as the civil proceedings to the last ditch.

The retail jewelry store of Julius Anderson, Mora, Minn., was broken into Tuesday night, of last week, by thieves who made off with several watches and a large amount of miscellaneous jewelry. The theft is believed to have been committed by professional thieves. Burglar insurance covers the loss.

Otto H. Fasoldt, Albany, N. Y., Files Voluntary Petition in Bankruptcy.

UTICA, May 24.—Otto H. Fasoldt, a jeweler and watchmaker at 32 N. Pearl St., Albany, and residing at Slingerlands, today filed a petition in voluntary bankruptcy in the United States District Court this city and after the adjudication the petition will be referred to Referee Lansing at Albany, who will call the meeting of creditors for the election of a trustee to wind up Mr. Fasoldt's affairs.

Fasoldt's creditors are all unsecured and their claims amount to \$6,285.40. The schedule discloses nominal assets valued at \$1,759.64, including \$700 in stock, \$75 in machinery, tools, etc., \$1,052.64 in debts due and \$7 on deposit in banks.

The creditors are: A. Lorsch & Co., \$733; Arnstein Bros. & Co., \$742; W. I. Rosenfeld, \$273; Seth Thomas Clock Co., \$358; Rosenzweig Bros., \$1,381; A. Wittnauer Co., \$628; L. W. Rubenstein, \$63; Self Winding Clock Co., \$67; Bawo & Dotter, \$95; M. Shepard & Co., \$17; W. Grant Co., \$95; D. Ullmann & Co., \$270; M. Schless, \$199; Haldiman & Co., \$37; J. Wodiska, \$49; I. Ollendorf, \$48; S. Brenauer & Sons, \$9; American Cuckoo Clock Co., \$31; Rockford Watch Co., \$15; Waltham Horological School, \$24; Municipal Gas Co., \$19; C. F. Weber Mfg. Co., \$9; F. Ridgway, \$9; Von Huesen, Charles Co., \$6; Roof, Horton Co., \$19; W. C. Penfold & Co., \$385; D. C. Percival & Co., \$126; Rogers, Lunt & Bowlen Co., \$137; Heintz Bros., \$386; M. Levitz, \$80; Times Union Co., \$20.

Many of the larger creditors hold notes given by Fasoldt and suits have been brought in the state courts to recover on those given to W. I. Rosenfeld, New York. This forced Fasoldt to file a petition in bankruptcy.

Mr. Fasoldt started in business in Albany in 1878 at 83 N. Pearl St., in 1893 he moved to 99 N. Pearl St. and subsequently to 32 N. Pearl St. He has been inspector for the New York Central and Hudson Railroad, and has always been prominent in business circles, and has borne an excellent reputation in the trade. Mr. Fasoldt formed a partnership with E. P. Bevilard, who was formerly in business in Utica, only a few weeks ago, the firm now being known as O. H. Fasoldt & Co.

Bids to Supply Clocks for United States Public Buildings.

WASHINGTON, D. C., May 21.—Bids were opened at the Treasury Department to-day for furnishing United States public buildings east of the Rocky Mountains with clocks during the fiscal year ending June 30, 1907. The bidders were as follows:

Chelsea Clock Co., Boston, Mass., pendulum clocks, \$16 each; spring clocks, \$20.

Seth Thomas Clock Co., New York, pendulum clocks, \$10.10.

American Clock Co., electric clocks, \$19.25 each.

R. H. Macy & Co., New York, pendulum clocks, \$11.10; spring clocks, \$10.72; electric clocks, \$21.60.

John B. Ball, Joplin, Mo., has admitted a partner, and the firm style is now Ball & Putnam.

Reconstructed Ruby Decision.

Time for Government to Appeal Has Expired—Gem Importer Gives Interesting Points as to Manufacture of These Stones.

The time in which the Government could appeal from the decision recently announced by the United States Board of General Appraisers in the reconstructed ruby case, as it was called, has expired, so that the ruling is now accepted. Accordingly, the duty on rubies made by any artificial process is now definitely fixed at 10 per cent., the same as the duty on natural rubies advanced in condition. The case came in the form of an appeal by Albert Lorsch & Co. against an assessment of 20 per cent. by the Collector of the Port, who classified the articles as non-enumerated manufactures. Gen. George W. Mindil, the precious stone examiner at New York, who testified for the Government at the trial, did not recommend an appeal.

The decision does not mean that the Government could not prove a distinction between natural and other kinds of rubies. A gentleman who is familiar with the reasons actuating the General Appraisers, said: "The Board, under the law and decisions, could not make any other classification than the one announced. The rubies, made by an artificial process, could be classed under Section 6 of the tariff law of 1897 as non-enumerated manufactured articles were it not for the decision of the courts bearing on Section 7, the similitude clause. Under these decisions before an article can be classified as non-enumerated manufacture, an effort must first be made to classify it with one of the enumerated articles by resemblance in material, quality, texture, or the use to which it may be applied.

"In the case of artificially made rubies there can be no question as to the close resemblance in all these respects, although a resemblance in one or more would be sufficient for the purpose.

"Reconstructed rubies have the same chemical constituents as the natural rubies. The texture and quality deceive all except experts. As to the uses you may say that they are identical. So while people in the trade and the buying public may make whatever distinction they please between a stone formed by nature and one put together by man, yet under the law as it stands, there is nothing else that the Board can do except to classify for all customs purposes artificial rubies with those that are made by nature."

People in the trade exhibit interest in the question discussed incidentally at the hearings, as to how reconstructed rubies are made. It will be recalled that Gen. Mindil and other experts said that there is no such thing as reconstructed rubies, in the sense in which those articles have commonly been described. Up to that time it had generally been accepted that reconstructed rubies were made by fusing smaller rubies or ruby dust. Gen. Mindil said that in order to fuse the rubies the extreme heat required would destroy the red color, so that the product would be worthless. The opinions of the well-known writers on precious stones were cited in support of the

position taken by this gem expert.

This incredulity as to the supposed process of making reconstructed rubies was at variance with views expressed in technical papers, read from time to time in Paris, the readers apparently having no doubt that the articles were made by fusing smaller gems. The New York importers, when questioned, said that they had understood the method of fusing natural rubies to be followed in making the reconstructed article, but admitted that they had never seen the process. One of the writers, whose opinion was cited at the hearing, admitted in his book that a number of years ago a new kind of artificial ruby had made its appearance in the market, and that some mystery existed as to the method of its production.

L. Tannenbaum, of L. Tannenbaum & Co., New York, who has paid some attention to the subject, although not dealing in reconstructed rubies, said to a representative of this paper several days ago, that beyond any question rubies can and are made by the process of reconstruction. He has seen the process conducted, he said, and is absolutely sure of the fact that the reconstructed rubies are made of smaller rubies fused together. He said that at Paris the trade knows all the facts, and no doubt exists on the subject in that city where reconstructed rubies are made in large quantities.

Mr. Tannenbaum added that the smaller rubies when melted lose their red color just as the expert testified, but he said the other material is added which restores the original color. He said that stones have been made by the process in this country.

Another man said that if coloring material is added, such as chromium, then the reconstructed rubies are on a somewhat different plan than if they were made only by massing smaller rubies. He said that they would come in competition in trade, not with natural rubies, but with the scientific rubies, made by the well-known chemical process.

United States Court Restrains Transfer of Gorham Mfg. Co.'s Stock Until Suit by Geo. H. Robinson Is Decided.

Stockholders of the Gorham Mfg. Co. received this week copies of a circular letter sent out by the company's attorneys, Comstock & Canning, and dated at Providence, R. I., saying:

"We are instructed by the president of the Gorham Mfg. Co. to inform you that in the bill in equity brought against this company in the Circuit Court of the United States, District of Rhode Island, there has been entered a preliminary decree restraining this company, until the final hearing of the cause or further order of the court, from further action in the matter of the Silversmiths' Co.

"Under these circumstances the stockholders are not required to subscribe for the stock and make payments, in accordance with the vote of the Board of Directors and the circulars recently sent. Subscriptions already received will be held in abeyance.

"If the plan is to be carried out you will

be advised and ample time will be given for subscription and payments therefor."

PROVIDENCE, R. I., May 24.—In the case of George H. Robinson against the Gorham Mfg. Co., and others, Judge Brown, of the United States Circuit Court, last evening granted a preliminary injunction which temporarily prohibits the defendants from carrying into effect the resolutions which were adopted at a recent meeting of the Gorham Mfg. Co.'s stockholders, and which provides for certain issues and transfers of stock.

The Judge accompanied his decision by an opinion. The court did not base its action upon the objections raised by the plaintiff to the regularity of the meeting at which the resolutions were adopted. The Judge indicated that there is no question of fraudulent intention and that there is no uncertainty as to the majority of shareholders preferring the plan for which they voted. The Judge gives force as to the issue as to whether or not the shareholders, under their charter, have the power to carry out the proposed plan. Pending the final decision of this question, Judge Brown held that a temporary injunction is for the real interest of both parties. The Judge said in part:

"In deciding upon this petition, I do not proceed upon the ground that a fraudulent intention is exhibited in any of the acts of the defendants. Apparently it was not regarded by a majority of the shareholders of the Gorham Mfg. Co. as undesirable that Mr. Holbrook should have a large or controlling voice in the Silversmiths' Co. But whether or not this plan is preferred by a majority of the shareholders is not the question. Giving due consideration to the fact that a majority of shareholders may regard this action as for their pecuniary advantage, and to the rule that all problems of business judgment are to be determined by a majority vote, yet it must be remembered that the majority are limited in their powers by the charter, and that this cannot be overridden, however profitable it might be for a majority to carry out what they apparently, in good faith, regard as a sound business proposition.

"In view of the importance of the questions which have been presented, I am of the opinion that the complainant presents a proper case for a preliminary injunction. Having regard to the interests of a majority of the shareholders, it seems to me highly undesirable that this plan should proceed—that the Silversmiths' Co. should put forth the new issue of shares, and the exchange of Gorham Co. shares be made and the assets of the Gorham Co. transferred to the Silversmiths' Co., while this bill is pending. Should an injunction be refused at this time, and the complainant's bill subsequently be sustained, the injury to the complainant from a failure to grant temporary relief would be great, and perhaps irreparable, and the injury to the defendants, which would result from undoing what had been done, would doubtless be great. The best interests of all parties will be subserved by granting this preliminary injunction. Having in mind the statements of complainant's counsel as to his willingness to proceed speedily to a hearing on the merits, I think that, if the defendants desire, a shorter time than that allowed by the rules should be fixed for the taking of testimony, in order that the case may be finally determined on full hearing as speedily as possible.

D. S. Thompson, formerly of Livermore Falls, Me., is now at Lewiston, Me.

O. A. Hensel, 2804 North Ave., Milwaukee, Wis., writes the CIRCULAR WEEKLY that there is a good opening in that locality for a wide awake jeweler to open a store as it is the growing part of Milwaukee, having a large number of factories, some of which employ as many as 400 people. Mr. Hensel will supply further information to anyone interested in this subject.

Alabama Optical Society Holds Its First Annual Meeting in Birmingham.

BIRMINGHAM, Ala., May 28.—Alabama opticians are very much pleased with the result of the first annual meeting of the Alabama Optical Society held in Cable Hall here last week and the organization of a State body to look after the interests of the eye specialist. Hardwick Ruth, of C. L. Ruth & Co., Montgomery, told a CIRCULAR-WEEKLY reporter that he regarded the move as one that will give the best of results to the opticians of the State. It is expected that the session of the legislature which convenes next January will undertake to pass certain bills that will be detrimental to the profession and a committee of opticians will be formed to combat this.

The meeting was opened by W. E. Houston, secretary of the A. A. O., and J. H. Fowler, with F. W. Bromberg, of this city, acting as secretary. The following programme was carried out: "Your Neighbors of the North," H. J. Cook, Knoxville, Tenn., president of the Tennessee Association; "Optics, North and South," J. H. Tinder, Birmingham; "A Few Remarks," C. E. Folsom, Atlanta, Ga., president of the Georgia Optical Society; "Color Vision," M. B. Clason, Columbus, Ga.

The following questions were discussed: "Shall we Charge an Examination Fee?" "Shall we have a Minimum Price List?" O. H. Gerry, of Memphis, talked of "Instruments," and S. W. Lane, Kansas City, Mo., gave an interesting blackboard talk. Mr. Houston talked of organized effort.

After choosing Selma as the next place of meeting, the society elected the following officers: President, E. H. Hobbs, Selma; first vice-president, W. C. Abbott, Birmingham; second vice-president, C. F. Cross, Gadsden; secretary, J. H. Tinder, Birmingham; treasurer, M. T. Doering, Anniston.

Executive Committee: H. Ruth, Montgomery; F. W. Bromberg, Birmingham; A. N. Maumenee, Mobile; E. J. Schweizer, Selma.

Examining Board: Andrew Brown, Florence; W. E. Butt, Childersburg; J. W. Langley, Sylacauga.

Mississippi Opticians Organize and Form the Mississippi Optical Society.

JACKSON, Miss., May 28.—With opticians present from every part of the State, the Mississippi Optical Society was last week organized at a meeting held at the Edwards House here. Officers were elected and a constitution adopted. The purpose of the society is to elevate the status of the opticians of the State by promoting higher education and a more thorough work among those who are members.

The organization of the State society was started by W. E. Huston, secretary of the American Association of Opticians, after earnest preliminary discussions and a very entertaining talk by Dr. L. W. Lane, of Kansas City. The following officers were elected:

E. R. von Seutter, Jackson, president; Theo. A. Mauch, Yazoo City, first vice-president; J. D. Crane, Gulfport, second vice-president; Albert A. Orr, Vicksburg, secretary; E. V. Waite, Corinth, treasurer. J. B. Ellis, T. P. Martin, M. E. Fritz and

A. L. Parker were elected an Executive Committee. The Examination Committee is composed of the following: T. W. Queen, L. L. Guess and H. Watkinson.

Arkansas Optical Society Organized in Little Rock, Ark.

LITTLE ROCK, Ark., May 23.—The Arkansas Optical Society was organized at the meeting of state opticians at the Capital Hotel Saturday afternoon. About 30 opticians from different parts of the State attended the meeting, and became charter members. Letters were read from several others, indicating their intention to join the society, and it is expected there will be a membership of more than 100 before the next annual session of the society.

The meeting was held under the auspices of the American Association of Opticians. William E. Huston, Kansas City, secretary of the association, was present and spoke on the good to be derived from organized effort. An address delivered by Dr. S. W. Lane, of Kansas City, president of the Southwestern Optical College, was one of the principal features of the meeting after the permanent organization was effected.

William E. Huston was elected temporary chairman when the session was called to order. Dr. W. F. Bailey was chosen as temporary secretary. W. B. DeShazo, formerly of Little Rock, now of Rogers, who was responsible for the organization of the society, spoke concerning the merits of such an organization. He declared the opticians of the State should be protected by State law just as other professions are, and this, he said, could not be done without organized effort.

Following his address a committee on organization was chosen consisting of W. B. DeShazo, Carl Shibly and Dr. W. F. Bailey. A committee on officers for the new organization was chosen, consisting of W. L. Foutch, C. A. Faulkner, R. E. Mosby and E. J. Bush.

At the afternoon session these two committees reported, and a constitution and by-laws were adopted. The following officers were elected:

President, T. J. Ellis, Jonesboro; first vice-president, Charles S. Stiff, Little Rock; second vice president, Carl Shibly, Van Buren; secretary, W. B. DeShazo, Rogers; treasurer, Albert Pfeifer, Little Rock; Executive Committee, Charles Mosby, W. L. Foutch, Ira Westback, Jesse Zimmerman; Examining Board, Dr. W. F. Bailey, Little Rock; Simpson Johnson, Eureka Springs, and E. J. Bush, Benton; Reception Committee, W. B. DeShazo, Rogers; Charles S. Stiff, Little Rock; J. T. Ellis, Jonesboro; Messrs. Spott and Jefferson, Little Rock, and Dr. W. F. Bailey, Little Rock.

Those present at the meeting included:

W. L. Foutch, Gurdon; W. B. DeShazo, Rogers; J. C. Faulkner, Russellville; R. E. Mosby, Jonesboro; T. J. Ellis, Jonesboro; Carl Shibly, Van Buren; J. G. Dickson, Little Rock; Dr. W. F. Bailey, Little Rock; C. H. Gerry, Memphis, Tenn.; Dr. S. W. Lane, Kansas City; I. A. Wright, Little Rock; H. H. Stover, California; W. E. Huston, Kansas City; C. J. Bush, Benton; W. J. Martin, Van Buren; I. I. Borodoff, Texarkana; Curt H. Carmichael, Booneville; C. R. Senteer, Jackson; John C. Eberhardt, Dayton; F. Baker, Little Rock; Spratt & Daniel, Monticello; J. W. Oglesby, Gravette; Charles Mosby, Batesville; Val. Taylor, Beebe; E. Y. Stinson, Benton; G. W. Keenan,

Springdale; J. M. Powell, Morrilton; T. G. Stickell, England; W. C. Bell, Ozark; H. T. McKinley, Little Rock.

New Stores and Enterprises.

C. O. Varnson has opened a store at Hamley, Sask., Can.

H. C. King has just commenced business in Grenfell, Sask., Can.

W. S. Flory recently began business at 17 W. Main St., Dallastown, Pa.

Chas. Carr has started in the retail jewelry business in Flandreau, S. Dak.

Wm. L. Calkins is a new jeweler and optician at 509 Grand Ave., Waukesha, Wis.

The Henkers, Baker Jewelry Co. is the name of a new concern in Vincennes, Ind.

J. Riley Kyle will shortly engage in the watch and jewelry repairing business in Osborne, Pa.

G. T. Sullivan has opened a watch and jewelry repairing shop on Central Ave., Fitzgerald, Ga.

M. J. Nelson, formerly with S. Perlman, Washburn, Wis., has rented quarters at that place, where he will shortly engage in business on his own account.

Walter Longemate will, about June 9, open a retail jewelry store at 139 W. Water St., Elmira, N. Y. Mr. Longemate has been in the employ of the La France Jewelry Co., that place, for the past 12 years.

The Eastern Optical Co. is the name of a new concern recently incorporated in Massachusetts with a capital stock of \$25,000. The officers are: President, N. C. Phinney, Boston; treasurer, G. H. Quaid, Wakefield, Mass.

The J. J. Boyd Optical Co. has been incorporated in York, Pa., with a capital stock of \$10,000. The incorporators were: J. J. Boyd, W. H. Boyd and Theo. Gerrish. The concern will manufacture eyeglasses, lenses and other optical goods.

The H. C. Hart Mfg. Co. has filed a certificate of incorporation with the State secretary in Connecticut to make plated ware, etc. The capital stock is \$25,000, all paid in. The incorporators were: W. O. E. M. and H. C. Hart, all of Unionville, Conn.

The City Jewelry Store is the name of a concern which is about to be incorporated in Camilla, Ga., by C. L. Taylor, John C. Wilson, F. S. Perry, J. B. Lewis and E. E. Cox. The capital stock will be \$2,000, divided into shares of \$50 each. The firm will do a retail jewelry business.

The Dennison Drug Co. has succeeded L. J. Riesland & Co., Milaca, Minn.

The handsomely furnished new store of Andrew H. Frandsen, Monmouth, Ill., was formally opened to the public last Saturday.

Geo. H. Pease recently purchased the stock of W. S. Johnson, Baxter, Ia. Mr. Pease was formerly in the employ of Mr. Johnson.

The American Optical Co., of Southbridge, Mass., and London, Eng., last week, through Treasurer Channing M. Wells, filed with the Secretary of the Commonwealth of Massachusetts its annual corporation statement. The figures show: Real estate, \$280,900; machinery, \$162,000; cash and debts receivable, \$752,820; manufactures and merchandise, \$612,485; capital stock, \$60,000; accounts payable, \$6,767; profit and loss, \$1,742,438.

ADDISON W. WOODHULL, President.
FRANK K. HUFF, Vice-President.

GILBERT T. WOODHULL, Treasurer.
WILLIAM J. McQUILLIN, Secretary.

MY interest is with the buyer. Why? He pays me 2 per cent. for my services. The seller's interest is with me. Why? He is not compelled to divide his profits with me and can afford to make the closest prices to my clients, thus reaching the best American trade on conditions that cannot fail to gain their preference.

The buyer's interest is also with me. Why? By not exacting the usual commission I make it to the seller's interest to favor my clients. Nothing is added to the price. I am content with what the buyer pays me. The buyer's advantage under such circumstances is equally as evident as the seller's. I invite investigation of that point.

There is nothing that appeals more to a June bride for her bridesmaid's gifts than the dainty and inexpensive Necklaces and Pendants that we make.

3 Maiden Lane, - New York.

Newark.

Two peddlers who were selling worthless jewelry at Rutherford, N. J., and otherwise misconducting themselves were, last week, sent to the Hackensack jail for 15 days by Recorder Yates. The prisoners, who said that their home was in New York, gave their names as Frank Davis and John O'Neill.

Thomas J. Bradley, formerly in business at 372 Broad St., who went into bankruptcy more than a year ago, and whose troubles in the courts have been reported from time to time, last week appeared before the referee in bankruptcy. Mr. Bradley refused to answer any questions that would throw light on his conduct of the business, basing his refusal on the ground that information thus solicited might be used in prosecuting him on the indictment which has been found by the Federal Grand Jury. The examination was postponed indefinitely. Bradley will be tried soon, it is expected, on the indictment charging him with concealing assets from creditors.

Reeves & Browne, manufacturers at 4 Walnut St., last Saturday, caused the arrest of Howard K. McKenzie, 29 years old, living at 220 St. Mark's Pl., Brooklyn, who had been employed by the firm as a salesman. He is charged with appropriating to his own use samples to the value of \$2,150. Mr. McKenzie was taken to the First Precinct Police Court, where he was held in \$1,000 bail for the action of the Grand Jury and he afterward furnished the bond. He entered the firm's employ Jan. 1. The members of the firm were recently informed that he had pawned in New York and other cities pieces of diamond jewelry that had been entrusted to him. They notified him to report at the office. It is said that, his suspicions being aroused, he redeemed some of the articles that had been pledged, and he brought with him, when he reported, jewelry to the value of \$1,200. The property still missing, according to statement furnished by the firm, include 20 diamond brooches, 19 diamond scar pins, 12 pairs of diamond sleeve buttons, four diamond fob chains, four diamond rings, seven diamond bracelets, 15 diamond lockets and one diamond boa clasp.

James F. Malone, a well-known resident of New Haven, Conn., where for some time he was in the employ of the Harvey & Lewis Optical Co., died, May 26, at his home, that place, of apoplexy. He was at one time editor of the *New Haven News*.

There was a well-attended meeting of the Louisiana Optical Association in New Orleans, La., May 19, and the following were elected members of the board of directors: S. P. Schuessler, Baton Rouge; James P. Williams, New Orleans; Louis Frigerio, New Orleans; Jacques Beek, New Orleans; Edw. Clandel, New Orleans; N. Bellamore, New Orleans; L. Burkett, Abbeville, La.; Edw. Bohne, Covington, La. There was a later meeting of the board of directors and the following officers were elected: S. P. Schuessler, president; James P. Williams, first vice-president; Louis Frigerio, second vice-president; Jacques Beek, secretary; Edw. Clandel, treasurer; N. Bellamore, auditor.

Connecticut.

Chas. H. Seyfried, New London, is closing out his optical stock, and will leave for New York, June 1.

In Stamford the retail jewelry stores now close on Tuesday, Thursday and Friday evenings at seven o'clock.

Thomas Niland, of the J. J. Niland Cut Glass Co., South Meriden, has returned from a business trip to New York in the interest of the concern.

The Sessions Clock Co., Forestville, began its summer schedule May 19. The shops will be closed every Saturday afternoon during the Summer.

The New England Watch Co., Waterbury, will close its plant every Saturday afternoon during the Summer season and at 3:30 P. M., during the other working days.

Chas. G. Drechsler, formerly with the Bradley & Hubbard Mfg. Co., Meriden, died about a week ago, in the Meriden Hospital, aged 55 years. Death was caused by cancer.

Watch repairers in Bridgeport declare that the week ending May 23 was one of the busiest which they have experienced in several years, owing, they say, to the recent explosion which deranged numerous watches.

Thus far no clue has been obtained to the thief who robbed Barney Steinfeld, 304 Sixth Ave., New York, of \$3,000 worth of watches and diamonds in New Haven. The loot includes four watches, three diamond horseshoe pins and 10 diamond rings.

The New Haven Clock Co. is among other concerns which recently began to operate their factories according to the Summer schedule. This plant will be closed Saturday afternoons in accordance with the concern's annual custom.

John Mitchell, formerly assistant foreman in the tool room of the Waterbury Clock Co., Waterbury, was recently presented by several of his fellow employes with a purse of gold on the occasion of his resignation to accept a position out of town.

Hilding Stromberg, in the employ of Landers, Frary & Clark, New Britain, was caught in a belt while at work on Monday morning, of last week, and drawn around the shafting, his left arm being torn off at the elbow. He was taken to the New Britain general hospital in a critical condition.

J. J. Niland Cut Glass Co., manufacturers of cut glass, South Meriden, last week gave an exhibition of glass cutting in one of the large general stores, in New Haven. A number of glass cutters were at work showing the various processes through which the blank must pass before it is a finished product.

The Waterbury Clock Co., Waterbury, has been made the defendant in a suit for \$12,000 for damages brought against it by Jos. Marchitto who claims to have lost a finger on a power press which was not properly cared for. Among the witnesses for the plaintiff is Supt. W. J. Larkin, of the concern.

Willard A. Blakeslee, for several years in the employ of the Waterbury Clock Co., Waterbury, died recently at his home on S. Main St., Thomaston, after a prolonged

illness of cancer of the liver. The deceased was 46 years of age and at one time worked in the marine department of the Seth Thomas Clock Co.

Lancaster, Pa.

William Smith, engraver, late with the H. M. Musser Silver Plate Co., has entered the employ of Ezra F. Bowman's Sons.

The baseball team of the Hamilton Watch Co.'s factory will open their season on Memorial Day with a game with the Athletic team.

Among the jewelers visiting this city lately were J. A. Kirk, Quarryville; S. H. Miller, Mt. Joy; August Carmany, Coatesville; C. E. Hinkle, Ephrata.

M. Berman, Altoona, Pa., jeweler, was in Lancaster last week, having come to place his brother in the Ezra F. Bowman Technical School as a student.

H. E. Randall, late of New York, has taken a place with S. Kurtz Zook as optician and watchmaker, succeeding James A. Currie, who intends locating at Sheridan or New Castle, Pa.

The theft of two gold watches about two weeks ago from Harry Sobel's jewelry store, has been traced to a 12-year-old boy, Roy Portner, who confessed to the theft of one of them. He will be tried before the Juvenile Court.

Last week a San Francisco jewelry firm returned to the Hamilton Watch Co. a number of watches which had passed through the great fire, in a safe. The cases of all were crusted with black oxide, but two of the timepieces were in good running order.

As more of the jewelry stolen from L. C. Reisner, while on a railroad train between Harrisburg and Chambersburg, has been returned, sentence has been suspended for the present on William Fraker, a railroad engineer, who pleaded guilty in the court at Carlisle recently to the theft. Of the \$3,500 worth of jewelry stolen, over \$2,000 worth has now been recovered.

The funeral of Abraham Bitner, through whose effort the old Lancaster Watch Co. came into existence, and of which he was the manager for some years, took place Wednesday and was largely attended. Among those present were 20 of his old employes, who are now with the Hamilton Watch Co., which succeeded the Lancaster concern.

Cleveland.

L. M. Sigler, of the Sigler Bros. Co., sailed for Europe a few days ago and will be in the diamond market for some time.

Capt. R. E. Burdick, of the Bowler & Burdick Co., will sail for Europe early in July to purchase diamonds for next season.

E. B. O. Smith and wife, Lancaster, O., were in this city, last week, on their honeymoon trip. While here Mr. Smith called on some of the wholesale houses.

W. B. Blood, Chicago, Michigan representative of the Scribner & Loehr Co., was at the house, last week, as was Mr. Knight, who has another portion of the same State.

Among the merchants visiting in the city within the last week were the following: H. H. Brainard, Medina, O.; Frank Dyer, Caro, Mich.; W. W. Wells, Lodi, O.;

George High and Mrs. High, Medina; Harry Downs, Bellevue; John McClintock, Chagrin Falls; Mrs. A. R. Kimpton, Oberlin; E. E. Critz, of the Critz-Haserodt Co., Elyria; Albert Zang, of J. A. Zang & Sons, Alliance; and F. N. Prevey, of F. N. Prevey & Co., Akron.

Buffalo, N. Y.

Best & Co., 11 E. Genesee St., have completed the decoration of the front of their jewelry store.

Meyer Brown, 136 Seneca St., has completed alterations to his store and added a large new safe.

John Magner, former manager of the optical department of the Progressive Co., was in Utica Wednesday of last week to attend the funeral of his nephew, who died suddenly.

Jerch Kinney, 92 Seneca St., has reached the age of 70 years, and is anxious for a business partner. Mr. Kinney, who lives in East Aurora, established his jewelry store in Buffalo 35 years ago.

The Grant St. jewelry stock of W. Z. Jarden, bankrupt, recently purchased by Buehl Bros., as an investment, is still locked up in the establishment. Buehl Bros., who also purchased the Philip Fischer bankrupt stock, now on sale at 390 Main St., will dispose of the Jarden stock in a similar manner.

The retail jewelers of E. Genesee St. are liberally signing an agreement for the closing of their stores in July and August at 6 o'clock every evening of the week. For years the jewelers in this thoroughfare have kept their stores open evenings the year round till 9 o'clock. The agreement also stipulates that the stores shall be closed Saturday afternoons in the months mentioned.

Buffalo jewelry merchants are very indignant by reason of a raid upon them by court officers with subpoenas summoning them to serve as jurors in civil and criminal cases. In one or two instances the merchants have been subpoenaed without notice, and ordered to lock up their stores in order to accompany the officers to the City Hall, they being alone in their stores at the time the service was made. The complaining jewelers declare there are enough men available as jurors without the officers dragging them out of their places of business.

Walter Harrington, under indictment here for robbing the store of Paul Foerster, 134 Seneca St., will not be brought to trial until the arrest of Eugene Dobel is made, if this is possible. A warrant was issued last week for Lobel, charging him with complicity in the theft of \$3,000 worth of diamonds from Mr. Foerster's establishment. Recently Lobel was arrested in Memphis, Tenn. He was released and left Memphis before the Buffalo authorities could get papers for his arrest there. Mrs. Foerster was told by Buffalo physicians that unless she went into the country for a rest she could not expect to live more than two months. She promptly took the advice of the physicians. Mrs. Foerster's health has failed rapidly since a tray of diamonds was stolen from her in her husband's store. She has brooded constantly over the loss of the jewels, and the fact that they were stolen while she was exhibiting them.

OF THE JEWELRY AND KINDRED TRADES.
Over 4,000 Marks. Second Edition. Price, \$3.00.
The Jewelers' Circular Pub. Co., 11 John St., N. Y.

Boston.

F. A. Colburn, Cambridge, has been spending a week at his Summer cottage at Lake Sunapee, N. H.

Samuel Mendlesohn, dealer in watches and jewelry, has moved from room 800 Jewelers' building, to rooms 713 and 714 Washington building.

D. C. Percival, of D. C. Percival & Co. has gone to Maine on a fishing trip. His son, Lawrence F. Percival, and his bride have returned from their European wedding trip.

T. S. Reynolds, the London, Eng., manufacturer of barometers and thermometer was in Boston recently, renewing his acquaintance with his customers. This was his first visit to the city of Boston in many years.

The many friends of John B. McKelvey, with Nelson H. Brown, 90 Frank St., will be grieved to hear of the death of his daughter, Julia, who died May 21, of acute indigestion, after a sickness of a few hours. She was 18 years of age.

The following jewelers were in Boston during the week: G. V. Turgeon, Lewiston, Me.; F. Ricard, Lowell; Starr Hewitt, Salem; Mr. Pratt, with Har Raynes, Lowell; J. H. Jacques, Haverhill; S. K. Gurney, of Gurney Bros. Co.; Breton; Robert A. Lohnes, Worcester; Thomas Margetts, Hingham; E. E. Coddington, Norfolk.

Mrs. May Mott Smith Cunningham, San Francisco, Cal., is exhibiting a fine collection of hand-wrought jewelry at Arlington St., in this city. The designs are original with her and are artistic, though they are on a rather big scale, and some of them are almost barbaric in the magnificence. Precious stones are employed as the central motifs and the surrounding designs harmonize so that each gem has the most becoming setting. Mr. Cunningham's studio was burned during the recent San Francisco disaster and shows several designs which were taken from the safe after the fire, and which, curiously discolored, showing the peculiar action of heat on metals and gems.

The Medal Comb Co., Templeton, 1 been incorporated under the laws of Massachusetts. It has a capital of \$10,000, the par value of the stock being \$100 per share. Its charter authorizes it to buy land, build a factory, manufacture and deal in combs, brushes, hair pins, buttons, buckles, fan articles, and novelties of horn, bone, celluloid, amber, or other substances; purchase control of other companies, and acquire patents. No share of stock is to be sold until it is offered to the stockholders. The incorporators were: President and treasurer, Frank L. Hopkins, Templeton; clerk, Edward W. Walsh, Templeton, and Joseph P. Camery, Templeton. These three are the directors of the company.

The Enterprise Cut Glass Co. has awarded the contract for the erection of a large factory in Elmira Heights, Elmira, N. Y. The building will be situated at the corner of 8th St. and College Ave. The concern is now located in Honesdale, Pa., but will move to the new territory as soon as the factory is completed.

Our Traveling Representatives

E. A. Woodmancy, representing Potter & Buffinton Co., Providence, R. I., was in Toronto, Ont., last week.

The following salesmen were in Boston, Mass., during the week: J. Williams, Fera & Kadison; Mr. Sherwood, Solidarity Watch Case Co.; John W. Reddall; L. Henry Jurgens, Snow & Westcott; J. H. Hardin, F. A. Hardy & Co.

Among the travelers on the Pacific Slope, recently, were: F. R. Sheridan, Arnold & Steere, who visited the trade in San Francisco and Oakland, Cal., last week, and Fred Carpenter, W. & S. Blackinton Co., who was in Oakland last week.

Among the traveling representatives to visit Buffalo, N. Y., last week, were: Leo Goldsmith; Chas. F. Swazy, Champenois & Co.; C. B. Bartlett, Whiting Mfg. Co.; E. Huston, Mandeville, Carrow & Crane; John C. Hull; Mr. Gregory, Strobell & Crane; Walter S. Noon, Cory Bros. Co.; Chas. S. Untermyer, Chas. Keller & Co.; Mr. Barnum, Shafer & Douglas; J. B. MacDonalld, Wolcott Mfg. Co.; E. J. Rider, Walter E. Hayward.

The following traveling representatives visited the trade in Lancaster, Pa., last week: D. Fox, Lyons Gem Co.; Walter H. Young, Simpson, Hall, Miller & Co.; S. K. Jones; Harold G. Tinkler, Bride & Tinkler; H. B. Bliss, Gorham Mfg. Co.; A. E. Silberman, Leon Hirsch; Henry Greenthal, Albert Lorsch & Co.; William G. McIlwain, A. R. Justis Co.; E. P. Ledos, Ledos Mfg. Co.; Frank Byrnes, H. D. Merritt Co.; Mr. Creamer, J. T. Mauran & Co.; Frank Sohmer, Arnold & Steere.

Among commercial travelers in Columbus, O., during the past week, were: A. J. Augustin, Dennison Mfg. Co.; M. W. Porter, J. M. Fisher & Co.; P. H. Winterberg, Sprochnle & Co.; J. R. Kraus, Zach. A. Oppenheimer; R. B. Renick, Geo. Borgfeldt & Co.; F. C. Allen, Sansbury & Nellis; Fred T. Barry, S. O. Bigney & Co.; Mr. Guggenheim, Ingomar Goldsmith & Co.; G. W. Bleeker, Martin, Copeland & Co.; H. C. Bliss, Bliss Bros. Co.; D. Skutch, New Haven Clock Co.; Helmer Thompson, F. H. Noble & Co.

Barnum, Shafer & Douglas; Mr. Macpherson, C. Ray Randall & Co.; F. C. Allen, Sansbury & Nellis; J. C. Bigalke, Bigalke & Eckert Co.; R. P. Caughlin, C. G. Alford & Co.; Jack Thompson, J. B. Bowden & Co.; Mr. Wile, Buffalo Jewelry Case Co.; J. B. Read, Shepard Mfg. Co.; G. W. Bleeker, Martin, Copeland & Co.; Mr. Hayes, Ehrlich & Sinnock; J. E. Simonson, Ludwig Nissen & Co.; A. J. Parker, Osmun-Parker Mfg. Co.; W. H. Osborne, R. Wallace & Sons Mfg. Co.

The following traveling salesmen called on the trade in St. Louis, Mo., last week: C. B. Bartlett, Whiting Mfg. Co.; John J. Moffitt, Battin & Co.; Samuel Jacobson, Jacobson Bros.; F. R. Horton, Carter, Howe & Co.; J. P. Wayton, Lebkuecher & Co.; George W. Beardsley, Allsopp & Allsopp; S. W. Abbey, E. Ira Richards & Co.; S. H. Brower, Edwin Lowe & Co.; J. B. Freeman, Freeman, Daughaday & Co.; Hubert Sombron, Hipp. Didisheim & Bro.; Emil Pick, Hammel, Riglander & Co.; Joseph S. Frank, Sussfeld, Lorsch & Co.; Joseph Rifkin, L. Heller & Son; H. C. Rowbotham, Schrader-Wittstein Co.; C. T. E. Smith, Reed & Barton; Milton S. Rodenberg.

The following traveling representatives called on the trade in Kansas City, Mo., during the past week: Geo. W. Beardsley, Allsopp & Allsopp; I. H. Blatt, W. G. Pollack & Co.; F. R. Horton, Carter, Howe & Co.; W. B. Howe, Bradley & Hubbard Mfg. Co.; Jul. F. Schuman, Jr., William Kinschke Co.; E. C. Holbrook; Mr. Sherman, estate of O. M. Draper; James O. Otis, Harvey & Otis; S. H. Brower, Edwin Lowe & Co.; E. J. Walther, D. F. Briggs Co.; L. W. Arnold, Western Clock Mfg. Co.; Mr. Boss, Standard Button Co.; J. Rothschild, Kaffeman, Rothschild, & Co.; Walter R. Shute, Kohn & Co.; Mr. Vaslett, Fletcher-Burrows Co.; Mr. Finberg, Finberg Mfg.

Co.; Wm. Matschke, A. Joralemon & Son; Jos. S. Frank, Sussfeld, Lorsch & Co.; Emil Pick, Hammel, Riglander & Co.; G. W. Cureton, Henry G. Lefort.

Traveling representatives who called on the Cincinnati, O., trade, the past week, included: B. Eichberg, Eichberg & Co.; Morris Baer, Attleboro Mfg. Co.; Bernard Simms, Simms & Co.; Mr. White, Esser & Co.; Mr. Newberger, R. Blackinton & Co.; J. Palmer, H. A. Kirby Co.; G. Rodenberg, Rodenberg Mfg. Co.; Mr. Mayor, William H. Luther & Son; Charles Lyons, Torrey Jewelry Co.; Mr. Oakley, Thornton Bros.; Mr. Fry, Fry Bros.; F. R. Truell, W. H. Saart Co.; Mr. Parks, C. H. Cooke Co.; J. Cobb, F. M. & J. L. Cobb; Mr. Valentine, Taunton Pearl Works; Frank L. Carpenter, Dominick & Hoff; Charles F. Sexton, William L. Sexton & Co.; R. H. Brown, Barden & Hull; C. B. Bartlett, Whiting Mfg. Co.; Mr. Bishop, Bergfels & Co.; H. Somborn, Hipp. Diddisheim & Co.; Mr. Hodgson, White & Co.; F. W. Pearce, Bay State Optical Co.; Mr. Levy, Byron L. Strasburger & Co.; Maxy L. Potter, J. L. Fisher Co.; Arthur Bradshaw, International Silver Co.; W. S. Sparrow, Stern Bros. Co.; Emil Herbeck, Herbeck, Deiner Co.; H. C. Wilson, Crescent Watch Case Co.; F. E. Buffum, Bristol Mfg. Co.; T. C. Keys, L. E. Waterman Co.; C. B. Bartlett, F. W. Weaver & Co.; W. W. Evans, T. G. Hawkes & Co.; Mr. Fox, Fox & Co.

Traveling representatives who called on the trade in Omaha, Neb., last week, were: C. C. Achorn, Colonial Silver Co.; C. H. Davison, Coddington & Heilborn Co.; L. W. Arnold, Western Clock Mfg. Co.; Mr. Remington, Carter, Quarnstrom & Remington; J. Rothschild, Kaffeman, Rothschild & Co.; F. L. Pettie, Waterbury Clock Co.; William T. Smith, International Silver Co.; Fred J. Foster, Unger Bros.; Richard Merker, Bates Bros. Co.; Mr. Noble, Sturtevant, Whiting & Bigelow; George E. White, White & Roundsville; George L. Paine, Geo. L. Paine & Co.; Helmer Thompson, F. H. Noble & Co.; G. Fred Perry, F. H. Sadler Co.; Mr. Wilkins, Ostby & Barton Co.; Arthur H. Moore, Moore & Son; H. A. Scofield, Scofield, Melcher & Scofield; H. E. Cobb, Daggett & Clap Co.; E. J. Walther, D. F. Briggs Co.; Ernest Block, Louis Stern & Co.; W. D. Sinnock, Ehrlich & Sinnock; Ira C. Jones, Chas. L. Trout & Co.; Chas. E. Lachner, Hayes Bros. Co.; John A. Lassau, Martin, Copeland & Co.; C. F. Hartshorn, Krementz & Co.; De Lancey Stone, Shafer & Douglas; R. L. Robinson, Dennison Mfg. Co.; E. C. Holbrook, Ferdinand Bing & Co.; Ralph C. Dick, St. Louis Clock and Silverware Co.; Chas. E. Howe, E. L. Logee & Co.

The following traveling representatives visited the trade at Pittsburg, Pa., last week: F. C. Allen, Sansbury & Nellis; D. Skutch, New Haven Clock Co.; R. C. Read, H. F. Barrows Co.; Frank S. Ottley, Riker Bros.; Wallace E. Welch, Hoyt, Obrig & Geiger Co.; E. A. Reed, Reed & Barton; Frank W. Cullom, Sulzberger Bros.; E. R. Barnett, Waite, Mathewson & Co.; Maurice Kohn, Silberman, Kohn & Wallenstein; Mr. Fisher, Furbish, Swift & Fisher; Wm. Matschke, A. Joralemon & Son; Charles L. Drown, Ostby & Barton Co.; E. J. Walther, D. F. Briggs Co.; E. M. Bliss, Bliss Bros. & Co.; Mr. Strandberg, Sykes & Strandberg; Donald Le Stage, H. D. Merritt Co.; Mr. Bleeker, Wm. S. Hedges & Co.; M. V. Decker, Plainville Stock Co.; I. W. Lederer, S. & B. Lederer Co.; H. B. Bliss, Gorham Mfg. Co.; G. W. Bleeker, Martin, Copeland & Co.; O. P. Bliss, Wm. C. Greene Co.; W. R. Eliot, Meriden Cut Glass Co.; J. M. Morrow, American Watch Case Co.; Mr. Finberg, Finberg Mfg. Co.; Mr. Somes, Bates & Bacon; Wm. Rosenberger, A. Wallach & Co.; George H. Remington, Maintien Bros. & Elliott; Louis A. Blackinton, W. & S. Blackinton Co.; Mr. Bishop, Bergfels & Co.; J. Ira Lester, Milton L. Ernst; A. W. Levy, Byron L. Strasburger & Co.; Fred T. Barry, S. O. Bigney & Co.; C. L. Cabot, Bishop Co.; C. B. Bartlett, Whiting Mfg. Co.; B. A. Noble, Sturtevant, Whiting & Bigelow; John D. Dalzell, J. D. Dalzell & Co.

The losses by fire at the Bradley & Hubbard Mfg. Co.'s factory, Meriden, Conn., were recently adjusted. Chief Lucas recorded the loss on the building at \$2,000 and that on the contents about \$11,000. It was generally believed that the total loss would be almost \$20,000. An inventory of the stock, however, revealed that much of the finished stock escaped serious damage.

New Orleans, La.

Louis Moss, a Carondelet St. jeweler and diamond setter, who was arrested for stealing a quantity of jewelry from William Frantz & Co., 142 Carondelet St., pleaded guilty to larceny before Judge Chretien, in Section B, of the Criminal District Court, a few days ago. The plea is a compromise one, and under the law Moss will escape the penitentiary, but he is compelled to serve the term in the parish prison. The first charge against the diamond setter was embezzlement, but Mr. Frantz, not wishing to be severe on the man, agreed to have him plead guilty of the lesser offense. Moss did job work for Mr. Frantz and other jewelers, and several weeks ago he created something of a sensation by declaring that two masked men had come into his place while he was working at night, and at the point of a pistol robbed him of a lot of valuable property. The property stolen belonged principally to Mr. Frantz and the remainder to private customers. The detectives went to work on the case and recovered most of Mr. Frantz's jewelry in pawnshops, where it had been pledged by Moss.

The battleship *Louisiana* has been completed and the Progressive Union intends to raise \$10,000 with which to purchase a magnificent silver service for the great floating fortress. The old plan of making the gift a \$2,500 set has been abandoned, and on the new proposition Governor Blanchard and Mayor Behrman are expected to play their parts. The committee, of which Andrew Blakely is chairman, had a meeting Saturday and reached the decision to ask Mayor Behrman to take full charge and boom the proposition to its utmost. Governor Blanchard is enthusiastic over the project and thinks that the Pelican State should do full honor to its splendid namesake. A committee will be appointed in each parish to solicit funds, and each parish committee will have power to appoint a subcommittee to work in the towns and villages. When Assistant Secretary of the Navy Newberry was in New Orleans a short time ago he informed the committee that the *Louisiana* would be sent here to receive the service any time during the Fall that the citizens desired, and it is probable that the committee will select either October or November for the visit.

The Mutual Aid Association of the silver workers employed by the Towle Mfg. Co., Newburyport, Conn., held its first annual assembly in the City Hall of that town May 21, and the affair was voted a great success by all who participated and attended. The Towle Mfg. Co.'s orchestra rendered a number of selections and the programme of the evening included a number of original musical compositions composed and performed by members of the association. There were also humorous sketches, fencing bouts, athletic exhibitions, a minstrel sketch and a farce, after which refreshments were served and dancing was indulged in until the small hours of the morning. The affair was in charge of the executive committee, of which C. N. Saford is chairman, and C. E. Groaton, secretary and treasurer.

THE JEWELERS' CIRCULAR PUBL. CO.
Publishers,

11 John St., cor. Broadway, New York.

Philadelphia.

Ferdinand Levy, 929 Chestnut St., has returned from an extended southern trip.

Homer Vernon, watchmaker, has resigned his position with Strawbridge & Clothier.

T. C. Kremer, Phoenixville, spent a few days last week attending the convocation of the Night Templars at Royers Ford, Pa.

H. Garfinkel is closing out the business conducted by him in the Mint Arcade building and proposes shortly to vacate the store.

Gustave Lanz, Norristown, returned last week from a week's pleasure trip traveling through historic battlefields of the Civil War.

J. E. Caldwell & Co. have designed and made the prizes for the American Rowing Association's Regatta on the Schuylkill River.

The retail store of Roland Oliver, Beverly, N. J., was entered by thieves last week and a considerable quantity of jewelry was stolen.

W. B. Hens, 717 Sanson St., enameLER, has removed with his family to Wildwood, N. J., for the Summer, where he has taken house.

William Liener has completed the installation of new fixtures in his new store 2256 N. Front St., and held his formal opening last week.

George Schaffner, who recently sold his jewelry store at 210 Woodward Ave., has gone into the brokerage and loan business in the Loyal Guard building.

Ben Meisner and David King, baker and lothier, respectively, succeed S. H. Ives and H. T. Phillips in the loan business at 4 Monroe Ave. S. Schwab is manager.

Bailey, Banks & Biddle Co. was awarded the contract, last week, for the prizes and trophies for the Spring and Summer golf tournaments of the Wilmington Country Club.

J. E. Caldwell & Co. are making a display of prizes and trophies together with the Bailey, Banks & Biddle Co. for the fashionable Horse Show at St. Martins Green.

A. R. Justice Co. was awarded the contract last week for the prizes to be awarded at the tennis tournament to be held by the Philadelphia Morning Paper Carriers' Association.

The Eye Fix Remedy Co., of this city, was on hand at the annual convention of the Ohio Optical Association, which met at Columbus, May 28-29. The concern presented a handsome badge to each member.

Patrick Haggerty, watchmaker, recently with S. J. Lyons, 2258 N. Front St., this city, last week bought out the retail store in Mauch Chunk, conducted by Fred. Loos. The latter had been formerly with John MacPherson and had conducted the business only a short time. Mr. Haggerty is widely known in this city's trade.

About 80 wholesale and manufacturing jewelers and opticians of this city have organized a society for the purpose of making Detroit known as a center for their business. They will co-operate with the Board of Commerce. The officers are: President, Frank Kennedy, of the Kennedy Optical Co.; vice-president, R. E. Rogers, of Kunz & Rogers; secretary, Charles Ber-

key; treasurer, Alfred E. Patterson. A name will be adopted and directors chosen at another meeting to be held June 1.

Miss M. Rubenstone, a niece of Jacob Rubenstone, with whom she was associated for about five years, has started in business for herself at 711 Sanson St., as a manufacturing jeweler and diamond setter, with repairing for the trade as her specialty. Miss Rubenstone is the only woman conducting a like business on her own account in this city, but since she has acquired a thorough familiarity and wide experience from her long association with her uncle, who is now in the jobbing business at 127 S. 7th St., a prosperous career is predicted for her.

David Baghivo, the Italian jeweler at 1454 S. 11th St., who claimed that a colored man named William Peterson attempted to rob him last week while pretending to make a purchase, failed to make out a prima facie case at the magistrate's hearing Friday and the prisoner was promptly discharged from custody. Baghivo, who said he was sure that Peterson meant to rob him, fired at the latter with a revolver. The shots attracted a policeman's attention and Peterson was arrested. The prisoner argued that the jeweler persisted in quarrelling with him over the price of an article, and after an argument he left the store only to be shot after and arrested.

The carefulness of Benjamin E. Sattler, who is connected with the jewelry and pawnshop of M. & S. Fridenberg, 37 W. 11th St., was responsible last week for the arrest of a man and a woman who were accused of attempting to dispose of a watch which had previously been reported to the police as a part of a quantity of stolen jewelry. The watch was offered to Sattler by James J. Miller, and the clerk noticing the initials "J. E. D." on the back remembered that such a watch had been described as part of the lost stolen from the house of Mrs. E. Ferris. Sattler questioned Miller, who said he had been given it to pawn by the girl who was outside. He then went out called the girl in and notified the police, who later arrested the pair. The girl gave her name as Grace Dean, and corroborated the story of the man, that he was a stranger to her and had simply granted her request to pledge the watch. After some questioning the girl told the detectives where she lived, and at her home they found a clock and several other pieces of jewelry. Although the police found Miller to be comparatively innocent in the action, he was held as a witness and he, the girl and a man said to be the girl's husband, who was later arrested, were all held in \$600 bail.

H. Brouse recently moved into his newly furnished store at 168 Sparks St., Ottawa, Ont., Can.

The following recently passed the examination of the Board of Regents of the Illinois State Optical Society, and are now members of that society: Oliver Savill, Canton, Ill.; Geo. W. McFatrieh, M.D., secretary of the Northern Illinois College of Ophthalmology and Otology; Max Goldberg, Chicago; W. A. Foley, Chicago Heights; S. A. Carpenter, Harvey, Ill., and Victor H. Sponberg, Chicago. The Board will meet shortly.

Canada Notes.

TRADE CONDITIONS.

Retail trade is beginning to feel the stimulus of warm weather and the approaching hymeneal season, and Toronto merchants are doing a good business. Manufacturers are very busy and some establishments are working day and night to overtake orders. Reports from the west and British Columbia are encouraging, dealers being disposed to order freely.

S. C. Wallace, London, Ont., has sold out to W. G. Young.

Lorren Bricker, Preston, Ont., has assigned to H. C. Edgar.

Alfred Marentelle, Belle River, Ont., is moving to Tecumseh, Ont.

H. J. Vinclette has sold out his jewelry business at Magratti, Alta.

Chas. Clarkson, Cypress River, Man., has assigned to D. C. Clarke.

E. L. Weiss' jewelry store, Bancroft, Ont., was destroyed by fire recently.

The assets of W. C. Balcom, Hantsport, N. S., have been sold to A. S. Fillmore.

D. Myles, Haileyburg, Ont., has admitted a partner, and the style is now Myles & Co.

The Western Jewelry & Novelty Co., London, Ont., has been succeeded by W. J. Wray & Co.

Ewart Bros., Rossland and Nelson, have dissolved, each continuing separately, one at Rossland and the other at Nelson.

John L. Laves, Montreal, will be married June 27 at St. Luke's Church, Montreal, to Miss Florence Ogden, of the same place.

R. J. Abbs, traveling representative of the Goldsmiths Stock Co., Toronto, Ont., returned last week from a successful trip of three months to the west and British Columbia.

G. B. Kelvey, representing the Goldsmiths Stock Co., Toronto, Ont., on the eastern route, has returned from a visit to the Maritime Provinces and reports business brisk.

The Barbon-Parker Mfg. Co., incorporated under the laws of Iowa to manufacture and deal in jewelry, etc., has been licensed to do business in Canada with a capital not exceeding \$45,000.

Ambrose Kent & Sons, Ltd., Toronto, Ont., have been given the order for the recognition button of the recently established secret order, the "Sons of Rest," whose headquarters are in Toronto.

Andrew Mackenzie, formerly in the employ of the American Waltham Watch Co., Montreal, but more recently commercial traveler for the Smith Paterson Co., died recently at the Royal Victoria Hospital, Montreal, as the result of a fall.

William Bramley, Montreal, has suffered heavy bereavement in the loss of his mother, Mrs. John Bramley. The deceased was a resident of Montreal for over half a century, and was the widow of the late John Bramley, who was an officer in the Grenadier Guards and came to Canada with the regiment.

R. L. Lighfoot & Co., Bolivar, Tenn., have assigned.

E. Claudel has succeeded to the optical business of E. & L. Claudel, New Orleans, La.

H. A. Forbes & Co., formerly of San Francisco, Cal., are now located at Canton, O.

100 STATE STREET,
ALBANY, N.Y.

A LARGE ASSORTMENT OF DIAMOND
MOUNTED JEWELRY CARRIED IN STOCK.

Pittsburg.

J. J. Lowenstein is manager for the Griffin Jewelry Co., successors to Herman L. Joseph, 260 Fifth Ave.

Charles O'Brien & Co. last week sold to a customer a diamond jeweled gold hand bag for \$1,000. It was a special order.

F. P. Roberts & Sons expect to move into their new store next week, although the building is not yet finished. The fixtures are being installed as rapidly as possible.

A. A. and P. C. Gillespie are now uncles, a sister, Mrs. John Foley, having presented her husband with a daughter, the first child born to any of the Gillespie girls.

Homor J. Lindsay, of the Carnegie Steel Co., is now one of the partners of Charles O'Brien, of Chas. O'Brien & Co. Mr. Lindsay is a member of the staff of Gov. Samuel W. Pennypacker, of Pennsylvania.

Mr. and Mrs. E. H. Kennerdell, of Tarentum and H. H. Weylman, of Kittanning, Pa., were in Pittsburg last week. Messrs. Kennerdell and Weylman are members of the Knights Templar and attended the ball of that lodge at Duquesne Gardens.

H. S. Johnston, Apollo, and family, who some time ago started for San Francisco, but were compelled to leave the train in Illinois on account of several of their children becoming ill, have continued their journey to the coast, but will not go to San Francisco for the present.

The Merchants and Manufacturers Association gave a "Greater Pittsburg Social dinner" at the Annex Hotel last week, the function being attended by some of the local jewelers. On the tour of the association of northwestern Ohio, which begins June 4, Sam F. Sipe will be among the merchants who will accompany the party. Heeren Bros. & Co. will also be represented and possibly the Geo. B. Barrett Co.

The jewelers in the Park building last week petitioned the city authorities to put a stop to the playing of a phonograph in a "nickelodeon" in Fifth Ave., opposite the Park building, which disturbed business, and the police authorities complied with the request; the amusement place is now closed. This city is overrun with these nuisances, especially Fifth Ave., where numerous jewelry stores are located, and they are regarded as a detriment to business.

The Knights Templar conclave resulted in bringing to Pittsburg a large number of out-of-town merchants, and local jewelers decorated their places beautifully for the occasion. Goddard, Hill & Co. was finely decorated with silk flags, while the stores of the John M. Roberts & Son Co., E. P. Roberts & Sons, W. W. Wattles & Sons, West, White & Christy, and numerous other establishments, made lavish displays. Among the out-of-town people in the city were the following: F. W. Koehler, Sharon; John I. Stadtmiller, Indiana; W. H. Bowser, Freeport; T. H. McNary, Washington; Robert W. Brady, Washington; F. B. Theakston, Brownsville; Wm. Hunt, Uniontown; R. V. Marshall, Freeport; H. C. Morrison, wife and daughter, Mt. Pleasant; Mr. and Mrs. E. Priese, Homestead; Walter McKean, Charleroi; John Kennedy, Waynesburg; Harry F.

Frampton, Brownsville; William Hanna, New Castle; Harvey Fritz, Oil City, and Mr. Price, of Price & Landas, Titusville. Most of these dealers bought bills of goods.

Rochester.

The last of the season's regular meetings of the Rochester Credit Men's Association was held last Thursday evening in the Chamber of Commerce parlors and was largely attended. The programme included a short business session, at which the following delegates were selected to attend the national convention of credit men to be held in Baltimore June 13, 14, 15: Philip Present, Daniel B. Murphy, C. S. Bradt, I. A. Wile, J. H. Lempert and Edward Weter. James P. B. Duffy delivered an address on "Credit."

Over 5,000 persons attended the meeting held recently in the City Hall in the interest of the Saturday half-holiday question. The local jewelers are the leading spirits in the movement to close at noon on Saturday during June, July and August, and the other merchants are rallying to their support in large numbers. Among the vice-presidents at the meeting were the following jewelers and opticians: Geo. R. Bausch, S. D. Burritt, W. W. Bissell, James J. Ernisse, L. Ettinheimer, W. R. Gormly, J. H. Humburch, Henry Oemisch, E. J. Scheer, Rudolph Schmidt, C. E. Sunderlin, J. R. White and C. F. Wolters. A committee was appointed to visit the different stores in the interest of the movement, and on the first day of visiting secured the signatures of 94 firms. It is said that with probably one or two exceptions every jewelry store in the city is willing to close at 1 o'clock Saturday afternoon during the three months stated above.

North Attleboro.

John E. Tweedy was chosen vice president of the Town Improvement Society last Tuesday.

Frank Kennedy, eastern representative of Paye & Baker Mfg. Co., made a brief visit to the factory last week.

The H. F. Barrows Co., through its treasurer, Harry F. Barrows, has filed its annual corporation report. The figures are: Real estate, \$5,000; machinery, \$29,400; cash and debts receivable, \$128,850; merchandise, \$46,575; capital stock, \$175,000; profit and loss, \$34,925.

Woodbury Melcher and William F. Main- tien have been chosen treasurer and secretary respectively of the Plainville Real Estate Co., which intends to remedy the inconvenience that the jewelers of North Attleboro and Plainville have experienced through lack of dwelling houses for factory employees.

Andrew Wilson, Winfield, Kans., has been confined to his home during the past week by a serious illness.

S. S. Brenner, Portland, Ind., who was recently accused of selling liquor without a license or prescription, on Tuesday of last week, was tried in the Circuit Court and acquitted.

Attleboro.

An addition is being made to the factory of Freeman, Daughaday & Co., Chantley.

Stephen A. Snow has returned to the home office of Reed & Barton, Taunton silversmiths, after a tour over the New England circuit.

Charles L. Bliss, who recently retired from the Bliss Bros. Co., has announced his candidacy for the next election to the lower branch of the Legislature.

James E. Blake, of the James E. Blake Co., has received an invitation to the launching, Tuesday, at Bristol, R. I., of a yacht to compete for King Edward's cup.

Reginald D. Fogg, salesman for the Watson & Newell Co., who, on his last trip to New York, in the Winter, caught spotted fever, continues critically ill. He has long periods of unconsciousness and is almost helpless. The case attracts wide attention, and much sympathy is expressed for the sufferer.

A long-standing dispute has been settled between the town and the Jas E. Blake Co. The town in some highway work recently built a high masonry wall by mistake several feet upon the company's land, just where it blocked a move to erect a new factory soon to go up. After legal proceedings had been instituted the town saw its error and has arranged to make amends.

The Attleboro Co-operative Bank last week elected to office as directors Hon. Sidney O. Bigney, of S. O. Bigney & Co.; Fred L. Torrey, David E. Makepeace, of the D. E. Makepeace Co.; Thomas S. Carpenter, of the Horton-Angell Co.; Frank H. Sadler, of F. H. Sadler Co.; Charles P. Keeler, of McRae & Keeler, and Edward A. Sweeney, of the W. H. Wilmarth Co.

Frank A. Chace, Chicago representative of the C. M. Robbins Co., returned to Attleboro, last week, to attend the funeral of his brother, Edmund C. Chace, who was drowned in the Harlem River, New York. The deceased was a Newark (N. J.) working jeweler. F. A. Chace left early this week for a month's trip on the eastern circuit, and will then resume charge at Chicago.

S. O. Bigney & Co., last week, accepted plans for a new three-story factory to stand on the corner of Wall and County Sts. It will be shaped like the letter L. The long section will run parallel to the present Bigney shop, and the short section, at right angles in the rear, will join the rear of the Bigney plant. The front of the present Bigney plant will then be built out toward the front of the new section, so that a rectangular court will be formed inside. The new structure will be 85 feet along County St., 200 feet on Wall St., of wood, and three stories high. Applications are reported already in hand from Providence jewelry concerns desiring quarters. On the present Bigney shop an extension has been completed to give added room to one tenant, the Electric Chain Co., and another L for S. O. Bigney & Co. to use as a plating room.

Rose & Evans, Telluride, Colo., who recently formed a partnership, have dissolved. The business will be continued as hitherto by Charles E. Rose.

Diamond Mining in South Africa.

THE report of the Premier Diamond Mining Co. for 1905 showed 1,388,071 loads handled, giving 845,652 carats, or an average per load of 0.609. The average value per carat was 23s. 6.29d., though no doubt if the Cullinan diamond realized a price per carat commensurate with its size, this figure would be largely increased. The cost per load was 3s. 3.448d.

The market for Premier stones improved during the year. At all recent meetings of diamond companies it seems to be agreed that the price of diamonds has improved. The improved demand, however, seems only to be for larger stones, as it was stated at a recent meeting of the Pieser Diamond Co. that "of late there had been a great fall in the price of inferior diamonds, the price having gone down to 2s. and 2s. 6d. per carat." In the case of the Premier Co. 85 per cent. of the value is obtained from stones averaging £3 a carat, and 15 per cent. from stones averaging 9s.

In the working of the mine, it appears that the labor supply has been short of requirements. An attempt is to be made to overcome this difficulty by the use of steam shovels and machine drills, which, it is hoped, will also reduce the losses by theft. It has been found that the grease tables, even after second treatment, fail to extract all the stones.

Attempts have been made to curtail the power of the company as a competitor in the diamond market, not only by the original diamond law under which the State takes 60 per cent. of the profits, but also by exercising a direct control upon its expenditure.—*Engineering and Mining Journal*.

King Alfonso to Give Princess Ena a Diamond Studded Crown.

A SPECIAL cable dispatch to the New York *Star* from Madrid, May 15, stated that King Alfonso's wedding gift to Princess Ena consists of jewels valued at half a million dollars. They comprise a golden crown studded with diamonds, a diamond diadem, a diamond necklace, a pearl necklace, a golden bracelet studded with diamonds, brooches and earrings.

Death of James D. Lincoln.

NORTH ATTLEBORO, Mass., May 28.—James Danielson Lincoln, one of the pioneer jewelry manufacturers of Plainville, died suddenly Saturday from diabetes at Pasadena, Cal. He is survived by a stepson, Woodbury Melcher, of this town. Mr. Lincoln's property, it is said, will be left to his stepson.

According to an often-expressed wish of Mr. Lincoln, the body will be cremated and the ashes be interred by the side of his wife at Laconia, N. H. In 1903 Mr. Lincoln presented a memorial library to his native town of Brimfield.

Mr. Melcher has left for California to take charge of the remains.

The store of L. F. Monillesseaux, Mahanoy City, Pa., was closed last week by the sheriff.

News Gleanings.

S. Bernstein has moved from Omaha, Nebr., to Memphis, Tenn.

H. Engels has purchased the store of J. H. LeRoy, Fairbury, Nebr.

The store of W. R. H. Wells, Abbeville, Ala., was recently destroyed by fire.

E. A. Pinto, West End, Duluth, Minn., has returned from a short visit to Maryland.

B. W. Carter recently reopened his watch and jewelry repairing shop in Butler, Ga.

The dissolution is reported of the jewelry firm of McKinney & Rhea, McKinney, Tex.

Frank G. Stedman has put in new fixtures in his jewelry store in New Windsor, Colo.

Ernest Homer, Dayton, Ia., is seeking a location at which to engage in the jewelry business.

Mr. Vincent is making extensive improvements in his retail jewelry store at Long Beach, Wash.

H. E. Childs, Clyde, N. Y., has remodelled the interior of his store and put in new show and wall cases.

A. F. Cummings, Holyoke, Mass., has moved from 121 Lyman St., into larger quarters at 166 High St.

R. A. Heggie, Ithaca, N. Y., is in New York attending the session of the Court of Deliberation of the Scottish Rite, at the Masonic Temple.

W. W. Howe, a retail jeweler of Clearfield, Pa., is a partner in the firm which is establishing a pleasure resort in the vicinity of that town.

Mr. Tice, of Tice & Benson, Auburn, N. Y., who was recently successfully operated upon for appendicitis, is now able to attend to business again.

Geo. E. Holmes, for some years in the jewelry business at Clifton Springs, N. Y., and later at Lock Haven, Pa., is now practicing as optician at Newark, N. Y.

Thomas F. J. Murphy, Callicoon Depot, N. Y., has filed a petition in bankruptcy. His liabilities are \$12,000; assets, \$6,700. Wm. A. Law has been appointed receiver for the concern.

The annual convention of the newly formed Wisconsin Retail Jewelers' Association, will be held June 27-28, in Milwaukee, Wis., with headquarters in the Hotel Blatz.

The Burke & Sweeney sapphire mines, near Yogo, Mont., have been sold to the American Sapphire Co., a New York corporation which will operate and develop them.

Frederick Boenstadt, Cheyenne, Wyo., was robbed recently of about \$200 worth of jewelry. Two men were subsequently taken into custody, but no booty was found on them.

The \$5,000 silver service for the battleship *Washington*, to be presented by the State of Washington, will be ordered at once through Schacht & Riorden, Spokane, Wash.

Archie Tegtmeyer, Milwaukee, Wis., recently filed a bond amounting to \$5,000, guaranteeing costs in a suit brought in the Circuit Court of the State against him by his landlord, who, it is alleged, is trying to have Mr. Tegtmeyer vacate the store at Grove St. and National Ave.

Welsh & Bro. Co., Baltimore, Md., have

moved from 323 N. Charles St. to the Professional building, 330 N. Charles St. The new quarters are 100 feet long and 20 feet wide, the interior furnishings being exceptionally attractive. There are also two large show windows, one on Charles St. and the other on Mulberry St.

On Wednesday, May 16, an electric car with an unusually long pole passed through the village of Watkins, N. Y. This pushed the live trolley wire against a telephone wire, and 368 telephones in the village were burned out. Among them was that in the jewelry store of A. A. Cowing, where a fire was started and light damage done.

An unknown man recently stole a candelabra from a wall case in the store of W. A. Kirkham, Leavenworth, Kans., and after taking it, returned for another article, when he was pounced upon by one of the clerks, but managed to escape. A waiter, who gave his name as Ross, was subsequently arrested and accused of the crime.

Powell Penn was recently sentenced to six months imprisonment in jail in Danville, Va., on a charge of larceny preferred against him by W. P. Grishaw, a local jeweler. Several watches found in the possession of the negro had been identified by Mr. Grishaw as his property. The negro, in his defense, claimed to have secured the timepieces from another colored man.

The Elgin Jewelry Co., Elgin, Ill., is the plaintiff in a suit to recover \$200 and interest from A. Bolinski, Mahanoy Plane, Pa. The concern claims to have billed goods amounting to \$200 to the defendant, and alleges that the latter agreed to pay \$50 on each of four payments. The defendant avers that the concern did not live up to its representations, and that he did not make a contract for the goods.

Thieves who recently broke into the store of O. E. Graves, Cementon, Pa., stole about \$200 worth of general merchandise, including a large amount of jewelry. A burglar alarm failed to operate, leaving the intruders free to plunder without being discovered. After leaving the store of Mr. Graves, the thieves went to the establishment of Geo. T. Rockel, where they made an unsuccessful attempt to enter. The burglar alarm here sounded and frightened away the thieves before they gained access to the stock.

Jewelers Gold Bars Withdrawn and Exchanged at New York.

Week Ended May 26, 1906.

The U. S. Assay Office reports:
Gold bars exchanged for gold coin...\$394,611.93
Gold bars paid depositors..... 61,556.72

Total	\$456,168.65
Of this the gold bars exchanged for gold coin are reported as follows:	
May 21.....	\$25,622.04
" 22.....	102,957.37
" 23.....	55,527.34
" 24.....	137,809.14
" 25.....	62,294.16
" 26.....	10,401.88

Total

Chas. M. Levy, 90 William St., New York, is making a number of intricate tools of modern construction for the manufacture of a new line of signet rings and lockets, which will continue to be his specialty. The new tools and new machinery will save much labor and time in manufacturing it is promised.

Optical Notes and Briefs.

(Also see page 92.)

W. A. Stevens, of the Bay State Optical Co., Chicago, was a visitor in Omaha, Nebr., during the past week.

J. C. Grasborg, formerly of South Omaha, Nebr., has taken a position in the optical department of Hayden Bros.' store, Omaha, Nebr.

Hirsch & Kaiser, formerly on Kearny St., San Francisco, Cal., but now located temporarily at 1757 Fillmore St., have their factory under way, and as they saved all their prescriptions, they are already attending to their customers.

The Berteling Optical Co., of which Harry Nordman is manager, has opened at 2505 Clay St., near Fillmore St., San Francisco, Cal. Mr. Nordman reports that he saved all his records and has some stock on hand with which to begin business.

Henry Kahn & Co., proprietors of the Ocularium, now located at 2253 Fillmore St., San Francisco, Cal., reports that all their books and records were burned and they are now asking their clients to call to have their glasses recorded.

J. R. Jenkel, optician, formerly located at 817 Market St., San Francisco, Cal., has selected a location for temporary purposes on Van Ness Ave. This firm has cast its lot with a number of retailers in various lines, who have agreed to group themselves together in temporary locations along Van Ness Ave.

The Erker Bros'. Optical Co., St. Louis, Mo., has secured a 99-year lease of the property at 705 Washington Ave. It is expected that the concern will move from the present location, 608 Olive St., at the expiration of the present lease. The property on Washington Ave. has a frontage of 22 feet six inches and a depth of 150 feet.

Miss E. L. E. Waltz has been placed in charge of the J. N. Adam Co. optical department in its department store at Buffalo, N. Y. For two years Miss Waltz had charge of the optical work in the Buffalo store of Philip Fischer, who recently went into bankruptcy. She succeeds Dr. Bemis, recently resigned, and she is the only practicing woman optician in the city of Buffalo.

The California Optical Co., San Francisco, Cal., whose handsome four-story factory and store at 205 Kearny St. was one of the finest in the west before its destruction on the night of April 18, has resumed business in fairly commodious quarters on Fillmore St. Here suitable dark rooms have been fitted up and the sales room is being put in shape. Factory and stock rooms have been secured in the rear and the first wheels in the new factory began to turn May 14. This company saved all its prescriptions and will be in shape for active business in a very few days. The company is prepared to stay in its present quarters for two years, but will move down town, running the present place as a branch, when the time seems ripe. Manager Fennimore, of the company, states that a lens drill and a lens cutter were the only machines saved. These had been discarded and were stored away in a place where they escaped the fiercest of the fire as well as falling walls and beams.

The stock of S. H. Abbott, McKinney, Tex., was slightly damaged by water and smoke during a recent fire at that place.

GORHAM POLISH

¶ The Gorham Mfg. Co. take this opportunity of impressing upon the retail Jewelry Trade the advantages arising from an ample provision of Gorham Silver Polish and Powder.

¶ The prepossessing form of the packages in which these preparations are put up serves in itself to render them an attractive feature of the silverware counter, suggesting to customers the expediency of availing themselves of the most highly approved means of keeping their household silver in immaculate condition.

Continued Increase in Precious Stone Importations. THE figures given out as to the importations at the port of New York of precious stones and pearls indicate that the total for the fiscal year ending June 30, 1906, will be greater than for any preceding fiscal year since the records of the port have been kept. The total for the year ending June 30, 1905, was \$33,223,164.59, the greatest up to that time. For 10 months of the current fiscal year ending April 30 the total is \$32,308,239.51. The figures of May and June, when added, will certainly send this year's aggregate above last year. May and June in last year were months of heavy importation, the total of the two months being upward of \$6,000,000. As the May figures, which will be made public this week exceed those of last year and those of June cannot fall much below those of the corresponding month of 1905, this year will go far ahead of its predecessor.

The last calendar year exceeded the records of the last fiscal year, the total for the 12 months ended Dec. 31 last year being \$37,146,337.35. It is not impossible, judging from the figures on hand, that the fiscal year now drawing to its close, may in turn exceed the calendar year which has the record so far.

The preponderance in the gains in the last calendar year was in cut stones and pearls, which are classified together, and the gain in these classes has continued. The importation of cut stones and pearls in the 10 months ending with April amounted to \$23,589,763.03. This was greater than the total for the last fiscal year (\$22,942,522.36.)

In the present fiscal year the totals for every month up to this time, with the exception of November and January, has exceeded the totals for the corresponding months in the preceding fiscal year.

Present indications are that the total importation of rough stones, which are mostly diamonds, will not differ greatly in value from that of the last fiscal year, when the figures stood \$10,280,642.23. In the last calendar year the importation of rough stones amounted to \$10,146,451.04.

The following table shows the importations for each of the 10 months of the current fiscal year:

Month.	Cut stones and pearls.	Uncut stones.	Total.
1905.			
July.....	\$3,149,735	\$843,096	\$3,092,831
August.....	1,815,718	460,154	2,275,873
September.....	2,240,987	1,009,892	3,250,839
October.....	2,409,144	1,100,245	3,509,390
November.....	1,695,378	771,714	2,467,093
December.....	2,846,373	787,005	3,633,379
1906.			
January.....	2,023,269	683,727	2,706,997
February.....	1,999,475	1,067,560	3,067,036
March.....	2,726,970	1,062,854	3,789,825
April.....	2,682,707	932,224	3,614,932
Total, 10 mths.	\$23,589,763	\$8,718,476	\$32,308,239

National Stamping Bill's Great Progress. THE news published in the last issue of THE CIRCULAR—WEEKLY to the effect that the Senate of the United States had just passed the Jewelry Trade's Gold and Silver Stamping law introduced by Congressman Vreeland caused deep satisfaction to manufacturing, jobbing and retail members of the trade throughout the country, who have earnestly and ardently favored the measure since the time that the

bill was outlined by this journal. The news which was received just as THE CIRCULAR—WEEKLY went to press, was unexpected, as even the most ardent and enthusiastic supporters of the measure did not believe that it could attain the approval of the upper house of Congress so quickly, but its passage shows not only that the Senators of many States had heard from their constituents on the subject, but also that a measure such as this, which seeks only to protect the trade and public from dishonesty and works no injury to the legitimate manufacturer, is properly deemed important enough for our highest legislative body to give it consideration at the first opportune moment—which was directly after the Rate Bill had been passed.

Fortunately for the jewelry trade the Senators from three States with great jewelry manufacturing centers—Rhode Island, Massachusetts and New Jersey, had been well informed by their constituents in the silver and gold trades and saw to it that the other Senators were made aware of the importance of the legislation proposed, and the great victory of the bill in the Senate is due almost as much to the work of Senators Aldrich, Crane and Kane as was the victory in the House due to the wholehearted and strenuous work of Congressman Vreeland.

A gratifying feature of the action of Congress on the bill so far lies in the fact that the measure as passed by the House was practically the same, in all details, as it was when introduced after being approved by the retail trade and the joint committee of the manufacturers of New England, New York and New Jersey. Outside of a few changes in phraseology which strengthened the text of the bill, the only amendments made by the Senate were those which decreased the penalty for a violation of the act from a fine of \$1,000 and six months' imprisonment to a fine of \$500 and three months' imprisonment, and extended the time in which the act shall take effect from six months to one year after the date of its passage. Although many members of the trade would like to see the bill go into effect in exactly the form in which it passed the House, it is safe to say that few supporters of the measure can be found who would not rather have the House concur in the Senate amendments than run the risk of delay in having the bill go into effect.

While the position of the President on the measure has never been officially stated, there seems to be little doubt in the jewelry trade and among the bill's supporters in Congress that an act such as this, which simply promotes honesty and protects the public, will surely get his approval.

The William A. Rogers (Ltd.) management has refused to recognize the silverworkers' union which has been formed in Oneida, N. Y., and Thursday practically all the company's employes quit work. The trouble started about three weeks ago, when some of the union men left their benches. The company induced some of the employes to return to work, but it is claimed the most prominent union men were given notice to quit. Since then the relations between the company and the employes have been strained, and Thursday all the help, numbering about 100, left the shop, and the plant was shut down.

Columbus, O.

J. C. Goodman, of Goodman Bros., left Saturday for a week's outing at Atlantic City.

Mr. Burt, of E. Burt & Son, Cardington, O.; B. F. Sikes, Galena, and Paul Johnson, of the Peerless Optical Co., Chicago were visitors here last week.

Milton Daniels, who for years has occupied a room in the Bornheim building Cleveland Ave. and Long St., has removed into a new building on the opposite side of Long St.

B. H. Davidson, Waverly, and R. Davidson, Murray, have purchased the store J. H. O'Daniel, on the viaduct. M. O'Daniel says he will probably go to San Francisco. The firm name will be Davidson Bros.

J. L. Sievert, who in October launched "The Sievert Jewelry & Optical Co.," 11 S. High St., has gone out of business and is now in Chicago. His optical business he sold to Miss Helene Campbell, who will conduct it for the present under the name "The Sievert Optical Co."

The Hofman Jewelry Co. received a telegram Thursday from R. N. Whitford, general manager, saying he had procured for the firm a rich gem claim near San Diego, Cal. Mr. Hofman became interested in the semi-precious stones while visiting in California, and sent for Mr. Whitford for consultation.

J. F. Bruns, Greenville, S. C., last week had on display in his show window the medals supplied by him to be awarded prizes to local students during commencement week.

Why not set
your diamonds

Arch Crown Mfg. Co 26 Camp Street
Newark, N. J.

New York Notes.

The offices of Herpers Bros., 41 Maiden Lane, have been enlarged and the firm now offers increased facilities to visitors from out-of-town.

Jacob Strauss, of Jacob Strauss & Sons, 4 Maiden Lane, returned on the 15th inst., on the *Kaiser Wilhelm II.* from a purchasing trip in Europe.

J. H. Venon, importer of china, 43 W. 14th St., will sail for Europe to-morrow on the *La Provence*, to visit the china factories of France, Russia and Sweden.

Joseph G. Brenaner, formerly of Poughkeepsie, and more recently with Leboldt & Co., recently assumed the position of manager of the Norman Selby Co., 1503 Broadway.

Next Tuesday at 11.30 A. M., creditors of Scherckling Bros. & Co., formerly Manufacturers at 28 E. 22nd St., will hold their first meeting in the office of Referee F. K. Pendleton, 25 Broad St.

The building formerly occupied by Tiffany & Co., at Union Sq. and 15th St., which is being remodeled for wholesale commercial purposes, was, last week, leased for 10 years, at an aggregate rental of \$300,000.

A certificate incorporating M. Tecla & Co., of Croton-on-Hudson, was filed last week. The company conducts a store at 220 Broadway. The capital is \$40,000, and the directors are: Charles Etlinger, Cleveland; F. J. Goldsoll, A. M. Lynch, New York.

Siegel, Rothschild & Co., 418 Baltimore St., Baltimore, have recently engaged Mrs. E. Lipmanson, formerly with James Stokely & Co., Philadelphia, who will represent them in eastern Ohio, Illinois and Michigan. S. Solomon will represent the Baltimore house in Texas, Louisiana and Oklahoma. D. A. Weinberg, of the same company, will sail for Europe on the *Barbarosa* about June 16.

June 18 to 21 are the days on which the National Association of Stationers and Manufacturers will hold their convention in New York. The Hotel Astor has been designated as the headquarters. Committees have been for some time making arrangements for the entertainment of visitors. There will be an evening at the Hippodrome, trips to Coney Island and up the Hudson and a banquet.

Cards have been sent out to the trade announcing that the business heretofore conducted under the style of Wm. B. Kerr & Co., Inc., will be continued by the re-organized company of the Wm. B. Kerr Co., with a general office and factory at 144 Orange St., Newark, N. J., and sales office at 320 5th Ave., New York. The company's distinctive line of silverware will be produced as heretofore.

Two young brothers, giving their names as Jack and George Hayes, who were arrested at 18 W. 22nd St., on suspicion of stealing a quantity of silverware with which they had been calling on the pawnshops, claimed that the articles had been bought by them from the Reed & Barton Co. Nothing was known as to the youths at the company's store in this city. The brothers were detained, pending an investigation.

Members in the trade are invited by J. H. Buck, the curator of metal work at the

Metropolitan Museum of Art to consult him at any time in relation to art topics associated with his work. He remains at the museum during full business hours every day and says that he is always glad to see those in the trade who are in need of his services. Mr. Buck's services have been loaned for three days from June 1 to 3 to the Boston Museum of Art.

Fifty cents was the amount realized on the few dilapidated watches and articles of jewelry left for repair with the Richter Watch & Jewelry Co., formerly of 444 Third Ave., at the sale conducted last Thursday by John J. Hayden, Trustee in Bankruptcy, at his office, 258 Broadway. This makes \$48.50 which has come into the Trustee's hand to meet the total liability of \$7,047. The case is one of those on which even the lawyers do not get their fees and the creditors get nothing.

In the Children's Court, last Wednesday, Jacob Meyrowitz, an office boy, was convicted of stabbing Miss Bella Hecht, the stenographer, in the office of Meyrowitz Bros., 37 Maiden Lane, where both were employed. The stabbing was to cover up a number of petty thefts, as his confession published in the last issue of the CIRCULAR WEEKLY explained. A suggestion has been made to the Federal authorities to deport young Meyrowitz to Russia, whence he came a year ago, and this suggestion may be followed.

A certificate was filed at Albany last Saturday incorporating the business of Chester Billings & Son, diamond importers. The new corporation, which will continue under the old name, will take over both the wholesale business at 58 Nassau St. and the retail store at 353 Fifth Ave., which have heretofore been conducted by the firm. There is no change in financial interest as practically all the stock will be held by the three directors, H. B. Billings and A. H. Kirkpatrick, both of New York, who have heretofore been active in the business, and by P. S. Ross, Newark, N. J., who continues his financial interest. The amount of capital stock has been placed at \$600,000.

On a motion that Abraham Goldberg, formerly of 132 Ridge St., be required to turn over property to the value of \$10,000 to his trustee in bankruptcy, testimony was heard last Thursday before Referee Wm. Allen. The bankrupt was questioned in relation to his transfer of a parcel of Brooklyn real estate to his brother-in-law on the occasion of the latter's marriage, some time before the failure. Efforts were made by Mervyn MacKenzie, of Hastings & Gleason, representing the trustees, to show that this transfer was not completed until a period just before the failure and was, therefore, contrary to the statute. Leonard Bronner, appearing for the bankrupt, denied that anything has been done that was illegal or improper. The case was adjourned to Friday of this week.

Stern Bros. & Co., finding that the facilities of their jewelry factory, 33 Gold St., New York, are inadequate for the growing business, recently leased the top floor of 82 Fulton St., forming an "L" with one of the floors of the present factory. A door was cut through so that the new quarters are conveniently joined to the existing works. New machinery is now being installed and in a few days will be in opera-

tion. The additional room comprises 5,000 square feet, giving the company a third more space than it now has. The company has been obliged to keep its factory in operation overtime, and even this did not have the desired effect. The Fulton St. addition to the three floors already occupied on Gold St. will enable the company to increase the output to the degree desired.

Ten handsome pieces of coral brought from various parts of the world were recently donated to the Museum of Natural History, of New York, by Borrelli & Vitelli, 401 Broadway. These specimens supplement the collection which the museum had on hand. With the additions, the exhibit at the museum is now regarded as quite comprehensive. Following is a list of the pieces donated by Borrelli & Vitelli, showing the color and origin of each: one piece, white, from Mediterranean, coast of Africa; white, from Japan, near Kobe; orange blood, from Japan, near Tokio, Sagami Sea; pink, from Sardinia Island; pink, from Sicacca, Sicilian Sea; rose color, Spanish, Canary Islands; rose color, Messina, Sicilian Sea; rose color, Spanish coast, Mediterranean; rose color, Fagnana, Sicilian Sea; rose color, Seilla, Calabrian Sea.

Testimony was heard last Thursday in the bankruptcy case of Edwin C. Heathcote, formerly of 13 Maiden Lane. Mervyn MacKenzie, of Hastings & Gleason, appeared for the trustee in bankruptcy. Mr. Heathcote and his wife were closely questioned in relation to the loss of the books and stock valued at \$10,000 in a Brooklyn Bridge car, an occurrence which had been given by the jeweler as the cause of his failure. The particulars, as reported at the time by Mr. Heathcote, were published in THE CIRCULAR WEEKLY of Feb. 21 and 28. On the stand Mr. Heathcote went over the details substantially as told before. He said that when he released his grasp on the heavy package of books and jewelry he had the impression that his wife was taking hold. He said that he was the last person going out by the middle door of the car, while his wife was the last person going out of the door at one end. Neither of them saw the package leave the car, or saw anybody take it. Mr. Heathcote explained about the disturbance in the car and his anxiety to protect his wife from harm, leading him to release the package in shielding her. The examination was adjourned until next Tuesday. Mr. Heathcote's stock and fixtures were sold at auction last Thursday, just before the hearing in his case, by John J. Hayden, the trustee. Six or eight bidders were present at the trustee's office, 258 Broadway. The property went to the highest bidder, Frank Walker, representing the Brooklyn Purchasing Syndicate, for \$1,247.

William F. Boettcher, manager of the jewelry store at 85 Myrtle Ave., Brooklyn, last week filed a petition in bankruptcy in the United States District Court in that borough for the purpose of obtaining a release from liabilities incurred upward of 15 years ago. At that time, finding himself unable to meet his obligations, he gave a chattel mortgage to his father, the late Fred Boettcher. A number of creditors took

You Know How San Francisco Looks To-day

as well as how it appeared just before the earthquake and fire, but have you seen a picture of San Francisco fifty-nine years ago—1847—the year that it first became known as “San Francisco,” when there were “some 500 inhabitants—450 probably Americans, and 300 of these Mormons”?

The right to reproduce the picture taken at that time was secured a few days before the earthquake, from the owner in San Francisco, and, together with other interesting material, appears in the June issue of *The Silver Standard*, which is now published.

Those of the trade who have not seen a copy will receive one upon writing the publishers.

MERIDEN BRITANNIA CO.

(International Silver Co., Successor)

MERIDEN, CONN.

Makers of

“1847 ROGERS BROS.” FLATWARE

New York Notes.

(Continued from page 57.)

gments against him. The business has been conducted under William F. Butcher's management, and he files the present petition in order to get the judgments off the record. The list of creditors included Sig Hirschberg, A. A. Webster, J. B. Bowden & Co., Arthur Selwin. The total of the liabilities was \$2,753.

Hochberger last week moved his office from 37 Maiden Lane to the Myers building, room 609, 47 Maiden Lane.

Willard H. Wheeler and Newton H. Rogers, of Hayden W. Wheeler & Co., sailed Saturday on the *Campania*.

Newton Leviason, the president of the S. Cottle Co., 31 E. 17th St., is now in New York looking over new designs in jewelry, and will return about June 15.

Damage caused May 23 by a small fire in the building occupied by F. L. Peixotto, 11 William St., has been repaired and work in his jewelry factory resumed this week.

The American Jewelry Co., Brooklyn, with an authorized capital stock of \$25,000, was incorporated last week. The directors are E. H. Pfeiffer, Albert Levy, H. O. Patterson, all of Brooklyn.

Dr. George F. Kunz, of Tiffany & Co., returned last week from a short vacation spent at his country home. Dr. Kunz has recently been appointed a member of the committee which is planning the Hudson-Fulton celebration, to take place in 1909.

Invitations have been issued for the marriage of Abe Brautman, of E. Brautman's, 697 Grand St., Brooklyn, and Miss Jessie Edelson, the ceremony to take place Monday next in Webster Hall, N. Y. After the wedding the young couple will leave on an extended trip.

M. Rosen, 386 W. 50th St., was summoned last week by the police of the W. 4th St. station on the charge of receiving stolen property. According to the police several colored persons who were implicated in the theft of a quantity of jewelry from Mrs. M. Armory, 230 W. 76th St., owned some articles with Mr. Rosen. The jeweler denies receiving any of the property.

A summons was obtained last Friday in the Essex Market Court for Locketz & Dunkel, 318 E. Houston St., accusing them of violating the New York gold law by selling a slide which did not assay to the degree of fineness required by the stamp. The complainant was J. Jacoves, of the Brooklyn Watch Chain Co., 275 Bowery. The case may be heard on Friday of this week.

All the stock in the branch store of the firm of Jaccard & King Jewelry Co., 400 Fifth Ave., has recently been shipped to the store in St. Louis under the direction of H. McCleary, who remained after the store was closed for this purpose. A report that the company will reopen a New York branch in another location farther north on Fifth Ave. has been heard in the trade, but not confirmed.

A sentence to Elmira Reformatory was imposed last Friday in the Court of General Sessions on John Renner, the 17-year-old youth employed on one of the United

States Express Co.'s delivery wagons, who pleaded guilty to the theft of a package containing a diamond necklace which was shipped to a firm in Jersey City. An attempt was made to pawn the necklace at L. Rothman's pawnshop at 36 Park Row, and the pawnbroker notified the police who arrested Renner.

In a decision by T. S. Sharretts, the Board of United States General Appraisers, New York, sustained, last week, a claim filed by Hawley, Green & Engel and others of New York, it being held that metal belts and ornaments are dutiable at the rate of 45 per cent. ad valorem under the provision in the Dingley tariff law for manufactures of metal. Most of the belts and ornaments were set with imitations of diamonds and other precious stones, and were enamelled. The finding of the Board is in harmony with recent rulings of the courts.

Bernard Steinfeld, 401 Sixth Ave., who sells on the road, reported to the police of New Haven Tuesday of last week that jewelry to the value of \$4,000 had been stolen from him. He said that he was on his way to the railroad station when a man jumped from among the cars in the railroad yards and seized his sample case. Mr. Steinfeld pursued the robber, he said, for some distance, but was unable to catch the thief. The missing jewelry includes 10 diamond rings, two diamond sunbursts, two locketts and four gold watches.

Amusement was caused last week on arrival at the South Brooklyn docks of the British steamship *Manchester Merchant*, whose officers and men brought quite a lot of supposed gems. It seems that when the ship touched at Colombo in Ceylon the coolies, who came aboard, offered for sale what appeared to be rubies and diamonds of much value, being large and brilliant. Somebody whispered to the sailors that the coolies were not aware of the value of the precious stones. Officers and men traded watches, money and other valuables for these supposed stones. Until the ship reached Brooklyn, as the story goes, the sailors believed that they had made their fortunes by investing in these articles. The supposed rubies and diamonds were made of glass and, it is said, had been shipped to Ceylon from the United States.

Shreve & Co., San Francisco, will soon open, according to report, a branch store in New York. It is further said that the company has already leased a store, which is now being remodeled in the Cambridge Hotel property, at Fifth Ave. and 33d St. No definite announcement has yet been made, but the report is generally credited in the trade. If the store in the Hotel Cambridge property is taken it is possible that the company will have besides the Fifth Ave. front an entrance on 33d St., which would be regarded as quite desirable, being opposite one of the entrances to the Waldorf-Astoria. There are two jewelry houses now in the Hotel Cambridge property, those of Thomas Kirkpatrick and William Reiman. The remodelling of the upper part of the building and of two of the stores is being completed by the holders of the lease, the Gorham Mfg. Co., as was announced in last week's issue. While three jewelers in a row is something unusual in New York at present, yet people in the trade say that this would be no objec-

tion. The head of a prominent jewelry house nearby expressed doubtless the feeling of others when he said to a CIRCULAR-WEEKLY reporter: "When a number of high-grade stores are brought together they are a benefit to one another. We all know what the Rue de la Paix is in Paris. The more jewelry concerns that establish themselves on Fifth Ave. the better it will be for all of us. The coming of Shreve & Co., if they have decided to open here, will be heartily welcomed by New York jewelers. A house of their standing could not fail to add strength to any section in which they should locate a branch."

Trans-Atlantic Voyagers.

TO EUROPE.

D. Atlas, of Atlas & Fisher, Philadelphia, Pa., will sail June 9.

C. F. G. Bene, Cincinnati, will sail June 7 on the *Grosser Kurfurst*.

Emil Lewy, of Lewy & Cohn, New York, sailed Saturday on the *Finland*.

Harris Michalson, of I. L. Michalson's Sons, Ltd., Montreal, Can., sailed recently.

A. and E. Ludwig, of A. Ludwig & Son, New York, sailed recently on the *Graf Waldersee*.

Carl H. Weidemann, of Borrelli and Vitelli, New York, sailed Saturday on the *New York*.

Clement Weaver, of the Bailey, Banks & Biddle Co., Philadelphia, sailed recently on the *St. Paul*.

D. A. Weinburg, of Siegel, Rothschild & Co., Baltimore, Md., will sail on the *Barbarossa*, June 16.

Willard H. Wheeler and Newton H. Rogers, of the Hayden W. Wheeler Co., sailed Saturday on the *Campania*.

Sailing to-morrow on *La Provence* will be Charles S. Isabel, of Edward Van Dam, and J. H. Vernon, both of New York.

Meyer Goodfriend, of Goodfriend Bros., New York, and his niece, Miss Cora Goodfriend, sailed last Wednesday on the *Oceanic*.

Sailing on the *Kaiser Wilhelm der Grosse* recently were: Zach A. Oppenheimer, Leopold Stern, of Stern Bros. & Co.; H. H. Jacobson, of Jacobson Bros., all of New York.

Sailing on the *Kaiser Wilhelm II.*, May 22, were: B. Hyman, of Hirsh & Hyman, New York; Herman Keck, of the Herman Keck Mfg. Co., Cincinnati, O.; E. Arnstein, of Arnstein Bros. & Co., New York; Jules Franklin, New York.

FROM EUROPE.

R. Reinhart, New York, returned recently on the *Kaiser Wilhelm II.*

I. Newton Levinson, of the S. Cottle Co., New York, will return about June 15.

Jacob Strauss, of Jacob Strauss & Sons, returned May 15 on the *Kaiser Wilhelm II.*

CHICAGO, WEDNESDAY, MAY 30, 1906.

No. 17.

Kansas City.

J. Norton, of the C. B. Norton Jewelry Co., is at present a member of the jury in the criminal court.

Anna Huth, of the office force of the Edwards & Sloane Jewelry Co., left last week for a short vacation trip.

E. Branche, a student at the Kansas City Polytechnic Institute, has resumed his studies, after a visit of several weeks in the country.

Charles Makepeace, a student at the Kansas City Polytechnic Institute, has just returned to work, after an absence of about a month.

T. Medley, Yellville, Ark., and E. A. Medley, Melbourne, Ark., have just arrived in this city, and taken up their studies with the Southwestern Optical College.

Paul Preston, who covers Southeast Kansas, Oklahoma and Indian Territory for the Edwards & Sloane Jewelry Co., is on a short vacation, and is paying a visit to relatives in Butler, Mo.

C. F. Allison, manager of the Eagle Jewelry Co., 215 E. 12th St., reported to the police that his store was robbed the other night of 15 gold watches and 30 rings and eight lockets. The burglar forced a rear window.

C. P. Kionka, of Kionka & Kionka, has notified his firm that, having finished his trip through Tennessee and Kentucky, he has gone direct to Wisconsin, and will offer his trade in that section before coming home.

Wm. L. Foutch, of the Southwestern Optical College, who lives in Gurdon, Ark., has returned to his work here, after having attended the organization meeting of the Arkansas association. He reports a very enthusiastic association as having been formed.

The following jewelers called on the local jobbers during the past week: D. P. Snelli, Frontenac, Kans.; H. W. Walter, Jarcke, Junction City, Kans.; S. J. Huey, Leclairs Springs, Mo.; J. H. Whiteside, Liberty, Mo.; Walter Sperling, Seneca, Kans.; S. H. Ledden, Sedan, Kans.

Dr. S. W. Lane, president of the Southwestern Optical College, writes that he has nearly completed his trip through the south and is the secretary of the American asso-

ciation on his organization work. He will be home the latter part of this week. In Oklahoma the doctor had the pleasure of seeing six graduates of his school selected among the officers of the local association.

Denver

A. L. Shelley, of the Geo. Bell Co., left for Arizona, last week. Mr. Shelley will visit the mineral mines of the territory and secure minerals for specimens and cutting purposes.

Thomas Heard, Los Angeles, Cal., manufacturer of the Heard Improved Suction eyeglasses, was in this city, last week, on his way home from a tour of the east and northwest. Mr. Heard was interested in the California Jewelry Co., San Francisco, and reports that he lost over \$40,000 in the recent disaster.

The police are looking for one C. Davis, who secured goods from jewelry and other firms of this city under false pretences. One of his victims was the Enterprise Jewelry Co. Davis told J. Solomon, proprietor of the concern, that he conducted a general merchandise store at 338 Colorado Ave., Colorado City, and represented that he was of good standing with a prominent dry goods firm and trunk factory here. On these statements Mr. Solomon gave him \$85 worth of diamonds on credit. The man then went to the firms whom he had used as recommendations and using Mr. Solomon's name secured \$1,000 or more of merchandise on credit. He defrauded other jewelers and merchants in the same way, leaving town with, it is thought, over \$5,000 worth of stock. It has been ascertained upon investigation that his statements concerning the store at Colorado City were true, but since his disappearance it has been closed. Davis was only a recent arrival in the town and nothing is known of him there. He is described as being about 40 years of age and suffering from asthma. Because of the latter affliction he is believed to be still in Colorado.

The Goldstein-Weisser Jewelry Co., Peoria, Ill., has dissolved.

The business of the late Lorena Baker, Martinsville, Ill., is now conducted by A. Low & Son.

Chicago Notes.

Announcement has been made by the South Bend Watch Co. that the management has decided not to have a half-holiday Saturdays this Summer at the factory, and there will be no Summer vacation, owing to the fact that the plant will have to run continuously with a full force.

John P. Byrne, secretary of Lyon & Healy, was given a silver loving cup, last week, by employees of the firm. The donors are: C. N. Post, J. F. Bowers, G. E. Griswold, C. R. Fuller, W. H. Leckie, C. F. Ippel, H. H. Jefferson, R. B. Gregory, P. J. Healy, A. J. Keefe, T. F. Mullaney, T. F. Delaney.

Herman F. Hahn, head of the firm of H. F. Hahn & Co., was recently elected president of the United Hebrew Charities of this city. Mr. Hahn, who has been a resident of Chicago since 1873 has been vice-president and president of the Michael Reese Hospital, and is a member of the Standard, Jewelers and Iroquois Clubs.

Albert Schuprum, said to be a salesman for a New York jewelry house, who is charged with beating Mrs. A. Asquith, 1363 Sheffield Ave., a week ago, was arraigned before Justice Mahoney at the Sheffield Ave. Police Court. Schuprum told the Court that he was intoxicated at the time he struck the woman and declared that he would take the pledge if the Court would allow him a continuance.

It was announced last week that Mrs. Timothy B. Blackstone, widow of the former president of the Chicago and Alton Railroad, has sold to Otto Young for \$500,000 the family homestead at Michigan Ave. and Hubbard Court. Mrs. Blackstone parted with the place on the stipulation that Mr. Young would tear the building down as soon as she left, allowing no one else to occupy it. It will be razed, accordingly, early next Spring. Mr. Young securing possession on Jan. 1. The lot upon which the house stands has a frontage of 80 feet and a depth of 172 feet.

Julius Kahn, former president of the now defunct Cash Buyers' Union First National Co-operative Society, was arraigned last Wednesday before Judge S. H. Bethea in the United States District Court, charged in three counts of an indictment with op-

To the Jobbing Trade.

Judge the question for yourself. Does it pay you to mount your own diamonds when we sell them already set and charge the regular prices for the mountings, and the importer's price for the diamonds, selling them by weight?

See and compare. That's all we ask, and have no fear of the result.

erating three separate schemes to defraud the public by the use of the mails in soliciting the sale of stocks through that agency. Kahn was in court and was represented by Attorney William S. Forrest. Attorney Forrest pleaded for two weeks in which to decide what action he would take in controverting the indictments. Judge Landis said he must plead, demur or move to quash at once. Attorney Forrest then demurred to the indictment.

Anton Nordla, claiming to be a watchmaker, residing on State St., Chicago, was found ill in the yard, at Elgin, Friday afternoon. Nordla was conveyed to the prison station, where a physician was called to attend him. He probably will be sent to Chicago if he recovers.

J. P. Byrne, the president of the Chicago Jewelers Association was recently elected president of the National Association of Piano Dealers of America at the convention of that organization at Washington, D. C. The association selected Chicago as the place of meeting next year.

Miss Zelda Ermine Stewart, of this city, co-operating with the Chicago Women's Club, in making a report on woman and industry, showing existing conditions of factory women in Illinois, states that conditions of women employed at the watch factories of Illinois are the best she has experienced anywhere.

Omaha.

L. C. Pedersen, Walnut, Ia., has sold his jewelry interests to C. A. Elder.

C. H. Jansen, with the Shook Mfg. Co., has just returned from a trip through Colorado.

Fred Brodegaard & Co. will supply 14 gold emblem pins to the Ladies' Danish Society.

The wife of W. H. Valhowe, watchmaker with Shook Mfg. Co., has gone to Cleveland, O., on a visit.

Albert Edholm has gone out on the Lander, Wyo., extension of the Northwestern Railroad in search of new trout streams.

J. C. Mitchell has purchased the jewelry store of Harry Engels, Red Cloud, Nebr., while Mr. Engels has bought the store of J. H. Le Roy, Fairbury, Nebr.

News was received here recently that J. F. Ingalls, Long Pine, Nebr., shot himself in the abdomen May 23 and died a few hours afterward. The deceased was unmarried.

Out-of-town buyers in this city last week included: K. C. Koons, Beatrice; D. Davis, Falls City; Fred Gardner, Lincoln; J. W. Crabill, Plattsmouth, and C. E. Smith, Kingsley.

F. Willman, a pioneer jeweler of St. Paul, Minn., who recently closed out his business, spent several days in Omaha last week, while en route to the coast on a pleasure trip.

George W. Ryan, of the firm of Mahoney & Ryan Co., accompanied by his wife, has returned home from a two month trip spent in Europe. They visited France, Germany, Holland and England. Mr. Ryan purchased extensively while abroad.

C. G. & L. L. Otwell, Laurel, Del., have been succeeded by C. G. Otwell, who will continue the business alone.

Cincinnati.

John A. Herchede, of the Herchede Hall Clock Co., is home again from his eastern trip.

Louis F. E. Hummel, 9 Emery Arcade, is enjoying a 10 days' rest at West Baden, Ind.

E. J. Fox, of Lindenberg & Fox, and family have gone to their Summer cottage at Tower Hill.

John C. Daller, Sr., manager of the Clemens Oskamp Co., is making a business trip through Ohio.

Clifford Husman, formerly with Lindenberg, Strauss & Co., has taken a position with Joseph Mehmert.

L. M. Levy, secretary of the Philadelphia Watch Case Co., at Riverside, N. J., was a visitor here last week.

B. Ganz, of the Gustave Fox Co., is making a special trip through Illinois, Indiana, Michigan and Ohio.

J. D. Fuhr, a clerk in Schwartz's pawnshop on Central Ave., died suddenly in the store, last week, of heart disease.

Hess Henle, of A. G. Schwab & Bro., left last week for a two weeks' pleasure tour of New York, Boston and Atlantic City.

I. N. Fox, of Fox Bros. & Co., has returned from Europe, where he visited the diamond markets. Sol Fox, of this firm, returns in June.

Joseph Noterman, of Joseph Noterman & Co., and E. H. Croninger, with their wives, are attending the Knights Templar Conclave at Paris, Ky.

C. J. Bene, formerly of the firm of Beue, Lindenberg & Co., will leave Cincinnati, June 1, for New York, from which city he will sail for Europe June 7.

Bitterman Bros., Evansville, Ind., have purchased new fixtures in this city for their new store, which is reported to be one of the finest in that section of Indiana.

Out-of-town buyers who replenished their stock here, last week, included Frank Emmerling, Hillsboro, O.; J. N. Embrey, North Lewisburg, O.; J. C. Fischer, Flemingsburg, Ky.; E. B. Scott, Batavia, O.

The glass front in the store of A. C. Ackman, at 9th and Pike Sts., Covington, Ky., was broken by thieves the past week. No goods were stolen, as the thieves were frightened away before they could get anything.

Joseph Becker, for some years connected with the Cincinnati branch of the Philadelphia Watch Case Co. and well known here, has retired from business and gone to Fayetteville, Mo. John Derwin, a former Cincinnati jeweler, is Mr. Becker's successor.

Floyd Nester, Boonville, Ind., who was recently married to Miss Mary E. Metsker, of Noblesville, Ind., came to this city in the course of their honeymoon and visited Cincinnati friends. Fred. Heinzle and wife, of Fell City, Ind., were also here in company with the bride and groom.

A few days ago Jacob Reinstatler, jeweler at Clark and Baymiller Sts., and his little daughter Olga, while seated in the front of their home, were bitten by an infuriated bull dog, which, with its owner, was passing by. The dog first attacked the child and would not release her until it was beaten almost into insensibility by its

owner. While Mr. Reinstatler was taking the name and address of the man the dog bit him on the hand and then turned on his master, biting the latter severely. Officers were called and they attempted to take the dog away to shoot it. It then leaped to the throat of its master, but was immediately shot. The wounds of Mr. Reinstatler and his daughter were cauterized and both are reported as doing well.

St. Louis.

W. W. Purcey is the proprietor of a new jewelry store that has opened at 4304 Page Ave.

A. Hagen, formerly of 3160 Easton Ave., has moved further east, and is now located at 3540 Olive St.

A. H. Aylesworth, president of J. F. Dailey & Co., was here from Chicago several days last week.

Alvin L. Bauman, president of the L. Bauman Jewelry Co., has announced by cable his safe arrival in Paris.

A. C. Arnold, of Arnold & Co., Texarkana, Ark., was a visitor in St. Louis last week, combining business with a visit to his relatives here.

Jacob B. Pollack is the latest to open a new jewelry store in this city, his store being located at 6116 Easton Ave. Mr. Pollack is the son of Joseph Pollack, of 1133 N. 4th St.

Meyer Hurwitz has opened a new store in the Arcade at 503 Collinsville Ave., East St. Louis. His establishment is one of the largest on the east side. He is well known in St. Louis.

W. H. Wheeler, Palmyra, Ill.; Enno Dick, New Baden, Ill.; John Ketting and E. J. Baumann, Ste. Genevieve, Mo., were among the visiting jewelers in the local market last week.

Goodman King, president of the Mermod, Jaccard & King Jewelry Co., probably will sail from Cherbourg, June 9, after a visit abroad. Mr. King will remain several days in New York, and he is due to arrive in St. Louis about June 20.

F. J. Bross, one of the traveling representatives for the L. Bauman Jewelry Co., departs this week to enjoy his vacation, after a successful season. From St. Louis he goes to French Lick Springs, Ind., and thence to Lake Minnetonka, Minn.

A police report states that T. J. Klein, a salesman for the Sterling Silver Co., left his sample case, valued at \$35, in charge of a small boy, and that the case was stolen from the youth. The directory fails to give the name of the Sterling Silver Co.

The stockholders of the Brooks Jewelry & Optical Co., *Globe-Democrat* building, have elected the following officers and directors: Jas. J. Burke, president and treasurer; Paul E. Pautler, vice-president, and Arthur G. Sudheimer, secretary. Mr. Burke is 33 years old, and the others are each 21, making the average age of the directors only 25, the youngest average of any corporation in Missouri, with a capital of \$25,000.

Herman Mauch, president of the Retail Jewelers' Association of Missouri; Frederick W. Drost, and Martin Hacker, the St. Louis jewelers who attended the conclave of the Missouri Knights Templar at

Joplin, have returned with expressions of having had a most enjoyable time. C. S. Poole, Joplin, was a member of an important committee that rendered great assistance in entertaining the visitors, Charles A. Mauch, Marshall, Mo., a brother of the St. Louis jeweler, was also at the conclave.

Harry Smith, a negro burglar, who was caught, recently, in the act of robbing the jewelry store of William F. Mueller, at 1804 Olive St., was captured in Union Station after a long and exciting chase. When Smith was run down on his person were found two silver watches, three silver match safes, some silver knives and forks and a silver-backed hat brush, identified as having been stolen from the Mueller store. At the rear door of the place was a lot of silverware, two handsome toilet sets and other articles of the total value of \$200. A gold watch and chain with a diamond studded charm, a pair of gold-rimmed spectacles and some gold cuff buttons were found on Smith, and the police believe these articles were also stolen.

J. F. Dailey, manager of J. F. Dailey & Co., a time payment house, states that a warrant has been issued for the arrest of one of their outside representatives, Charles E. Pitcher, who is said to have decamped with diamonds and watches to the value of \$400. Pitcher left the Dailey establishment with the samples Saturday afternoon, May 12, and nothing has been heard from him since. At first it was thought that his disappearance might be the result of foul play, but investigation developed the fact that Pitcher had collected various sums which he did not turn into the office. Pitcher is described as being 5 feet 10 inches in height, having light hair and sometimes wearing a light mustache. He is thin and inclined to stoop, has a prominent nose and a receding chin. He has worked for various time-payment houses, including Loftis Bros. & Co., Chicago and St. Louis, and at one time was assistant manager of the branch here, the Walker-Edmund Co. and Jones & Dreyer, Chicago. He has been with the Dailey firm for several months.

Minneapolis and St. Paul.

W. F. Renich, of Kirchner & Renich, Minneapolis, is ill of typhoid pneumonia.

Charles Olson and wife, Minneapolis, left May 24 for a visit to Sweden. They will be gone about three months.

C. P. Greene, of the Minneapolis School of Watchmaking and Engraving, has returned from a short trip to Iowa.

The Jewelers Security Alliance has added the following members in Minneapolis: H. Birkenhauer & Co., Johantgen & Kohl, Reed-Bennett Co., E. E. Spaulding and W. G. Leber.

The R. G. Winter Jewelry Co., Minneapolis, closed its store Thursday to rearrange stocks for a sale, previous to moving to the new location at 608 Nicolett Ave. The company will be in the new quarters about Aug. 1.

G. B. Ellestad, Lanesboro, Minn., last week, was in the Twin Cities on his way to Fort Francis, Ont., on the international line between Minnesota and Ontario. It is necessary to go to Winnipeg in order to reach the city of Fort Francis by rail.

San Francisco.

TRADE CONDITIONS.

The San Francisco retailers who have re-established themselves in either temporary or permanent quarters in that city, report that trade conditions continue to show a slight improvement from day to day. So far sales of articles of utility, such as cutlery, spoons and hollow ware, are the largest. The demand for wedding rings is still unusually large and there is a growing demand for jewelry of various grades. Even the dealers in solid goods and in cut glass report that a certain demand is springing up. One prominent feature of the trade is a demand for souvenirs which have been through the fire. During the last few days jewelers are offering burned goods with considerable success. Both jobbers and retailers are doing considerable business in damaged souvenir spoons, which are meeting with a good sale from collectors and others. Souvenirs of this sort are retailing at from \$1 to \$2 apiece.

The W. K. Vanderslice Co. has located in a temporary office on Devisadero St., near Geary St.

Radke & Co., formerly at 118 Sutter St. and at 65 Geary St., are now doing business at 1813 Devisadero St.

Karl Eber & Co., retail jewelers, formerly at 206 Kearney St., opened last week with a line of jewelry, silverware, etc., on Castro St.

C. J. Auger, formerly at 303 Kearney St., has now taken a store at the corner of Van Ness Ave. and Market St., in the new retail district.

William Glindemann, formerly at 53d St., has secured quarters in the new Fillmore St. retail district. His new store is on Fillmore St., near McAllister St.

A. Sanders, formerly in business here, but who has been staying at San Luis Obispo since the fire, has returned to this city for the purpose of resuming business.

The James A. Sorensen Co., formerly at 103 6th St., has opened a store at 1255 Fulton St., and is also opening a branch store at the corner of 20th and Mission Sts.

It is definitely announced that Brittain & Co., formerly at 120 Geary St., but who since the fire have entered the hardware trade, will not reopen in the jewelry business.

Thomas Fairbrother, who, before the fire, was located at 609 Taylor St., has had his safe moved to Napa, Cal., where it will be opened. Mr. Fairbrother will probably remain at Napa for some time.

Julius A. Young, manufacturers' agent, now in the Globe Hotel, Broadway, Oakland, is having fixtures installed in his new quarters at 717 Market St. He expects to remove to San Francisco within a few days.

The Fleissner, Marshall Co., formerly in business at 14 Geary St., has taken temporary offices at Mr. Fleissner's residence on Vallejo St. As yet it has not been decided when or where the company will reopen its store.

A. Katz, 925 Broadway, Oakland, reported to the police a few days ago that he was robbed of a diamond ring by two soldiers who entered the store ostensibly to buy a ring, but who ran out with a ring when his back was turned.

J. R. Jenkel, formerly in business at 817 Market St., in the old Flood building, has completed arrangements for a temporary store on Van Ness Ave., between Sutter and Bush Sts. His new store will have a frontage of 22 feet and a depth of 55 feet.

The Emporium, San Francisco's largest

general store, has secured a location at the corner of Van Ness Ave. and Post St. A temporary building will be erected here as soon as possible, and the plans call for jewelry, cut glass and kindred departments.

The Owl Drug Co., which has a large department devoted to toilet articles and sundries, has arranged to open a store on Van Ness Ave., between California and Sacramento Sts. The store will have a frontage of 50 feet and a depth of 100 feet.

Mr. Warren, of the Elgin National Watch Co., came out from Chicago last week to assist Mr. Morse, manager of the company's San Francisco agency, in getting re-established. Temporary quarters have been taken at 525 13th St., Oakland, and a permanent location in San Francisco will be secured as soon as possible.

Henry Wolff, formerly located at 120 Sutter St., reports that his safe, when pulled out of the ruins, two weeks after the fire, was still red hot in places and that the wheels of the safe were so hot they burned tracks in the planks up which the safe was pulled. The contents of the safe were found to be in poor condition.

Hammersmith & Field have secured a good temporary location at the corner of Van Ness Ave. and Eddy St., where they have opened with a stock of jewelry and silverware. They are preparing to fit up the new store quite handsomely and to remain there until permanent quarters can be secured in the downtown district.

Nordman Bros. are requesting eastern manufacturers who did business with the house to furnish the concern with a statement, showing the amount of merchandise purchased since Jan. 1. This is done for the purpose of adjusting their insurance claim, as the fire destroyed all records. The firm is now located at 2505 Clay St.

William Allan Hargear has assumed the management of Shreve & Co.'s Oakland office, 1103½ Broadway. Shreve & Co. are now equipped with a fair amount of stock at their temporary store, 2429 Jackson St., this city, and are going ahead rapidly with the preparations of refitting and reopening the former store at the corner of Post St. and Grant Ave.

The Nathan-Dohrman Co., wholesalers and retailers of tableware, hollow ware, cut glass, art goods and house furnishings, has secured temporary quarters on Van Ness Ave., between Pine and California Sts. The store will have an average width of 100 feet and an average depth of 120 feet. Besides the frontage on Van Ness Ave., the plans provide for a wing with a 25-foot frontage on California St.

A. I. Hall & Son, who are now partially located in San Francisco and partially in Oakland, report the arrival of 11 tons of clocks at the railroad yards, but owing to the congestion of the railroad business and the inability of the railroad company to secure sufficient help to effect a clearance, the clocks are still undelivered, although there is at present a great demand for this class of goods from all over the State. There is also a good demand for watches.

The store now occupied by William Wilson, on Broadway near 11th St., Oakland, has been leased with the remainder of the building to the United Cigar Stores Co. The latter company has demanded an increase in rent from \$135 to \$350 per month. It is

not yet known whether or not Mr. Wilson will pay the increase; in fact, it is reported that the store he now occupies will be converted into a restaurant. Mr. Wilson has been in business in Oakland for 40 years, and his is said to be the oldest mercantile business in the city.

Joseph H. Eames, a diamond setter, formerly located in the Thurlow Block, at 126 Kearney St., has been arrested on a charge of felony embezzlement preferred by F. De Ferrari & Co., formerly in the jewelry business at 217 Montgomery St. The management of the latter company claims that at the time of the fire Mr. Eames had in his possession eight diamonds valued at \$1,000 belonging to F. De Ferrari & Co. Mr. Eames claims that the diamonds had been lost out of the safe through a hole which was burned in it at the time of the fire.

Indianapolis.

Herman L. Rost, Columbus, Ind., spent last Sunday with his brother, Carl L. Rost and family, of this city.

The police have not succeeded in getting any clue which might lead to the identity of the man who recently passed a forged check at the Cullen Optical & Jewelry Co.'s store.

A gold bar worth \$180 and made of Indiana gold, mined in Morgan county at the placer mine of the Gold Creek Mining Co., was on exhibition in this city recently. The gold was 22 karat.

J. H. Reed has returned from a six weeks' visit along the Pacific coast. He spent several days in San Francisco, where he succeeded in getting many fine photographs of the earthquake ruins.

Out-of-town jewelers who visited the local jobbers and manufacturers last week, included: Aaron Pursel, Noblesville; Mr. Barnes, of Barnes & Foster, Spencer; H. Wheeler, Dana; J. A. Pickett, New Castle; C. E. Hodgen and Ross J. Haseltine, Kokomo; J. F. Harding, Brownsburg; H. A. Pauley, Bloomington; B. Maier, Edinburg; D. S. Whittaker, Lebanon, and Mr. Raber, of Clark & Raber, Anderson.

Pacific Coast Notes.

A. W. Susen, Monterey, Mex., has gone to Dallas on a short business trip.

Thomas H. Ryland, New York, called on the jewelers in Santa Fe, N. Mex., last week.

T. R. Jones, Phoenix, Ariz., will leave June 1 for Southern California, where he may locate.

D. S. Binford, Whittier, Cal., attended the monthly meeting of the Southern California Optical Society, in Los Angeles, last week.

E. R. Hubbard, Lompoc, Cal., is making improvements in his store. He now occupies the entire front of the building and has added a line of silverware.

A. E. Springberg, Redlands, Cal., is making extensive additions to his jewelry store in the way of furniture. A solid oak cut glass room is being placed in the rear of the show room, where a large stock of cut glass, hand-painted china and Tiffany glass will be displayed. The room will be lined with plate glass mirrors on two sides and brilliantly lighted with electric lights.

UNITED STATES PATENTS.

ISSUE OF MAY 22, 1906.

20,963. BRACELET. FREDERICK FETTING, Providence, R. I., assignor to the Potter & Buffinton Co. Filed Jan. 5, 1906. Serial No. 294,725.

In a bracelet, two hollow wings, in combination with a tube having a projecting head fixed in one

ing and slotted, of a reinforcing-strip having a projecting upper portion and a lower portion of less breadth than the outer diameter of the tube closely mounted in the tube, and a pivot-pin fixed in the other hollow wing and traversing the head of the tube and the upper end of the reinforcing strip.

20,998. TELESCOPIC SIGHT FOR FIRE-ARMS. AMBROSE SWASEY, Cleveland, O., assignor to the Warner & Swasey Co., Cleveland, O. Filed Oct. 10, 1905. Serial No. 282,096.

The combination of a supporting member arranged to be secured to a firearm, a sight device rotatably mounted on the supporting member, a socket portion on the supporting member having a screw-threaded bore, a screw operating in said

re and engaging the sight device by one extremity, the screw having an annular slot adjacent its end, and an arm secured to the sight device and engaging the screw at said slotted portion.

21,124. PERCOLATOR. GEORGE E. SAVAGE, Meriden, Conn., assignor to Manning, Bowman & Co., Meriden, Conn. Filed Aug. 31, 1905. Serial No. 276,524.

In a percolator, a fluid-holding body having an in-

gral bottom portion forming a relatively small heating-chamber at the base, a cover member form-

ing the top of the heating-chamber, a percolator-tube connected to the cover, said cover having an inlet discharging close to the bottom for the passage of fluid from the body to the heating-chamber, and a base with a ring formed separately from the bottom of the heating-chamber and laterally surrounding and secured in intimate contact with the outer side walls, of the heating-chamber and extended horizontally beyond the bottom of the heating-chamber to form an extended base for the percolator and vertically spaced apart from the body of the percolator.

821,125. PERCOLATOR. GEORGE E. SAVAGE and JAMES W. CHAPMAN, Meriden, Conn., assignors to Manning, Bowman & Co., Meriden, Conn. Filed Aug. 31, 1905. Serial No. 276,525.

In a percolator, a liquid-reservoir, a receptacle for holding the grounds, a heating-chamber having

lateral walls exposed to the flame, a cap having an inlet and an outlet, and a base-flange secured at the top of and extending laterally of said chamber.

821,140. SELF-WINDING ELECTRIC CLOCK. BERNHARD TROPP, New York, assignor to William Henry Laird, New York. Filed July 16, 1904. Serial No. 216,817.

The combination substantially as described of a driving power, a driven mechanism, an electric motor, winding mechanism interposed between the same and the driving power, a primary circuit-closer, comprising a stationary contact member and a co-operating contact member carried by a wheel of the driven mechanism for periodically

but momentarily closing the circuit of the motor at one point, and a secondary independently-operating circuit-closer comprising a fixed contact member and a co-operating contact member carried by a wheel connected with the winding mechanism.

821,141. LENS-FINDER FOR CLINICAL THERMOMETERS. WALDEMAR UDE, St. Louis, Mo., assignor to Johnson & Johnson, New Brunswick, N. J. Filed Dec. 18, 1905. Serial No. 292,246.

The combination with the tube of a thermometer,

of a lens-finder, comprising an opaque member inclosing a portion of the tube of the thermometer

and having an open space for the lens, and having a portion of its sides at a distance from the thermometer-tube to form means for manual engagement.

821,146. ADVERTISING APPARATUS. FREDERICK J. WALTON and LONGINUS V. ROGERS, Finchley, England. Filed June 23, 1905. Serial No. 266,620.

In advertising apparatus, the combination with a framework having display-orifices of advertisement-carrying boards, of a chain connection between said boards, pulleys over which such chain con-

nection runs, a centrally-journalled clockwork-operated lever, a connecting-rod pivoted at one end to one of the advertisement-carrying boards and at the other end to one end of the centrally-journalled clockwork-operated lever, and means for retarding and releasing said lever at predetermined intervals.

821,320. FOLDING BRUSH. MELBURN H. TUPPER, Buda, Cal. Filed June 7, 1905. Serial No. 264,048.

In a device of the class described the combination with a substantially box-shaped body having the sides formed of a double thickness with an interior hollow portion, of the cross-pieces extend-

ing into slots formed in the inner portion of said side pieces, bars adapted to slide in between the walls of said hollow sides and support the ends of the pivoted rods, vertically-slotted resiliently-held bars fitting in the hollow portion in the side walls and adapted to coact with the slotted walls to removably retain the pivoted rods in position.

821,396. JEWEL-PIN AND PALLET-STONE SETTER. OLE O. AUNE, Waltham, Mass. Filed June 3, 1905. Serial No. 263,546.

A tool comprising grippers for holding a jewel-pin, means for holding a balance in assembling

relation to the pin, and a heat-conducting shield in close proximity thereto adapted to receive heat from a flame and to prevent the flame coming into contact with the jewel or any part of the balance.

821,406. ALCOHOL-BURNER. JOHN H. ERNST, New York, assignor to Silver & Co., Brooklyn, N. Y. Filed July 15, 1905. Serial No. 269,815.

In an alcohol-burner, the combination with a supporting-tripod of a burner-bowl consisting of two pieces united by a circumferential bead by which the burner is supported in its tripod, the uppermost piece having a flame-orifice, a circumferential bead about its upper edge and a circumferential series of air-admitting holes separated from

each other by interspaces of greater width than the individual holes and located between the two circumferential beads, means for preventing the burner from rotating in the tripod, a band located between and confined in place by said beads and

provided with air-holes and interspaces corresponding with said air-holes and interspaces in the upper portion of the bowl, and a handle to which the ends of said band are secured.

821,445. COFFEE PERCOLATOR. ALONZO A. WARNER, New Britain, Conn., assignor to Landers, Frary & Clark, New Britain, Conn. Filed Dec. 22, 1905. Serial No. 292,942.

A coffee-percolator comprising a vessel, a pumping-tube and means for forcing the fluid up through the tube when the vessel is properly

heated, with a cup at the upper part of the said tube and vessel and a retainer for the said cup, the said cup having a suitable strainer for its lower part, an internal retainer-seat and outlets for its upper part, and the said retainer having a screen and a flanged rim fitted to the said cup for forming an annular overflow-space between the said cup and retainer.

821,515. PUNCH-BOWL. JOSEPH SIMMS, Detroit, Mich. Filed June 22, 1905. Serial No. 266,502.

A dispensing-receptacle for beverages compris-

ing the bowl proper in combination with a detachable base-support formed with projecting means at its base, and a detachable annular tray supported on its lower face by said projecting means, substantially as described.

821,517. BADGE. NELSON STAFFORD, Brooklyn, N. Y., assignor to the N. Stafford Co., New York. Filed Jan. 16, 1905. Serial No. 241,178.

A badge, name or designation plate, comprising a recessed base-plate, a frame-plate fitting and received in the base plate, a name-plate received

into the frame-plate and fastening devices connecting the frame-plate and base-plate, concealed by the name-plate, and other devices for connecting the base-plate to an article for support.

DESIGNS.

38,017. BADGE. DALLETH Z. MERCHANT, Portsmouth, Va. Filed March 23, 1906. Serial No. 307,726. Term of patent $3\frac{1}{2}$ years.

38,018. HANDLE FOR SPOONS, FORKS OR SIMILAR ARTICLES. JOHN CLULEE, Wallingford, Conn., assignor to the International

Silver Co., Meriden, Conn. Filed April 9, 1906. Serial No. 310,882. Term of patent 7 years.

38,019. HANDLE FOR SPOONS, FORKS OR SIMILAR ARTICLES. JOHN CLULEE, Wallingford, Conn., assignor to the International

Silver Co., Meriden, Conn. Filed April 9, 1906. Serial No. 310,883. Term of patent 7 years.

38,020. HANDLE FOR SPOONS, FORKS OR SIMILAR ARTICLES. WILLIAM C. COMMAN, Providence, R. I., assignor to the Gor-

ham Mfg. Co., Providence, R. I. Filed April 12, 1906. Serial No. 311,398. Term of patent 14 years.

38,021. BACK FOR BRUSHES, MIRRORS OR

SIMILAR ARTICLES. SIDNEY A. KELLER, New York, assignor to the William H. Saart

Co. Filed April 7, 1906. Serial No. 310,332. Term of patent $3\frac{1}{2}$ years.

38,022. CLOCK-FRAME. STANLEY M. LAWSON

Cincinnati, O. Filed April 4, 1906. Serial No. 309,945. Term of patent $3\frac{1}{2}$ years.

UNITED STATES TRADE-MARKS.

[The following trade-marks have been adjudged entitled to registration under the Act of Feb. 20, 1905, and are published by the Patent Office in compliance with Sec. 6, of said act, which provides "Any person who believes he would be damaged by the registration of a mark may oppose the same by filing notice of opposition, stating the ground therefor, in the Patent Office, within 30 days after the publication of the mark sought to be registered, which said notice of opposition shall be verified by the person filing the same before one of the officers mentioned in Sec. 2, of this act. If no notice of opposition is filed within said time the Commissioner shall issue a certificate of registration therefor, as hereinafter provided for."]

BRITISH PATENTS.

(ABRIDGMENTS OF SPECIFICATIONS 1905, FROM THE Illustrated Official Journal.)

ISSUE OF MAY 9, 1906

152. VEIL FASTENINGS. A. B. PLUMMER, 17 New St., Leicester, Jan. 10.

A clip for veils consists of two triangular metal frames formed with two of their sides coincident, the frames turning about this side as an axis. In Fig. 1, the frames 2 have two sides in common provided with lugs 3 and bearing a pivot pin 4.

A spring, consisting of a coil of wire, is formed upon the pivot pin, the ends of which are connected to the thumb-pieces 6 which form part of the frames. In use, the frames are opened by pressing the thumb-pieces together, and the veil is passed through the lower frame.

704. MATCH BOXES, ETC. D. INNES, 65 Great Tower St., London, E. C. Jan. 13.

Match-boxes and cigar and cigarette cases are made so that the contents are raised to facilitate removal when the lids are opened. The platform

h, Figs. 2 and 4, on which the matches rest, is provided with a back and guides moving in contact with the pocket e, and is raised by the spring k, after the lid has been opened by pressing the button g. When the lid is closed, the spur l depresses the platform. The platform may be provided with clips to hold coins. Reference is made to Specifications No. 3742, A.D. 1874, and Nos. 18,961 and 23,427, A.D. 1893.

708. LENSES. S. D. CHALMERS, Northampton Institute, Clerkenwell, London, E. C. Jan. 13.

The invention relates to improvements in Fresnel's dioptric lenses as used for lighthouses. The

reflecting-surface A B of the prism is made flat instead of curved, the necessary curvature being given to either one or both of the refracting surfaces, A C, B C.

Complete specifications accepted May 2, 1906.

20,069. BROOCH-FASTENING. GOODE, GOODE & SARJEANT.

20,504. LENS. CHURCHILL.

26,798. CHECK CLOCK. VOGELMANN.

Precious Stones in Madagascar.

CONSUL HUNT reports from Tamatave that the probability of the existence of many rich deposits of precious stones in Madagascar has caused the government of the colony to employ an expert geologist to make a report on the situation there. He has already commenced operations in the district between Ambatolampy and Antsirabe, where he has discovered zircons, garnets, sapphires, beryls of various hues, and tourmalines.

Mr. Hunt will make an analysis of these specimens and render a report with regard to their commercial value.

Hitchcock & Gohl, Springfield, Mass., were among the plaintiffs who recently preferred charges against Chas. G. Bruffee, who was arraigned about a week ago in the criminal sitting of the Superior Court. From the opticians, Bruffee is alleged to have stolen five pairs of opera glasses valued at \$10 each, and two telescopes valued at \$4 each. Bruffee, in his defense, pleaded an alibi.

WALTHAM WATCHES

We beg to announce the issuing of the following described 16 size movements:

THE HOROLOGICAL REVIEW.

The Making of Clock Cords.

Translated expressly for THE JEWELERS' CIRCULAR
WEEKLY from the *Revue Internationale
de l'Horlogerie.*

IN treating of parachutes we called attention to the importance of clock cords and to the serious consequences that their breakage may entail; it now seems inter-

fitted with a certain number of bobbins—as many as the strand is to have wires. These wires unwind themselves simultaneously, and when all have reached a certain point they twist themselves up into a spiral shape, the progress of this operation being regulated as desired.

Fig. 1 shows a simple machine of this character with 12 bobbins, each one of

tandem. It is composed of four parts arranged, respectively, for six, 12, 18 and 24 bobbins, that is to say, a total of 61 bobbins, counting the hemp core advancing through the central tube, which passes from one end to the other of the machine.

The tandem machine is adapted for the making of strands of a variable number of wires, thus, in using only the six bobbins at the left of that which is seen in Fig. 3 one can make a strand of seven wires, the seventh wire of which serves as core coming out of the single bobbin that one sees on the left of the illustration. In using the 12 bobbins of the second section one can make strands of 13 wires. The third section gives strands of 19 wires, and the fourth, strands of 25 wires. By coupling one section with another or two others, one obtains strands of other arrangements.

The machine shown in Fig. 4 is more complicated. It is the reunion of the two modes of manufacture, hence its name, the compound machine. It carries 42 bobbins of metallic wire, and produces at the finish a cable composed of six strands, of seven wires. This is the type of clock cables of which we are treating in this article.

The six bobbins at the left are provided

FIG. 1.

sting to say something of their fabrication and their composition.

The diameters used in metallic cords for use in tower clocks are limited between one millimeter and a half and eight millimeters. The cords may be of iron or of steel; the iron cords present greater resistance to breakage, particularly in the large sizes.

Let us call attention to the fact that a clock cord is submitted to other causes of deterioration than the carrying of the weight. Among the principal of these causes is that of the successive shocks which the cord receives and which do not occur by continuous movement, but by jolts, at the moments when the clocks strike and when the running of the clock causes the cable to unwind.

Although in principle the manufacture of these cables does not appear to show any mechanical difficulty, nevertheless special machines of large proportions are required. Illustrated herewith are some types of these machines from drawings which have been kindly sent us by Thos. Barraclough, of London, Eng., a specialist in this line. The cord, properly speaking, is composed of a number of strands with a central core of hemp. Their manufacture consists of two distinct operations: the setting up of the strands and the joining of these strands with the core in a cable.

A machine for making the strands is

which can take more than 60 kilos of metallic wire, representing in one piece a strand of 720 kilos in weight. Fig. 2 shows a ma-

FIG. 2.

chine for cabling eight strands of the preceding machine. Each of the bobbins can take 1,000 kilos of the stranding wire. Fig. 3 represents a stranding machine set up

with the six wires destined to form the center of the six strands. The 36 following bobbins, divided into two groups in the illustration, represent the six series of six

*Time
O my friend
is money!*

—BULWER-LYTTON.

And in this money making age there is an enormous and increasing demand for accurate timekeepers. This means that time is money for the dealer who carries a stock of

ELGIN Watches

See Jobbers' list for prices or write the Company.

Every dealer is invited to send for the Elgin Art Booklet, "Timemakers and Timekeepers," illustrating the history and development of the watch.

NEW YORK OFFICE, 11 John Street.
SAN FRANCISCO OFFICE, 206 Kearny St.

wires which are to twist themselves around the six central wires. The core of the cord comes from the left, passing as usual through the central tube which runs from one end to the other of the machine. This machine is highly interesting, for all its movements and its arrangements are combined in such a way as to obtain absolute precision. In each strand the enwrapping may be more or less tightly twisted, as desired, the angle under which the wires present themselves to the direction of the central wire being subject to modification. Before proceeding to twist itself around the central core of the cable, each strand goes through a sort of spinning chamber, or rope walk, which secures its perfect regularity. A roller guide conducts it afterward to the several terminal spinning chambers, which surround the core.

These spinning chambers are so arranged that the adjustable pressure by means of

The bobbins are of two meters in diameter and each one of them may be loaded with 8,000 kilos of wire. This permits the manufacture, in one piece, of a cord of 48,000 kilos. Taking, in conclusion, an example relating to clock work, we must note that a cord of five millimeters in diameter is a very current type, weighing about 65 grammes to the meter and composed of 42 divisions.

Let us suppose that a cable was manufactured by the capacity of these machines of only the limited diameter of eight millimeters. Every bobbin can hold 25 kilos of wire, which would be a total weight of 1,050 kilos, which would represent a length of 16,000 meters in one piece and without a splice. With these colossal figures we are indeed far from those small pieces, so fine and delicate that one asks oneself what fairy fingers could have fashioned them, and which hold the record for smallness at

Some Experiments Recently Made With a Seconds Pendulum.

(A paper read to members of the Municipal School of Technology by T. D. WRIGHT.)

THE subject of this paper was suggested by a long series of experiments with a regulator made in our own workshop for the purpose of testing the value of Dr. Guillaume's nickel steel alloy for the rods of compensation pendulums.

The alloy is commercially known as "Invar," suggesting invariability. I am sorry to admit that my specimen has not justified its claim to the title. I commenced the experiments with quite an earnest confidence that a material had been discovered which would be invaluable to the clockmaker, but have been disappointed.

As I have only experimented with one rod the results must not be taken as conclusive, the more so as in the course of

FIG. 3.

prings permits the production of cables of various diameters. They are also movable in the horizontal direction, that they may give to the cable the suitable twist. After having made several turns on a moving drum of about 1.50 meters in diameter, the completed cable passes between two compressing rollers, which fix the necessary tension. It then proceeds to twist itself on bobbins or reels which serve as its vehicle toward the demand.

The movements of the various parts of the machine are harmonized in such a way that each bobbin turns in the proper direction. Its working can also be reversed in order that the twisting of the wires of the strands, and on the other hand, that of the strands around the cable, may be made in the right direction (that is to say, in the contrary direction, one to the other), or in the same direction of both.

The machines for making metallic cables are very extensive, as may be seen by the few figures given relating to the weight of wire for the bobbins. We complete these figures by giving some others.

The central tube of the compound machine, which we have been discussing, measures no less than 5.50 meters in length. It may be adjusted to produce strands having as many as 19 wires each. The machines of the style seen in Fig. 2 will serve to make a cable with strands which reach even greater dimensions. It is true that cables are made there which are very different from those which are intended for the use of clocks. The most powerful model with six bobbins, occupies a space of 14 meters by 6, without counting the place reserved for the storing reels which one sees on the right.*

*This space requirement is far surpassed by the largest of the strand machines, which measures 22 meters in length. As regards the tandem machine, length space requirement is 37½ meters by more than three meters in width.

the other end for the clock-making industry. But is it not the prerogative of this marvelous branch of mechanical art to lead us on from surprise to surprise?

Another Historical Clock.

IN the possession of August E. Weinert, 3607 Graceland Ave., Indianapolis, Ind., is a bronze clock, gilded, to which is attached a history. The clock was made in France and is a beautiful piece of art work. It stands upon a bronze base four and a half inches high, and beside the clock on the same base is a full length figure of George Washington, in regimental attire, one arm resting upon the clock. In one hand he holds a scroll; the other hand is

the experiments it was found that other factors than the temperature error affected the rate. I wish particularly to draw your attention to the influence of the isochronism of the vibrations of different dimensions of the pendulum spring, and to the effect of change of temperature on the arc of vibration.

You are all probably aware of the general principle of compensation pendulums. When the temperature is raised, the rod, if made of any ordinary material, lengthens, carrying the rating nut away from the suspension; on the rating nut, in this type of pendulum, is supported a tube of some material having a greater expansion than the rod for the same change of temperature; on the top of this tube rests the

FIG. 4.

at his side resting upon a sword. This figure, of solid bronze, is 10 inches high.

Surmounting the clock is a bronze eagle with spread wings. Below the clock is the inscription, "First in War, First in Peace, First in the Hearts of His Countrymen." Across the front of the base in bas-relief is a symbolic scene representing Washington returning to the pursuits of peace.

The tradition that goes with this piece of French art is that the clock was presented to Washington; that afterward it came into the possession of some member of the family of Henry Clay, and later, after the Civil War, was sold.

bob, supported at, or near, its center of gravity. The expansion and contraction of the bob so supported has little or no effect on the time length, and if the relative lengths of the rod and compensating tube are inversely as their respective coefficients of expansion, the time length of the pendulum, i.e., the distance between its centers of oscillation and suspension, will remain constant in all temperatures. If, for instance, ordinary steel expands 12 times as much as nickel steel, we must employ one inch of steel tube for every foot of nickel steel in the whole rod.

My pendulum has a round "Invar" rod

Over 3,000 different effects are now being presented to the jobbers in the NEW FALL LINE OF ATTRACTIVE PATTERNS. The best and most comprehensive line ever displayed anywhere.

Let us be Partners

We are advertising the New England Watch to one third of the population of the United States. Next Fall this advertising is going to create a public awakening; is going to cumulatively force business for the Fall and Christmas season, and now, Mr. Jeweler, we want you for a full partner.

Thousands of convinced people are already writing us asking where they can buy the New England Watches. We don't sell to consumers and so we want you to make these sales. We want to refer these inquiries to you, and you get the profits—you make just so many new customers.

We are in earnest about this partnership plan. Your interests are our interests and we are going to work with you and for you. We are sending out men to find out just how we can help the jewelers. We are going to carry out an extensive plan of co-operation with you.

How can we assist you? What can we do to make our partnership more profitable? Write us your suggestions and get the details of our plan.

The New England Watch occupies a field all its own, Mr. Jeweler. It is built distinctly for the general public and advertising is going to make—is making—it the favorite watch of the Great American People.

A letter asking us for our plans will be a letter written in the interest of increased business. Better write it NOW.

Special Offer To the Jewelry Trade

Commencing May 1, 1906, we withdrew from our price lists enameled watches heretofore shown in lists and catalogues under series "S" (ELF) styles. To clear our stock of enamels in the 10 ligne series "S" (ELF) watches, we offer a rearrangement of this style by substituting our new 4-jewel "SS" movement in place of the 12-jewel "S" movement previously used in this watch. This new movement is a superior time-keeper, and it is fully guaranteed. We have a limited stock of the following colors, but guarantee no patterns:

Red, Blue, Green, Electric Blue, Mauve, Turquoise, Pearl, Violet, Black, Miscellaneous.

These cases and colorings are the same as formerly, and all with swivel pendants.

We reduce prices as follows:

Series SS (ELF) Enamel Watches, each, \$7.00.

Series SS (ELF) Enamel Watch, with Fleur-de-lis Brooch, enameled, and box, \$8.00.

No quantity guaranteed, but will be sold at these prices until stock is exhausted.

Can be obtained at Factory, Offices or Distributing Agents.

The Cowboy

The very latest in a strong, finely finished watch.

Open face, nickel silver, screw case. Stem wind and set. Six-jeweled movement.

Flat parallel crystals; 10-karat gold filled crystal ring, and gold filled crown.

In every way a desirable time-piece, durable and stylish.

Address DEPARTMENT OF PUBLICITY,

NEW ENGLAND WATCH CO.,

WATERBURY, CONN.

mm. in diameter (about 5-16ths of an inch). The tube is of mild steel, with a bore large enough to pass freely over the rod, and an outside diameter of half an inch.

The bob is a pair of steel cylinders, each 1 in. long and 2 in. in diameter, connected by a short stout steel cross-bar firmly screwed into each, leaving a space of about three-quarters of an inch between the cylinders, so that there is no danger of the compensating tube touching either of them. The under side of the cross-bar, resting on top of the tube, is at about the center of gravity of the bob.

The weight of the bob is 14 lb 2 oz.

The weight of the whole pendulum is 15 lb 8 oz.

As it was desirable to have the rating nut below the bottom of the bob, our first suspension spring was made 1 in. long on top piece to collar; the collar on top of rod, in which the lower end of spring was fixed, was made of brass about 1 in. long. Estimating that it would need fully 1 in. of the mild steel tube to compensate the spring and collar, there remained 2 in. of rod upwards, if required, to compensate the nickel steel rod.

The spring was of tempered steel 1 in. long, 1/2 in. wide, and .011 in. thick. I expected to have the bob supported at its center of gravity because, so long as that point remained at a constant distance from the center of suspension, the two main factors affecting the rate of vibration—the driving moment of the bob about the suspension, and the moment of inertia of the bob (considered as a particle) about the same point—would remain constant. I recognized that any increase of temperature, by increasing the dimensions of the bob, must increase the moment of inertia of the bob about its own center of gravity, and that this would tend to make the rate slower in higher temperatures; and that the greater heat would also increase the driving moments, and the moments of inertia of the rod, the compensating tube and the rating nut.

Dr. Bryant had made a series of calculations to determine the true point of support, and later, W. N. Barber contributed an article to the *Horological Journal* (see February, March, April, 1905), dealing in an exhaustive manner with the subject. As will be seen by Mr. Barber's paper the subject is an exceedingly complex one, in which the exact value of all the factors involved cannot be accurately estimated. The difficulty is increased by the fact that we are never sure that two specimens of similar material will have precisely equal co-efficients of expansion.

I reasoned that in the first place the effect of these subsidiary moments was comparatively small, that it would only be necessary to have a slightly longer compensating tube to experimentally adjust the compensation for any two given temperatures and that the error, at intermediate temperatures would then be very small indeed. Anyway, if it should be significant, it would be possible to measure it.

The regular has a Graham escapement with jeweled pallets, and the escape wheel

and verge holes are jeweled. A first grade "Invar" rod was obtained from Agar Baugh, and the experiments were commenced in March, 1904. Mr. Baugh did not know the exact co-efficient of the rod, but thought it might safely be taken as less than .000001 per 1 deg. C. It had been through the annealing process considered necessary to "set" the alloy. If it should prove to have as large an expansion as the above the 4 1/2 in. of tube we started with would be insufficient, but we thought it would do, as we could remove the brass collar, if necessary, and substitute a nickel steel one, and could use a nickel steel spring if required. The case is a plain one made for experimental purposes, and although not really airtight it fits well, so that a light will not burn in it when the door is closed.

The lower end of rod was cut in a screw-cutting lathe with 50 threads to the inch, and the nut is divided into 60 equal parts, so that three divisions equal 1-1,000th of an inch. In rapidly obtaining an approximate regulation it is well to remember that one turn of the nut upwards has more effect than one turn downwards, and it is also convenient to know that, with a seconds pendulum, a difference in length of 1-1,000th of an inch produces, almost exactly, a difference in rate of 1 second per day.

The temperature experiments were commenced by placing spirit lamps in the case, but as the door had to be left open a little way to keep the lamps alight, the temperature was variable and air currents were set up disturbing the arc and causing irregularities. It was quite evident, however, that the clock was gaining in the higher temperatures. The natural changes of temperature in the room were too small to give us much information. During this time we varied the arc of vibration by using different weights, and observed the effects on the isochronism. With a weight of 8 lb. and an arc of 4.8 deg. the rate was nearly six seconds per day slower than with a light weight, and an arc of 3 deg. We removed the spring and substituted one 1 1/2 in. long and .005 in. thick. As Arthur Webb and Thomas Hewitt had clearly impressed upon me the value attached by the older makers to the isochronal hole in the pendulum spring, I made one in this, although I did not find that modern makers adopted it. The hole was nearly .25 in. diameter, and was to be opened oval upwards or downwards to quicken or retard the rate in the long arcs. When set going we found the long arcs now one second per day *faster* than the short ones.

At the time of the August Bank Holiday, as the room would be unoccupied for three days, I shut it up and heated it with an anthracite stove, maintaining a fairly even temperature from 80 deg. to 90 deg. for the whole time. During this time the clock went more than two seconds per day faster than at the normal temperature of about 70 deg. F., although I had shortened the tube to 4.2 in., so that the nut was only well free of bottom of bob. Did the "Invar" rod actually contract in higher temperatures?

A hot water circulator suggested by Mr. Morrison was now fitted. A long brass

tube 2 1/4 in. in diameter was fixed inside the case, reaching nearly to the bottom, and passing out through the top. Two unions were fitted to the tube, one a little below case top, the other nearly at the bottom. A sealed copper tank was fitted outside the clock below both unions. From the upper union a pipe passed into the top of the tank and terminated there, from the lower one a pipe passed into the tank terminating about an inch from the bottom. The cistern was heated by a Bunsen gas jet, and a constant temperature of about 90 deg. F. could be maintained for weeks.

The greatest variation did not exceed 1 deg., unless we allowed the water to evaporate below the level of the top joint, and thus stop the circulation. When the water tube reached 150 deg., the case was about 90 deg. The daily evaporation amounts to several inches, and we found it best to refill with hot water of about the same temperature as that of the tube, as there was less tendency to "spit." In first filling with cold water we were troubled a good deal by the spitting as the temperature rose and unless the top of case is watertight there may be trouble. It is also necessary to make ample allowance for the expansion of the water. On one occasion we filled the tube too full, and when the water got hot it ran over the top, found its way inside into the movement, so that we were compelled, there and then, to take it to pieces and clean it. We then soldered an elbow on the tube, carrying the outlet away from the case altogether, and had no further trouble of the kind. The additional tubing also allowed us a much larger margin for evaporation, so that it was only necessary to refill at intervals of three or four days.

About this time the pendulum, which had been lent for demonstration purposes at a conversazione at the Northampton Institute, had its spring buckled. A new one of the same dimensions was made, but as the top piece was rather small and slight, I made a new larger and stouter one. This embraced more of the spring, and the new acting dimensions were now .39 of an inch long, .62 wide, and .005 thick, with the similar hole in the center. As might have been expected this alteration made the long arcs still faster.

(To be continued.)

Horological Notes.

ONE of the most curious clocks in the world, says the *Engineer*, is said to be that which tells the time to the inhabitants of an American backwood town. The machinery, which includes nothing but a dial, hands and lever, is connected with a geyser, which shoots out an immense column of hot water every 38 seconds. This spouting never varies to the tenth of a second. Every time the water spouts up it strikes the lever and moves the hands forward 38 seconds.

An immense new clock sold by E. White, Rutland, Vt., was installed recently in the new town hall at Wallingford. The time-piece has four dials, each six feet in diameter, and a pendulum nine feet long. It will strike a bell weighing 2,500 pounds.

A new town clock, the gift of George H. Catlin, Scranton, Pa., has just been erected in Shoreham, Vt.

This illustration shows our main factory exactly as it exists, where 3,000 complete watches are made daily.

LANGENDORF WATCH CO.

CHAUX-DE-FONDS, SWITZERLAND.

It will be of great interest to every jeweler to learn that we are devoting our full attention to this market. The existing conditions in the watch trade have convinced us that there is a long felt want for moderate priced, but accurate Swiss Watches.

We wish to call your attention to our LONVILLE MOVEMENT. It has a lever escapement and is being made in Os, 12s and 16s, fitting perfectly all American cases. This movement is salable and profitable. Our Watches and Movements will be introduced in this market bearing the following names:

OPTICAL DEPARTMENT

Is the Time Ripe for a Recognized College of Optometry?

(Abstracts from a lecture delivered by F. W. P. SIMMONS, before the New England Association of Opticians, Boston, Mass., May 16, 1906.)*

[EDITOR'S NOTE.—That readers may fully appreciate the value of Mr. Simmons' remarks, it may be well to review the situation from its origin. Years ago, A. Jay Cross, of New York, pleaded earnestly for a higher educational status; John C. Eberhardt, Dayton, O., joined hands with Mr. Cross, and together they worked, believing that while legislation was desirable, it could best be secured by raising the educational standard. On Nov. 15, 1905, E. LeRoy Ryer urged the Optical Society of the City of New York to act upon this subject, and proposed the formation of the "American Academy of Optometry," believing this a practical solution of the problem. This plan met with hearty approval from all sections of the Union and its influence was felt nowhere more forcibly than in New England, where it rekindled the old spirit that, in 1898, resulted in the establishment of the "New England Optical Institute." The college scheme proved a failure, not because it was lacking in itself, but because the members of the optometrical profession did not see fit to take advantage of the chance thereby given to improve their education. It has been conceded upon good authority that the only fault of this institution was its being 10 years in advance of the times. With the usual Yankee aggressiveness and praiseworthy intrepidity, Mr. Simmons now proposes the formation of another optical college, in somewhat the following terms.]

"Mr. President, fellow members and friends: The mention of the word friends makes me fear that I have more friends in the audience now than I will have an hour from now, for my present task is not a pleasant one; but one wherein I must tell the optician what he is not, rather than what he is.

"When the subject was first given to me I divided it into two sections—first, whether or not a college should be established, and, second, if so, where it should be established. That a college should be formed cannot be questioned, nor do I think its location should be questioned. It must be in Boston. Where else can we have it? What other city has any right to have it, and what other city has the same advantages?

"Before going any further let me tell you that we will have a school—don't doubt that for a minute. The term used to designate members of our calling is a point that demands careful consideration. The word optometrist is a good one, brought to the front by prominent men and papers. We still, however, call ourselves opticians, either because we are conservative or because we are afraid the public will not understand

other terms. It is true that the public understands the meaning of the word optician in a general sense, although it has not learned to differentiate between the man who grinds the lenses and he who examines the eye.

"I dare not give definite preference to any particular term, but I do state emphatically that if we have a school it must give us a name—a name that will withstand criticism. This name must include a degree, but a degree that will not, in any way, infringe on medicine.

"Six or seven years ago we had a school. Whether it was good or not, I will not attempt to discuss here, but the time has come now "to make some distinction between the various grades. A clerk behind the counter in the wholesale house is an optician; the peddler traveling through the country is an optician; the helper in the shop is an optician, and the little foreigner who wished to go to night school and was asked his occupation, replied, 'optician.' Between refracting opticians, eyesight specialist, consulting optician, examining optician, graduate optician, eyesight refractionist, optometrist, etc., etc., the public does not know where it is at.

"The school must give us a standard, a high standard, but it must also give us a name, else it is worthless. We do not begin to know the A, B, C of what we should. Asking a patient if he can see better or worse is not optical work.

"Since the New England Association of Opticians was established there has been a thirst for knowledge among opticians. We have had a medical lecturer, but he didn't know, or didn't tell us, that which we sought; maybe he was justified, maybe not.

"I think we should condemn many of the optical advertisements that appear in the daily press. Sometimes a paper contains more fake medical optical ads. than news. Such advertising drags good and bad alike down into the mud. When a man advertises to sell \$3 gold glasses for \$1, he is treading on treacherous ground. I don't want to see unreasonably high prices charged, nor a fee for examination if the examination is not good; but when we get a school our services will be worth something. Any man who charges a fee, yet lacks a thorough knowledge of his work, is as much a fakir as he who sells the \$3 glasses for \$1. We must do something to improve. We are far from perfect. I have taken a retinoscope and selected a cylinder that seemed perfect, and then have the patient accept a sphere, yet I have used the retinoscope for 13 years.

"The opticians are doing most of the re-

fracting work and will continue to do it, for each year shows more patients leaving the oculist for the optician. Last year I refracted 1,402 new cases; 500 had previously been to oculists, less than 60 had been to fellow opticians, and the rest had worn glasses before.

"It shows plainly that the oculist is holding his work. If, however, the public comes to us, we must be able to do all that our duty to them requires. We should know all about disease, but must not treat it. If a troublesome refractive case presents itself, don't send it to an oculist, but another optician; the optician will be loyal to you, the oculist will not, and to make that doubly sure we must formulate a Code of Ethics and abide by it. Though we should in no way treat disease, we should know all about it and, going still further, we should know all about those drugs that have any bearing, direct or indirect, upon the eye.

"Legislation will come, but only after we have established a school with so firm a foundation that physicians, who intend making a specialty of eye work, will come there for post-graduate instruction.

"The school should give thorough training in anatomy, physiology, neurology, optics, applied optics and refraction, root a branch.

"The sessions should be held in the evening and, instead of a two or three month course, a two or three years' course should be given.

"Three years ago we arranged to take a course of lectures at the Massachusetts School of Technology. Some time after a number of the men took private courses from one of the professors of Tufts College. Thus it is evident that we are realizing that the time is coming when a college will be needed and supported.

"Within a year the Y. M. C. A. is to consider the advisability of incorporating a course of optometry in its series. It gives a recognized law course and what will prevent it from giving a recognized optometric course? Before we can expect a degree, we must make ourselves proficient, and to that we must have a school. A school that can give us a well earned name will give us unquestionable rights, and one of the privileges would be just legislative recognition. There is no time like the present or no place like Boston."

The Hamilton Jewelry & Optical Co. Ltd., Hamilton, Ont., has been reorganized. H. Barnard and R. Broughton have been large shareholders and have been appointed directors.

*See issue of the Circular-Weekly of May 23, for a full report of the Twelfth Annual Convention of the New England Association of Opticians.

Optical Department.

The Health Ray Lenses.

Lecture by Dr. ARTHUR C. CAMPBELL, Topeka, Kans., before the convention of the New England Association of Opticians, May 16, 1906.)

MAN is at the bottom of an atmosphere and through this comes to him all the external foods and forces by which he is sustained. To the action of these forces, willingly or unwillingly, we and all lower orders of animal life must submit. One of our chief concerns is to so utilize these forces that they may help and not injure the processes of our life.

LIGHT.

First among these forces is light. We are told that the sun is the great dynamo in which this force originates; that it is a wave or vibration, which emanates from the sun and travels unerringly in straight lines in every direction to the farthest confines of the solar system. That a small action of this force penetrates our atmosphere and impinges upon us, the living organisms.

LIGHT AND LIFE.

Again we are confronted with the fact that light not only accompanies life, but it is absolutely essential to it. The helianthus and the daisy turning their faces ever to the sun, the white stalks of the cellar-town potato, the eyeless fish of subterranean rivers, who are lineal descendants of animals who once lived in the light, the leached, almost bloodless, arteries of the prisoner of Chillon and Monte Cristo, all are evidence to the necessary life-giving virtue of light.

Science has made a more exhaustive and serious study of light than of any other object, not excepting electricity. It has found that a beam of white light is by no means a simple force, but is made up of an infinite number of vibrations or wave lengths, each varying from its fellow in length, rapidity and other characteristics.

THE SPECTRUM COLORS.

In this discovery scientists were aided by the colors which made their appearance in

the spectrum, created by passing light through a prism. We may well imagine with what eagerness they hailed the fresh discovery that each spectrum color was due to a wave having a certain rate of vibration; that at one end the red ray moved like a dray horse compared with the thoroughbred violet at the other extremity of the scale. Thus they led to the announcement that solar light passing through any medium of refraction whether the rain drop in the heavens, the dew glistening upon the grass, the quartz quarried from the earth, the glass manufactured by the ingenuity of man, or by the accident of the desert fire, is composed of seven colors.

Our scientists have advanced to a still more important conclusion by establishing the fact that each ray differed from its fellow in its essential properties; the red moving at the rate of 395 trillionths vibrations per second, each having a wave length of 700 millionths of a millimeter, exhibits the greatest amount of heat and but little chemical effect, while the violet moving at the rate of 750 trillionths vibrations per second (in round numbers double that of the red) with a wave length of 396 millionths of a millimeter (one-half so long as the red), presents comparatively little heat effect but marked actinism, or, in plain words, power to produce growth.

GRADATION OF COLORS.

You will observe in the spectrum that the colors are not clearly defined, the red shading insensibly into the orange, each successive color overlapping its predecessor, the indigo shading into the violet with the same absence of demarcation. Experiments have also disclosed that heating and actinic effects are blended in its various colors according to their respective distances from the red and violet ends. But the tremendous importance of the spectrum was appreciated only when it was discovered that beyond the red, invisible to the eye, are heat rays hotter than the red itself, and that outside the violet are invisible waves more actinic in chemical power than any we can see.

At this point the theorist, our scientist, turns over the subject of light to the practical man of affairs, with the injunction, "Here is what light is, what will you do with it?" The consumptive stakes his life upon the answer, seeking the open air sanitariums of various parts of the world, not only for pure air, but also the elixir of life—unadulterated sunshine.

Finsen by his experiments in the laboratory and sick room demonstrated light to be a remedial agent in the treatment of many diseases and established an indisputable connection between light and the health of the living organisms. Finsen's conclusions have been adopted by all the authorities in this country and Europe, who have admitted light to be not only a curative of disease, but also a preserver of health.

I attended a meeting of some of the most eminent American optical manufacturers in the City of New York, in October last. During their discussion I advanced the statement that light, which will not pass through our present spectacle lenses, possesses and imparts to the human system certain very valuable health-giving properties. To this they demurred, and at last adjourned the meeting for several hours for the purpose of taking the testimony of three of New York's best oculists upon the point in question. Telephone communications revealed the fact that not three of the great oculists in the city could be found qualified to judge in the matter (I think they could be found if they had searched harder).

This surprised the manufacturers and the major part of them departed to their respective homes, wondering whether your speaker knew whereof he spoke in regard to the therapeutic value of light. On the following day C. L. Merry, of Kansas City, Mo., Dr. Julius King and his son, Walter, of New York, went with me to the office of Dr. M. A. Cleaves, the acknowledged authority on light in this country (though not an oculist) to submit the question of the physiological action of that part of solar

GROUP OF OPTICIANS AND THEIR FRIENDS WHO ATTENDED THE 12TH ANNUAL CONVENTION OF THE NEW ENGLAND ASSOCIATION OF OPTICIANS.

Optical Department.

light which they admitted would pass through my lenses, but would not the regular. To that select few I gave my initial lecture with the aid of the chart which I have before me to-night.

LIGHT AND OPEN AIR TREATMENT.

After a general statement as to the curative properties of light, I touched upon the sanitariums of Colorado, New Mexico, and that one of Dr. Leuterwasser, who exposes his patients nude to the sun, and various other resorts, not forgetting the one at Saranac Lake, N. Y., where they sleep outdoors in the winter with the thermometer at 30 degrees below zero, and suffer no inconvenience. On the contrary, thousands are cured yearly of pulmonary tuberculosis with nothing but the aid of Nature's light, good wholesome food and oxygen, which is found in much larger quantities in any cold climate.

I then reviewed the work of that great professor, Niles Finsen, to whom we are indebted more than to any other man for our knowledge as to what particular part each wave length plays in the role of health and cure of disease. Finsen first, through the action of light, produced the immediate destruction of the disease germs themselves. Later he became thoroughly convinced that the action of light was primarily upon the blood and nervous system.

As proof of this statement many interesting experiments were made, one of which, the picture of the great Finsen lamp, will aid you to understand. A piece of Aristo photographic paper was placed on the under side of the lobe of his wife's ear; the outer surface of the ear was then exposed to the light energy of a 20,000 candle-power arc light for one hour, without discoloring the paper in the least. He then expelled the blood from the exposed ear and turned the light on for five minutes, blackening the paper beneath the ear, demonstrating two facts: First, that light penetrates the tissues of the body, and, second, that it is absorbed by the blood.

WHAT ARE HEALTH RAYS.

At this point Dr. Cleaves said, "Gentlemen, step this way." In an adjoining room she turned on a great searchlight that once belonged to an ocean liner, saying, "To show you the truthfulness of Dr. Campbell's statement, notice when I place my hand in its course, the red rays only are transmitted. If it were possible for me to render my hand bloodless we would see a white light very much as it is before it enters the hand. This demonstrates that the health rays, as he calls them, are absorbed by the blood." Dr. Julius King asked what color rays were absorbed by the blood. Dr. Cleaves responded in the language of Finsen, "The blue, indigo, violet and ultra violet." These are the health rays.

Doubtless many of you read about a month ago of Professor Gates, of Washington, D. C., making experiments with ultra violet light, showing whether a person is actually dead or not. This novelty was known to Finsen 12 or 15 years before his death, and is simply another experiment proving that in the living organism these health giving rays of light are absorbed by

the blood, while in the dead, where the blood is not circulating, they pass through the tissues.

Do not understand me as saying that ultra-violet light taken alone is beneficial to the eye. On the contrary, allow me to most emphatically say it is detrimental if taken in quantities, though they are among the most important healing rays, and when properly mixed with the other parts of solar light as it comes to us, it is most certainly beneficial and thought by many to be the most active part of the health rays. These will not pass through glass to any great extent, as is well known.

I then exhibited this picture of a few of the many diseases cured in the Finsen laboratories. The center picture taken before and after treatment is copied from Rational Hydrotherapy, by Dr. John H. Kellogg, of Battle Creek, Mich., who visited Finsen and gives his endorsement of Finsen's work in his last edition, where these two pictures may be found.

HEAT AND HEALTH-RAY FUNCTIONS.

It is the function of the red end of the spectrum, or heat rays, to so warm the soil as to make possible the growth of plant life, but it is to the health rays we are indebted for that life-giving quality which enters into the plant in a mysterious way and causes it to come forth in all its beauty and bear fruit.

HOW THE HEALTH RAYS ACT.

In a similar mysterious way these short wave lengths, the health rays, enter into and produce the changes in the blood, causing both the white and red corpuscles to increase in size and number, giving to the white, the scavengers, a greater strength and vitality to fasten themselves upon disease germs; others are thrown out in waste matter as puss or are surrounded in a capsule and therefore kept from destroying the tissues, as in tuberculosis; these health rays, moreover, increase the number and size of the red and multiply their capacity for carrying oxygen and food to feed the tissues, burn up the waste matter and carry away the debris that accumulates.

Another very important function of light must not be overlooked. Concentrate a beam of white light upon living flesh, and you will have, as I have endeavored to show in the illustration, an enlargement of the small arteries, which are controlled reflexly from the nerve centers of the brain and chord. This dilatation enables the blood to flow easily and copiously, bearing upon its crimson tide nutrition to wasting brain and other tissues, and discharging into its excretory organs, the sewers of the body, the poisonous products to be thrown out. Now, combining this illustration with Dr. Cleaves' explanations, we have, by the use of light alone, a better supply and quality of blood and a larger channel through which it may pass, and have also well in hand the physiological processes of growth and repair.

HEALTH AND THE EYE.

The relation between health and the eye; this special organ of sight, is the main object of our interest. Each organ of the body acts upon the vital fluid blood in a manner peculiar to itself. I need but mention to you the office performed by the liver, stomach, pancreas, lymphatics, etc.,

and those strange but little understood bodies, the ductless glands. Each is necessary, each must perform its function or the blood is vitiated and ill-health results. Life may cease because the blood is not supplied with the element furnished by each organ. The lungs are the special organs of aeration, yet not all the work of oxidation is performed by the lungs.

The body's covering is constantly inhaling and exhaling air. In the same sense, and to a greater degree, the eye is the special sense of sight, the gateway through which the light flows and discharges its energy, nourishing the blood. To a greater degree I say, because every civilized man increases the burden of nutrition imposed upon the eye by concealing the major portion of his body with clothing, which otherwise could and would absorb much of the needed light through the skin.

Natives in semi-civilized countries, like Liberia and even Mexico, cure themselves of many diseases by exposing their entire bodies to the sun. Indeed, the African is almost wholly free from these dread diseases in his native land, while in this country it is a common saying in the dissecting room that negroes either have tuberculosis or syphilis. There is but one explanation to this, and that is that through his black skin almost wholly covered with wearing apparel it is impossible for enough of the health rays to penetrate and vitalize the blood.

Rob the system of these health rays and disease will result. Great Britain furnishes us a good example of this, there being a greater percentage of deaths from the white plague on these islands than in any other civilized country, from the fact that the atmosphere with its great number of cloudy and foggy days absorbs the health rays and deprives the system of vitalizing force. We are told that Massachusetts, on account of her cloudy weather, also claims a great number of victims of consumption, some 4,000 dying annually in this clouded State alone.

(To be continued.)

Another Staunch Advocate of an American Academy of Optometry.

ROCHESTER, N. Y., May 23, 1906.

Editor THE JEWELERS' CIRCULAR-WEEKLY

I personally think it a good thing, and it is properly handled it would certainly benefit every optometrist, as we never can get any too much knowledge. Moreover in order to get that knowledge in a medical school we must first prepare for it with several years' college work, and every optometrist has not the time to spend to go through so much work.

I think if we could have a standard college for optometrists, which would teach optics exclusively and grant a proper diploma when proficient, we would certainly be much better off than at the present time.

C. S. SUMERISKI,

Secretary Rochester Optical Society.

Dodge & Whitney, Lansing, Mich., have moved into their new store, at 208 Washington Ave., S. The optical department is a feature of the new quarters.

SOME ATTRACTIVE EXHIBITS SEEN AT THE RECENT CONVENTION OF THE NEW ENGLAND ASSOCIATION OF OPTICIANS.
(Described in last week's issue of THE CIRCULAR-WEEKLY; also see page 92.)

Optical Department.

Optical Notes and Briefs.

W. R. Livingston, Brush, Colo., was a recent visitor to the optical trade in Denver, Colo.

E. Amsden has taken a position as optician with the Columbian Optical Co., Denver, Colo.

Dr. C. M. Haviland, optician and oculist, Fort Collins, Colo., was in Denver, Colo., recently, on business.

W. E. Dodd, Butte, Mont., has gone to Chicago, to take a post-graduate course at an ophthalmic college there.

Herman Silbert, optician, 482 Washington St., Buffalo, N. Y., is the inventor of a mounting for eyeglasses, soon to be perfected and put on the market.

Mason Smith, for several years in the branch optical store of A. Martin, 617 Main St., Buffalo, N. Y., has gone to New York, and may remain there after he takes a rest in the hope of benefiting his health.

The North Dakota State Board of Optometry met in Grand Forks recently, to close up business for the year, prior to starting with a new board July 1. The present board has completed its three years' term, and accomplished a great deal of good work in that time.

A meeting of the Executive Committee of the Buffalo, N. Y., Optical Society, was held at the home of the society's president, Mr. Simeox, last Thursday. At this meeting Roger Williams, of the Failing Optical Co., an enthusiastic steam yachtsman, announced he would take the society members in his yacht to Rochester, N. Y., to attend the convention of the American Association of Opticians.

Andrew Brown, of D. V. Brown, 740 Sansom St., Philadelphia, Pa., was one of the subjects last week of Anna Eva Fay, who is appearing at a local theatre, and who asserts her power to tell secrets of all sorts and to read minds. Mr. Brown wanted to know what had become of some valuable certificates which he had mislaid. To his astonishment and delight Miss Fay told him where they were hidden and the recovery of the certificates prompted Mr. Brown to write Miss Fay a flattering and appreciative letter.

One of the features of the civic parade at the centennial celebration of the city of Geneva, N. Y., recently, were the two floats of the Standard Optical Co., of that city. The first float displayed all styles of lenses, gold and silver, gold filled and Roman alloy material used in manufacturing spectacles. On this float was also a quantity of completed goods made by this company. The second float was called the machinery float. On this was an optical bench, a lens marker, a standard lens cutter and drill, a prisoptometer and an Acme edge grinder. A demonstration of the work of the different machines was given on the float. Besides the floats 160 men employees of the concern took part in the parade.

A burglar alarm thwarted a bold attempt to rob the rooms occupied by F. A. Hardy & Co., wholesale opticians, on the fifth floor of the Arapahoe building, 1622

Arapahoe St., Denver, Colo., last Wednesday night. The thieves climbed a fire escape and entered through a window. They seemed to have first centered their attention

door sounded and scared them away. That the would-be robbers were desperate and would have blown open the vault, had other means failed, was evidenced by fuses com-

on a safe containing \$1,000 worth of gold spectacle frames, but before they could pry it open, a burglar alarm attached to the

monly used by bank thieves in setting nitroglycerine, which were found scattered all over the floor of the room.

RETAIL JEWELERS ADVERTISING

The use of this department is open to every retail jeweler and optician. Forward for criticism your newspaper ads., booklets, catalogues, novelties, circulars, etc. Ask advice and offer suggestions. Replies in these columns are unbiased. Make letters as full and particular as you desire. Every letter and ad. sent will receive full attention, though the publication of the matter may sometimes be delayed several weeks.

WITH the dawning of Friday will be ushered in the wedding month, during which the jeweler should continue the appeal to prospective gift-buyers which began—or, at least, should have begun—in the month of May, thus allowing eight weeks of persistent advertising. Several samples of June advertisements were pub-

well written. The unusual type used in the catch phrase, name plate, etc., makes the announcement conspicuous and easy to read. In a previous issue THE CIRCULAR-WEEKLY reviewed the advertising methods of J. Selinger, Washington, D. C., and the latter recently forwarded the accompanying two ads., together with several others. The

What Some Jewelers Say.

JEWELRY to turn the heart is shown in our new assortment of dainty things for this season. Ornaments for hair, neck and waist are here aplenty. Combs, hat pins, barrettes, stick pins, belt buckles of chaste design and exquisite workmanship. They are developed in various metals and the styles range from Louis XVI. to Art Nouveau. Prices are as attractive as the goods. A. E. Dwelle, successor to E. W. Blossom, Sterling, Ill.

Diamonds, Watches & Jewelry

We claim to be one of the largest dealers of fine Southern Diamonds in the South, and we want to absolutely secure every customer who makes a purchase from us against any loss. It is our desire to make a proposition to all purchasers of gems, either at our Main street or Bay street store, that will in a way make them practically safe and give them for a very small price the use of any 100 if a Diamond that they desire to wear. This proposition on its face explains itself, and as to our reliability ask any local bank in Jacksonville, and find out if we do not live up to every obligation that we make, and if our signature is not absolutely safe. We will give you a \$50 Diamond worth one, and no matter if Diamonds decrease in value, you have a standing offer whenever you remain in Jacksonville or move to New York or Chicago, that we will give you \$50 cash \$15 for one and \$30 for the other. (High quality Diamonds up to \$400 same proposition.) If Diamonds decrease to \$1.00 and we have in stock information that 25 per cent to 40 per cent will be added in value during 1906, you have made a money making investment, and you are wearing the Diamond. This offer is made not alone to assist in selling stores, but also to prove to you, without any doubt, that our points are based on such a small percentage that we stand ready to hand you in cash \$150 for an article that you paid \$150 for. When you purchase a Diamond from us your receipt states the correct weight, the quality of the Diamond, and with mounting has our stock number engraved on it. This number corresponds to the entry in our book. Consequently you can give our receipt and the Diamond to any express office in the United States, and your money will reach you as fast as the South Sea Express Company can return it. We are and have been for the past ten years direct Diamond importers, and buy only fine, well-cut stones, and make our selections in full paper lots. We claim, and can prove, that our knowledge of Diamonds is as good and a little better than the average gem dealer, and it is in our interest to give you only the finest white goods that are on the market. Our business has grown from a small store in Jacksonville to the present location, and the reason is this: we have treated our customers. One buy with another and the endless chain of Diamond purchases rapidly corrects honest values, for as a chain, especially in fine Engagement Rings. We have the assortment and the prices. In reference to watches, we have every high-grade make and only employ expert trained workmen. Our firm represents the Atlantic Coast Line, as watch inspectors, and have fully 300 of these employees registered on our books, proving our ability to handle with care the finest watch movements manufactured.

SELINGER'S, F & 9th Sts.
"Look for the Big Clock."

lished in the issue of THE CIRCULAR-WEEKLY May 2, the present week's announcements being of a various character, with the exception of the ad. of Fred Rolshoven & Co., Detroit, Mich., which offers fit suggestions in a general way. The ad. of Joseph Goodman & Son, Memphis, Tenn., reduced from four and a half ches, double column, is "newsy" and typographically attractive. "Your money back, ss 10 per cent., in two years" ought to rnish food for thought to those seeking ofitable investments. The attractive "proposition" of Hess & ager, Jacksonville, Fla., which occupied a ace of 10 x 6 1/2 inches, is worth reading. The advertisement just at the right of is was received a short time ago from rank E. Davis, an enterprising jeweler and ptician of Northampton, Mass. It was ed originally in a space of 10 x 4 1/2 inches. he catch phrase is one that will appeal rongly to many. The text that follows is

design of the first ad., which occupied five and three-quarter inches, double column, is striking, and the text tells why one should take advantage of Selinger's service. The type is well chosen. The ad. below this is rather attractive, too. The text is cleverly constructed, particularly in view of the recent form of bill governing the practice of medicine introduced in New York. Should this bill become a law, it will be a misdemeanor for any one other than a physician to relieve pain; hence one can readily see its aim at the optician, who must be careful not to promise in his ads. to effect cures. A scrutinizing analysis of the wording of the Selinger ad. will show that the advertiser keeps strictly within the pale of the law. He says "headaches are often caused by eyestrain." He does not say "We can fit your eyes with glasses and cure your headaches," but merely "If you need glasses we can tell you."

bend many times without breaking. One of our chief officers gives the engraving department his personal and special attention. He studies carefully all the new things that are presented and from the best of them our styles are drawn. If your invitation bears the Brodnax imprint you will know that it is the best of its class that can be produced. We would like to send you our sample book No. 17, which shows the proper forms for invitations and announcements, and also for all the necessary enclosures, such as church, reception and at home cards. George T. Brodnax, Memphis, Tenn. Our exhibit of high class jewelry was never so temptingly beautiful as at present. A tremendous variety to choose from and interesting prices throughout the collection. Jeweled rings of great beauty, scarf pins, cuff links, bracelets, etc. See our diamonds.—Frank F. Stapf, Dunkirk, N. Y.

That this department shall prove mutually beneficial to our readers, it is desirable that the members of the trade generally communicate with *THE JEWELERS' CIRCULAR-WEEKLY* regarding any advantageous device or plan which they are utilizing in connection with their business.

A TECHNICAL WINDOW DISPLAY.

Processes of Manufacture Which Never Fail to Attract Attention.

KNOWLEDGE is something of which every individual owner is proud. But it is to the owner of occult knowledge that the greatest expansion of chest occurs

ingress of the general public is debarred, where none but the chosen few are permitted entry!

Are you a Mason? Oh, the marvelous

long and often, a catering to the thirst for information that exists in the person of the show window gazer. A certain branch of instructional, or shall it be called cultural window trims have been suggested, sufficient to give the retail jeweler, desirous of outdoing the average competitor in window displays, a direction in which to exert his ingenuity.

But there are numberless divergent sources of instructional information that can be dealt out to the public, each of which

(1)
BLANK.

(2)
ROLL.

(3)
PRESS-OUT.

(4)
ROUGH.

(5 AND 6)
STRIKE-UP.

(7) (8) (9)
POLISH. SILVER PLATE. HAND BURNISH.

from a consciousness of "inner" information. The feeling of ownership is "comparative" to the "position" of the ignorant "common herd." But the proud feeling of sole ownership is the real "superlative" in that line of sensation.

Watch the look of supremacy among the theatregoing crowd of the man who has been "behind the scenes." And see the open display of admiration or envy of his uninitiated companions when just a few words leak out of the conditions that rule in the "wings" or the actions of the "profess" in the "greenroom." What wonders are supposed to be hidden anywhere where

mysteries that are attached to the workings that go on the other side of the veil! Do not superciliously call those thrills that creep up the human spine upon the hope of disclosures just rank, idle curiosity that killed the cat. However, call it what you choose, the fact of this desire for hidden knowledge pervading every fiber of all cultured humans has to be acknowledged, and, accepting this condition of things, the owner of a store front has the key to the hearts of the passing multitude. Let him make honest and earnest use of it.

The writer, in the "educational" show window series, has dwelt upon, perhaps too

will appeal to this same sentiment or curiosity, whichever you care to term it.

There is, for instance, ready to the hand of the retail jeweler information which is absolutely unknown to the public, which even the deep learning between the covers of the encyclopedias does not reveal. This would be of an attractive character that must draw the crowd of intelligent treasure-seekers so thickly strewn among the throngs on every busy sidewalk.

Well does the writer remember one of the most "taking" features in the wily performance of the late world-renowned prodigateur, Dr. Lynn—his showing "the

Storekeeping Department.

It was done," after one of his feats of edgerdemain, touched the hearts of his admiring audience. And when, after he had shown "how it was done" and the public was no wiser than before, they were just as delighted as if the conjuror had actually imparted his secret.

There is a lot of action that goes on in the gold and silversmithing factory that can be divulged without passing over to the eager enquirer anything that will injure either the trade or the reputation of the factory. Pass it out. The public wants it. The writer would like to know "how the wheels go round," as Helen's babies expressed it, for, becoming a foolish scribe instead of learning a useful trade, like that of the gold and silver smith, he missed all his useful and highly interesting knowledge.

Teach us all you can and dare in your show window.

If you desire to get some clue as to how to go about the work, perhaps the writer might suggest, leaving you to do. Let us take as an example:

A SPOON DISPLAY.

Some time ago the American Silver Co., Bristol, Conn., put together on a stiff cardboard backing, in size about 22 inches long by 10 inches wide, a capital, practical exposition of the "Evolution of a Teaspoon." This clever piece of advertising gives a graphic view of the nine grades of transition through which the teaspoon passes in its manufacture before it becomes a thing of beauty and utility in its burnished state. An illustration of that concern's "evolution" card is given herewith. No doubt many of THE CIRCULAR-WEEKLY readers have already seen it, as it is not by any means a recent device. It serves, however, as a directive force on which to build a show window trim that, if not exactly novel in its source, can be extended into instructional show window displays that will offer attractive and "occult" features—and sell goods.

The weak point in this or similar "evolutionary" cards is, from our present standpoint, that it is too condensed—it does not make a window display, but a feature in the window.

Suppose we extend the space and elaborate on the instruction afforded. How would it be to separate these nine exhibits sufficiently apart from one another to fill out the window? Let us give the display a taking caption on a card located above the entire exhibition, something catchy, say:

A Spoon—Full
of
Factory Facts.

Then we mount on three cards, separately, nuggets of the three metals composing the alloy base with the words (one on each): "Nickel," "Copper," "Zinc." Grouping these cards, we put a caption to the trio in such words as:

Best Alloy for Table Ware.

Next take in hand process No. 1, the "blank." Mount it on a card, with its technical name on top, and, underneath, a few salient points concerning the process gleaned from the factory, such as its being cut by a steel die (if it is); the pressure needed of so many pounds to the square inch; the thickness of the plate from which it is cut, etc.

Follow this with a card alongside, containing the second process of the evolution. Set the title "roll" over the exhibit, and under it (in as few words as possible), the leading features of the process—run through rollers and reduced, under so many horsepower pressure, to such and such a thickness.

Now for No. 3: State how "press out" is done, etc. And so continue a carefully carried out technical display, with description, of the remainder of those nine stages. But perhaps the thing is just a little bit "dry" bait for the vitiated tastes of some of our prospective customers. Suppose we squeeze a little of lighter matter in to increase the size of the show and make a diversion.

How would it be to bring in a little history to spice the window story. A show card, for instance, as follows:

Ben Butler Loved Spoons.

Another:

AN ANCIENT CUSTOM.
For Centuries Children Have
Cut Their Teeth on Spoons.

Display some "Apostle" spoons. Germans still have them in their customs. Append a card reading:

"APOSTLE" SPOONS.
European Godfather Gifts
to Cut the Child's Teeth On.
Child Christened in Patron Saint's Name
On Spoon.

Make three little piles of cockle, mussel and clam shells. Put a card at their back, thus:

FIRST SPOONS EVER USED.
Cockle, Mussel and Clam Shells.
So History Tells Us.

Display a few horn spoons, with the following card:

HORN SPOONS WERE AMONG THE FIRST.
An Old Saying:
"To Make a Spoon or Spoil a Horn."

Add a few wooden and bone spoons with a card:

Table Ware Progenitors.

Another card, perhaps to fill in a blank space, might be:

Our Distant Forefathers Said:
"He Wants a Long Spoon
Who Sups With the Devil."

Try to get at least one snuff spoon. The

Scotch especially used them up to within a recent date, and they should be available to the energetic seeker. Some such card as this might be used:

"SNUFF" SPOONS.

It Was

"Take a Spoon of Snuff"

Before the Day of

"Take a Pinch of Snuff."

Which Was Cleanest?

All this is, perhaps, progressive window trimming, and, maybe, up-to-date. If so, can't we get ahead of this date and produce an advanced style? This "evolution" display explains what the factory does, but can't we pull in the factory itself? At least a part of it. Get photos of the machines and add them to each process.

The cigar and the cigarette dealer puts a man or woman into the window to show how "smokes" and "death tubes" are put together, and the jeweler himself puts the watch tinker to work in his show window. Old and stale as the sight is, there are still always a few to watch the process—maybe due to just innate human cussedness of "hangin' round" while seeing the other man work.

Why not call into requisition an expert or two from your tableware manufacturer to "demonstrate." At least you could put a polisher in the window. A small electric motor takes up very little space and would "mote" all the polishing or burnishing needed in one corner of the window. Put a pile of "Silver Plate" spoons (as on that "evolution" card) on one side of the demonstrator and, as he burnishes them, let him heap them on a pile on the other side. Put a big card between the unfinished and finished spoons, thus:

STEP INSIDE.
Take One Home.
25c.

If the pattern is novel or very pretty, you might make a big enough sale to pay for the window on that spoon sale. Those who enter will probably buy other stock besides a mere spoon.

These window suggestions are to pull the customer in. You can assuredly "do the rest."

C. W. C.

Cheerfulness in Business.

CHEERFULNESS has a wonderful effect upon our physical natures. Show me a thin, dyspeptic, chalky face apology for a man who goes around groaning over his real or fancied ailments, and I will show you a man from whom cheerfulness has departed—not always because sickness has driven it out, but too often because moroseness has courted physical disability. "Let good digestion wait on appetite," and mirth on both.

Optimism and cheerfulness go hand in hand. Pessimism and mental disturbance are twin sisters. If you have not a sound body and a sound mind you cannot fill the measure of your position and turn out work satisfactory to your employer and yourself.—*The Business Man's Magazine and the Bookkeeper.*

[Answers are also solicited from our readers to the questions published on this page.]

QUESTION No. 1568.—To Transfer Engraving.—Will you kindly tell me the best way to transfer engraving to articles that are the French gray finish on them?

R. F. L.

ANSWER:—An engraving which is printed may be transferred to any metallic surface by diluted turpentine varnish. Engraving in metal may be transferred to any other metal by diluted black alcohol varnish by means of pressure, using a piece of rough paper.

QUESTION No. 1569.—Kermess Finish.—I was recently shown several pieces of copper articles that were said to have a kermess finish. Kindly tell me how this finish is obtained.

K. F.

ANSWER:—This finish has only recently made its appearance. The method of producing it is described in the *Metal Industry* as follows: Take 1 pint of common nitric acid and dissolve in it sulphate of copper until complete saturation has taken place. Dissolve 1 oz. of this mixture in 1 gal. of water. This procedure will produce a greenish opaque solution. Now add enough mucic acid, C.P., to clear it up, and then add 1 oz. of pulverized bloodstone. This solution should be used near the boiling point. It produces a beautiful finish on copper or copper plated goods, which is better than bronze medaille.

QUESTION No. 1570.—Lead-Antimony Alloy.—Please give me a formula to produce a lead and antimony alloy, suitable for casting purposes.

L. A. A.

ANSWER:—For lead and antimony alloy the right proportions must be used, otherwise the castings will break. Use lead, 84 lbs.; antimony, 15 lbs.; tin, 1 lb.

QUESTION No. 1571.—Etching on Brass.—I have a number of brass nameplates, on which I want to etch names. Can you tell me how I should go about this?

E. B.

ANSWER:—Make a "stop-off" varnish, or resist, taking 1 part of resin and Burgundy pitch and $\frac{1}{2}$ or 1 part of dry asphaltum. This is moulded into a stick. The names should be plainly written on the plates with ink or soft pencil. The plates are then warmed and the stick of resist is rubbed over it, so it will cover all except the written name. Then place the plates, when dry, in a flat porcelain dish, with the names upward, and pour over this nitric acid, diluted with five times the quantity of water. When the letters are etched deep enough, rinse in cold water and place the plates in turpentine until the resist has all been dissolved. If the letters are to be in black, then fill them in with black lacquer. When well dried, remove the surplus black lacquer with a cloth and alcohol.

QUESTION No. 1572.—Argasoid.—Please

give me the alloy of argasoid. A. P.

ANSWER:—Argasoid is a substitute for silver. It costs about 50 per cent. more than brass. The composition is: Tin, 4.035; lead, 3.544; copper, 55.780; nickel, 13.406; zinc, 23.198; iron, trace.

QUESTION No. 1573.—Watch Dial Cement.—Which is the proper cement for fastening the seconds dial in an enameled sunk second dial?

ANSWER:—Dial manufacturers generally use warm glue, somewhat fluid, and mix with it a small quantity of gypsum or coarse plaster of paris, which composition, when dry, becomes very hard. This mixture, as long as not hardened allows one to place the small dial in its proper position.

QUESTION No. 1574.—Fresh Water Pearls.—Will you kindly tell me in what special kind of clam pearls are found?

B. D.

ANSWER:—Fresh water pearls are secured from the shell of the fresh water mussel, and are taken from the mantle of the mollusk, close to the lips or soft part of the mussel or oyster. These mussels are generally found in shallow water in running streams. They might be found in rivers of Michigan or in the little streams running into the lakes, although the great region of production is in Arkansas in the territories of the Mississippi, in the Missouri river, in Wisconsin and along the borders of Iowa.

A New Filtering Apparatus.

IN this age of uninterrupted invention and industrial combination it is not enough for a goldsmith to be a competent craftsman in his own special line. The growth of the jewelry industry and the art of goldsmithing make it incumbent on the individual goldsmith to be up to date in a commercial sense and to be in a position to offer his goods at reasonable prices and with the smallest possible waste of time and material if he wishes to compete successfully with his rivals.

An entirely new system of filtering which has been put upon the market deserves mention, owing to its practical nature and the simplicity of its operation. The sweepings and metallic waste have hitherto, it is true, been subjected to special treatment in factories and workshops, but the goldsmith's hand water and the waste water from polishing were treated according to primitive methods and goldsmiths often poured the waste water away on account of the complicated nature of the manipulation required.

These drawbacks are now, to a very great extent, obviated by the filtering contrivance described herewith, which can be supplied in a simple form to the smallest workshop

and at the same time be made available for large establishments by connecting several filtering plants together. The apparatus possesses the great advantage that it is delivered ready for immediate use, and can be set up by the operator himself, thus entirely doing away with the cost of installation, etc.

The inventor of this system, Söhnle, is a professional man, who has been occupied for many years with the treatment of waste water, and has arrived at his results by exhaustive experiments carried on during that time.

The principal feature of the contrivance consists in the omission of the felted funnel hitherto used, which was often liable to become corroded by the acids present in the waste water, and to get choked and brittle on account of particles of soap and grit in the polishing water. A firm filtering mass fixed in a barrel makes possible an auto-

AN EFFECTIVE FILTERING DEVICE.

matic filtering of the waste water without expensive adjuncts or annoying loss of time. It has been shown that the water running away after filtering is absolutely free from any metallic refuse, and that this refuse can be treated dry, together with other refuse.

The apparatus need not occupy any space required for other purposes, as it can be placed in a cellar or basement. If no other space is available, it may be set up in the workshop, as it has no unpleasant odor whatever.

The invention, says the *Journal der Goldschmiedekunst*, has already been introduced into many European gold and silversmiths' factories and workshops and has met with unanimous approval. J. Schmalz, Pforzheim, dealer in tools and machinery, has the exclusive right of sale in Europe.

A New Solder.

A SOLDER for aluminum has been invented, says Consul Atwell, of Roubaix, by Fernand Hecht, a mechanic of that city. With a soldering iron he can join together two pieces of the metal or join aluminum to copper, brass, or iron. The invention is simple, no acids or salts being used. Mr. Hecht exhibited his process satisfactorily before the professors of chemistry of the Faculty of Science, and was also awarded a medal from the Northern Industrial Society of France for making a discovery of great importance.

L. E. Winchester, formerly a watch repairer for J. W. Ware, Dunkirk, N. Y., has purchased the jewelry stock of F. S. Jolls, in Fredonia, N. Y. Mr. Jolls has retired owing to ill health, and will move to a more agreeable climate.

THE CONNOISSEUR

Devoted to Art Pottery, China, Marbles, Bronzes, Cut and Decorated Glass Ware, Bric-à-Brac, Lamps, Art Metal Wares, Fancy Goods and Kindred Lines.

An Exhibit of Pottery, Glass, Silver, Pewter, Etc., of the Georgian Era.

THE trustees of the Whitechapel Art Gallery have organized an interesting exhibition illustrating the Georgian era, as widely as their space and funds will allow, as a special contributor to the *Pottery Gazette* of London. This, the Spring exhibition, opened March 29 and closed May 1. The committee aimed at presenting a survey of British art in the 18th century in its many sided character rather than at representing any one branch of it. The desire was to arouse rather than satisfy interest and appreciation in this period of national art, seeing that the spirit of the Georgian period is so predominant to-day, the present exhibition illustrating the art of that era is most opportune. The exhibits consist of paintings, sketches, engravings, prints, maps, mezzotints, books, silver plate, pewter, linen, costumes, needlework, furniture, pottery, glass, etc., and a number of interesting relics and curios. There are loans from the South Kensington Museum, and many are private collections have been generously lent by their owners. Some of them have not before been seen in a public exhibition. The pottery exhibits are of more than ordinary interest, and are entitled to mention here.

There is a Chippendale cabinet, lent by W. H. Spottiswoode, containing a collection of Lowestoft china, lent by W. W. R. Spelman, author of an interesting monograph on Lowestoft ware. Mr. Spelman is the owner of the greater portion of the molds, saggars and broken china recently discovered on the site of the old works, and which have established the fact, which was before a subject of doubt, that china was really made at Lowestoft. The discovery, however, points to the conclusion that it was made there only in comparatively small quantities. Mr. Spelman gave an interesting lecture on the subject, illustrated by lantern slides, at the gallery, April 18.

There is a fine collection of old Staffordshire pottery, lent by B. T. Harland, appropriately shown in another Chippendale bookcase, lent by Mr. Spottiswoode. While British porcelain of the Georgian era was largely copied from the Chinese and Continental wares, the pottery of the period was essentially British. Among the pieces lent by Mr. Harland are Astbury wares and white salt-glazed teapots, both made in the first half of the 18th century. The salt-glazed ware is very light, and has a rough surface. The teapots are curiously formed as houses, animals, shells, and even ships. Examples of what is called "Whieldon" pottery, the splashed wares, date about the

middle of the century. A collection of Bristol china is shown by Alfred Trapnell. In a large case in the center of the gallery, among other exhibits, there is a terra-cotta bust of Pope by Roubillac, with Staffordshire figures lent by Wilson Steers and some other specimens of pottery.

The authorities of the South Kensington Museum lent a representative selection of old English porcelain of the period illustrated by the exhibition. This includes good specimens of the soft-paste porcelain made at Chelsea, Bow, Derby, Worcester and other early factories. Another case of pottery from the South Kensington Museum contains examples of the figures for which Staffordshire potteries were famous. There are humorous groups on the lines of the familiar "Parson and Clerk," and a number of Toby jugs, busts and figures of the late 18th and early 19th centuries, colored in the showy style of the period. A case of Wedgwood ware, also from South Kensington, contained vases, plaques and medallions in the famous jasper ware, while the black "basalt" was also well represented. There was a section of a case (C) containing several interesting examples of old Adams ware.

There was a pair of 18th century Adams jasper oviform covered vases, on foot, with designs in relief, representing the seasons, and also a pair of vases and covers of the same period in solid pale blue Adams jasper with acanthus leafage in white relief and Romanesque border. Both pairs are of the period of 1780 and were lent by Percy Adams. H. Merton Thoms lent a number of transfer-printed pieces of Worcester, Longton Hall and Liverpool china. A number of cups, jugs and mugs were decorated with printed portraits of kings, queens and heroes of the time—a very popular form of china decoration. Most of the transfer-printed pieces shown were made at Worcester from 1756 to 1766. The process was first used in Liverpool, London and Worcester, and widely extended until it has become a very important branch of decoration in the potteries.

Preparations are being made for a new line of bric-à-brac that will be introduced to the trade by S. A. Weller, Zanesville, O. Samples will be shown about July 1 in the store of the New York agent, C. H. Taylor, at Park Place and West Broadway.

Burglars broke into the store of A. Seidensticker, 237 High St., Hamilton, O., a fortnight ago, but were frightened away before securing any plunder. The rear window had been pried open and foot marks were found on the floor of the store by Arthur Seidensticker on the morning following the robbery.

Customs Decisions on Statuary, Glass Ware, Earthen Ware and Kindred Lines

PROTESTS involving the duty on statuary, glass ware and earthen ware have been decided in the last week by the Board of United States General Appraisers, New York, as follows:

Statuary, Bases for Busts.—Protest, etc., of L. Straus & Sons, *et al.*, against the assessment of duty by the Collector at New York. Abstract 9303 (T. D. 26902) followed, relating to bases for busts.

Cut and Colored Glass.—United States *v.* Marcel Schmidt (3633) and United States *v.* D. Lisner & Co. (3647). United States Court of Appeals, second circuit, April 14, 1906. Nos. 153 and 199. Appeals from the Circuit Court of the United States for the southern district of New York. Appeals dismissed by consent. In the decisions below (T. D. 26462) the Circuit Court affirmed decisions of the Board of United States General Appraisers, Abstract 2175 (T. D. 25462) and Abstract 2519 (T. D. 25513), which had held certain articles composed chiefly of cut or colored glass to be dutiable as manufactures of glass under Par. 112, Tariff Act of 1897. Note T. D. 25486.

Molded Earthen Ware With Single Color Glaze.—United States *v.* L. Straus & Sons. United States Circuit Court, southern district of New York, April 27, 1906. On application for review of a decision of the Board of United States General Appraisers. Decision reversed by consent. The goods in controversy consisted of earthen ware embellished with molded designs and coated with a single-color glaze. They were held dutiable by the Board under Par. 96, Tariff Act of 1897, as earthen ware "plain white and without super-added ornamentation of any kind," against the Government's contention that it is dutiable under the provision in the same paragraph for earthen ware "painted, tinted, stained, * * * or otherwise decorated or ornamented in any manner." For decision below see G. A. 6061 (T. D. 26443). The decision in this case was not on the merits of the contentions made, but was consented to on behalf of the importers because the correct contention was not made in the importers' protest.

Decline of English Glass Production.

THE decline of the glass industry in Great Britain is a subject of discussion in that country, and is attributed to the free-trade policy of the nation. In 1871 the imports of glass goods were \$4,974,440 in value, and in 1904 \$18,636,500. In the meantime 30,000 British workmen in the glass trade were thrown out of employment.

The price of glassware in England now is said to be greater than if the goods were made at home, but foreign manufacturers would lower prices if English competition were increased.

Webb Huston is being sought by the authorities of Evansville, Ind., accused of obtaining \$365 from three banking institutions and articles of jewelry from Kruckemeyer & Cohn under false pretenses. Huston is said to be well connected in Evansville.

REVIVAL OF CHINA BIRD ORNAMENTS.

That old styles come round again is indicated by a glance at bird ornaments which are now seen in some importing houses and which were familiar in the stores of 10 years ago. The birds, usually of life size, are sometimes suspended within golden rings, which may be conveniently hung almost anywhere. Other birds are placed upon standards, which also serve for match cases and for other similar useful purposes. The material is china highly colored to represent the varied plumage of the winged tribe. One of the importers said that the molds which had been used in the German factories nearly half a century ago and had been thrown aside for many years, were recently taken out again. They were then used in producing the present collection of bird ornaments, which are enjoying much of their old time popularity.

GERMAN CHINA BRIC-A-BRAC.

In the salesrooms of Chas. Ahrenfeldt & Co., 52 Murray St., is an attractive line of German china bric-à-brac in drab background and relief ornamentation in bronze effects; several fine, large vases are ornamented with female figures, executed in full relief and in *art nouveau* styles. Other vases come in Greek form, with medallion ornaments, showing classical heads. Among the novelties are windmills, with children in playful attitudes, and maidens holding flower bowls. Another piece has a maiden filling a water jug from a spring, under which is a bowl.

SATISFACTORY DEMAND FOR FRENCH CHINA.

French china imports say that the import season now drawing to close has been satisfactory in the volume of business that has been booked. Although the bulk of the orders were obtained in the early months of the year, scattered requests have been coming through May. By the middle of June the import business will be closed, and the attention of the importers and manufacturers will be given to the production and distribution of the goods. The heaviest deliveries are generally made in August and September, about the time that the American agents visit the factories for the purpose of selecting samples for the following year's business. The designers of the large houses have been busy all year and the result of their work will be submitted toward the end of the Summer to the inspection of American agents who pick out the works which in their judgment will appeal most strongly to the trade in this country.

The offerings, when they reach New York, therefore, represent the combined skill and discrimination of artists and business men.

*

The cut glass manufacturers quite generally agree that the past season has been prosperous. While the orders naturally diminished as the warm weather approached, yet even through May business was far from being at a standstill. The inquiries which are coming from buyers indicate much interest in the offerings to be made for new season, now about to open.

THE RAMBLER.

Recent Tariff Changes by Foreign Countries.

THE new tariff of Spain, which goes into effect July 1, has two scales of duty, the first and general scale, referring to products and all merchandise of countries generally, and the second, the rate to be applied to goods of countries which concede their lowest duty to Spanish products; provided that the Spanish Government considers such duties show sufficient reciprocity to warrant this concession. Among the rates that may interest manufacturers of the jewelry and kindred trades are the following:

	Scale I. Pesetas.	Scale II. Pesetas.
Mirrors	100.00	100.00
Silver-plated goods, per kilo.....	9.00	6.00
Optical instruments, per kilo.....	15.00	15.00
Gold watches, each.....	20.00	15.00
Silver watches and those of other metals, each	4.00	2.00
Works of clocks, and parts of same not otherwise provided for, per kilo	5.00	3.50

Consul Ruffin, of Asuncion, Paraguay, in speaking of the customs law which went into effect March 15, says the percentage of duty to be paid remains the same as fixed by the law of 1899. Among the lines which pay 5 per cent. ad valorem are gold and silver jewelry, with or without gems; scientific instruments, with or without handles adorned with gold, silver or platinum; gold and silver watches, and utensils of silver.

Among those paying 40 per cent. ad valorem are crystals in general, books covered with tortoise-shell, mother-of-pearl, ivory, imitation of pearl, or having embossings of gold or silver. Cases in which jewelry, etc., are enclosed are to be declared apart from their contents. Delft glass and porcelain, which come with other articles, will be weighed apart, adding 25 per cent. tare for brute weight to the delft and glassware, and 30 per cent. to the porcelain.

Testing Pottery by Touch and Smell.

IN the general overhauling which the Metropolitan Museum of Art, New York, underwent through its change in management, the Japanese pottery exhibits received their fair share of attention. Professor Morse thoroughly, but rapidly, tested the catalogue identification of every piece. It is reported that in most cases the touch of his fingers tells him what he wants to know about the date of any vessel. Sometimes the sense of smell comes to his aid, as in the case of certain forgeries, whose beautiful deep tone has been produced by boiling in oil.—*Pottery Gazette*.

Arabia's Ancient Turquoise Mines.

THE goddess of turquoise and the turquoise mines in old Arabia are the things Prof. Petrie, the English archaeologist, has been studying, says a daily exchange. As a member of a scientific exploring party he spent several months among the mountain ranges of the Sinai district of old Arabia, on a stretch of level ground some 2,300 feet above sea level. There they pitched their tents, accompanied by 30 workmen and the native chief of the district.

At the top levels was the sandstone in which were caverns worked by parties of ancient Egyptians for turquoise. Some tablets still remaining showed that those parties were carefully selected and carried on their labors systematically. Here, in this desert region, to which supplies of food and water had to be brought from a long distance, the men mined in companies of 500 or 600. The usual time for the search was from December to March. One expedition had conveyed to it daily something like five tons of food. The caverns themselves were examples of patient industry.

The famous temple of the goddess of turquoise, to whom the workers did homage, was 250 feet long and contained a range of chambers or courts. From one of the tablets it appeared that a certain expedition went out of the recognized season. But its labors were successful and were therefore duly acknowledged with great gratitude to the patron goddess.

Of the ancient inscriptions 250 have been copied. They have an important bearing on the age of the turquoise expeditions, long before the birth of Christ, as well as on the Semitic form of worship in vogue before the establishment of Judaism.

Mining for Rubies in Burmah.

THE system practiced for obtaining rubies in the mining districts in Burmah is of the most primitive description, says the *Searchlight*. The mining shafts are simply holes about two feet square, sunk to a depth varying up to 50 or 60 feet. The shoring up of the walls of the shaft is most crude, the sides being supported by posts at the corners and branches of small trees secured carefully against the sides by means of stout sticks.

The miner carries a tin pot similar in shape to a blunt-edged cone on his head. He squats down in one corner and digs between his knees in the opposite corner. The earth or *byon*, as the ruby-bearing earth is called, is conveyed to the top, as fast as it is excavated, in small buckets let down from above.

The apparatus for raising and lowering the buckets is simple in the extreme. A stout bamboo post about 20 feet high, called a *maungdine*, is fixed upright in the ground at a convenient distance from the pit or dwin, and a long, thinner bamboo pivoted horizontally into the upper end of it, so as to project an eighth from the mine and the long arm toward the mine.

C. W. Ernsting, San Diego, Cal., has renovated his store and erected a new street clock in front of his establishment.

FISHING MADE EASY

By Using
The Greer
Pat. Lever
Hooks.

THE BEST FISH HOOK ON EARTH

for Sea, Lake and River Fishing. No losing bait, nor coming home without your largest fish. No breaking loose or tearing out. No one can afford to fish without one. No springs to get out of order. It is simple and strong, being a lever, the harder a fish pulls the stronger it will hold him. It is easily adjusted to all kinds of fishing by sliding the little clamp on the rod. We claim for the lever hook that a fish does not have to be hooked on the bait hook to get him, if he pulls on the bait the larger hook will spear him. Made in two sizes only, 1-0 and 3-0. Price: 1-0, 10c. each; \$1.00 doz. 3-0, 15c. each, \$1.50 doz.

Bastian's Class Pins and Badges

When you handle Bastian Bros' Class Pins and Badges, you handle goods that are known to every intelligent person wherever English is spoken. We have advertised extensively and persistently in Leading Magazines until the name of Bastian bears the same relation to class pins that the name Elgin does to a watch.

No other manufacturer can meet our prices—it is an impossibility for him to do so—because we own the only patented process whereby one girl with one machine can do the work of six skilled workmen.

Note these Prices:

Silver-Plated Pins, per doz.,	\$1.00
Sterling Silver Pins, "	2.50
Gold Plate	3.00
Solid Gold	15.00

25% Discount to Retailers

Silver-Plated Pins retail at 10 cents and Sterling Silver at 25 cents. They are finely made of heavy metal, and on the Sterling Silver Pins the best French enamel is used.

We also make to order Badges, Medals and Buttons in either Gold, Silver, Bronze or Ribbon, and we rigidly guarantee everything we make.

M2417

FAHYS Montauk Case

M2773

Unless it perform its function, the greatest force ever devised is of less use than a baby's rattle to a full grown man; it is the performance that counts.

You must grant us that we have the force, the organization to manufacture the best 20 year case on the market.

Every jeweler knows the Montauk to be the best 20 year case, and those who have bought it before are buying it again, which is a good indication that it is the case the people want.

JOSEPH FAHYS & CO.

THE BEST JUDGES

Are the most critical as to the cutting, when considering the worth of a diamond—it's the cutting that makes the diamond brilliant—it's because of its brilliancy that the diamond is so highly prized.

The diamonds we offer are cut in our own cutting works, and no effort spared to see that they are cut right. The price we ask for them—the actual cost of the rough stone, plus the workmen's wages, with our modest profit added.

The REPAIRING

END OF YOUR BUSINESS IS THE
MOST IMPORTANT PART OF IT

More people come into your store to leave work than to purchase goods.

Almost every one of your good customers became so through your repair department.

Progressive jewelers know this and concentrate their efforts on the repair department of their business. They give it the most prominent place in their stores; they emphasize it in all their advertisements; they keep themselves and their employes thoroughly informed on the costs of all kinds of work, new ideas and methods; they are courteous and accommodating to repair customers; have all work ready when promised; and do only such work at home as they can do well.

They send all the rest to us.

We devote our entire time, energy, capital, and twenty-five years' experience to this important branch of the jewelry business; employ and educate the best help that can be obtained; systematize and inspect the work, and use every modern method to produce the best work promptly at reasonable prices.

It is to your interest to do business with us, it is to our interest to have you.

Let us work together.

SILVERWARE destined for the general service and adornment of the table should, in order to be wholly satisfying, possess not only a markedly decorative effect, but an opulent dignity and a well defined individuality of design.

¶ It is the belief of the Whiting Company that in their new Louis Quatorze pattern, which has been applied to every article suitable for table use, these essentials of success are very prominently displayed.

¶ With the confidence born of this belief, therefore, they beg to call attention to their novel and original treatment of one of the most popular, as it is one of the most effective, of historical styles.

WHITING MFG. CO., SILVERSMITHS
Broadway and 19th Street, New York.

Is There a Watch Trust ?

Is a Live Topic at the Present Time in Congress.

This Question Will be Fully and Able Elucidated

and every jeweler is urged to keep posted on this subject, as it will be not only instructive, but profitable to know of abuses that are of vital interest to all who sell Watches.

Why should the retail jeweler have to pay more for Watches than do department stores and mail order houses and scheme trades? is an old question.

And now comes another question of discrimination that is worthy of long discussion in the Congress of the United States.

The essence of the question is:

Why can American Watches be bought in other Countries for little more than half of what Americans at home have to pay for them ?

All who have the interest of the Watch business at heart can have copies of the speeches on this subject sent on application.

THE WESTERN CLOCK MFG. CO. LA SALLE, ILL.

THE AMERICA ALARM AND CLOCK

The AMERICA Alarm is what most alarms are not ; a clock, an accurate timekeeper, besides a mere sleep breaker.

BECAUSE the WESTERN casting process permits to make pivots of a highly polished wire, of the hardest steel and only 21 thousandths of an inch thick.

BECAUSE these pivots transmit to a hard steel and brass train the initial power, supplied by an elastic non-breaking mainspring, with a minimum friction loss.

BECAUSE the WESTERN hard steel pallets, locking and unlocking 250 times per minute on a clubbed-tooth wheel, produce an absolutely perfect escapement.

IT is the unanimous opinion of those jewelers who have examined the new O and 12 size movements of the ILLINOIS WATCH CO. that they are the best watches in these sizes ever manufactured in America.

It's Time to Go Yachting and Camping

Every jeweler should see that his stock is complete with Sternau Chafing Dishes, Dainty lunches, such as lobster a la Newburg, clams in every style, etc., can be prepared on board the yacht or at the camp, to satisfy the most fastidious.

The Chafing Dish with its accessories is almost indispensable where yachting and camping are concerned. Made in nickel-plate and silver-plate.

Our Traveling Companions and Touring Chafing Dishes are also desirable for yachting and camping. They take up but little room when not in use, as their parts are collapsible and fit into the cup or dish.

ROBT. LEVY, MANUFACTURING JEWELER
Green and Columbia Streets, Newark, N. J.

"We never follow the Fashion, the Fashions Follow Us."

MAURICE L. POWERS.

JOSH W. MAYER.

Distinctiveness.

SOME ONE with a mental twist that lets him say profound things cleverly, offers this: "We incline toward perfection through expression—by doing a thing as well as it can be done constantly and consistently it becomes a habit." We have found it so in the manufacture of our new productions—for them we can promise much—a deal more than you have ever found in Diamond Mounted Jewelry other than ours. Be specific, say you? Good. The first vital essential is the making—ours is expressive. It insures distinctiveness and character, perfect unity in proportion and grace in every line and curve.

The second is the style—that rests with you. We will present at our coming exhibition, to be held in our offices from August 13th to 18th inclusive, hundreds of different models, from the extremely conservative to the most radical which good taste sanctions.

Then the materials; we had rather not enter into a discussion nor will we evade the issue. No matter what price you elect to pay for any of our productions, we pledge ourselves as to the excellence and high grade of the Diamonds, Sapphires, Emeralds, Pearls or other precious stones used in any of our goods. That ends our contention, excepting the prices, which are our magnet, being the lowest in the market for the quality of goods.

Once a visit always a visit.

POWERS and MAYER,

Makers of Diamond Mounted Jewelry THAT SELLS.

258-260 Fifth Avenue,
NEW YORK.

We are always pleased to ship goods on memorandum when satisfactory references are given.

JUNE is the month of roses and we are busy all month turning out "Rose" jewelry for the Fall season. Our trade-mark, the "Rose," on any article stands for quality and excellence and has a reputation of forty years back of it.

Our new seller, "The Rose" thin model Swiss 15 jewel watch, cased up by the Crescent Watch Case Co., is moving rapidly and the trade who have handled same report sales right along. We have placed a rush order for an additional large quantity. If not already supplied, write us for sample.

Truth in Report That Rough Diamonds With Cleavage Lines Marked Are Imported at New York.

Diamonds with lines of cleavage marked in ink are not being imported, and a report at such a practice has begun is pronounced erroneous by the customs authorities. The report probably originated in the fact that some months ago an importing firm brought in a quantity of rough diamonds on which the lines of cleavage were marked in black ink. The Collector of the port called upon Gen. George W. Mindil, a precious stone examiner, as to whether or not these marks advanced the stones in value. Gen. Mindil advised that there was no advancement in condition, as these marks represented the labor of an expert cleaver. He said that if the time spent by the cleaver in tracing the lines was worth \$100, then certainly an additional value to that extent had been imparted to the stones. If the stones were imported with such lines drawn, he said, then the services of an expert cleaver would not be required in this country. A man with a slight training, it has claimed, could cleave after the lines were drawn. As the cleavers are the highest paid employes in the diamond business, the saving in labor was declared to be considerable.

The Collector accordingly took the position that if the stones were marked, then the duty of 10 per cent. would be imposed and the importation would not come in free of rough diamonds. An additional question was raised as to whether or not a penalty had been incurred by under valuation. The importers offered to erase the ink marks in the presence of the customs authorities, but the latter held that this could not be legally done. After conference, an arrangement was finally made so that the marked diamonds were sent back to Europe, to the consignor, who erased the marks and then returned them to this country.

Since that time, the customs authorities say, no rough diamonds have come into the port that bore any marks except those marked by nature.

Fire Does \$18,000 Damage to Stock of Simon Davis & Co., Pittsburg, Pa.

PITTSBURG, Pa., May 31.—The wholesale jewelry establishment of Simon Davis & Co., 725 Liberty Ave., was damaged by fire at 3 o'clock yesterday morning to the extent of \$18,000, with \$15,000 insurance. The cause of the blaze is not known, but it is supposed to have originated from crossed electric light wires.

The Davis establishment occupies the entire second story of the building at Liberty Ave. and 8th St., and the fire in it was discovered by a watchman of the building. It was turned in an alarm. The flames were confined to the second floor. The rear end of the jewelry establishment was gutted and the fixtures and the stock, except what was in the safes, were ruined. Two sample trunks were also destroyed.

Mr. Davis in speaking of his loss to-day said: "I carried a stock valued at \$22,000, with insurance of \$15,000 in many companies. The loss has not been adjusted by the companies, but will be in a day or two. The best jewelry was locked up in the safe. The origin of the fire is a mystery, and the

only plausible explanation seems to be that the electric light wires must have become crossed, because there was no fire about the building." Mr. Davis said that he has already resumed business and is now engaged in taking an inventory of the stock not scorched by the fire. Repairs to the damaged building will be made at once, but it will be several weeks before the store assumes its natural conditions.

Assistant Chief Robert McKinley, of the Pittsburg fire department, badly lacerated his left hand by pulling a hose through a brick window.

Jewelry, Clocks, Watches, Silverware and Kindred Lines Exported from New York.

Washington, D. C., May 30.—The following were the exports of jewelry, silverware and optical goods, clocks, watches and kindred lines from the Port of New York for the week just ended:

Alexandria: 2 packages clocks, \$110.
Bombay: 63 packages clocks, \$934; 15 packages watches, \$2,582.
Bremen: 1 package plated ware, \$150; 2 packages watches, \$1,325; 2 packages optical goods, \$306.
Buenos Ayres: 9 packages plated ware, \$1,100; 3 packages optical goods, \$152; 4 packages watches, \$764; 5 packages plated ware, \$628; 1 package jewelry, \$336; 1 package watches, \$518; 36 packages clocks, \$103.
Calcutta: 69 packages clocks, \$1,570; 12 packages clocks, \$210.
Capetown: 2 packages watches, \$381; 2 packages silverware, \$1,045.
Cardenas: 11 packages clocks, \$337.
Christiania: 17 packages clocks, \$590.
Colon: 1 package watches, \$190; 2 packages watches, \$156.
Copenhagen: 14 packages clocks, \$293; 6 packages silverware, \$114.
Delagoa Bay: 19 packages clocks, \$467.
Fayal: 18 packages clocks, \$190.
Genoa: 15 packages clocks, \$620; 2 packages jewelry, \$1,000.
Glasgow: 53 packages clocks, \$1,210.
Hamburg: 4 packages clocks, \$222.
Hamilton: 4 packages plated ware, \$168; 9 packages clocks, \$209.
Havana: 1 package jewelry, \$401; 1 package optical goods, \$134; 1 package silverware, \$237; 2 packages plated ware, \$1,477; 1 package optical goods, \$188; 7 packages jewelry, \$2,458.
Havre: 5 packages jewelry, \$475.
Liverpool: 3 barrels jewelers' sweepings, \$150; 128 packages clocks, \$1,376; 3 packages jewelry, \$583; 3 packages plated ware, \$1,183; 1 package jewelry, \$1,000; 2 packages optical goods, \$375.
London: 66 packages clocks, \$1,377; 1 package optical goods, \$583; 8 packages plated ware, \$706; 5 packages silverware, \$326; 12 packages optical goods, \$3,050; 22 packages watches, \$3,999; 1 package jewelry, \$455; 208 packages clocks, \$2,316.
Mazatlan: 8 packages clocks, \$230.
Montevideo: 1 package jewelry, \$354.
Naples: 2 packages jewelry, \$500.
Para: 2 packages jewelry, \$550.
Rio de Janeiro: 2 packages optical goods, \$1,641.
Savanilla: 20 packages watches, \$130.
Shanghai: 37 packages clocks, \$818; 2 packages watches, \$800.
Singapore: 2 packages plated ware, \$185.
Southampton: 1 package watches, \$325.
Sydney: 28 packages plated ware, \$2,697; 2 packages watches, \$175.
Tampico: 82 packages clocks, \$1,358.
Trinidad: 3 packages plated ware, \$229.
Valparaiso: 5 packages plated ware, \$781.
Vera Cruz: 5 packages plated ware, \$502; 10 packages clocks, \$108.

Mr. and Mrs. E. H. Hopkins, Penn Yan, N. Y., who recently returned from a three months' trip to California, had a fortunate escape from the catastrophe that visited San Francisco, having left the Palace Hotel just 12 hours before the earthquake occurred.

News of the Death of James D. Lincoln, a Great Shock to His Friends and Relatives.

NORTH ATTLEBORO, May 30.—The news published in the last issue of THE JEWELERS' CIRCULAR—WEEKLY to the effect that James Danielson Lincoln, a pioneer jeweler of Plainville, died suddenly Saturday, May 26, at his winter home in Pasadena, Cal., was a shock to the many friends and relatives of the deceased, who were not even aware that he was ill. His last letter home told of no ailment, but said that he was planning, in June, to make a journey to Alaska before returning to North Attleboro. Diabetes was given as the cause of his death.

Mr. Lincoln was born March 30, 1823, in the town of Brimfield, Mass., and was the

THE LATE JAMES DANIELSON LINCOLN.

son of Dr. Asa and Sarah E. (Danielson) Lincoln. At the age of seven his mother died and he went to live with his uncle and aunt in Franklin. He received his education in the Franklin and Wrentham academies, and after graduation taught school in Walpole. He then made preparations to become a physician, but circumstances, however, led him into business with his uncle, Fisher Thayer, of Wrentham, who was a thread manufacturer. When Mr. Thayer died, Mr. Lincoln became associated with the jewelry firm of Draper, Tift & Bacon, which, after Mr. Tift's death, became known to the trade as Lincoln, Bacon & Co. For some years he has been out of business.

In 1880 Mr. Lincoln married Mrs. Eliza Melcher, but had no children. In 1889 and 1890 he represented the town of Wrentham in the Legislature. Mr. Lincoln was always fond of his birthplace, and in 1903 presented his native town with a memorial library costing at least \$25,000.

Immediately upon receipt of the news of Mr. Lincoln's death, his step-son, Woodbury Melcher, hastened to California. In accordance with Mr. Lincoln's wish his body will be cremated and burial will be at Laconia, N. H.

J. F. Lindvall, Moline, Ill., has installed new fixtures and show cases and otherwise improved the interior of his store.

Graceful Example of British Silversmith
Presented to Sailors of the North
Atlantic Fleet.

AN example of graceful silversmithing seen in the cup illustrated on front cover of this issue, which was presented to the seamen of the United States North Atlantic fleet by the seamen of H. M. Second Cruiser Squadron, under command of H. S. H. Prince Louis of Battenberg. It is understood that this cup, which was recently exhibited by Tiffany & Co. New York, will be used as a yearly racing trophy for the best 12-oared boat crew of the North Atlantic fleet.

The cup, which measures 31 inches in height, was made in London, England, and is of silver, richly plated all over with gold. It is of urn shape and of a classical design much in vogue near the close of the 19th century. The inscription begins with names of the boats in the North Atlantic fleet, which took part in the entertainment of the squadron of Prince Louis, in the Fall of last year, as follows: *Maine, Alabama, Illinois, Iowa, Kearsarge, Kentucky, Massachusetts, Missouri, West Virginia, Pennsylvania, Maryland, Colorado, Mayflower, and Yankton*. Then follows this testimonial of friendship: "To the enlisted men of the North Atlantic fleet from their British cousins of the Second Cruiser Squadron on board the *Drake, Cornwall, Essex, Bedford, Cumberland*. In grateful remembrance of the many kindnesses, tokens of good fellowship and wonderful entertainments that were given to them in cordial friendship by their comrades across the sea, Annapolis, Nov. 1 to Nov. 20, 1905, New York."

Bill to Establish Court of Customs Appeals Introduced in Congress.

A bill was introduced at Washington last week, by Representative Needham, creating a United States Court of Customs Appeals, to consist of a Chief Justice and two Associate Justices appointed by the President and ratified by the Senate. The object is to take away from the circuit courts the appeals from the decisions of the United States Board of General Appraisers. Exclusive jurisdiction to review the Board's rulings is to be entrusted to the new court if it is created, and from the decisions of this court the only appeal would be to the Supreme Court of the United States.

Newberry, Mich., Jeweler Dies of Gunshot Wound Received by Accident May 13.

MARQUETTE, Mich., May 30.—Edward Gruber, a jeweler at Newberry, who was accidentally shot May 13 by Elizabeth Haining, his betrothed, while the couple were hunting, died May 25. The body was taken to Shepherd, Mich., Gruber's former home, for burial.

About two weeks ago a fire broke out in a store next door to the jewelry store of A. Steuber, Le Roy, N. Y. An explosion occurred which completely wrecked the show window on that side of Mr. Steuber's store.

Imports of Clocks, Watches, Jewelry and Gems Into Canada.

Death of Walter W. Chase.

PROVIDENCE, R. I., May 30.—The funeral of Walter Wayland Chase, well known in the jewelry circles, who died last Thursday was held from his late residence, 261 St. Monday. The services were conducted by Rev. Charles M. Melden, pastor of the Mathewson St. M. E. Church, where the deceased was an active member, and he attended by a large number of the members of the church as well as others who had come to love and respect the deceased. The bearers were Herbert S. Jones, Alexander J. Morrison, representing the Epworth League, and Elmer D. Nickerson and Carleton C. Carter, of the Young Men's class. The floral remembrances were unusually attractive. Interment was at the Mount Burial Ground.

Walter Chase died about 1 o'clock Thursday afternoon after an illness of less than a week, peritonitis being the cause of death. He was the son of the late William C. Chase and Aitana F. Chase, and was born in this city Dec. 15, 1866. He attended the common schools here and was a pupil at the North High School. After leaving school he entered the jewelry business and had followed it ever since. About six years ago he started with his father-in-law a jewelry manufacturing establishment on Clifford St. He made the style of the Chase Mfg. Co. For many years he was president of the Epworth League connected with the Mathewson St. M. E. Church, and was also a member of the Order of United Workmen.

The deceased leaves a widow and one brother, named A. Chase.

Jewelry Valued at \$2,730 Stolen from St. Louis Firm and Police Are Searching for Watchmaker.

ST. LOUIS, Mo., June 1.—Diamonds and jewelry of the value of \$2,730 were stolen from the Jaeger Loan & Jewelry Co., 2615 Olive St., and a watchmaker formerly in the employ of that firm and bearing the name of Eugene C. H. von Hartman is charged with the theft of the valuables.

The articles were stolen Tuesday night, according to the statement of J. M. Chiswell, treasurer of the company, but the robbery was not discovered until Wednesday morning, when Mr. Chiswell opened the safe. The articles were taken while the goods were being removed from the show windows to the safe, it is believed. The watchmaker did not return to work Wednesday, and has not since been found.

Von Hartman claimed to have been a captain in the German army, and also a veteran of the Spanish and Boer wars. He is tall and lanky, has four scars from sabre cuts on his left wrist, weighs about 170 pounds, and is in a sickly condition. He wore a high collar and a pair of elephant hide low-quarter shoes bought in London.

A reward of \$100 has been placed in the hands of Chief of Detectives Desmond, of the St. Louis police force, by the company for the arrest of Von Hartman.

Scott S. Rowley, for a number of years in the jewelry business at Brockport, N. Y., died of anemia, recently, in California, whence he had gone for a milder climate. The interment was made at Brockport.

Death of Reuben Harris.

WASHINGTON, D. C., June 1.—In the death of Reuben Harris, senior member of the firm of R. Harris & Co., which occurred at his residence in this city about 11 o'clock on the evening of May 28, the jewelry trade of Washington loses one of its oldest and best-known members. While Mr. Harris had been in bad health for some time his death was entirely unexpected. Early in the evening he had been conversing with A. D. Prince, his partner, and spoke about how well he felt, expressing his determination of going to the firm's store the next morning. His wife and two daughters were with him at the time he died and he passed away so peacefully that it was several minutes before they realized the end had come.

Mr. Harris had been a sufferer from a form of acute nervousness for more than a year and it finally resulted in a breaking down of his nervous system. Several months ago he went abroad and spent considerable time in the south of France and in Italy for the benefit of his health. About two weeks ago he returned and paid one visit to the store, greeting his associates and employees. Since then he had been confined to his home.

Reuben Harris was born in New York, Oct. 9, 1857, and was of Scotch and English descent. He was engaged in the jewelry business here for a period of 28 years, being associated with A. D. Prince, who was a first cousin. He was educated for the most part at various educational institutions in Berlin and was an accomplished linguist, speaking fluently English, German and French. Mr. Harris is survived by his wife, and two married and two single daughters.

Regarding Mr. Harris a friend said: "He was a man of the most genial disposition. As a business man he was exceptionally successful, and he had the distinction of being one of the best judges of precious stones in this country."

The funeral services were held at the home of the deceased on 16th St., at 10 o'clock, Thursday morning, being conducted by Dr. Louis Stern, of the Washington Hebrew Congregation, and Rabbi Abram Simon. The latter delivered the funeral oration, which was both eloquent and touching. He said that Mr. Harris, by his exemplary life, had won the admiration and respect of all with whom he came in contact. Possessed of that tremendous energy for which he was noted, he overtaxed himself, but in doing so he won the unstinted admiration of all, owing to his integrity and strict probity.

At the conclusion of the services the casket was borne to the hearse through double lines of a delegation of St. John's Lodge, No. 11, F. A. A. M. The pallbearers were David Frankel and Isadore Saks, New York; Louis Stern, Philadelphia; S. Salabes, Baltimore, and Charles Goldsmith, Emile Berliner, Ernest Mayer and Harry King, of this city. The Masonic service was omitted and the interment was private at the cemetery of the Washington Hebrew Congregation.

W. S. Johnson has sold out his entire stock of jewelry, etc., in Baxter, Ia., to George H. Pease.

MEMORANDUM ORDERS SOLICITED.

First Prosecution Begun Under Gold Law of New York—Wrangle Results in an Adjournment.

Finkel, of Locketz & Finkel, jewelry manufacturer at 318 E. Houston St., New York, Friday afternoon was before Magistrate Finn, in the Essex Market Court, to answer a charge of violating the gold stamping law of New York. The complaint was made by J. Jacques, of the Brooklyn Watch Co., 275 Bowery, who claimed that Finkel had sold him a chain slide that did not assay up to the quality mark stamped on it.

For four years the complainant said he had bought from time to time from the defendant slides which were afterward used in making up chains. The last purchase made several years ago was of 21 slides, for which a bill of about \$30 was rendered. The slides were marked 14k. and bore the firm's initials. The bill as rendered describes the property as 14 karat slides. One or more of these slides were assayed and, it is claimed, showed less than 14 karat quality.

A denial was made by the defendant as to the fact that slides, guaranteed to be 14 karat in fineness, were sold to the complainant. The contentions of the defense, so far as they were brought out at the trial, were in relation to the veracity and motive of the complainant and the accuracy of the assay.

When the case was called Irving Kremer, of Kremer & Kremer, who appeared as counsel for the complainant, briefly stated to the Magistrate the character of the proceeding. The attorney said that he could prove by the testimony of a representative of the United States Assay Office that the slides did not assay 14 karat in fineness, and did not assay up to 13 karat in fineness, although the law allows a maximum variation of only one karat from the mark.

Laurice Blumen, of the Brooklyn Watch Co., testified that he bought the slides, and he asked Mr. Finkel if he was positive as to the slides being of 14 karat gold. Mr. Finkel replied emphatically that the gold was of the designated standard. The bill that was rendered was presented in evidence. The witness said that he tested one of the slides and found that it was below the standard. He said that he had sent two slides to the United States Assay Office to be assayed. His partner, J. Jacques, carried the slides to the assayer for that purpose.

The slides sent to the assay office were introduced in evidence. One had been cut into two halves, and one of the pieces had been assayed. The other slide had been assayed as a whole.

Col. L. Jungentob, the attorney for the defendant, then cross-examined Mr. Blumen. In answer to a question the witness said that his firm now manufactures slides. Mr. Kremer objected that this evidence was immaterial, but the Magistrate ruled that it was proper for the defendant to go into the question of the complainant's motive and if business rivalry could be shown. Some questions were also asked in relation to a series of the complainant's notes held by the defendant. Mr. Jungentob said that according to proof which would be introduced the summons in this case was served

on the day when one of these notes fell due.

Questions were also asked by the defendant's attorney to indicate the possibility of somebody tampering with the slides after they were delivered by his client and before they reached the assay office.

Mr. Kremer kept up a line of vigorous objections to the questions asked on cross-examination, and said the opposition was prematurely going into issues before the complainant had opportunity to present the affirmative evidence.

The principal trouble came when Mr. Blumen was asked for the stone on which he made his preliminary test, and to demonstrate to the court how he did it.

Mr. Kremer said that his client was not an expert, and that it was the intention of the complainant, as soon as the court would permit, to introduce the expert from the assay office, who was qualified to testify along this line. The magistrate ruled, however, that as Mr. Blumen had been for a number of years in the business and had actually made a preliminary test, the questions were proper.

When the testing stone was produced the defendant's counsel demanded to know where was the impression made by the test, and intimated that its disappearance from the stone was suspicious. Another slide similar to those that were assayed was presented to the witness by the defendant's lawyer, who asked that this be also tested. Again Mr. Kremer vigorously protested, saying that this outside slide had nothing to do with the case, that his client was in no respect qualified to give evidence of the character required, and that such evidence was immaterial.

During the discussion that arose Mr. Blumen insisted on answering some questions after his counsel had instructed him not to do so. The witness remarked that he had nothing to conceal, and wished to be entirely fair. Mr. Kremer, who had been getting more and more impatient, remarked that the examination could not go on, as he could not permit himself to be made a fool of by his client.

Magistrate Finn arose from the bench and was about to leave the room, apparently not intending to hear any more of the case. Mr. Kremer apologized, however, and the Magistrate consented to have the hearing continued next Friday before him in the 57th St. Court.

Mr. Cummings, of the United States Assay Office, was on hand as a witness, but his testimony was not introduced at this hearing. It was said his assays showed a fineness respectively of 11 $\frac{3}{4}$ and 12 $\frac{2}{10}$ karat, the former being of a half and the latter of an entire slide.

It will be contended by the defendant that the assay of the upper half of the slide was unfair because it included a stone-set ornament soldered in 10 places to the slide. The top and bottom of the slide are soldered to the sides.

Wm. McElroy, Plainfield, N. J., who was arrested last week while intoxicated had in his possession three nickel watches, a score of cheap rings, a quantity of plated chains, tea spoons and other articles. He denied that the property had been stolen, but the police are holding him pending an investigation.

Chicago Jobbers Organize to Prevent Manufacturers Selling to Both Retailers and Wholesalers.

CHICAGO, June 2.—One of the most important meetings ever held in the jewelry trade in Chicago took place this week, when prominent members of every jobbing jewelry house in Chicago met to devise plans for combating the manufacturers of plated and filled jewelry who sell both the retail and jobbing trade. The prosperous condition of the country in general has led many manufacturers to increase their output. Cities and towns heretofore visited only by the jobber have lately been invaded by the manufacturer. The increased facilities of transportation afforded by the electric inter-urban lines have made it possible for the manufacturer's representative carrying a small special line to visit towns heretofore considered jobbers' exclusive territory.

While the wholesale jewelry trade here is in a very prosperous condition, yet the jobbers think it is unfair for a manufacturer to sell to them and then try to sell the same goods to the jobber's customers. With this condition confronting them an organization has been formed here with the view of curtailing some of the abuses which are considered to exist.

The plan for such an organization has been discussed for some time in the past. Its culmination came this week when the association was organized with the following officers: President, Julius Schnering, of Otto Young & Co.; vice-president, B. C. Allen, of Benj. Allen & Co.; secretary, Harry Cohen, of the Stein & Ellbogen Co.; treasurer, Harry Hahn, of H. F. Hahn & Co. These gentlemen, together with Lem. W. Flershem, of Lapp & Flershem, and Mr. Alister, of Norris, Alister & Co., also constitute the Board of Directors.

The association, while not aiming to take drastic measures against manufacturers who sell both the jobbing and retail trades, seeks to protect itself and aims to have a harmonious understanding with certain manufacturers who are working strongly to sell both branches of the trade. Notices will soon be sent to all manufacturers who sell the jobbing trade and a "get-together" conference will probably soon be held.

Canadian Firm Accused of Illegally Stamping Word "Sheffield" on Cutlery Made in Niagara Falls.

NIAGARA FALLS, CAN., June 1.—The Ontario Silver Co., of this place, is charged with violating the Canadian law by the wrongful stamping of cutlery manufactured by them. An information was laid by Chief of Police Mains against George W. Clark, manager of the company, and the case came before Police Magistrate Crikshank, May 30, and was adjourned for a week.

The information accuses the defendant of unlawfully conspiring by deceit and falsehood and other fraudulent means to defraud the public, contrary to the criminal code. It is alleged that the Ontario Silver Co. has been making cutlery and stamping it falsely with the word "Sheffield" as though it were made in Sheffield, Eng. The cutlery so marked was afterward sold throughout Canada through wholesalers, jobbers, manufacturers and retailers.

The police searched the factory premises and discovered the following among other things:

Sheffield Knife Co., No. 12, Sheffield, England.

Manufactured by Leonard & Lee, Sheffield—two knives marked on handle 710 and 5.

Royal Oak Cutlery Works, Sheffield (Ro.).

Royal Cutlery Co., Sheffield, England.

The correspondence obtained in the office of the company is said to indicate that the company proposed to stop the use of these dies when the stock of cutlery already marked with them had been disposed of.

The proceedings have been instigated by the Cutlers' Co. of Sheffield, which is a sort of guild representing the cutlery industries of Sheffield, Eng., which are acting for the protection of Sheffield's reputation. Information came to the Cutlers' Co. early in 1904 that a very large manufacturing trade was being carried on in Ontario in common cutlery which was marked "Sheffield, England." The case was put into the hands of the Cutlers' Co.'s lawyers, one of whom was about to visit Canada to interview the Canadian government, which he did in October of that year. He saw Hon. Sydney Fisher, Minister of Agriculture, and urged that proceedings should be instituted under the merchandise marks act with a view to putting a stop to the infringement. Mr. Fisher promised to have the matter referred to the Justice Department for an opinion.

For some time nothing was done, but finally as the Cutlers' Co. urged the matter persistently and secured the intervention of the British Colonial Office, the Department of Justice stated that proceedings would be taken against the offenders under the criminal code, but that as the administration of criminal law rested with the provincial and not the Dominion authorities the attention of the Attorney-General of Ontario should be drawn to the case. This course was taken by the Cutlers' Co. through its solicitors, Malone, Malone & Holden, of Toronto, with the result that after long delay the machinery of the law has at last been set in motion.

The case excites widespread interest in the trade, as many houses have these goods

in stock and the clauses of the code under which action is taken render the seller equally liable with the manufacturer.

Atlanta Jeweler Swindled With Worthless Checks, But Subsequently Recovers the Articles Sold—Warning for Bankers.

ATLANTA, Ga., June 1.—Several prominent jewelers of Atlanta, among them N. Kaiser & Co., 15 Decatur St., are said to have been the victims Thursday afternoon of a man passing under the name of E. W. Jordan, who passed checks purporting to be drawn by the Baldwin Locomotive Works, Philadelphia, on the Philadelphia National Bank. Over \$1,000, it is said, was thus secured and Jordan escaped from the city.

Jordan approached Mr. Kaiser, representing himself as being associated with the Baldwin Locomotive Works. After having made several purchases, the man presented a check on the Philadelphia National Bank in payment. This check was immediately sent to the Fourth National Bank of Atlanta, and returned. At the same time Charles A. Ryan, cashier of the Fourth National, visited Mr. Kaiser and explained why.

L. P. Hillyer, secretary of the Georgia Bankers' Association, had recently sent out a warning to banks over the State, cautioning them against checks signed by a man named Jordan. When Mr. Kaiser therefore sent such a check he was informed of Jordan's character. This happened about five minutes after the man had secured the goods.

Mr. Kaiser chased up the street in pursuit of Jordan, and later in the day, in some manner concerning which the dealer declines to talk, the jewelry was restored.

Jordan has not been captured, but his arrest is expected.

Jordan is described in Secretary Hillyer's circular as a tall, broad-shouldered, light-complexioned man, slightly bald.

Cincinnati Police Arrest Negro Who Is Accused of Robbing Windows of Many Jewelers.

CINCINNATI, O., June 2.—James Taylor, alias "Gravy," a negro, was brought before the local criminal court yesterday on the charge of larceny, waived examination, and was bound over to the Grand Jury in \$5,000 bail. The arrest of Taylor, Saturday afternoon, has wound up a series of window robberies which have been going on for the last six weeks, and which have been a great puzzle to the police. The prisoner is the man who broke and robbed the windows of William Fink, 1424 Main St., and also that of Jacob Morris, at 1227 Vine St.

Taylor's third and last attempt at robbing jewelry store windows was made Saturday, when he smashed a window in the store of Andrew Alich at 930 W. Liberty St. and succeeded in getting about 12 rings set with diamonds, opals and pearls, and valued at about \$700. Taylor carried a granite brick wrapped in a newspaper and waited his chance to break the window. When the proprietor's back was turned he completed his work, mounted a stolen wheel which he had in hiding, and rode away.

Twice before he had done this successfully and disappeared, though the police started after him; but after the robbery of Mr. Alich's store the police tracked him to a cellar of a private residence on Freeman Ave., not far distant, and forced him to surrender at the point of revolvers.

When taken into custody, Taylor told the officers where to find the plunder he had hidden in the cellar. Eight rings of the 12 stolen from Mr. Alich were found in the rafters, and four are still missing. Part of the loot from the Morris and Fink robberies had previously been located in other places.

Taylor has been out of the workhouse about two months, and had been staying at Lockland, O., but came to the city occasionally to rob jewelers. Two years ago, it is said, he stole about \$7,000 worth of gems from the Palm Beach Hotel in Florida, where he was employed as waiter, and the most of this was recovered in Cincinnati. He is said by the police to have served a term in a New York prison under the name of Charles Johnson, for grand larceny.

Mae Thomas, Who Swallowed Diamond Stolen from Omaha Jewelers, Refuses to Undergo Operation and Will be Placed on Trial.

OMAHA, Neb., May 31.—The \$350 diamond swallowed by Miss Mae Thomas, three weeks ago, in the jewelry store of T. L. Combs & Co., has been located by the X-ray process, tightly clinging to the intestines in the region of the appendix. According to experts who have examined Miss Thomas, the membrane surrounding the diamond is inflamed and may cause appendicitis, thereby making an operation necessary.

It is said that the culet, or elongated point on the under side of the diamond, has penetrated the walls of the intestines and is stuck in that position. Whether or not it will ever be dislodged without an operation is a question. Physicians say that mucus may form around the stone in such quantities as to prevent it from ever troubling the girl.

She has been confined in the County Jail, and for a time it was believed that she would submit to an operation. The pain which she seemed to feel for several days subsided and she refused to allow the doctors to operate, although willing to take any medicine offered. She says that she would like to have the diamond removed, but objects to the use of a knife.

To-day it is given out that the young woman will be placed on trial for grand larceny, and as she has already confessed the theft of the diamond, it is supposed that a sentence of imprisonment will be imposed.

A meeting of creditors of Henry Greenbaum, Richfield Springs, N. Y., who is in bankruptcy, was held before Referee Hoyer at Oneonta last week, and the creditors elected David W. Woods, of Richfield Springs, as the trustee. Many claims were filed. The trustee was required to give a bond for \$4,000 and he has taken possession of the bankrupt's property.

Frank Allsopp Killed in an Automobile Accident and His Wife Badly Injured.

NEWARK, N. J., June 4.—The funeral of Frank Allsopp, of the wholesale jewelry manufacturing firm of Allsopp & Allsopp, Columbia St., this city, was held this afternoon at the home of his parents, Mr. and Mrs. George Allsopp. It was largely attended by members of the trade and business men generally, as he was more than ordinarily popular.

Mr. Allsopp's sudden death in an automobile accident near New Brunswick, Friday, was a great shock to the business community, particularly the jewelry trade. His wife, who was seriously injured in the same accident, was brought from the Wells Hospital at New Brunswick on Saturday afternoon and is now in St. Michael's Hospital in this city. She was told of her husband's death just before leaving New Brunswick as she insisted upon having him taken to Newark with her or knowing exactly what had happened to him. She has borne up remarkably under the shock. Both her legs are broken and one of her knees shattered. A successful operation was performed on the latter Saturday night, and to-day it was said that she is improving and that in the absence of any development of internal injuries which was at first feared it is now expected that she will recover.

Mr. Allsopp was an ardent automobilist. He had owned a big and powerful touring car since Easter week. With his three daughters and his wife he made a fast run to Asbury Park on Friday, starting on the return trip to Newark at 1 o'clock in the afternoon. The three young women are the Misses Nellie and Annie Allsopp, daughters of Henry Allsopp, also a manufacturing jeweler, and Miss Florence Baker, of 21 Madison Ave. They occupied the rear seat of the machine.

While running at high speed on a straight stretch of road near Old Bridge, Mr. Allsopp tooted his horn for a wagon, which was ahead and going in the same direction, to turn out. The driver did so, but when Mr. Allsopp tooted his horn a second time the driver evidently became confused and turned back into the middle of the road and then directly across the path of the touring car. In order to avoid a collision Mr. Allsopp turned his machine sharply to the side of the road. Unfortunately there was a telegraph pole at that spot. The machine struck it with frightful force just as Mrs. Allsopp slid out of the machine to the ground and Mr. Allsopp slid into her seat. The front end of the automobile was smashed up and a piece of it struck Allsopp on the left side of the head, fracturing his skull and causing almost instant death. The three young women were brown at least 30 feet but escaped serious injury. Mrs. Allsopp lost consciousness and was later removed to the New Brunswick Hospital, the body of Allsopp being taken to a morgue in the same city.

Mr. Allsopp was a partner in the jewelry business with his brothers Thomas, Albert E. and Edmund F. He was one of seven sons, and was 31 years old. He was married but leaves no children. He had been highly successful in business.

Death of David Daggett Coddington.

NORTH ATTLEBORO, June 3.—David Daggett Coddington, one of the foremost citizens of North Attleboro and one of its pioneer jewelers, died this morning after an illness which extended over a period of months.

Mr. Coddington was born in Attleboro, Aug. 25, 1832, the son of Chloe Daggett and Abiel Coddington. At the age of 16 he removed to North Attleboro, and has made his home here ever since. He was one of the early partners in E. Ira Richards & Co., and assisted in the formation of T. I. Smith & Co., which is to-day one of the biggest jewelry concerns in the United States. After his withdrawal from T. I. Smith & Co. he founded the firm of D. D. Coddington & Co. When this concern went out of existence in 1888 Mr. Coddington withdrew from active business life.

Mr. Coddington married Miss Pemelia Kent, of Attleboro. From the union were born six children, five of whom survive—Mrs. E. A. Follett, D. Edgar Coddington, Mrs. George W. Cheever, of Boston; Miss Ada Coddington and Mrs. Newell C. Bullard. The funeral will be held Wednesday afternoon at his late residence, 21 High St.

Death of James R. Connell.

PORTSMOUTH, N. H., May 30.—James R. Connell, who died suddenly of heart disease Sunday, was the oldest jeweler of this city and had been in business continuously for over 35 years.

The deceased was born at Schroon Lake, N. Y., in 1849, and became a member of the firm of Hutchinson & Connell, in 1872, continuing until 1880, when the firm dissolved. Both partners remained in the trade, conducting separate establishments. Mr. Connell had a good business and built up a large trade. Outside of the jewelry business Mr. Connell was interested in other enterprises and was one of the most prominent merchants of the town. He was highly regarded as a citizen and had held several positions of trust, at one time being a member of the City Council. He is survived by a widow, three brothers and three sisters. One of his brothers was Congressman from Nebraska and was succeeded in 1890 by William J. Bryan. The funeral was held Tuesday.

The first of what is to be a series of baseball games between nines recruited from Philadelphia jewelry houses was played Saturday at Logan between teams representing M. Sickles & Sons and S. O. Hurlburt & Sons. Sol. Sickles provided the balls and bats, and the employees of both establishments, as well as many other baseball enthusiasts in the trade witnessed a well-played game. Max Polak captained the nine of M. Sickles & Sons, and John A. Smith that of H. O. Hurlburt & Sons. The score was 22 to 7, in favor of M. Sickles & Sons' team. The line up was as follows: M. Sickles & Sons—G. Hunt, ss.; C. Levy, lb.; T. Baer, c.; B. Kirscher, p.; B. Robertson, 3b.; M. Polak, rf.; T. Madden, 2b.; C. Bohrer, lf.; B. Artz, cf. H. O. Hurlburt & Sons—H. Shope, lf.; E. Farnan, cf.; J. Weyl, lb.; E. Kranich, ss.; Seels, rf.; F. Barman, 3b.; F. Hurlburt, 2b.; J. Smith, c., and P. Schropter, p.

Certain Buckles and Millinery Ornaments Held to be Dutiable at 45 Per Cent.

Dress and belt buckles and various millinery ornaments are held to be dutiable at 45 per cent, as manufactures of glass or paste and not at 60 per cent, as jewelry by a decision announced last week by the Board of United States General Appraisers, New York, sustaining in part a protest of Hawley, Green & Engel, against the assessment of duty by the collector at New York. General Appraiser Sharretts in his opinion says:

"The merchandise covered by these protests consists of—

"1. Dress and belt buckles, clasps, slides, cabochons, and other ornaments composed of steel or other base metal, some of which are more or less elaborately enameled and some set with imitations of diamonds, rubies, sapphires, etc., all the foregoing being similar to the merchandise covered by findings 2 and 3 of G. A. 6141 (T. D. 26681).

"2. Ornaments composed of metal and paste in imitation of jet, returned by the appraiser as manufactures of colored glass and metal, glass chief value, and assessed by the collector with duty at the rate of 60 per cent, ad valorem under Par. 100, tariff act of 1897, said ornaments being similar to those passed upon by the Circuit Court for the Southern District of New York in *Bader v. United States* (116 Fed. Rep., 541).

"From the Board's decision in G. A. 6141 (*supra*), wherein it was held that belt buckles and clasps similar to those now in dispute were dutiable at 60 per cent, ad valorem under Par. 434, the importers duly appealed to the Circuit Court for the Southern District of New York, *Blumenthal v. United States* (suit 4108), and introduced additional evidence before the referee.

"Influenced by the decision of the Circuit Court of Appeals, second circuit, in *United States v. Schiff* (139 Fed. Rep., 549; T. D. 26492), an order of reversal has now been entered in suit 4108 (*supra*), and acquiesced in by the Treasury Department, following which acquiescence of the Department we sustain the claim in the protests that all the merchandise returned by the appraiser as jewelry and assessed with duty at the rate of 60 per cent, ad valorem is dutiable at 45 per cent, ad valorem under Par. 112 or 193, tariff act of 1897.

"As to the merchandise included in the second class, on the authority of *Bader v. United States* (*supra*), we also sustain the claim in the protests that the same is dutiable at the rate of 45 per cent, ad valorem under Par. 112.

"The decision of the collector in each case is reversed to the extent indicated."

Scenes in San Francisco.

Snapshots of Jewelers and Jewelry
Store Sites Taken by a New Yorker
Directly After the Earthquake.

Pictures presented in this issue of scenes in San Francisco are from photographs taken immediately after the great earthquake by Fred. H. Wilkinson, who for a number of years has traveled in the west for the A. Wittnauer Co., 13 Maiden Lane, New York. The prints were kindly loaned to THE CIRCULAR-WEEKLY by Mr. Wilkinson in order that its readers might have an opportunity of getting from them a vivid impression of the happenings in the city as they were recorded by his faithful camera.

When the earthquake came Mr. Wilkinson was in bed at the Palace Hotel. He hurried down to the office and took his three sample cases to the Crocker-Woolworth safe deposit vaults. After some difficulty he prevailed upon the night watchman to place the cases inside the door, and the watchman said that a little later they would be put in one of the vaults. The traveler had, therefore, the satisfaction within an hour after the earthquake of seeing his cases in a comparatively safe place. The watchman, however, refused to give any receipt. Later in the day Mr. Wilkinson returned to learn if the cases had been placed in the vaults. At that time everything was in confusion. He found that the vaults were packed full and was told that his cases were inside one of them. With much difficulty he induced the officers of the company to open the vaults until he finally satisfied himself that the cases had been thrown together with all kinds of property, all in the greatest confusion. The officers of the company would give no receipt for anything. They had by that time a force of watchmen who saw that nothing was taken away.

From the day of the earthquake until May 6 Mr. Wilkinson remained in the city, at which time he came east he had the knowledge that all his samples had been saved, the cases having been returned to his custody. During that time Mr. Wilkinson enjoyed the hospitality of G. A. Fleissner, of the Fleissner & Marshall Co. The jewelry firm's store was in the wrecked district, but Mr. Fleissner's home was fortunately 10 or 12 blocks from the edge of the fire zone. Mr. Wilkinson says that to Mr. Fleissner's open-hearted hospitality a number of persons in the trade are under deep obligation.

Herbert Van Ness, who represents several Newark and New York houses in San Francisco, his brother Arthur Van Ness, who was associated in the business, and the mother were sheltered at the Fleissner home.

Having plenty of time on his hands Mr. Wilkinson went about with his camera and obtained one of the finest collections of photographs of the ruins in different parts of the city that has been seen in the east. The pictures in this issue were selected because of special interest to members of the trade.

In the accompanying pictures No. 1 shows a group of jewelers who have been out foraging and are returning to G. A. Fleissner's residence. The group included Mr. Fleissner and David Marshall, of the

San Francisco's Wholesale and Retail Houses Re-Establishing Themselves in the City—Jobbers Moving Back from Oakland.

SAN FRANCISCO, Cal., May 31.—The San Francisco wholesale trade has been busy this week getting itself re-established in San Francisco. Most of the jobbers, who were for a time in the Globe Hotel building in Oakland, are now located in San Francisco, where stock is being arranged for business. The quarters so far occupied are

LEVINSON BUILDING, SHOWING RUINS OF STORES OF W. K. VANDERSLICE CO. AND CALIFORNIA JEWELRY CO.

G. A. Fleissner is at the right, and his clerk, Herbert Brandon, at the left. The safe sank out of sight.

The seventh floor of the Camm building is shown in picture No. 6. Mr. Wilkinson is standing on a girder, where had been the office of Wm. Landrum, the representative of several eastern jewelry houses.

John and Julius Hammersmith, of Hammersmith & Field, are standing outside their wrecked store in picture No. 7, and are looking at the ruined interior.

In the picture No. 8 John Hammersmith and an employe have entered the store and are shown standing at the safe. It will be noticed that the door of the safe is partly open. Whether it was accidentally left open before the fire, or was loosened by the flames, is uncertain.

After the ruins of Hammersmith & Field's store had been carefully searched under the direction of the members of the firm a part of the debris was thrown across the street. The picture No. 9 shows a group of men searching this debris thinking that something of value may be found there.

A group standing outside of G. A. Fleissner's house is shown in the last picture. At the left, wearing a soft hat, is Herbert Van Ness; next to him is his brother, Ar-

more or less incomplete, and the furnishings are not of the best. Jobbers have been obliged to content themselves for the time being with whatever is most available in the way of safes, counters and wall cases.

Some retail stores which were established early on Fillmore St. are doing well with certain classes of goods. Most of the best-known stores are, however, still only partially established. The new stores on Van Ness Ave. are being put up rapidly and will be occupied within a week or two. One retail store has already announced a location in the downtown district on Market St. There is a notable falling off in the number of booths and tents, which have been scattered along Market and other streets for the sale of curios, burned jewelry and silverware, burned art goods, and other novelties recovered from the ruins of Chinatown. The city authorities have imposed a license and other restrictions which are tending to reduce the number of these transient establishments.

In Oakland the trade is heavy and the jewelers are doing a better business than before, the increase in population making itself felt. There has, however, been a decided inflation in rents and this is causing adverse comment.

The Diamond Markets.

ANTWERP, May 24.—Business is exceptionally quiet at present, owing chiefly to the scarcity of the desirable goods. Very large stones are not asked for, but small white and light brown roses, as well as good m \acute{e} l \acute{e} e of about 250 francs per carat, are in great demand. Clean goods being scarce, ordinary sorts, such as brown, yellow and "tatis" are selling at good prices. The same can also be said of defective stones.

A well-known diamond manufacturer, J. F. De Roeck, living at Berchem, Longue rue St. Jacques, 97, died recently at the age of 41 years.

The following are among those who have been here during the past fortnight: Messrs. Jacob Strauss, Alf. Loewenthal, Ben Rees, Rosenlack, Laubheim, De Sola Mendes, of New York; Mr. Sickles, Philadelphia; Mr. Kohn, Vienna; Messrs. M. Slabetzky, Wmsz B. Rapoport, Slycer, Mitacouolo, Arm. Levy, Herrenstein, Aronstein, S. Horowitz, Lambert fr \acute{e} res, M. De Vries, all of Paris; Mr. Monnaschn, St. Petersburg; Mr. H. Strauss, Hanau; Mr. Churgin, Kiev; Mr. Sonner, Basel; Mr. Beckman, New Zealand; Messrs. Abend, Frenzel, Berlin; Mr. Kahn, Stuttgart; Mr. Urbanck, Frankfurt at Main; Mr. Goldsmidt, London; Mr. Weintraub, Warsaw; Mr. J. Benhaun, Constantinople; Mr. Krall, Elberfeld.

The "Gilde der Antwerpse Diamant Nyverheid," which has employers as honorary members, celebrated the anniversary of its founding by a procession followed by a meeting and ball at the Grand Cafe, rue Breydel.

AMSTERDAM, May 23.—A slight improvement in the diamond trade here has been noticed within the last few days. There have been several good purchases by American buyers of m \acute{e} l \acute{e} e in two, three and four grains. Numerous merchants and brokers left recently for Paris, taking with them a stock of small roses and brilliants. Merchants in this city were able to procure more lots of rough diamonds at London. They bought Bultfontein, Kimberley, Westselton and Jaegersfontein diamonds.

The several local diamond shops are still working full force.

PARIS, May 24.—The weather is bad, and the condition of the precious stone market is not much better. The number of foreign merchants who were looked for this month has been fewer than expected, in consequence of which the transactions were not as large as hoped for. The sale of diamonds were not so good, but pearls were bought in much larger quantities. Colored stones are very quiet at this time, due to the fact that many of the regular buyers of this kind of goods have not yet arrived.

The firm of Picard & Carpentier was recently established, with offices at 8, rue de Choiseul, for a term of four years with a capital of 75,000 francs.

Mr. Menki, a diamond merchant of rue de Chateaudun, was married last week to Miss Merwick.

Large quantities of industrial "borts" were placed on the market and sold.

Board of United States General Appraisers Passes on Cases Involving Duties on Jewelry and Precious Stones.

The Board of United States General Appraisers, New York, have announced, in the last week, the following decisions on cases involving duties on jewelry, precious stones and imitations:

MILLINERY ORNAMENTS.—Protest of J. Johnson & Co. against the assessment of duty by the Collector at New York. G. A. 6130 (T. D. 26653) followed, relating to millinery ornaments.

RECONSTRUCTED RUBIES.—Protests, etc., of G. A. Woodman *et al.* against the assessment of duty by the Collector at Chicago. G. A. 6336 (T. D. 27278) followed, relating to reconstructed rubies.

IMITATION PRECIOUS STONES.—Protests, etc., of Albert Lorsch & Co. against the assessment of duty by the Collector at Providence. G. A. 6289 (T. D. 27112) and G. A. 6342 (T. D. 27292) followed, relating to imitation precious stones.

IMITATION PRECIOUS STONES.—Protests, etc., of Loeb & Co. *et al.* against the assessment of duty by the Collector at New York. Same as above.

BRASS SWIVELS—PARTS OF JEWELRY.—Protests, etc., of C. B. Richard & Co. against the assessment of duty by the Collector at New York. G. A. 2889 (T. D. 7255) followed, relating to brass swivels and parts of jewelry.

BRASS SWIVELS—PARTS OF JEWELRY.—Protests, etc., of Manhattan Chain Co. *et al.* Same as above.

PRECIOUS STONES.—Protest of G. Veeck against the assessment of duty by the Collector at New York. The merchandise consisted of precious stones cut in the form of beads and of drops or pendants, but not set. As claimed by the importer, it was held dutiable as precious stones cut but not set under Par. 435, Tariff Act of 1897. G. A. 6097 (T. D. 26586) followed.

RECONSTRUCTED RUBIES.—Protests, etc., of American Express Co. *et al.* against the assessment of duty by the Collector at New York. Same as above.

RECONSTRUCTED RUBIES.—Protests, etc., of A. G. Guerdin against the assessment of duty by the Collector at Philadelphia. Same as above.

ORNAMENTAL PINS—JEWELRY.—Protest of Goldberg & Co. against the assessment of duty by the Collector at New York. The articles in dispute consisted of fancy ornamental pins, which the Board held to have been properly classified under Par. 434, Tariff Act of 1897, as jewelry.

CHATELAINE BAGS—LACE WEARING APPAREL.—Protest of C. H. Wyman & Co. against the assessment of duty by the Surveyor at St. Louis. On the authority of Tiffany & Co. v. United States (T. D. 25316), the Board held chatelaine bags set with imitation of precious stones not to be jewelry but to be dutiable as manufactures of metal under Par. 193, Tariff Act of 1897, as claimed by the importers. Certain wearing apparel was held to have been properly classified under Par. 339, relating to embroideries and articles composed in part of lace. G. A. 5866 (T. D. 25844) followed.

RECONSTRUCTED RUBIES.—Protests, etc., of Sam Hochhaus *et al.* against the assess-

ment of duty by the Collector at New York. G. A. 6336 (T. D. 27278) followed, relating to reconstructed rubies.

TOY JEWELRY.—Protest of A. Strauss & Co. against the assessment of duty by the Collector at New York. Certain jewelry designed solely for the amusement of children was held dutiable as toys under Par. 118, Tariff Act of 1897. Strauss v. United States (T. D. 26903) followed.

IMITATION PRECIOUS STONES.—Protest of Rud. C. Hahn & Co. against the assessment of duty by the Collector at New York. G. A. 6289 (T. D. 27112) followed, relating to imitation precious stones.

IMITATION PRECIOUS STONES.—Protest of H. Nordlinger's Sons against the assessment of duty by the Collector at Providence. Same as above.

IMITATION PEARLS, PIERCED.—Protest of Overton & Co. against the assessment of duty by the Collector at New York. G. A. 6088 (T. D. 26554) followed, relating to pierced imitation pearls.

BELT PINS.—Protests, etc., of Callender McAuslan & Troup Co. against the assessment of duty by the Collector at Providence. G. A. 6139 (T. D. 26679) followed, relating to belt pins.

IMITATION PRECIOUS STONES.—Protests, etc., of Julius Mamluck & Co. against the assessment of duty by the Collector at New York. G. A. 6289 (T. D. 27112) followed, relating to imitation precious stones.

IMITATION PRECIOUS STONES.—Protests etc., of H. Nordlinger's Sons against the assessment of duty by the Collector at Providence. The Board held circular pieces of glass or paste, five-eighths of an inch in diameter, molded so as to represent in high relief the frontal part of an owl's head, and ornamented with superadded decoration, to have been properly classified as manufactures of paste under Par. 112, Tariff Act of 1897. But the importers' contention that the importations should have been classified as imitation precious stones under Par. 435 was sustained (1) as to incrustated stones, (2) as to circular pieces of glass or paste about one-half inch in diameter, the backs of which have been impressed with a series of diamond-shaped figures outlined in silver foil and colored in imitation of precious stones, the stamping and coloring being effected during the process of manufacture and not subsequent thereto, and (3) as to oblong pieces of glass or paste made in imitation of jet, one and one-quarter inches long and three-quarters of an inch wide. Note G. A. 5386 (T. D. 24581), G. A. 5981 (T. D. 26206), G. A. 6342 (T. D. 27292), and G. A. 6289 (T. D. 27112).

IMITATION PEARLS, PIERCED.—Protest of R. F. Lang against the assessment of duty by the Collector at New York. G. A. 6088 (T. D. 26554) followed, relating to imitation pearls pierced.

PRECIOUS STONES.—Protest of G. Veeck against the assessment of duty by the Collector at New York. Certain so-called "kristall rondelles" were held dutiable as precious stones cut but not set, under Par. 435, Tariff Act of 1897. G. A. 6097 (T. D. 26586) followed.

METAL FOR CHAINS—JEWELRY.—Protest of Albert Lorsch & Co. against the assessment of duty by the Collector at New York.

The merchandise consisted of metal fob chains, and was held to have been properly classified as jewelry under Par. 434, Tariff Act of 1897.

SILVER WATCH CHAINS—JEWELRY.—Protests, etc., of Albert Lorsch & Co. against the assessment of duty by the Collector at New York. The merchandise consisted of silver watch chains and was held to have been properly classified as jewelry under Par. 434, Tariff Act of 1897.

PRECIOUS STONES.—Protest of Nordlinger & Mamluck against the assessment of duty by the Collector at New York. The merchandise was held dutiable as precious stones under Par. 435, Tariff Act of 1897, as claimed by the importers.

ROCK-CRYSTAL INTAGLIOS.—Protest 22824/h of Nordlinger & Mamluck against the assessment of duty by the Collector at New York. G. A. 6285 (T. D. 27108) followed, relating to rock-crystal intaglios.

BRASS SNAPS—NECKLET SNAPS—JEWELRY.—Protests, etc., of Manhattan Chain Co. against the assessment of duty by the Collector of Customs at New York. The merchandise, which was classified as parts of jewelry under Par. 434, Tariff Act of 1897, was claimed to be dutiable as manufactures of metal under Par. 193. As to a portion consisting of necklet snaps set with imitation precious stones, the Board found it to be commonly known as parts of jewelry. As to another portion, consisting of brass swivels, valued at about seven cents per gross, the Board held it not to be parts of jewelry, and sustained the protest to that extent. G. A. 6330 (T. D. 27,255) followed.

MILLINERY ORNAMENTS—IMITATION PRECIOUS STONES.—Protest 125,542 of Veit, Son & Co. against the assessment of duty. As claimed by the importers, a portion of the merchandise, consisting of millinery ornaments, was held dutiable as manufactures of the component of chief value, and another portion, consisting of imitation rock crystals, was held dutiable as imitation precious stones under Par. 435, tariff act of 1897.

Death of Fred. R. Ingalls.

LONG PINE, Nebr., May 30.—Fred. R. Ingalls, who died last week as a result of a bullet wound self-inflicted, had been in the jewelry business here for a long time, and the tragedy was quite a shock to his many friends in this section. Mr. Ingalls had been drinking heavily, and a warrant had been issued for his arrest as an inebriate. When the Sheriff tried to serve the warrant last Wednesday, Mr. Ingalls resisted arrest, drew a revolver and finally fired two bullets into himself, receiving fatal wounds in the abdomen from which he died the following day.

The deceased was the son of J. F. Ingalls, an old and well-known jeweler, who started in business in Waukegan, Ill., over 40 years ago. In 1891 the elder Ingalls opened a branch store in Long Pine and took his son in partnership as J. F. Ingalls & Son. After continuing for 10 years the deceased took over the business, which he conducted until the breaking out of the Spanish-American War, and then turned the store over to his father while he served in the American army. When the war was over he came back to Long Pine and resumed business again.

Another Attempt to Get Goods from Maiden Lane Firm by Means of a Forged Order.

An effort was made to obtain three field glasses from the Julius King Optical Co., Maiden Lane, New York, by means of forged order, last Monday. At 9 o'clock the morning a uniformed messenger boy appeared and presented to Leo Wormser envelope on which was the name of the B. Claflin Co., dry goods jobbers. There was an order written on the company's letterhead as follows:

NEW YORK, June 4, 1906.
The Julius King Optical Co., 2 Maiden Lane:
Gentlemen—Kindly send by bearer 1/21, 1/24,
No. 550 glasses, on memo., and oblige,
THE H. B. CLAFLIN CO.
Per Morris.

S.—Enclose memo, bills inside.

Mr. Wormser was suspicious and besides had some time ago ceased to deliver goods on written orders. The H. B. Claflin had not ordered this way before. Stepping to the telephone Mr. Wormser quickly learned that the order was forged. The Claflins sent one of their men and a detective came from police headquarters. The boy, when questioned, said that he had been sent from 296 Broadway, where he had answered a call, and had met a man in the hallway. The man told him to get a package and carry it over to Claflin's. It was concluded that the man's intention was to intercept the boy before he got to the goods house.

Accordingly a dummy package was given to the lad and he was told to walk over to the dry goods house. The detective followed. Presumably, the man had been alarmed by the delay as he did not appear. Detectives Nugent and McGuinness are trying to find the forger. The glasses described in the order cost about \$40.

Voluntary Petition in Bankruptcy Filed Against Edelhoff Bros. & Co.

A petition in bankruptcy was filed Wednesday of last week against Edelhoff Bros. Co., formerly retailers at 574 Fifth Ave., the following creditors: Larter & Sons, \$1; Fera & Kadison, \$14,063; Carter, Lowe & Co., \$181. Rawson L. Wood, of R. Wood & Sons, early in March was appointed receiver, and under his supervision a systematic examination of the books and accounts has been made and all of the assets available up to this time have been put into cash.

As the receiver had no power to distribute the assets he and the other creditors presented by the Jewelers Board of Trade arranged for the filing of the bankruptcy petition. The allegation made in the petition is that the corporation, while insolvent, delivered to favored creditors diamonds and other assets to the value of \$5,000.

The appointment of the receiver for this corporation was one of the consequences of the failure of Schickerling Bros. & Co., manufacturers at 28 E. 22nd St. The affairs of the two corporations were so closely woven together that the bankruptcy of one involved the other. Because of the closeness with which some of the accounts were kept and the complicated character of the relations between the two concerns an examination of the books has been an

unusually intricate process and the experts only recently completed their labors.

Decisions by the Board of United States General Appraisers, Affecting Duties on Decorated Art Wares, Etc.

Decisions by the Board of United States General Appraisers, New York, in cases involving duties on decorated earthen ware, glass ware and various art products, have been announced in the last week as follows:

Earthen Ware Heads.—Protest of D. Buhrig against the assessment of duty by the Collector at New York. Protest sustained on the authority of G. A. 6229 (T. D. 26915), relating to earthen ware heads.

Molded Glass, Imitation Jet.—Protest of Veit, Son & Co. against the assessment of duty by the Collector at New York. Certain articles made in imitation of jet, which were classified as cut glass under Par. 100, Tariff Act of 1897, were found to be composed of molded or pressed glass, and held dutiable under Par. 112 as manufactures of glass as claimed by the importers.

Stems, Manufactures of Metal.—Protest of Geo. Borgfeldt & Co. against the assessment of duty by the Collector at Baltimore. Certain stems with metal lids, which were classified as decorated earthen ware or stone ware, were claimed to be dutiable under Par. 193, Tariff Act of 1897, as manufactures of metal. Protest sustained.

Church Statuary.—Protest of J. Ochoa y Hermano against the assessment of duty by the Collector at San Juan. Benziger v. United States (192 U. S., 38; T. D. 21977) followed, relating to church statuary.

Medallions.—Protest of Geo. Borgfeldt & Co. against the assessment of duty by the Collector at Philadelphia. A portion of the merchandise, consisting of glass medallions with metal frames, was held dutiable as manufactures of metal under Par. 193, Tariff Act of 1897, as claimed by the importers. G. A. 6064 (T. D. 26446) followed.

Trade Gossip.

Webb C. Ball, Cleveland, O., has been appointed general time inspector of the Lehigh Valley Railroad, with headquarters at South Bethlehem, Pa.

Isaac Brush, Bridgeport, has had on display in his show window the silver loving cup which will be given as a prize to-day, in a competitive drill between Ivanhoe and St. Paul's Commandery, Knights Templar, at Madison Hall, at that place.

The Holtzer-Cabot Electric Co., Brookline and Boston, Mass., is mailing the trade a concise and artistic four-page circular, dealing with the company's 1906 model electric lathe motors for buffing, grinding, polishing, etc. The folder is printed in two colors, and shows excellent cuts of the firm's Boston and Brookline manufacturing and office buildings. Perhaps the most novel feature contained in the text is the offer of the company to install a motor on trial, subject to the acceptance of the jeweler after having given it a severe and thorough test. A price-list and eight clear illustrations of direct, alternating and combination motors, buffers and grinders and their many interchangeable parts, artistically arranged, complete the instructive circular.

The first meeting of the creditors of Otto H. Fasoldt, Albany, N. Y., who was recently adjudged a bankrupt, will be held before William Mansing, referee in bankruptcy, Steefel building, Albany, N. Y., June 12 at 3.30 P. M., at which time creditors may attend, prove their claims, examine the bankrupt and elect a trustee.

Death of Joseph Wineburgh.

UTICA, N. Y., June 4.—Joseph Wineburgh, senior member of Joseph Wineburgh & Sons, jewelers at 32 Genesee St., died at 6 o'clock this morning. While Mr. Wineburgh had been in declining health for several years he was up and able to be about yesterday. Death was due to Bright's disease.

Mr. Wineburgh, who was in his 74th year, was a native of Russia. Several years before he had reached his majority he had decided to seek his fortunes in the United States and coming here settled upon Utica as his future home, and for over half a century he had been one of its most honored residents. Mr. Wineburgh was 18 years old when he started his long and successful business career here. After reaching this city he soon branched out in business, traveling all over the northern part of the State selling dry goods and jewelry. He soon acquired a reputation for honesty and fair dealing, which he retained throughout his business career. Mr. Wineburgh formed many acquaintances and 27 years ago when he decided to engage in the retail jewelry business in this city, he started the foundation of a business which had been unusually successful.

The store was first located at 32 Genesee St., and there it has remained. When the late Jacob Wineburgh became of business age, his father admitted him to the firm and the name was changed to Joseph Wineburgh & Son. This was about 15 years ago, and later another son, Hyman Wineburgh, was admitted to the partnership and the firm became Joseph Wineburgh & Sons. A few years ago Mr. Wineburgh's health began to fail and the business was entrusted to Mr. Wineburgh's sons. Jacob Wineburgh, who had been associated with his father for many years, died on Aug. 21, 1905, and since then Hyman Wineburgh and another son, Edward, had been in charge of the firm's business.

Deceased was a business man who believed that success was only acquired through strict application to business and unflinching honesty in dealing with the public. He obtained the confidence of people in Utica and Central New York, and for many years he enjoyed a large and remunerative business. The foundation which Mr. Wineburgh laid was well cared for by his sons. Mr. Wineburgh retired from active participation in the business about seven or eight years ago.

It was largely due to the efforts of Mr. Wineburgh that the House of Jacob was formed in Seneca. He was one of the founders of the society. He also was a member of the Independent Order of Odd Fellows and became a member of Shendoah Lodge No. 95 on April 21, 1865, and in 1889 the grand lodge of the State presented him with an Odd Fellows' veteran badge.

Mr. Wineburgh is survived by a widow, formerly Rosa Epstein, who lives at the family residence, 153 Blandina St., two sons, Hyman and Edward Wineburgh, and two daughters, Mrs. I. Marks, of Bradford, Pa., and Mrs. A. S. Workman, of Montreal.

R. E. Schubart, Wheeling, W. Va., will sail from New York, on a pleasure trip to Europe, June 22.

Creditors File Involuntary Bankruptcy Petition Against I. G. Dillon & Son Co., Wheeling, W. Va.

An involuntary petition in bankruptcy was filed last Saturday against the I. G. Dillon & Son Co., retail jewelers at Wheeling, W. Va., in the United States Court at Wheeling. The petition was filed by attorneys representing the Jewelers Board of Trade, New York. Secretary Safford, with power of attorney from a number of the New York creditors, went to Wheeling earlier in the week to complete an investigation which he began some time ago. The circumstances having been detailed in THE CIRCULAR-WEEKLY of May 9.

A receiver has been in possession of the business for some time, having been appointed by the State courts on I. G. Dillon's application. The appointment of the receiver destroyed plans which had been forming with a view to the creditors granting an extension. Mr. Safford and a committee of creditors concluded that the company is insolvent and that the best method of adjusting affairs was by a resort to bankruptcy court.

The company's liabilities amount to \$100,000, of which nearly one-third is due to Wheeling banks, but this indebtedness is said to be almost fully secured. The nominal value of the assets, including property given as collateral security, is \$190,000. The greater part of the merchandise indebtedness is owing to New York creditors.

Creditors of Schickerling Bros. & Co. Hold First Meeting and Elect Trustee in Bankruptcy.

Creditors of Schickerling Bros. & Co., who were jewelry manufacturers at 28-30 22d St., New York, held yesterday their first formal meeting, under the terms of the bankruptcy act, in the office of F. Pendleton, 25 Broad St., the referee in charge of the case. The Jewelers Board of Trade was represented by Attorney Mervyn A. Mackenzie, of Hastings Gleason. The receiver, Robert C. Moore, was represented by Thomas & Oppenheimer, who are associated in the case with A. Karselen.

By a unanimous vote Receiver Moore was chosen trustee. No effort to vote was made on the part of the secured creditors. After some general discussion of the condition of affairs an adjournment was taken to June 19 at 2 p. m.

The petition in bankruptcy against the company was filed three months ago. Liabilities have been given at \$160,000, which a considerable part is secured by assignments of merchandise and open accounts. The officers of the corporation were instrumental in forming Edel Bros. & Co., who had a retail store at Fifth Ave., New York, and who are also in bankruptcy.

During the recent horse show in Wheeling, Man., D. R. Dingwall, of that place, attracted a great deal of attention to his show window by displaying the head of a horse within a large horseshoe and surrounded by a circle, the entire sign being made up of diamonds, rubies, emeralds and topazes, valued at \$87,000.

Our Traveling Representatives

Shuman, of Shuman Bros., was in San Francisco, Cal., last week, visiting the trade. Among the traveling representatives to visit New York, last week, were: Charles F. May, Champenois & Co.; Fred J. Foster, Unger & Co.; T. Laffey, Gorham Mfg. Co.; E. A. Reed, L. & Bryant.

Among the traveling men who called upon the trade in Denver, Colo., recently, were: Carl Domick, H. F. Hahn & Co.; R. L. Robertson, Denver Mfg. Co.; L. W. Bruns, Juergens & Anderson; Louis Freund, Henry Freund & Co. Among the representatives of wholesale houses recently in Detroit, Mich., were: J. T. Griffith, Carter, Howe & Co.; H. W. Valentine, Alvin & Co.; C. B. Bartlett, Whiting Mfg. Co.; A. J. Eker, Osmun-Parker Mfg. Co.; L. E. Smith, M. J. Bryant & Co.

The following traveling representatives visited the trade in Lancaster, Pa., recently: T. D. Bailey, J. S. Gatter; C. G. Cushman, Reed & Barton; C. S. Lake, Whiting Mfg. Co.; J. F. Crane, Mandeville, Carnow & Crane; W. B. Ehlers, Ehlers & Co.; A. C. Fellmer, N. H. White & Co.; M. J. J. Charles P. Goldsmith & Co.; Julius Reidel, Canada Community, Ltd.; S. K. Jones, Harry Lissner, Jacobson Bros.; George S. Melville, F. B. Ehlers Silver Co.; H. B. Bliss, Gorham Mfg. Co. Among the traveling salesmen who called on the trade in St. Louis, Mo., last week, were the following: Mr. Crossin, Crossin & Co.; G. W. Eker, Martin, Copeland & Co.; Emil Pick, Samuel Riglander & Co.; C. E. Sutton, Flint, Lind & Co.; Mr. McLoughlin, E. S. McLaughlin & Co.; E. A. Warner, Adolph Tanzer; E. A. Reed, L. & Barton; Emil Herbeck, Herbeck-Demer Co.; R. B. Carr, Link & Angell; T. S. Sturgis, Hiley Bros.; H. H. Meyer, William B. Kerr & Co. Inc.; S. W. Abbey, E. Ira Richards & Co.; B. Levy, Orient Mfg. Co.

Traveling men visiting Boston, Mass., during the week, included: Frank Burns, Pairpoint Corporation; Louis Nordlinger, L. & M. Kahn & Co.; Link Waite, G. K. Webster & Co.; John A. Abel, L. Bros. Co.; Benjamin Griscom, Bippart, Griscom & Osborn; Robert Simpson, Riker Bros.; Mr. Leckinton, R. Blackinton & Co.; Charles Duffy, Jos Richardson & Co.; J. Cooper Stone, Jones & Woodland; Alex. Chase; Mr. Martin, Martin, Oeland & Co.; Gustav Saacke, Wildpret & Co.; Mr. Steere, Arnold & Steere; Charles H. George H. Fuller & Son Co.; T. G. Frothingham.

Traveling representatives calling on jewelers in Chicago, Nehr, last week, included: L. Bruns, Juergens & Anderson Co.; W. A. Crocker, Christies De Baccarat; A. S. Riley, Mandeville, Crow & Crane; Mr. Dick, St. Louis Silver Ware Co.; E. E. Spaulding, Allsopp Bros. and Bassett Jewelry Co.; M. D. Aneker, Langfeld Bros. & Co.; W. S. Willis, Gorham Mfg. Co.; Fred Foster, Unger Bros.; F. E. Whiting, Whiting & Davis; C. H. Anderson, Ross, Saltman & Anderson; Meyer Lehmann, Ludwig Lehmann; Mr. Finberg, Berg Mfg. Co.; K. L. Taylor, Riley & French; M. Bliss, Bliss Bros. Co.; W. F. Drexmit, Keystone Watch Case Co.; Harry Mix, Wightman & Co.; Andrew S. Cooper, Parks Bros. & Co.; Henry Freund, Henry Freund & Co.

The following traveling salesmen have been calling on the trade in Kansas City, Mo., during the week: A. H. Oakley, Thornton Bros.; F. R. Bell, W. H. Saart Co.; Chas. S. Peckham, J. Peckham & Co.; John W. Case, H. F. Carpen & Son; H. A. Adams, Kraus & Deitsch; H. Meyer, Wm. B. Kerr & Co., Inc.; D. A. Dason, Wallach & Davidson; Mr. Marsh, C. A. Marsh & Co.; A. Oppenheimer, Rudolph Wolff & Co.; F. A. Fairbrother, Armstrong Braiding Co.; C. H. Howard, Mason, Howard & Co.; Edgar H. Potter & Buffinton Co.; Hubert Somborn, Op. Didisheim & Bro.; Fred J. Foster, Unger & Co.; H. R. Blackman, Champenois & Co.; W. Crocker, Paul Durand; C. E. Sutton, Flint,

Blood & Co.; Mr. Remington, Carter, Qvarnstrom & Remington; Mr. Fox, Fox & Co.; Joe Frank, Sussfeld, Lorsch & Co.; Helmer Thompson, F. H. Noble & Co.; J. Gocus, National Jewelry Case Co.; W. R. Stevens, Bay State Optical Co.

Traveling representatives who visited the trade in Cincinnati, O., last week, included: James Baker, Frank M. Whiting & Co.; C. E. Hulstrom, International Silver Co.; Mr. Young, Whiteside & Blank; E. A. Reed, Reed & Barton; Mr. Washbourne, Graff, Washbourne & Dunn; Sig. Stern, Stern Bros. & Co.; Ike Price, Louis Strasburger's Son & Co.; Norbert Gunsburger, L. & M. Kahn & Co.; Max Loebritz, Duer Watch Case Mfg. Co.; Mr. Sinnauer, Oppenheimer Bros. & Veith; F. C. Allen, Sansbury & Nellis; R. B. Carr, Link & Angell; Mr. Delano, Day, Clark & Co.; John Goodwin, Durand & Co.; Charles Williams, Gorham Mfg. Co.; Helmer Thompson, F. H. Noble & Co.; Mr. Stanley, Hercules Safety Clasp Co.; E. S. Fishback, Hamilton Watch Co.; George Bleecker, Martin, Copeland & Co.; Christopher Morgan, Rogers & Bro.; D. Skutch, New Haven Clock Co.; E. P. Tiffany, F. H. Sadler & Co.; Mr. Crossin, Crossin & Co.; M. F. Thornton, A. Lounsbury & Son.

Connecticut.

E. A. Bliss and Wm. Rettenmeyer, Meriden, sailed Thursday for a month's trip to Europe.

Jas. Chulee, Wallingford, has assigned to the International Silver Co., Meriden, two patented designs for spoons, forks, etc.

The New Haven Clock Co.'s baseball team on Decoration Day defeated the F. B. Pfeleghar baseball nine by a score of 20 to 3.

The International Silver Co. has planned to erect an addition to its plant in Bridgeport. The structure will be of brick, mill construction. The dimensions will be 48 by 200 feet.

The annual excursion of the Landers, Frary & Clark Mutual Aid Society, New Britain, will be held Saturday, Aug. 4. The trip will be made as usual to Sabin Rock. Special trains will be chartered.

W. F. Tetro, formerly with Lee Roberts, Bristol, and later in the employ of John R. Clayton, Waterbury, has purchased a store in Northampton, Mass., where he will engage in business on his own account.

John W. Davis, formerly with the Holmes & Edwards Silver Co., Bridgeport, was committed to the insane asylum, Middletown, last week by Judge Nobbs upon application of Supt. Brennan of the Charity Department. Davis, it is said, is suffering from religious mania.

A. Frank, optician, Bridgeport, was thrown from his carriage May 30, while out driving with his fiancée, Miss Mabel Harris, and sustained numerous bruises and a compound fracture of his right arm. Miss Harris is also suffering from shock.

A large trophy cup which has been on display for several days in the show window of Perry & Stone, New Britain, has attracted a great deal of attention. The cup was presented to C. A. Whipple, superintendent of McGuire & Penniman, Providence, R. I., by his associates, and was supplied by the above mentioned jewelry firm.

The Bradley & Hubbard Mfg. Co., Meriden, expects to complete the work of equipping its entire plant with electricity by next Fall. The work includes the wiring of the factory for 600 electric lights to be used instead of the Meriden Electric Light Co.'s power and lamps. The latter will be retained for use in an emergency. Many of the local factories are now equipped with their own electric lighting plants.

News Gleanings.

Mrs. Susan M. Randall has discontinued her store at Brockport, N. Y.

A fire, which took place at Stamford, Tex., recently, did considerable damage to J. M. Lively's jewelry store in that town.

Edward Wilhelm, a veteran jeweler of Phillipsburg, Mont., died recently as a result of heart failure. He was 66 years of age.

Corwin Bros. & Johnson, Park City, Mont., report having suffered a burglar loss of about \$100 worth of watches, silverware, etc.

Milwaukee (Wis.) jewelers, Wednesday evening, organized a local society, which all retail jewelers in the city will be invited to join. The purpose of the organization is to hold monthly meetings, at which the conditions of trade will be discussed. The officers elected are: President, A. J. Stoessel; vice-president, George Durner; secretary, Franklin Thompson; treasurer, Frank P. Wilde. Plans for the convention of the new State organization to be held here on June 27 and 28, were made at the meeting.

Adolph Weis, who was accused of stealing jewelry from Joshua Sutta, 175 Meadow St., New Haven, was sentenced May 27 to 60 days' imprisonment. Weis, it was alleged, obtained several hundred dollars worth of stock from the jeweler under the pretext that he was a salesman. He was subsequently arrested in Cleveland, to which place he had shipped the jewelry, and brought back to New Haven. The defendant's attorney stated that most of the stolen property had been restored to the owner.

J. G. Schumann, Richmond, Va., was visited recently by a negro who wanted to see some watch keys. The jeweler, who suspected the man, watched him closely while he busied himself fixing some keys. Suddenly he saw the negro lean over the show case, slide back the door and pick up a watch with a hook. Though Mr. Schumann jumped quickly the thief was quicker and rushed out the door with the jeweler in pursuit. He was finally captured and locked up as a suspicious person. It was later found he had robbed other men as well, in all being accused of stealing 13 watches in different stores. The man, who gave his name as William Thomas, was sent to jail for six months on one charge and held for the Grand Jury on others.

Two men called at the jewelry store of J. F. Kohler, Richmond, Va., recently and purchased two cheap rings. Later in the day one of the men came back and asked that one ring be exchanged. While looking over the tray the stranger deftly slipped the cheap ring he had purchased in the place of a three-stone diamond ring worth \$400, while the jeweler's attention was attracted in another direction. A short time later the second man returned and worked the same trick, taking a large solitaire diamond ring. A description of both men was given to the police. The trick might have been exposed at once but for the fact that the strangers had asked the jeweler to leave his tags on the rings which they had first purchased, and when they replaced these in the tray it was not apparent that a substitution had been made.

DOMESTIC versus FOREIGN CUTTING

IMPORTANT TO MANUFACTURERS

FROM
M-
M-
SIZES

American and Egyptian Peridots and other Precious Stones are being cut by us to Special Shapes and Sizes.

They are much superior to imported goods in cut and accuracy of size.

Manufacturers should bear in mind that there is no waste where every stone is a gem.

We carry every Precious Stone but the Diamond.

Trans-Atlantic Voyagers.

TO EUROPE.

C. J. Bene, Cincinnati, O., will sail to-morrow.

Andrew Patterson, of R. C. Hahn & Co. sailed to-day on the *Baltic*.

Herman Levy, New York, sailed yesterday on the *Kronprinz Wilhelm*.

B. H. Davis, of B. H. Davis & Co., sailed last Thursday on the *Deutschland*.

H. R. Beguelin, of Cross & Beguelin, New York, sailed Saturday on the *Iturra*.

Arthur Silberfeld, New York, will sail June 12 on the *Kaiser Wilhelm der Gross*.

E. Adler Gardner, with the E. A. Bl. Co., New York, sailed yesterday on the *Prinz Oskar*.

W. A. Schlossman, with H. F. Hahn Co., Chicago, and wife, will sail to-morrow on the *Grosser Kurfurst*.

Wm. Kinscherf, Jr., of the William Kinscherf Co., New York, sailed recently on the *Kaiserin Auguste Victoria*.

Sailing last Wednesday on the *New Amsterdam* were: Julius Kaufman, of Kaufman Bros., New York; Max J. Lissauer, of Lissauer & Co., and wife, New York.

FROM EUROPE.

A. Roseman and son returned recently from the *Finland*.

John Silberfeld, Antwerp, arrived last week on the *Lucania*.

M. F. Harris, of Harris & Harrington, returned May 30 on the *Carmania*.

Leopold H. Herzfelder, with Day Mayer, New York, returned yesterday on the *Kronland*.

Returning last week on the *Kronprinz Wilhelm* were: Maurice Brower, D. de S. Mendes, of the Mendes Cutting Factory.

Utica.

William A. O'Donnell has acquired interest in the C. J. Wells Co., retail jewelers at Liberty and Genesee Sts. Since the death of Calvin J. Wells the business has been conducted by Mrs. Wells, with the assistance of Mr. O'Donnell, who has been identified with the firm for several years.

Theodore O. Loveland and James Records, trading as the Moline, Ill., Jewelry Co., sued Walter Drejza before Judge Pritchard to recover \$150 for goods alleged to have been delivered to Drejza as agent. Drejza claimed that he had repaid the money due the company, minus a commission of 33 1/4 per cent. A jury gave the plaintiffs a verdict for \$6.75 and a motion for a new trial was denied.

About \$9,000 was realized from the recent sale at the American Art Gallery, New York, of the works of Paul Noe, the Belgian sculptor, who lost his life in a balloon ascension, and the money will be forwarded to his mother and sister. The executor retained the plaster originals of all the sculptured figures in order that a limited number of castings could be made by the Gorham Mfg. Co. Orders for the castings will be taken, so that the finding to the sculptor's relatives will be increased. The Belgian government has asked for some of the castings and it is expected that several will be placed in the Metropolitan and Brooklyn Museums.

Attleboro.

Frank Emmons Guild, son of Emmons Guild, of the W. H. Wilmarth Co., and himself a manufacturing jeweler in Providence, R. I., will take a bride the evening of June 14, in the person of Miss Ethel Rose Wolfenden, of this town.

J. W. Luther & Co., through Treasurer Louis C. Luther, last week filed with the Secretary of the Commonwealth the following annual corporation report: Machinery, \$10,000; cash and debts receivable, \$15,250; manufactures and merchandise, \$10,750; capital stock, \$35,000; accounts payable, \$2,000.

A. S. Ingraham & Co., through Treasurer Robert S. Ingraham, last week filed with the Secretary of the Commonwealth the following annual corporation statement: Machinery, \$3,000; cash and debts receivable, \$13,089; merchandise, \$1,700; goods, \$6,000; capital stock, \$20,000; accounts payable, \$2,155; profit and loss, \$634.

The Poole Silver Co., Taunton, last week, through Treasurer Edward F. Roach, filed the following annual corporation report: Real estate, \$21,000; machinery, \$16,000; cash and debts receivable, \$13,912; manufactures and merchandise, \$12,012; capital stock, \$10,000; accounts payable, \$1,106; surplus, \$16,000; profit and loss, \$7,538.

The public library trustees of this town, of which the late Louis J. Lamb, of C. H. Allen & Co., was a member for years, have embodied their regrets at his recent death in a set of resolutions, adopted last week. They are particularly eloquent, showing a true appreciation of his high ideals, keen insight, wise judgment and kindly sympathies. His widow, Mrs. Elizabeth B. Lamb, has been appointed guardian of his youngest son, a minor. The management of his firm, C. H. Allen & Co., continues for the present without change, except his absence. Mr. Lamb was in general charge at the factory, assisted by his brother and partner, William H. Lamb, while the third partner, C. H. Allen, was chief traveling salesman.

Edward Scott Shannon, a New York business man, was married last week to Miss Edith Morton Smith, only daughter of William H. Smith, of Smith & Crosby, one of the foremost manufacturing jewelers of the older generation in this town. They will reside in New York City. The wedding was attended by an unpleasant incident, a Boston newspaper the next day printing a sensational story about an elopement, which brought the family much undesired prominence. The story has been publicly stigmatized as without foundation.

Ernest D. Gilmore, of E. D. Gilmore & Co.; Herman T. Regnell, of Regnell, Biggley & Co.; A. Vinton Cobb, of A. V. Cobb & Co.; Charles A. Marsh, of A. Marsh & Co.; Ernest M. Bliss, of the Bliss Bros. Co.; Clark E. Rowe, William E. Coles, and Edgar A. Remington, of Carter, Qvarnstrom & Remington, are manufacturing jewelers elected to office in the Young Men's Christian Association last week. The main support of this body is that of the jewelry manufacturers, who like to keep a conveniently located and wholesome recreation place for the young men in their employ.

North Attleboro.

Theron I. Smith and party arrived home Monday from a three months' European trip.

The Bugbee & Niles Co. was obliged this week to operate its factory 13 hours a day.

Alfred Sweet, western salesman for J. F. Sturdy's Sons, returned last Wednesday from an extended trip.

Walter C. Sherman is home from a four weeks' trip through the west in the interests of the Estate of O. M. Draper.

Accidents to boilers caused the factories of the H. F. Barrows Co. and Paye & Baker Mfg. Co. to be closed for a half day on Thursday.

Mrs. J. H. Peckham underwent a serious surgical operation in Providence last week and is reported to be making satisfactory progress.

The engagement is announced of Miss Lillian Bagnall, daughter of Joseph Bagnall, of the Doran, Bagnall Co., to Frank Lester Holbrook, with G. K. Webster & Co.

The Webster Co. has filed its annual statement. The figures are: Real estate, \$37,807; machinery, \$61,126; cash and debts receivable, \$185,021; merchandise, \$181,899; total, \$466,153. Capital stock, \$175,000; accounts payable, \$120,854; surplus, \$15,000; profit and loss, \$158,299; total, \$469,153.

Christopher Dobra, treasurer of the B. S. Freeman Co., has filed the following financial report for his concern: Machinery, \$16,638; cash and debts receivable, \$36,061; merchandise, \$15,000; patent rights, \$2,000; total, \$69,699. Capital stock, \$25,000; floating indebtedness, \$39,303; profit and loss, \$5,396; total, \$69,699.

E. I. Franklin & Co. and 34 other manufacturing jewelry concerns have signed a petition that will ask the board of Selectmen to clothe the Rhode Island Co. with power to act as a common carrier. The jewelers are anxious to see the 'railway company vested with this power so that it may carry its packages and express from and to Providence. A hearing has been set for June 14.

The filing of a petition by the Rhode Island Company asking the selectmen to allow an extension of their rails on Elm St. is taken as confirmation of the report that this Summer a four-story brick jewelry factory is to be erected by Boston capitalists. The extension of the rails it is said is desired because it will make it possible to build the factory much cheaper than otherwise through the big saving in expenses of carting.

James Mitchell has purchased the business of Harry Engels, Red Cloud, Nebr.

L. E. Walker, who recently purchased a stock of jewelry, etc., in Benkelman, Nebr., has now purchased the store building of C. R. Walker & Co.

In the District Court at Paterson, Judge Lewis, on Tuesday of last week, awarded a judgment for \$61 against M. Roemer, of 603 Main St., for the purchase price of a quantity of jewelry bought from the Lyon Taylor Co., of Iowa. The defense claimed that the jewelry was not of the character represented.

New Stores and Enterprises.

W. F. Tetro is a new jeweler in Northampton, Mass.

Gaston Wilson has just commenced business in St. John, Wash.

E. J. Bommer recently started in business as an optician in Chillicothe, Ill.

George Osborne is about to engage in the jewelry business in Laharpe, Kans.

R. J. Rulford, formerly of Beaver City, Nebr., has opened a store at Almena, Kans.

H. E. Lee, optician, recently opened an office in room 15, Waverly building, Hartford, Conn.

W. O. Hayward, a graduate of the St. Louis Watchmaking School, has opened a new jewelry store at Atwood, Kans.

M. L. R. Howald, formerly in the employ of A. H. Coleman, Massillon, O., has just started in business for himself at Salem, O.

The Royal Jewelry Co., of New York, with a capital of \$2,500, has been incorporated by Herbert Gray, Lucy S. Gray and C. R. Spies, of New York.

Hurwitz Bros. & Bloom is the name of a new wholesale jewelry house which has started in business in Rochester, N. Y. The firm now occupies offices in the new Central building on Main St., E.

George Fruh, a watchmaker, who was formerly located with Joseph Hornback, Cincinnati, O., for many years, has bought out the L. C. Klotter business at Brighton, Cincinnati, O., and will carry on a retail jewelry and repair business.

The C. F. Scheckleton Co. has been incorporated in Massachusetts to deal in many articles, among which jewelry is included. The capital is \$1,000, and the president is T. A. Kelleher, Winchester, Mass., and the treasurer, Charles T. Scheckleton, Boston.

The Flagg Cutlery Co., Monmouth and 12th Sts., Jersey City, N. J., was incorporated last week for the purpose of manufacturing gold and silverware, also glass ware, in addition to cutlery. The authorized capital is \$100,000. Incorporators: James H. Flagg, Brooklyn, N. Y.; John L. de Saulles, New York; George M. Clarke, New York.

J. F. Dailey, of J. F. Dailey & Co., St. Louis, Mo., has been in Chicago arranging for the opening of their time-payment house there, of which he will have personal charge. The new store, which was opened on Monday, is located at 68 E. Washington St. Ralph W. Wilson, who has been with the Dailey firm since it started in business, will be the manager of the St. Louis house.

A. G. Lietsch, of Mt. Union, Ia., and his cousin, Harry Slingluff, of Burlington, Ia., have bought the business of H. L. Tucker, New London, Ia., and will take possession about June 10.

John J. Kingsley, Inc., is the name of the concern which recently received a Massachusetts charter to manufacture and deal in watches, with a capital of \$25,000. Albert E. Knowlton, Boston, is the treasurer of the company.

Thomas E. Gonterman, Granite City, Ill., expects to have his new store at 19th and D Sts. ready for occupancy by Sept. 1. The building will be two stories high and will cost \$14,000. Mr. Gonterman was in St. Louis last week.

Boston.

Arthur H. Pray, of the Tremont building, has been on a trip to Rangeley lakes. Charles A. Damon, with Daniel Pratt's son, is home again from an outing at oleb, Me.

Carl D. Smith, of the Smith-Patterson Co., returned last week from a brief outing up to New Hampshire.

Joseph Cowan arrived home on Monday from an extended business trip through the Ohio valley and Lake region.

H. M. Thompson is a new salesman in New England territory for the E. H. Saxton Co., of the Washington building.

Irving Smith, of the Crescent Watch Case Co., was in Boston last week, at the New England office of the company in the jewellers' building.

R. Kelse McKee, salesman for the Thomas Long Co., has returned from a 100-mile pleasure trip to Canada, his journey extending to Edmonton, Alberta.

The J. J. Round Co. has been incorporated to do a jewelry business, with a capital of \$25,000. Alfred A. Phillips, John J. Round and John G. Ellis are the directors. E. A. Cowan sailed for Europe Thursday, accompanied by Mrs. Cowan, and will be gone about two months, visiting the trade centers of the Continent and England.

H. N. Lockwood, repairer of watches, clocks and jewelry, has removed from 9 Bromfield St. to 61 Bromfield St., near Tremont St., where he is more comfortably situated.

Fred H. Woodman, 352 Washington St., has taken the New England agency for the Buffalo Mfg. Co. He has also engaged Skelding as traveling man in New England territory.

E. C. Fitch, Jr., of the Montreal office of the Waltham Watch Co., and R. A. Ketter, of the Chicago office of the company, have been in Boston at the company's headquarters during the past week.

C. C. Bogle, of Bogle Bros., White River Junction, Vt., who was in the jobbing trade in Boston on Summer St., about a decade ago, has been here during the past week, renewing old acquaintance in the jewelry district.

W. F. Macomber, who travels in the north and southwest for E. A. Cowan & Co., has been home for a short time from his Spring trip, and is now taking an outing in northern New England, accompanied by Mrs. Macomber.

Col. S. O. Bigney was a visitor to several of the jobbing houses in the trade last week, which has not been wont to receive calls from him since he became a member of the Governor's Council, as frequently in former years.

L. W. Adams, of Adams & Singleton, has joined the automobile enthusiasts, and is planning a long vacation tour in his new car. C. H. Singleton, of the same firm, has opened his Summer home at Winthrop for the shore season.

William A. Darling, formerly in business at Quincy, Mass., has accepted a position with Charles W. Johannot, who succeeded the late C. W. Beals. Mr. Darling was associated with Mr. Beals, it is interesting to note in this connection, when he

first learned the business, nearly 25 years ago.

J. George Martin, who left the clock trade some months ago for a position in the Stock Exchange clearing house, has returned to his earlier occupation, and is now connected with the Boston office of the Wm. L. Gilbert Clock Co.

In a prize contest inaugurated by the Boston Herald upon its removal to new quarters, the name of C. E. Durgin, with the Thomas Long Co., is entered, and he has the distinction of leading in popularity this week by 100,000 votes.

The W. E. Woodman Co.'s establishment, where an auction sale has been held daily since the concern's failure, several months ago, is shortly to change its method of doing business, it is understood, giving up the auction feature, and returning to ordinary selling.

Lawrence F. Percival, of D. C. Percival & Co., whose wedding was announced a few weeks ago, returned last week from a wedding trip to Europe with his bride. D. C. Percival, Sr., who is an enthusiastic devotee of the fisherman's rod, has been enjoying a brief sojourn at Rangeley lakes.

Henry Arnold, of D. C. Percival & Co., is now in New Hampshire, recuperating from the effects of the surgical operation to which he submitted a few months ago, and it is expected that he will be able to return to business in August, if no further setbacks are encountered by him in the meantime.

On Monday of this week a loan exhibition of early American silver, which promises to be of much interest, opened at the Boston Museum of Fine Arts. There are nearly 350 pieces in the collection, including more than 50 by Paul Revere. In the exhibit also there are specimens from the church plate of Boston and vicinity, and several private owners among old Boston families have permitted heirlooms of fine workmanship to be shown anonymously.

Lancaster, Pa.

Walter Kahn has moved to Nashville, Tenn., where he will open a repair establishment.

Frederick Matthias, formerly of Mahanoy City, Pa., has located in business at Millersville.

F. A. Peters and W. F. Meiskey, of the H. S. Meiskey Co., visited the Gettysburg battlefield last week.

T. Wilson Dubbs, jeweler, accompanied by W. Scott Leinbach, spent a couple of days fishing on the Chesapeake Bay, last week.

Among the jewelers visiting here last week were John Eimerbrink, York; H. F. Andrews, Strasburg, and Henry Fochl, Columbia.

Roy Portner and William McAvoy, aged 12 and 10 years, respectively, who some time ago robbed Harry Sobel's jewelry store, were convicted in the Juvenile Court and sent to the House of Refuge.

G. William Reisner exhibited last week in a N. Queen St. show window two sets of handsome medals made at his factory, for the winners of athletic meets, one being for the public schools of Springfield, O., the other for the Hill School,

Pottstown, Pa., and the Penn Charter School of Philadelphia.

By an error it was reported last week that James A. Currie, formerly with S. Kurtz Zook, intended to locate in Sheridan or New Castle. This Mr. Currie denies as being without any foundation in fact.

Francis J. Kemper, a Denver, Col., jeweler, spent last week with Lancaster relatives, en route to New York. Wilton G. Potter, a London, England, jewelry manufacturer, who is visiting Philadelphia relatives, spent a couple of days in Lancaster last week.

Frank Gerkin, with G. W. Loar & Co., Grafton, W. Va., has just finished a course in engraving at the Ezra F. Bowman Technical School and returned home. Paul Wentz, with F. W. Kochler, Sharon, Pa., has entered this school for a course in watchmaking.

The newly elected Board of Directors of the Non-Retailing Co., organized on May 29 by electing the following officers: President, A. F. Hostetter; Vice-President, John W. Eshleman; Secretary, Milo B. Herr. On Saturday Alfred B. Moyer, manager of the company, and Director Milo B. Herr, with their wives, left for a month's western trip, which will include Chicago, Denver, the Yellowstone Park, Duluth and the Great Lakes.

Omaha.

S. W. Lindsay has erected a new electric sign in front of his store.

John Larson, of T. L. Combs & Co., has gone on an extended trip to Sweden.

R. J. Rulfford, Beaver City, Nebr., has opened a jewelry store in Alma, Kans.

George W. Ryan, of Mawhinney & Ryan Co., was in Fairbury, Nebr., on business last week.

Hilmar G. Anderson, Fremont, Nebr., was in the city last week buying stock and returned home with a brand new "Rambler" automobile.

J. A. Reuling, Wymore, Nebr.; Mr. Ross, Bancroft; S. H. Avery, Auburn; J. W. Mefford, Ainsworth; P. W. Napier, Decatur; L. S. Robinson, Glenwood, Ia., and W. A. Queenby, Lead, S. Dak., were in the city last week.

Canada Notes.

E. Raymer, Edmonton, Alba., has sold out to Jackson Bros.

W. H. Atkinson succeeds J. E. Atkinson in the jewelry business, Deloraine, Man.

James D. Fowler, Fredericton, N. B., is dead.

The jewelers of Hamilton, Ont., have agreed to close their stores on Wednesday afternoons during the summer months.

E. Taylor, for many years with the Hudson Bay Co., Winnipeg, Man., has been appointed managing director of Gowan, Kent & Co., manufacturers of china and cut glass.

On account of the increase in the price of silver the Hemsley Mfg. Co., Montreal; Roden Bros., and the Toronto Jewelry Mfg. Co., Toronto, Ont., have advanced the price of souvenir goods 10 per cent.

GORHAM SILVER

JUNE WEDDING GIFTS.

¶ June has always been the month of Roses, but it is nowadays the month of Weddings also.

¶ The display of wedding gifts at a fashionable wedding is hardly held to be complete unless a chest of spoons and forks or some other articles of Gorham silver are included.

¶ The sagacious Jeweler, therefore, will at this season take particular pains to add to his stock such lines of flatware and other ware as will be likely to secure the attention of the buyers of Wedding presents.

¶ In anticipation of these June Wedding demands, the Gorham Mfg. Co. have prepared a number of unusually attractive special pieces.

THE CASE of a woman who swallowed a diamond stolen from an Omaha, Neb., jeweler, and refused to be operated upon in order that the gem be recovered, has attracted wide attention throughout the country, and brings up a novel point as far as the right to recover stolen property is concerned. There is a general principle of law that a man is entitled to recover his own property, by proper legal procedure, no matter where it may be, and that no act of a thief can give title either to himself or to any one else. In attempting to apply this principle, however, the jeweler and the authorities in Omaha seem to have found themselves in the same dilemma as was the Shylock of Shakespeare, who, though entitled to his pound of flesh, had only the right to remove it without taking blood. It is contended that if the woman who swallowed the diamond was operated upon without her consent the jeweler, while having the right to recover the stone, would be responsible for manslaughter in case the operation proved fatal. This is by no means the first instance in which a thief has swallowed stolen jewelry and gems, but it is the first case of the kind that has presented the novel point as to the right to recover the gem by an enforced operation. While the woman will probably be prosecuted for larceny the outcome of the case as to the recovery of the gem will be awaited with interest.

Gem Importations During May.

AS foretold in the last issue of THE CIRCULAR—WEEKLY the precious stone importations into the Port of New York for the month of May broke all previous records, amounting in value to \$4,021,405.06 as against \$3,233,825.31 in May last year, which until that time held the record. Of the importations of last month the value of the cut precious stones and pearls amounted to \$2,673,542.96, which was about \$400,000 above the record figures of last year, and the value of the uncut stones, principally diamonds, was \$1,347,862.10, which beat by more than \$100,000 the record for these gems in May which was made in 1901. It will clearly be seen from this that there is now no doubt that the figures for the fiscal year, which ends this month, will surpass all records of the Custom House, indicating that the consumption of precious stones in this country shows a continuous increase despite the fact that importers are not able to obtain all they want in certain sizes and qualities. How the figures of last month compare with those of May in previous years will be found by an inspection of the following table.

	Uncut.	Cut.	Total.
May.			
1906....	\$1,347,862.10	\$2,673,542.96	\$4,021,405.06
1905....	972,918.95	2,260,906.36	3,233,825.31
1904....	1,051,594.42	1,328,241.59	2,379,836.01
1903....	567,086.18	1,855,497.78	2,422,583.96
1902....	889,229.02	1,386,647.04	2,275,946.06
1901....	1,235,877.78	1,944,395.37	3,180,273.15
1900....	513,597.85	804,761.16	1,318,359.01
1899....	432,851.45	1,200,711.59	1,723,563.04
1898....	134,909.40	202,759.85	337,669.25

In relation to the imports of precious stones and pearls in the current fiscal year, Gen. Geo. W. Mindil, the precious stone examiner at the Port of New York, said several days ago that the preponderance of

diamonds is about as great as in any preceding year, with pearls continuing second in financial importance. He said that in the last year there has been a notable increase in the imports of button pearls, which he attributes to the scarcity and the consequently higher price of round Oriental pearls. Rubies and emeralds, he said, have come in considerable value, and some cheaper stones, such as amethysts and garnets have been imported in considerable number and in weight, probably exceeding that of some higher priced gems. The importation of peridots has been rather heavy; also of opals. Gen. Mindil says that there has been an advance in price of nearly all gems. He states that diamonds of all grades have been constantly going up in cost, just as the importers have repeatedly predicted in the past year.

Good Outlook for National Stamp- ing Law.

OWING to the absence from Washington of Representative Vreeland, who introduced the Jewelry Trades' Gold and Silver Stamping Law, which has been passed by both branches of Congress, the bill which had been returned to the House because the Senate had made two slight amendments, was not acted on last week. The chances are now that a Conference Committee will be appointed this week, the bill reported to both Houses, passed and sent to the President within a very short time.

The only difference between the bill as it passed the House and as it passed the Senate is the change in the penalty made by the latter body, reducing the fine of \$1,000 and six months' imprisonment to a fine of \$500 and three months' imprisonment, and also an extension of time in which the bill shall go into effect from six months to one year after its passage. As far as the reduction in penalty is concerned, THE CIRCULAR—WEEKLY has heard no objections whatever to the Senate amendment, either from members of the trade or from members of Congress. The extension of time in which the bill is to go into effect, from six months to a year, was done at the request of Providence manufacturers, who wished to protect themselves on the goods for the Christmas trade, some of which were already in process of manufacture.

It is now likely that if the bill can be passed immediately, Senator Aldrich, who introduced this amendment at the request of the Providence manufacturers, may consent to a compromise such as having the bill go into effect Jan. 1, 1907, which would be satisfactory to all parties interested in the measure.

Jewelers Gold Bars Withdrawn and Exchanged at New York.

Week Ended June 2, 1906.

The U. S. Assay Office reports:	
Gold bars exchanged for gold coin....	\$341,379.68

Death of John C. MacClymont.

John C. MacClymont, who was well known in the jewelry trade, died last Saturday at his home in Plainfield, N. J., in 69th year. Mr. MacClymont began his business career with Ramee & Greason, remaining with them for three years, from 1866 to 1868. Then John R. Greason sold out his interest and Mr. MacClymont came a member of the firm, the style changing to Ramee, Schaffer & MacClymont. In more recent years he has been associated successively with Krentz & Co. and H. A. Kirby Co.

Funeral services were conducted last evening at his late home, 78 Washington Ave., North Plainfield. Interment will be at Woodlawn, N. Y.

In the recent suit of the Elgin Jewelry Co. against Anthony Bolinsky, of Mount Airy, Pa., the verdict was given in favor of the defendant. The suit was brought to recover the sum of \$200 with interest for certain amount of jewelry which had been forwarded to the defendant under an alleged contract under the date of Feb. 29, 1906. The goods were duly delivered, but the defendant claimed that the conditions of sale as set forth in the alleged contract were different from what had been represented to him by the agent for the plaintiff. He therefore sent the goods back.

New York Notes.

Alexander Backer, 2313 Eighth Ave., is out of business.

Larris Henkin moved recently from 165 Avenue C to 199 Flatbush Ave., Brooklyn. Announcement is made by Paul Greenberg, 272 Delancey St., that he will soon move.

Frank, 76 Bowery, will occupy the place in the new building now being erected at 11 Bowery.

Julius Kaufman, of Goodfriend Bros., sailed for Europe last Wednesday on the *De Amsterdam*.

Against the Marvin Watch Co. a judgment for \$103 in favor of the city of New York was filed Friday.

H. Davis, of B. H. Davis & Co., sailed Thursday on the *Deutschland*, to visit Antwerp, Amsterdam, Paris and London.

A judgment for \$139 was filed last Thursday against the United States Electric Clock Co., and in favor of the City of New York.

The C. O. Sweet & Son Co., Attleboro, Mass., have opened a New York office at 10 Maiden Lane, in charge of George T. Johnson.

Lease for a long term of the store at 2 Fifth Ave. has been taken by the Inter-Hoecker Co., opticians at 1145 Broadway.

A pearl and diamond given by Empress Eugenie to Edward A. Crane, is left by his will, which was filed for probate last Thursday, to one of the members of his family. Sympathy of many friends is extended to Max Traub, eastern representative of Lissauer & Co., whose mother died last Thursday. The funeral services were held Sunday last.

Liss Lenore Stern, the daughter of Sigmond Stern, of Stern Bros. & Co., was united in marriage to Arthur Lederer, of Cleveland, at 6 o'clock Monday evening in Immonico's.

At the annual meeting of the directors of the Charles E. Hancock Co., held in Providence, R. I., last week, L. H. Carpenter, New York representative, was elected vice-president of the corporation.

Maurice Bender was held for examination last week in the Essex Market Police Court on the charge of obtaining \$160 from Rebecca Hoecker, 35 W. 117th St., by selling her an imitation diamond.

John Silberfeld, Antwerp, a brother-in-law of Leon Weiner, of Weiner, Garson & Nye, of 277 Grand St., arrived here last week on the *Lucania*, bringing with him an assortment of diamonds and emeralds.

Adler Gardner, western representative of the E. A. Bliss Co., 321 Fifth Ave., returned yesterday on the *Prinz Oskar*, for a two months' trip to Italy, Switzerland, Germany, Holland, Belgium, France and England.

A sentence of not less than three years in prison was imposed last Thursday by Recorder Goff on Charles P. Moody, convicted of bigamy; also of grand larceny in obtaining jewelry from Chas. S. Crossman & Co.

A certificate was filed last Thursday incorporating a retail jewelry house under the name of H. Sacks, New York. The authorized capital is \$4,000; directors, Paul Sacks,

57 Second Ave.; Rosie Sacks, 1939 Third Ave.; Abraham Sacks, 272 Bleecker St., New York.

Sunday next will be the date of the 40th annual picnic to be given by the New York Watchmakers' Society at Oak Hill Park, Elmhurst, L. I. There will be amusements of various kinds and dinner will be served at 1 o'clock.

Charged with stealing from the jewelry department of a Sixth Ave. store, Thomas Peleso and his wife, of 250 E. 117th St., were last Thursday held by Magistrate Breen, in the Jefferson Market Court, in \$300 bail for examination.

At the store of M. Tecla & Co., recently opened at 929 Broadway as a branch of the concern at 47 Boulevard Kausman, Paris, the stock comprises artificial pearls, rubies, sapphires and emeralds. The New York branch was recently incorporated.

Max J. Lissauer, of Lissauer & Co., and wife sailed for Amsterdam on the *De Amsterdam*, last Wednesday. Mr. Lissauer will visit the principal cities of Holland, England, Germany and France, and expects to make a three or four months' trip.

An imitation pearl necklace, having a clasp set with small diamonds, was found one day last week in front of 92 Maiden Lane by a small boy who turned over the property to Detective Muldoon. The necklace, which is valued at \$50, is now at Police Headquarters awaiting an owner.

George Whitney, also known as "Old George" and as "The Fakir," who for many years had peddled cheap jewelry along the Bowery, was found dying at dawn one day last week in front of a Pearl St. lodging house. Before he could be taken to a hospital he was dead.

H. Z. & H. Oppenheimer, of 48 Maiden Lane, recently had the pleasure of extending congratulations to their parents, Mr. and Mrs. Zachariah Oppenheimer, whose golden wedding anniversary was celebrated at their Summer home in Far Rockaway, L. I. Numerous friends extended best wishes.

Glass diamonds and other cheap jewelry were found in the possession of two men who were arrested Sunday when coming out of a vacant house in W. 143d St. The men, who gave the names of Charles White and George Wilson, are suspected by the police of being burglars and were held in \$1,000 bail.

After being conducted for 40 years at 49 Catharine St. the business of Hannah Tannenholz was removed this week to 755 Lexington Ave. Mrs. Tannenholz, whose late husband established the business, now admits into partnership her son, Maurice, under the firm style of H. Tannenholz & Son. The store at 49 Catharine St. has been sold to Herman Rogalsky.

A certificate was filed last Saturday incorporating the Edwin Heathcote Co., with \$3,000 capital. The directors named are: N. M. Stevens, John Chattle and J. C. Heathcote, Brooklyn. It will be recalled that Edwin C. Heathcote, 13 Maiden Lane, recently went into bankruptcy after reporting the loss of a stock of jewelry valued at \$10,000 in a Brooklyn Bridge car.

Entertaining stories of his trip to Tennessee, Mississippi and Louisiana are being told these days to his friends by Colonel

John L. Shepherd, of the Keystone Watch Case Co. Although a Virginia boy, Colonel Shepherd had not been back to the south for many years, and his visit to his sisters and other relatives living in the States mentioned, was an event which he thoroughly enjoyed.

William Scheer, 544 Fifth Ave., who is the president of the Bell Harbor Yacht Club, entertained the members on Memorial Day at a dinner served in the clubhouse at Rockaway Beach. The dining hall was handsomely decorated for the occasion, and the boats in commission, by dressing ship, made a pretty scene in the harbor. The club has been built up mainly through Mr. Scheer's efforts.

A discharge from liabilities of \$12,716 was granted last week by the United States District Court to Theodore Sander, who was in business at 1278 Broadway until January, when an involuntary petition in bankruptcy was filed against him. A few days before the filing of the petition he made an assignment to Frederick Alt. The stock was since sold by the receiver under the direction of the bankruptcy court for \$1,500. The only other assets were fixtures and accounts.

At a dinner given recently by 50 representatives of importing houses to George W. Whitehead, who lately resigned as appraiser at the port of New York, there were present among others: E. J. Dingee, of the Gorham Mfg. Co.; Percy F. Frazee, of Alfred H. Smith & Co.; D. J. Frankel, of Joseph Frankel's Sons; S. Arnstein, of Arnstein Bros. & Co.; R. H. Kirkpatrick, of Chester Billings & Son; Ludwig Nissen, of Ludwig Nissen & Co.; August Goldsmith, of Stern Bros. & Co.; Wm. H. Sandford, of Tiffany & Co., and Theodore B. Starr.

Udall & Ballou is the style under which a new company was incorporated last week to take over the business conducted up to this time by the firm under the same name at 499 Fifth Ave. The company will occupy a new location, having obtained the lease of the store at 574 Fifth Ave., near 47th St., formerly occupied by Edelhoff Bros. & Co. The capital stock of Udall & Ballou is \$150,000, divided into shares of \$100 each. The directors for the first year are: Frederick H. Ridgeway and George W. Cudlipp, of New York City, and Lewis F. Wilson, of Elizabeth, N. J., in addition to the officers. The officers are as follows: Frank Udall, president; F. W. Barthman, Jr., vice-president, and Herbert Ballou, treasurer.

Creditors of Bernard Steinfeld, 504 Sixth Ave., who sells jewelry on the road, met at his request last Saturday in the office of Hastings & Gleason, 258 Broadway. Mr. Steinfeld was present and related the details of the robbery at New Haven, of which a brief account was given in last week's issue. Mr. Steinfeld said that the jewelry taken from him at that time was worth \$4,000. He showed the sample case which, he said, had been wrenched from his hand by the robber. The case was afterwards found in the railroad yards. The lock had not been opened, but a slit had been made in the side with a knife. Mr. Steinfeld offered the creditors 30 per cent. The liabilities repre-

OF THE

W. & S. BLACKINTON CO.,

and to commemorate the making of the first gold filled, hard-soldered, fancy-link vest chains by Wm. Blackinton, we make this announcement of direct interest to all
Retail Jewelers

Between May 1, 1906, and January 1, 1907

Every Blackinton Dickens, Waldemar, Pony or Negligee Chain will bear an aluminum tag, illustrated herewith

SAVE THESE TAGS

Every one has a definite value.

In January, 1907, we will award to retail jewelers according to number of Aluminum Chain Tags collected up to January 1

Four Capital Prizes

For the largest number of tags

ONE TOURING CAR—an automobile of STANDARD GRADE—1907 model

For the NEXT largest number of tags

ONE RUNABOUT AUTOMOBILE—high-grade—1907 model.

For the NEXT largest number of tags

ONE MOTORCYCLE—warranted to be A1—1907 model.

For the NEXT largest number of tags

ONE AMERICAN WATCHMAKERS' LATHE—of latest standard design.

Retailers who do not win one of the four capital prizes may exchange their tags for chains as below provided, or can realize on their tags as they use the chains.

FOR 40 TAGS—we will deliver free, one of our GLOBE one-eighth gold filled vest chains

FOR 75 TAGS—we will deliver free two GLOBE chains

FOR 100 TAGS—we will deliver free three GLOBE chains

N. B.—Refuse to receive from jobbers any of our chains that do not bear the coupon tags.

We offer a choice of twelve handsome patterns of Globe one-eighth gold filled chains in selecting premiums and illustrations will be mailed free on request. Globe one-eighth gold filled chains are guaranteed to assay one-eighth, are gold soldered and are warranted to give satisfaction for twenty years. Old Reliable W. & S. B. ★ gold soldered, 1-10 chains, are the best known chains in the world and have no superior in design, finish or wearing qualities. All Blackinton chains are made by our Wearbest process which hardens the gold and greatly increases the wearing qualities. No other chains are made in this manner.

Retailers who find difficulty in obtaining Blackinton Chains may, upon request, receive a list of jobbers who handle the goods in their territory, or a selection package will be shipped through any jobber whom the retailer may designate.

New York Notes.

(Continued from page 59.)

nted by those present amounts to \$4,600. ere was a difference of opinion as to ether or not the offer should be accepted, d no conclusion was reached.

Sumner Clarke, formerly of Lakewood, now at Red Bank, N. J.

Louis Rothenberg, Jersey City, has added as a partner Mr. Bernhardt, and firm style will be Rothenberg & Bernhardt.

Pinsler & Ghinger is the name of a new manufacturing diamond mountings at Maiden Lane. It is composed of E. Pinsler and J. Ghinger, the latter having formerly dealt in diamonds at the same address.

An alarm for Mrs. Wm. De Freest, whose husband is a designer in the silver in of Luxenberg & Haskell, 127 Grand , was sent out by the police last Saturday. She had been in a sanitarium some months ago and her husband feared that she had met some harm. The next day it was learned that Mrs. De Freest was visiting with relatives at New Brunswick, N. J.

C. G. Alford returned last week after missing a month in Saranac Lake Inn. Much of his time was given to fishing in the lake and streams thereabouts, and those who know of Mr. Alford's prowess in this sport will not be surprised on being told that he made some catches that attracted attention. The New York Herald of last Sunday recorded the fact that a four-and-a-half-pound speckled trout caught by Mr. Alford was one of the most beautiful specimens of the fish that had been seen in that part of the lake in many a day.

Because of some difficulty in getting the present address of William W. Randall, the jeweler who had desk room at 20 Maiden Lane until recently, the order requiring him to turn over property valued at \$600 to the trustee in bankruptcy of his estate, has not yet been served. The order was granted two or three weeks ago, but about that time Mr. Randall gave up his desk room in the Maiden Lane office. A visit to the house in Brooklyn given in the city directory as his home also proved fruitless, so that Hastings Gleason, who obtained the order, as attorneys for the trustee, are still trying to serve it.

Theo. A. Kohn & Son, 221 Fifth Ave., sent, last Thursday, an alexandrite weighing six and a half carats to Mrs. H. E. Smith, at the Belgravia apartment, Fifth Ave. and 49th St. A day or two later Mrs. Smith called up the jewelry firm and asked why the stone had not been delivered. The jewelers then made an investigation. They learned that when their messenger reached the Belgravia with the package he was informed that Mrs. Smith was not at home. Robert Eckler, a young man employed as hall boy, who had given the information as to Mrs. Smith being out, also offered to keep the package until her return. The police arrested Eckler, who was held in \$2,000 bail in the Yorkville Police Court on the charge of grand larceny. Afterward the alexandrite, which was an especially fine specimen, was returned to the firm.

European Pawnshops.

GERMAN ESTABLISHMENTS REGULATED FOR THE PUBLIC WELFARE.

A. M. THACKARA, Consul General, sends from Berlin an exhaustive statement concerning the pawnbrokers of that city, and also of other parts of Germany.

There are no pawnshops under the management of the municipal authorities in Berlin, but there is a royal pawn office and numerous private pawnbrokers, who have to be licensed and are strictly regulated by law. The Royal Prussian pawn office was established in 1834 under the control of the Royal Bank. The purpose of its establishment was the promotion of the common welfare, and all profits from the business, or any surplus which remains after charging a moderate rate of interest and deducting all costs of administration, are devoted to charitable purposes. It was established by a cabinet order signed by Frederick William in 1834. The officers are appointed by the bank, and there are strict regulations for the conduct of the business and for auditing of the accounts. The institution lends from one-half up to two-thirds of their estimated value upon all movable effects not expressly prohibited, including jewels, precious stones, gold, silver, copper, brass, tin, and similar metals, articles of clothing, and other useful objects for the storage of which no great space is required. Excluded from acceptance as pledges are worn-out goods, fluids, copper plates, books, and all fragile articles, or others easily spoiled or which would cause fire.

Persons who want to borrow money from the pawnshop, providing they are not known to officers of the institution, have to establish their identity by documents or by the testimony of credible persons, or from those who are prohibited by law from borrowing. There are specially appointed appraisers to estimate the value of any article pledged. A ticket is issued showing the name of the pawner, a description of the pledge, its estimated value, and the amount loaned on it. If the pledge is not redeemed, it is sold; and if any greater amount is obtained for it than the amount loaned, the excess is returned to the person who pledged the article. Every pawner has the right to redeem his pledge before the contract time has expired, but interest must at least be paid for one month. Provision is made for the recovery of the article pawned providing the owner loses his pawn ticket.

The lowest amount upon which money is loaned is 1 thaler, equal to 71 cents, except that in the department of the royal pawn office in the district of Berlin where the poorer classes reside, a loan is made on 2 marks, equal to 47 cents. The rate of interest on money loaned on pledges which the royal pawn office may legally charge is 1 per cent. per month, or 12 per cent. per annum. Upon easily negotiable securities, however, such as city, state, or government bonds, it may charge interest at the rate of 6 per cent. per year, but never less. In other words, the royal pawn office is not permitted to enter into competition with the banking houses.

The surplus, donated to charitable pur-

poses is not large. In 1888 it was \$14,764, in 1889 it fell to \$10,765, and in 1900 there was a loss of \$2,860. The profits in 1904 were \$2,131. These figures of the royal pawn office and its branches show that it is difficult to make it pay expenses. There are 174 private pawn shops in Berlin, so much more conveniently situated that they take the business away from the royal office. These private establishments are regulated very strictly, and the sale of unredeemed pledges has to be carried on by officers designated by the government. The appraised value of the loans of the royal pawn office was at the close of March, 1905, \$1,067,398. The working capital of the royal pawn office at the close of 1905 was \$883,072.

Among the persons who borrowed money at the royal office were merchants, artisans, tradesmen, capitalists, and property owners, artists, actors, military men, and people of all classes. There are no reliable statistics available which would indicate the amount of business done by the private pawnshops in Berlin. One of the principal local pawnbrokers estimates that the pledges of the 174 private pawnshops will average about \$10,000 each annually, the value of the pledges reaching \$10,710,000 and the loans \$3,570,000. They all seem to be prosperous.

In none of the cities in Germany can the public pawn institutions compete with the private pawnbroker, notwithstanding that the public institutions, on account of their official character, afford greater security in the storage of the pledges, the values are estimated by sworn appraisers, the rate of interest is lower, and in case of auction sale of the unredeemed pledges the pawner is better protected.

In the royal offices the pawner may redeem his pledge within a month by the payment of a month's interest, while in the private pawnshop no less than two months' interest is ever charged, however short may be the loan period. In the Government institution after the pledge is sold by auction the pawner is relieved from all responsibility, no matter if the price obtained at the sale should be less than the amount loaned with interest and the cost of sale. Under similar conditions, however, the private pawnbroker may sue the pawner for the difference. A private pawnbroker may charge interest of 2 per cent. per month, or 24 per cent. per year on loans not exceeding \$7.14, while the royal pawn office may only demand 1 per cent. per month, or 12 per cent. a year.

In a great majority of the Prussian cities of more than 50,000 inhabitants the existing municipal pawn offices were founded in the first half of the nineteenth century. After the year 1881 there were only two newly established—Essen in 1881 and Altona in 1882. On the other hand, the municipal pawn office of Magdeburg, founded in 1840, was suspended on the first of February, 1891, and negotiations are in progress looking for the dissolution of the municipal pawn office at Breslau which has existed since 1781.

(To be continued.)

Harry Silver has sold out his jewelry store in Seattle, Wash.

J. B. Pederson, Leeds, N. Dak., will erect a store building of concrete blocks for the use of Pederson & Waters, jewelers.

Ball's Official Standard R.R. Watches

WHAT WOULD YOU GIVE FOR A LIFELONG CUSTOMER?

Try this plan.

Sell your next watch customer a "Ball."

Its reliable performance will convince him you are a dealer to be depended on—he'll keep coming back for other things.

The watch will win you his business and friendship for always.

Write for booklet, and watch this space.

We want to add a lot of new friends to the Ball family of railroad watch dealers.

VOL. LII.

CHICAGO, WEDNESDAY, JUNE 6, 1906.

No. 18.

Chicago Notes.

J. Ziegler is on a western trip.
Reuben W. Cohen is in Minneapolis this week.

A. C. Becken has returned from a visit to New York.

Geo. T. Bynner has returned from a western trip.

James W. Clark has returned from a Canadian fishing trip.

Martin A. Hagen, Fargo, N. Dak., was a visitor here last week.

Max L. Silverberg, diamond dealer, will sail for Europe in June.

J. A. Cunningham is in the northwest for Regnell, Bigney & Co.

Joe Crawford, with J. W. Forsinger, has returned from a western trip.

I. L. Gross, with the Knickerbocker Silver Co., is on a southern trip.

Theo. Jacobs & Co. have removed to room 214, Silversmiths building.

L. A. Eppenstein has returned from a lengthy trip to the Pacific Coast.

W. A. Fay, with the John T. Mauran Mig Co., is on the Pacific coast.

Oscar A. Lessing, with S. & B. Lederer Co., is on a trip to the northwest.

Jack Stanley, accompanied by Mrs. Stanley, has returned from a visit to the east.

"Ed" Walther, with the D. F. Briggs Co., is back from a northwestern trip.

W. S. Sparrow, western agent for Stern Bros. & Co., is on a trip to the coast.

Ben. Roth has opened a new jewelry store on Madison St., near La Salle St.

Joe Witty, of Hopkins & Witty, Dubuque, Ia., was a visitor here last week.

Bernard Weinstein, 533 S. Halsted St., is taking a vacation at West Baden, Ind.

G. M. Landon, with the Homan Silver Plate Co., has returned from a northwest trip.

Larry Edwards, with Chas. E. Hancock Co., has returned from a trip through the west.

B. S. Sandfelder, with McRae & Keeler, has returned from a six weeks' visit to the factory.

P. H. Boyson, of the Boyson Co., Cedar Rapids, Ia., visited Chicago last week on a purchasing trip.

A. Courvoisier & Co., manufacturing jewelers, have removed from McVickers Thea-

tre building to room 914 Silversmiths building.

"Jim" Edwards, with the B. S. Freeman Co., has returned from a trip to the Middle Atlantic States.

B. F. Hirsch, representing Becker & Co., has removed from 19 Wabash Ave. to room 410 Silversmiths building.

J. S. Mayer, with the Mauser Mfg. Co., is on a two months' eastern visit to the factory at Mt. Vernon, N. Y.

John J. Decker, with Wm. A. Rogers, Ltd., is receiving the congratulations of his friends on the occasion of the birth of a daughter.

Victor Paltrovitch is opening a new jewelry store at 68 State St., in part of the premises formerly occupied by the Shourds-Adcock-Teufel Co.

Charged with embezzling \$2,000 from a former employer Theodore Pieper, bookkeeper for the Geneva Optical Co., was arrested here last week.

Geo. W. Pettee, with T. G. Hawkes & Co., and Fred L. Pettee, with the Waterbury Clock Co., will spend the Summer in the upper lakes region.

The cottage being erected at Lake Geneva by C. H. Knights, is nearing completion. Mr. Knights will occupy it with his family during the Summer.

Robert C. Abt, with Herbert W. Allen & Co., was married last week to Miss Kate Ward. Mr. and Mrs. Abt spent their honeymoon at The Dells, Wis.

Henry G. Rettig, of Rettig, Hess & Madson, injured his right leg while playing baseball Decoration Day. Mr. Rettig now walks with the assistance of a cane.

W. T. Austin, 550 W. Madison St., has bought out the jewelry store of Herman Schultz, 970 Milwaukee Ave., and is conducting business at the latter address.

F. R. Sheridan, of Arnold & Steere, arrived from the coast last week with his wife and family, who had been spending the Winter and Spring in Los Angeles.

H. W. Gilmore & Co. have been incorporated with a capital of \$5,000 to manufacture and sell jewelry. The incorporators are: William R. Payne, H. W. Gilmore, L. B. Drew.

J. F. Dailey & Co., instalment jewelers, St. Louis, Mo., have opened an instalment and retail jewelry store at 68 Washington

St., on the premises formerly occupied by Clapp & Cowl.

J. B. Renkin, manufacturer's agent in San Francisco, is on his way here accompanied by his wife. Mr. and Mrs. Renkin lost all their personal belongings in the San Francisco fire.

At a meeting of the creditors of The Cash Buyers' Union, held last week, Chas. L. Billings, an attorney at 100 Washington St., was appointed trustee. Mr. Billings has 60 days to file his report.

The Benedict Mfg. Co. has moved its local offices from room 903 to room 805 151 Wabash Ave. E. H. Banker, vice-president of the Benedict Mfg. Co., will start on a trip to the coast June 25.

W. A. Schlossman, with H. F. Hahn & Co., left for New York Friday, accompanied by his wife. Mr. and Mrs. Schlossman sail for Europe to-morrow on the *Grosser Kurfurst* for a two months' trip.

An automobile collided with a carriage containing Dr. J. B. McFattrich and some friends last week. Dr. McFattrich was thrown to the street, but outside of a shaking up sustained no further injury.

Charles C. Hoefer, of the Woodstock-Hoefer Watch & Jewelry Co., Kansas City, Mo., spent the latter part of last week here. Mr. Hoefer reports the business outlook in Kansas City very good for the Fall trade.

E. Staehli, of Staehli & Brunn, returned from Switzerland last week on the *Kronprinz Wilhelm*. While abroad Mr. Staehli made arrangements whereby shipments of watches made by his firm at Chaux De Fonds will be greatly facilitated.

The address is wanted here of Robert E. Corbett, formerly New England salesman for the Rockford Watch Co. Mr. Corbett lives in Danbury, Conn., and was last heard from in Boston. The Rockford Watch Co., Rockford, Ill., would like to know his whereabouts.

Albert L. Alexander, a jeweler of Mapleton, Ia., eloped with Miss Lela V. Douglas, of Sac City, Ia., and they were married in Milwaukee.

Harry Jahlinger, jewelry and silverware buyer, formerly at the Emporium, San Francisco, Cal., has recently accepted a similar position with the Henry Siegel Co., Boston, Mass.

ment of Diamond Tiffany
Bunch Rings.

Denver

Fred R. Warner, with Sam Mayer, has returned from a business trip to St. Louis, Mo.

Joseph I. Schwartz left last week for the mountains to try his luck as a fisherman.

Word has been received here that Dan C. Philips, of San Francisco, will shortly arrive in Denver to establish himself in the optical business.

Among those recently engaged by the Joseph I. Schwartz Jewelry Co. is D. A. Martin, well known among local jewelers.

A. Costather, a refugee watchmaker of San Francisco, had trouble on arrival in Denver. He became involved in an altercation on a street car and was fined by the police court for disturbing the peace.

The silver centerpiece donated by the Daughters of the American Revolution of Denver to the cruiser *Colorado*, has just been finished, and has been on exhibition this week in the windows of the Boyd Park Jewelry Co. The piece is a silver dish which can be used for either flowers or fruit. It is engraved in the center with the crest of the D. A. R., and is richly wrought about the border with hand-chased raised renaissance work. Another silver dish fits inside to hold moist sand for flowers, and over it is a solid gold screen to keep the flowers in place. Underneath the side of the dish is the inscription, "Presented by the Colorado Daughters of the American Revolution."

A fine array of prizes presented by manufacturing jewelers throughout the country for the coming national convention of the Elks is now on exhibition in the window of Sam Mayer in the Mercantile building. The gifts were donated through the efforts of Mr. Mayer, and will be given to the owners of residences having the handsomest decorations in honor of the Elks' visit. The first prize is a gold clock set consisting of three pieces presented by the Jennings Bros. Mfg. Co., Bridgeport, Conn. A handsome cut glass vase is the gift of J. D. Bergen & Co. The New Haven Clock Co. is the donator of a china clock. A lady's gold chatelaine bag, a unique belt buckle and an exquisite gold vanity box set with diamonds are presented by the E. A. Bliss Co., of Meriden, Conn. Frank Whiting & Co., Attleboro, Mass., are represented by a silver water pitcher. A sterling silver topped cut glass ink well is from the Woodside Sterling Co., New York. A solid silver berry bowl is from Unger Bros., Newark, N. J. A beautiful brooch set in sapphires is from Fishel, Nessler & Co., New York; a gold fob, from Louis Freund, and a solid gold elk's tooth from Gustave Fox and a gold watch from Sprochnle & Co., Chicago.

Elof Benson, Youngstown, O., will sail for Europe some time this month, and on his trip will visit Sweden and Switzerland making a visit to the watch factories in the latter country.

J. Frank Reaves, formerly superintendent of the Rockford Watch Co., Rockford, Ill., recently resigned to accept a position in a similar capacity with the South Bend Watch Co., South Bend, Ind.

St. Louis.

S. E. Bamber, secretary of the Hess & Culbertson Jewelry Co., is on a three weeks' trip through Ohio.

O. Miller, associated in business with L. A. King, Hawkinsville, Ga., is spending a few days in this city.

J. A. Jerauld, a manufacturing jeweler of Providence, R. I., called on the local trade here last week.

Alvin L. Bauman, president of the L. Bauman Jewelry Co., is now in the Antwerp diamond market.

Paul E. Pautler, of the Brooks Jewelry & Optical Co., made a short trip into south-east Missouri last week.

Meyer Schinderman is in Kansas and Missouri this week for the L. Bauman Jewelry Co., handling loose diamonds only.

F. Warneke has gone to Europe for a trip. In his absence the business in the reputable building is being looked after by his son.

E. Nickell has disposed of his business at 237 Grand Ave. to A. Bonjot, formerly with the F. W. Drostens Jewelry Co. Mr. Nickell will take a trip to Europe.

Goodman King, president of the Mermod, Jaccard & King Jewelry Co., was among the Americans who registered at the New York Herald Paris Bureau last week.

Max Schmidt, of the material department of the Bauman-Massa Jewelry Co., has been called to his home in Houston, Tex., on account of the illness of his father.

Joseph Auer, of the Bauman-Massa Jewelry Co., departed Sunday for a vacation trip. He went from here to Minnesota, and hence starts for a tour through Yellowstone Park, to be gone about four weeks.

W. F. Kemper, secretary of the Retail Jewelers' Association of Missouri, was away from his store last week, owing to injuries received by Mrs. Kemper, who fell while moving into their new home at 3450 Sidney St.

The Mermod, Jaccard & King Jewelry Co.'s fishing enthusiasts report a most successful outing, bringing home 265 game fish, according to the sworn statement of Walter D. Ely, of the repair department. The same crew made another trip last Saturday.

The Hess & Culbertson Jewelry Co. is now doing all of its own repairing, opening a shop in the Ornel building in which the store is located. Eight men are employed in the shop, which is in charge of E. J. Helmerichs, formerly with the Mermod, Jaccard & King Jewelry Co.

In the Circuit Court of St. Louis County a decree of divorce was granted last week to Mrs. Jessie B. Morrison against Samuel E. Morrison of Morrison, Levy & Co. By stipulation, judgment for alimony was entered at the rate of \$40 a month for the first year, \$50 a month for the second year and \$60 a month for the third year. After that there will be further determination of the amount.

Among the visiting jewelers in the local market last week were the following: George Notermann, Nokomis, Ill.; J. J. Gaffner, St. Jacob, Ill.; Robert Tetley, Farmington, Mo.; L. J. Empfield, Paragould, Ark.; J. Harvell, Litchfield, Ill.; L. A. Tomley, Poplar Bluff, Mo.; H. Cham-

bers, Bonne Terre, Mo.; Charles Goodrich, Caruthersville, Mo.; Ben. Bowden, Mayfield, Ky.; Fred Simon, Collinsville, Ill.

The Maschmeyer-Richards Silver Co. is now doing business in its handsome quarters, 300 Carleton building, 6th and Olive Sts. A. Maschmeyer was with the Jordan Cutlery Co., St. Louis, for 27 years, and was formerly manager of the New York house of R. Wallace & Sons Mfg. Co. D. P. Richards was with the Jordan Cutlery Co. for seven years. The new firm is a wholesale dealer in sterling silver, silver plate and cut glass.

The negro who was recently arrested after a wild chase on the charge of robbing the store of William F. Mueller, 1891 Olive St., escaped from the City Hospital, and is still at large. He dropped from the ledge of the hospital building to the ground between 30 and 40 feet, and eluded hospital attaches who tried to apprehend him. The negro had been identified as David Henderson, a chief on the private car of Theodore F. Shonts, president of the Clover Leaf Railroad, and the head of the Panama Canal Commission.

It was reported in the issue of THE CIRCULAR-WEEKLY of May 30 that Jacob B. Pollock was the latest jeweler to begin business in St. Louis, Mo. This was erroneous, as Mr. Pollock opened his store Jan. 4, 1906, at 6116 Easton Ave., near Wellston, Mo. He is the son of Alexander J. Pollock, of 106 N. 4th St., and is also the owner of the Wellston Jewelry Mfg. Co., which is located near his establishment. The office and factory are in Wellston. Alexander J. Pollock will move from his present location into more commodious and newly furnished quarters at 12 N. 4th St., this city, on or about June 15.

Indianapolis.

An itinerant watch repairer known as Sol Joseph died in this city recently.

Announcement is made that a new jewelry store will be opened in the Claypool Hotel building.

The local post office has held up the mail of the "Guess Novelty Jewelry Co." pending an investigation.

The family of A. W. Gray, of Gray, Gribben & Gray, has returned after a visit of several weeks in Kansas.

Local merchants have received announcement of the marriage of Floyd Nester, Boonville, Ind., and Miss Mary E. Metsker, Noblesville.

The local trade has been notified of the establishment of a new store in Vincennes under the name of the Henkers, Baker Jewelry Co.

Through the Federal Court in this city, Harry R. Greyer, who assigned several weeks ago, has offered his creditors 20 cents on the dollar.

Traveling representatives say that Bitterman Bros. have completed extensive improvements to their store in Evansville and that their store now is one of the handsomest in southern Indiana.

Out-of-town jewelers who visited the local jobbers and manufacturers last week included B. Maier, Edinburg; D. S. Whitaker, Lebanon; Aaron Pursel, Noblesville; Mr. Barnes, of Barnes & Foster, Spencer;

H. Wheeler, Dana; J. A. Pickett, New Castle; C. E. Hodgen and Ross J. Haseltine, Kokomo; J. F. Harding, Brownsburg; H. A. Pauley, Bloomington, and Mr. Raber, of Clark & Raber, Anderson.

San Francisco.

Matt. Draghicevich, formerly at 1024 Washington St., is now located at 1529 Green St.

Carraan & Green secured quarters, June 1, at 1510 Buchanan St., between Geary and O'Farrell Sts.

J. Hirschfeld has opened an office at 1740 Bush St., for the purpose of buying diamonds and other precious stones.

Julius A. Young moved from his temporary location in Oakland to his new quarters in the Kamm building this week.

Radke & Co., who opened for business some days ago at 1813 Devisadero St., have secured a full stock and have their factory running in good shape.

Wm. Wilson, a prominent Oakland jeweler, located for many years on Broadway, has leased a new store on San Pablo Ave., into which he will soon move.

The Field & Cole Curio Co., formerly at 327 Kearny St., is located temporarily at 19 S. 1st St., San Jose, but will reopen in San Francisco in the near future.

Adolf J. Grinberg, of Adolf J. Grinberg & Son, 1 Maiden Lane, New York, is in San Francisco with offices at 1015 Van Ness Ave., for the purpose of buying diamonds, pearls and other precious stones.

Walter Graves, a wholesale silverware and cut glass dealer, formerly at 120 Sutter St., and since the fire in the Globe Hotel building in Oakland, removed this week to the newly re-opened Kamm building in San Francisco.

T. Lundy, formerly in the retail business at 4 3d St., and on Market St., opposite the Call building, is now having a building erected on Market St., near Grant Ave., which he will occupy early in June with a stock of retail jewelry. This will be the first retail jewelry store to open in the center of the burned district. Mr. Lundy is now located at temporary offices at 947 Stanyon St.

D. J. Barr, a manufacturer's representative, formerly located at 120 Sutter St., has secured offices and salesrooms at 376 Oak St., from which point his business will be conducted during the reconstruction period. Mr. Barr represents J. A. Deknatel & Son, Inc.; Herbst & Wassall and Wm. Link. Mr. Barr has not yet recovered his safe nor even located it in the mass of ruins at 120 Sutter St.

Wm. B. Glidden, wholesale dealer in silverware and table cutlery, and Coast representative of R. Wallace & Sons Mfg. Co., E. G. Webster & Son and Wm. S. Hicks' Sons, has decided to remain at 1116 Broadway, Oakland, until suitable permanent quarters can be had in San Francisco. He prefers to put up with the inconvenience of handling his trade from Oakland rather than to accept anything now offered in San Francisco.

F. H. Shields, Mount Sterling, Ill., recently sold out to Mrs. E. M. Cox, who will continue the business.

Kansas City.

C. J. Benson, Lee's Summit, Mo., was in the city this week on a buying trip.

The Edwards & Sloane Jewelry Co. has begun closing at 1 o'clock on Saturdays.

Noble L. Fuller, of the Edwards & Sloane Jewelry Co., is expected back from his buying trip the middle of next week.

E. S. Villmoare, who travels for the C. B. Norton Jewelry Co., in Missouri and Texas, is in the house again this week.

Jake Levin, a traveler for Kionka & Kionka, who has been covering Kansas and Oklahoma, is on the home stretch now.

W. C. Schumann, who covers Kansas and Oklahoma for the C. B. Norton Jewelry Co., is paying the house a visit this week.

Fred C. Merry, vice-president of the Merry Optical Co., has just returned from a visit to the company's house in Memphis, Tenn.

Heo H. Ludwig, of the Edwards & Sloane Jewelry Co., will leave next week for a trip of a couple of weeks to the material markets.

The engagement is announced of Hazel Bell Rosenbaum, of this city, to Herbert Koppel, of the material department of the Meyer Jewelry Co.

O. W. C. Smith, a pupil of the Kansas City Polytechnic Institute, has accepted a position in the watchmaking department of the Jones Dry Goods Co.

F. E. Fricke, of the Meyer Jewelry Co., has sold his home on Norton Ave., and is now building on S. Troost Ave., where he expects to make his residence about Aug. 1.

D. B. Ward is busy these days, getting ready his wholesale business. He expects to open about the middle of June. The style of the new firm will be the Ward & Crellin Jewelry Co.

A. N. Bennett has finished his course with the Kansas City Polytechnic Institute, and has gone to Warsaw, Mo., where he will open a jewelry department in the Fair Store, conducted by his father.

O. H. Stevens, a pawnbroker of this city, was arraigned this week on two indictments. One was for receiving stolen property and the other charged him with perjury. He pleaded not guilty, and was released on bond.

The following retailers from the surrounding country have been calling on the jobbers this week: W. W. Whiteside, Liberty, Mo.; J. A. Zimmerman, Warrensburg,

Mo.; L. E. DeLanty, Parkville, Mo., and S. J. Huey, Excelsior Springs, Mo.

William E. Huston, secretary of the American Association of Opticians, has returned from a southern trip, where he has been forming State organizations, and reports a great deal of enthusiasm in Oklahoma, Arkansas, Alabama and Mississippi.

J. L. Holland, a jewelry salesman, who was stopping at the Savoy Hotel, reported last week that a sample case in his room had been robbed of two dozen gold watches, one dozen gold rings, three gold watch chains, three bracelets, a lot of gold fountain pens, collar buttons and small articles.

Dr. S. W. Lane, president of the Southwestern Optical College, has just returned from his trip through the south, where he helped to form the State associations which have affiliated with the American Association of Opticians. The Doctor will in all probability attend the meeting of the Iowa association on June 12 and 13 and he and Mrs. Lane will both attend the Rochester meeting.

The Jaccard Jewelry Corporation, now located at 1032 Main St., has secured a long-time lease on the property at 1017-19 Walnut St., two doors from the Cady & Olmstead Jewelry Co., four doors from Harry Carswell, and across the street from Gurney & Ware, and the Hewson building, which was recently leased by J. W. Mercer. That will make the block between 10th and 11th Sts., on Walnut St., a retail jewelry center.

Minneapolis.

It is reported that J. S. Cohen, of St. Paul, has gone to Seattle.

F. L. Metzger, of S. Jacobs & Co., was injured in a runaway accident recently.

F. L. Bosworth, of the F. L. Bosworth Co., has gone to New York on a business trip.

John Felkel, of the material department of S. H. Clausin & Co., has gone to Milwaukee to spend his vacation.

The Minneapolis Jewelry Mfg. Co. has begun moving from the Andrus building to the new Security Bank building.

A. H. Wick, a merchant of Fergus Falls, Minn., has won a suit brought against him by an Iowa manufacturing concern to collect for some jewelry. Wick set up that the goods were sadly misrepresented. The

Supreme Court of Minnesota said: "The a traveling salesman falsely representing that he had made sales of similar articles to a competitor engaged in the same business is an artifice used to cheat or deceive another."

M. L. Finkelstein, the St. Paul retailer won the suit brought by Harry Rose against him for \$15,285 damages for false arrest.

Recent callers on the jobbing trade were Martin A. Hagan, Fargo, N. Dak.; A. Rost, St. Peter, Minn.; W. H. Reighart, Minot, N. Dak.; J. M. Chalmers, Lake City, Minn.; Julius Anderson, Mora, Minn.

Detroit.

Wright, Kay & Co. have commenced suit against John Grant, a former superintendent of the Detroit United Railway, on a promissory note for \$164.62.

Burr, Patterson & Co. have taken additional space in the building at 73 W. Forest St., to accommodate their increasing business.

Salesmen for the E. H. Pudrith Co., a now on their second trip. M. E. Rowland is in Ohio, and Wm. H. Horton is in Michigan.

Alterations in the store of Hugh Connolly, State and Griswold Sts., are almost completed. The basement will be occupied by the cut glass, clock and optical departments, and the street floor by jewelry. Mr. Connolly will have three times the room in business that he had before.

Mrs. Anna Trebilcock, wife of E. Trebilcock, jeweler, at 324 Woodward Ave. charged him with non-support, and secured a warrant. He was released on bail, and the examination was set for June 6. Trebilcock was robbed six weeks ago of about \$1,500 worth of goods, which were later recovered.

Thos. Coffman has purchased the business of J. A. Robinson, in Toronto, Kans.

David B. Sickles, of New York, former diplomatic representative of the United States in Siam, recently furnished the State Department with a list of articles that may be profitably sent by manufacturers in the United States to Siam. In this list enumerates clocks, jewelry, music box, musical instruments, nautical instruments and watches.

Buffalo, N. Y.

TRADE CONDITIONS.

Buffalo jewelers say that there has been a pronounced renewal of trade activity in the last two weeks. That the early Spring trade was disappearing to some extent, and the awakening has been most gratifying. The change came with nothing of a rush.

Mrs. Frank Hammond, wife of the jeweler at 54 Seneca St., is the guest of her daughter in St. Louis, Mo.

P. T. Martin, optician at 620 Walden St., in a few days will take charge of S. F. Damm's optical department.

George E. Dehas, for several years with F. Chouffet, has taken charge of Chas. Damm's salesroom, 520 Main St.

N. Dreyfus & Co. have moved from 511 Washington St. to the Mutual building, in Carl St. They now occupy very handsome quarters.

E. Hazarel, head salesman with C. F. Chouffet, 379 Main St., rejoices over the arrival of a boy baby, last week, his first child.

A. E. Sipe, diamond importer, 8 Mooney Building, has begun his 15 per cent. annual discount sale, preparatory to leaving for his yearly trip to Europe.

Edward Arnold, for several years in the employ of Chas. F. Damm, has been made foreman of the factory, as a reward for his industry and efficient services.

Rich W. Bixby, son of F. G. Bixby, watch adjuster, has gone to Cleveland, O., where he is employed in the department of publicity of the Sherwin-Williams Co.

Richard C. Landers has left the employ of Peterson & Co., Genesee St. retailers, and has gone with Sirret & Svensson, retailers, 116 Franklin St., taking charge of their watch repairing work.

James P. Matson, who for several years was a manufacturing jeweler at 444 Main St., has discontinued his factory and has accepted employment with Heintz Bros., wholesale jewelers at Swan and Ellicott Sts.

Fred Elsheimer, for a number of years in charge of the repair department of Fred Tinsley's jewelry store at 87 E. Genesee St., has taken charge of the watch adjusting department of the T. & E. Dickinson & Co.'s store, 472 Main St.

Buehl Bros., who have been selling the Philip Fischer bankrupt stock at public auction in Main St., have nearly completed their task. They will soon put the W. Z. Jaden stock on sale, and if it goes too slowly they will sell it at auction in some other city.

Walter Harrington pleaded guilty before Justice Kenefick, last Wednesday, to the charge of stealing a tray of diamonds worth \$100 from Mrs. Paul Foerster, in her husband's store, at 134 Seneca St. Sentence has not been pronounced. Harrington was arrested in New Orleans. He has given the names of his accomplices.

Last evening the marriage of Julius Boasberg, of the firm of H. & J. Boasberg, 384 Main St., pawnbrokers and jewelers, and Miss Leonore Gerodzinsky, of this city, took place in the Colonial in Lafayette Ave., the Rev. Dr. Aaron, rabbi of Temple Beth Zion, officiating. Charles Folk was best man and Miss Flora Boasberg, niece of the bride-

groom, was bridesmaid. Mr. and Mrs. Boasberg left soon after the ceremony was performed for Brighton Beach, where they will reside. The bridegroom is in charge of the firm's branch store at 1358 Broadway, New York City.

Pittsburg.

The auction which was in force at 818 Liberty Ave., has closed.

Otto Heeren, of Heeren Bros. & Co., recently returned from a two months' European trip.

W. J. Johnston, of the W. J. Johnston Co., who has been in Washington on business, has returned to Pittsburg.

M. L. R. Howard, who has opened a store at Salem, O., bought his first bill of goods from West, White & Christy.

J. Loughrey Roberts, of the J. M. Roberts & Son Co., who has been at Atlantic City for the benefit of his health, has returned to Pittsburg greatly improved.

J. R. Reed & Co. will, in a week, begin the semi-annual inspection of watches of all trainmen employed on the Pennsylvania lines west. Several thousand watches will be examined.

Chas. S. Untermeyer, of Chas. Keller & Co., New York, is reported to have narrowly escaped injury several days ago, while riding in an automobile from Brad-dock to Pittsburg. The axle of the machine broke about the time he reached his destination.

The following out-of-town merchants last week called on the local trade: A. Katzenmeyer, Burgettstown; H. R. Barney, East Liverpool; Frank Worrell, Canonsburg; J. Linnenbrink, Rochester; W. E. Johnston, Canonsburg; P. J. Manson, Jeanette; Frank Murdock, Ligonier; Henry Zilliken, Wellsburg.

A new wholesale house is to be incorporated in Pittsburg, to be known probably as the Marsh, Brown & Mather Co., absorbing the firm of Marsh, Brown & Mather, which has quarters in the Bessemer building, 6th St. and Duquesne Way. W. O. Harrison, who for the last 12 years has been associated with the George B. Barrett Co., will be the new partner in the company. He will sever his connection with the Barrett concern Aug. 1, at which time he becomes a member of the new corporation.

Some of the local jewelers are agitating the holding of a jeweler's picnic in the near future. The plan has been suggested to THE CIRCULAR-WEEKLY correspondent by several who desire some one to take hold of the idea and push it to a successful conclusion. It has been a generation or two since the jewelers of Pittsburg have enjoyed a jollification among themselves. It is admitted on all sides that the local jewelers are not as fraternal as they should be.

M. A. Mead & Co., with quarters in the Farmer's Bank building, are represented on the Merchants and Manufacturers' sixth trade extension tour, which is this week invading northeastern Ohio and northwestern Pennsylvania. The tour began last Monday and will end Friday night. About 100 merchants are traveling in a special train. The following towns are being visited: Alliance, Ashtabula, Canton, Conneaut, Erie, Kent, Leetonia, Mansfield, Massillon, Niles, Rav-

enna, Salem, Warren, Wooster and Youngstown. These tours, it is estimated, have brought back to Pittsburg orders aggregating \$600,000 a trip.

J. Alexander Hardy, of the Hardy & Hayes Co., has again invested heavily in real estate, buying the lot adjoining the Penn building in Penn Ave., to the east of that structure. He organized a syndicate which bought properties through to Liberty Ave., Mr. Hardy taking the Penn Ave. lot on which there is a small building, in order to protect the Penn building, which he also owns. His new purchase is a lot 20 feet wide and 240 feet deep. The properties in question cost \$350,000. The value of Mr. Hardy's downtown real estate holdings now approximate, so it is said, close to \$1,000,000.

New Orleans, La.

Edward Claudel has succeeded to the business of E. & L. Claudel, 121 Carondelet St.

L. Fishel, the veteran Canal St. jeweler, will move about September next to 129 Carondelet St. Mr. Fishel has been in the business in New Orleans for the past 35 years.

Louis Moss, the Carondelet St. jeweler and diamond setter, who embezzled over \$1,000 worth of jewels from Wm. Frantz & Co., and whose plea of guilty of larceny was accepted by the District-Attorney, has been sentenced to serve one year at hard labor in the State penitentiary.

Mayor Martin Behrman, of New Orleans, has accepted the position of chairman of the large committee named to solicit funds for the purchase of a silver service for the battleship *Louisiana*. Thomas G. Rapiere, manager of the *Picayune*, and A. R. Blakely have been named vice-chairmen, and the work will be pushed forward vigorously. Mayor Behrman has decided upon \$10,000 as the price to be paid for the service, and the general committee has agreed that the service should in some way be identified with the State in a manner that would be most emphatic. With that end in view, Mayor Behrman will suggest that each parish appropriate \$100 to be put into an article connected with the set. For instance, the smaller parishes, according to the plan, will purchase the goblets, and each goblet will bear the name of the parish donating the money; towns like Shreveport, Baton Rouge, Monroe and Lake Charles will pay for the fruit baskets, the ladels, trays, etc., and New Orleans will undertake to collect enough to buy the punch bowl. The committee also determined that the contract should be given to a Louisiana firm of silversmiths or jewelers, and in a short time the firms will be asked to present designs.

A valuable optical invention is reported by Councilor-General W. Ruhlee, of Vienna, who states that a Hungarian chemist after several years of experiments, has produced a fluid optical lens of great power, which can be made cheaply. A fluid substance is enclosed between two thin crystals overcoming certain defects of optical lenses.

FACTORY: 35 Rue Des Trois Bornes, PARIS, FRANCE.

"Eboid"
TRADE MARK

IS SO WELL KNOWN that it requires little comment. Neither heat nor moisture will affect it, and its beautiful ivory black finish is indestructible, making it as handsome and serviceable as ebony, at one-fifth the cost. "EBONOID" trimmed with silver creates a most striking contrast. Our trimming is of the best white metal, quadruple plate, and will wear a lifetime. Ask your jobber to

show you our new line of **Stelns, Loving Cups, Shaving Mugs and Brushes, Vases, Claret Pitchers, Smokers' Sets, etc.**, and don't fail to send to-day for our illustrated circular showing our new designs.

Cincinnati.

William Owen, Elm St., will go south this week.

Dave Kaufman, of O. E. Weidlich & Co., in New York on business.

The Saturday afternoon closing among the jewelers of Cincinnati began June 2.

Arno Dorst, of the Dorst Co., is home again after a two weeks' vacation in South Carolina.

Edward Elsbach, manager for Hahn & Oppenheimer, is ill with an attack of typhoid fever.

Hugo Lindenberg, of Lindenberg & Fox, started on a fishing trip to Lake Geneva, Wis.

The six-year-old son of J. C. Miller, of Miller Jewelry Co., is reported as very ill with typhoid fever.

A. A. Spiegel, of the Gustave Fox Co., returned from a very successful and extended business trip.

S. Lindenberg, of Lindenberg, Strauss & Co., with his wife, left June 3 for a stay in New York and the east.

N. T. Arnold, Owensboro, Ky., purchased fixtures and stock here last week for a new store into which he has moved.

The Plaut Jewelry Co. has moved from its old location on W. 5th St. to the second floor in the Neave building at 4th and Race Sts.

Mr. Bentel, Sr., of the Bentel Bros. Co., Hamilton, O., was here last week on his return from visiting his daughter in Chillicothe, O.

Elizah Steitler, Owensboro, Ky., has purchased the William L. Coppersmith stock and will start in the retail jewelry business at that place.

D. A. Pless, Morristown, Tenn., after a long illness, was in town last week. He is getting ready to again call on his northern trade.

S. D. Parker, formerly with A. J. Clark, Arkville, Tenn., stated to Cincinnati friends last week that he is now with Geo. Calhoun & Co., Nashville, Tenn.

Joseph Noterman, of Joseph Noterman & Co., and E. M. H. Croninger have returned from Paris, Ky., where they attended the Kentucky annual convale of the Knights Templar.

Edward Mittendorf, manager for E. & J. Wigart, with his wife, and Albert Sauer, Newport, Ky., with his wife, will spend a few weeks in the east visiting various points of interest.

The marriage of Miss Laura E. Duhme, daughter of Herman Duhme, Jr., formerly of Duhme Bros., to F. W. Stevenson, of Cincinnati, took place yesterday at the bride's home in Wyoming.

Lee Kahn, of Lindenberg & Fox, and wife have gone to Atlantic City and New York for a three weeks' stay. C. B. Goldsmith, of this house, with his wife, leaves for a vacation at Petoskey, Mich.

George Newstedt has contracted for a very fine three-dial street clock, which will be built at the corner in front of his store. It will be the only one of its kind in the city and will be a fine piece of workmanship. Jacob Frohman, of Frohman & Co., and J. Gradison, 20 Emery Arcade, have left for a 10 days' stay at French Lick Springs, Ind. B. S. Newman, of the above firm, and

wife are taking a six weeks' trip among the eastern cities.

A handsome silver loving cup made by Theo. Neuhaus & Co., will be presented by ex-Mayor Julius Fleishman to the prize winner at the Latonia races, June 15, as the Cincinnati Trophy Stakes of the Latonia Jockey Club.

R. J. Timmerman and John Kappes, Batesville, Ind., were here last week prior to Mr. Timmerman's departure on a hunting expedition in Arkansas. Mr. Kappes will conduct the Timmerman business during the latter's absence.

Out-of-town dealers who were here last week buying stock, and not elsewhere mentioned, included: H. G. Knoeck, with Victor Bogaert, Lexington, Ky.; A. Clooney, Maysville, Ky.; Harry Cohen, Indianapolis, Ind.; A. J. Winters, Paris, Ky.; Walter Bentel, Hamilton, O.

Friends in this city received word from Minneapolis last week of the death of Mrs. Herman Duhme, widow of the late Herman Duhme, a former well-known member of the trade. Mrs. Duhme was 72 years of age and was the second wife of the jeweler. She is survived by one son, Albert G. Duhme, of Cincinnati, and two daughters, Mrs. Eustis, of Minneapolis, and Mrs. Ives, of Cincinnati. Frank and Herman Duhme, Jr., of Cincinnati were her stepsons. The remains were brought here and interred in Spring Grove Cemetery.

Philadelphia.

The Avis Cut Glass Co., Avis, Pa., was incorporated last week with a capital of \$5,000.

A Sheppard, watchmaker, has taken a position with F. X. Lieberman, 3525 N. 5th St.

Sol. Sickles, of M. Sickles & Sons, returned last week from a pleasure trip to the Pacific Coast.

Abe Sickles, of M. Sickles & Sons, returned home recently on the *Deutschland* from a purchasing trip abroad.

J. B. Bechtel, of J. B. Bechtel & Co., last week leased for the Summer a handsome country place at Perkasio, Bucks County, Pa.

Lou. Sickles, of M. Sickles & Sons, has abandoned the seashore for the country. He has taken a house at Bala for the Summer.

The International Silver Co. instituted suit in the local courts last week against the Spiro Soap Co., to recover on a contract.

Retailers in town during the week included: L. L. Bickings, Norristown; David Krause, North Wales, Pa.; H. S. Kratz, Souderton, Pa.

William Cavanaugh and Herman Neiegele, jewelers, were last week appointed to serve on the June Grand Jury of the Criminal Court.

J. J. Zimmern, southern representative of M. Sickles & Sons, starts to-day on a trip through the south, going to Savannah on the steamship *Berkshire*.

Andrew Brown, 740 Sansom St., was one of the delegates last week to the Lincoln Party State Convention, which nominated Lewis Emery, Jr., for Governor.

John Ernst, watchmaker, lately with F. L. Shaw, Camden, N. J., has started as a

watchmaker for the trade with Ferdinand Dilshheimer & Co., 710 Chestnut St.

J. E. Caldwell & Co. have been awarded the contract for the prizes for the West Jersey Horse Show Association to be held this week at the Camden Country Club.

Joseph H. Brazier, formerly active in the firm of J. E. Caldwell & Co., left recently with his family to spend the Summer at their country home, Kennebunkport, Me.

Joseph T. Bailey and Charles W. Bailey, president and vice-president, respectively, of the Bailey, Banks & Biddle Co., have opened their cottage at Newport for the Summer.

J. E. Caldwell & Co. received the contract last week for a handsome silver service of exclusive design presented to William S. Hilles, city editor of the *Bulletin*, on the occasion of his marriage.

The Board of Governors of the Jewelers' Club met last week to complete arrangements for the field day and annual Summer outing, to be given in the latter part of this month at a Delaware river resort.

John F. Simons, of Simons, Bro. & Co., was elected a director recently of the Manufacturers' Club, in which he has long been active. John Gordon Gray, of Queen & Co., opticians, was elected a vice-president.
